RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisc* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in *Italics*. State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, February 18, 1871.

Stock Exchange and Money Market.

Money has been in full supply, throughout the week, and responsible borrowers have had any existing advantage as to rates, the call loan figures having been 4@6 and the discount quotations, 6½@8 per cent. per annum on the better grades of commercial credits. The demand for accommodation has been fair, but not urgent. The speculative inquiry has been promptly met at the current rates. The mercantile needs have been also readily provided for within our range. There has been no serious outflow of currency. The city banks, in their last weekly returns, exhibited a gain of over a million and a half of legal tender notes, with a reduction of $1,327,720 in the deposit line, and $572,859 in the specie reserve. The U. S. Sub Treasury added $1,807,755 to its currency and $631,819 to its coin balances. It closed the week with a reserve of $62,423,555 in coin and uncancelled coin certificates, and $10,619,959 of currency. There has been a further accumulation of national bank notes at this point, and loans in this form have been offered free of interest for five days, on the condition that the loans shall be paid off at the end of that time in legal tenders, or checks calling for legal tender notes.

The specie reserve of the city banks according to the latest return is $25,660,714, against $38,072,184 same time last year. The city bank deposits are now $214,060,875, against $213,192,740 week ending Feb. 13, 1870. The legal tender reserve amounts to $55,773,292, against $56,603,000 same time last year. The circulation now stands at $31,790,164, against $33,708,572 same time last year. The loans are now $271,271,345, against $265,864,652 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $81,175,817 a day, against a daily average of $93,134,656 the preceding week. The current week's exchanges average about 93½ millions a day. The city banks, last week reported a loss of $572,859 of specie, and $1,327,720 of deposits, with a gain of $1,585,899 of legal tender notes. They increased their loans $481,586; and their circulation, $26,035.

National Bank notes to the amount of $488,340 were issued last week by the Treasury Department. Deducting from the grand total issue to 1741 banks the currency returned, including worn out notes, amounting to $37,703,212, the existing 1,648 banks, (with an aggregate capital of $435,356,084,) retain an actual circulation of $308,078,713. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $350,623,700; and for the public deposits, $15,819,500—making a total of $366,443,200. The Treasury Department last week redeemed and destroyed $644,800 of worn and mutilated fractional currency, and issued $390,146 of new.

The U. S. Sub-Treasury, on Wednesday of this week, closed with a balance of $11,678,258 in currency, and $63,709,214 in coin, against a balance a week previous of $12,171,615 currency, and $62,418,091 coin.

The U. S. Sub-Treasurer retired, last week, $2,348,322 of coin certificates, received for customs.

The Government revenues have been yielding moderately since our last. The customs at the port of New York, last week were $2,574,823; and at the outports, equal to about $850,000 more, all in coin, or coin certificates. The internal revenue yield thus far in February has been $4,578,726, and since July 1, 1870, $97,105,977.

The Gold speculation has taken a downward turn, the price having reduced from 112¼ to 110⅞, closing on Wednesday at 111⅛ as against 111¾@111⅞ on the preceding Wednesday. The offerings have been more liberal, and there has been much less confidence indicated by the speculative inquiries. The customs demand has been up to a fair average. The export drain, however, has fallen short of the anticipations of the chief operators for a rise. Last week's outward movement of specie was under a million dollars (having been precisely $905,152 in the aggregate) and thus far in 1871, the shipments hence have been $4,310,673, against $3,674,414 same time in 1870, $4,211,382 in 1869, and $8,793,388 in 1868. The Aspinwall Steamer delivered here $79,286 on Monday. The aggregate of the week's imports of

oreign specie was $80,875, and since Jan. 1, $275,649 against $2,271,620 same time in 1870. The outflow of specie, last week, was $905,152; and on Wednesday of this week, $313,573. On Thursday of this week, Government sold a million of Gold at equal to the current market rates.

The Gold Exchange Bank clearances on Friday of last week were $14,118,000; on Monday of this week $51,277,000, the extremes since our last. The clearances on Wednesday were $42,657,000.

Under the February programme of the Treasury Department, Government will sell Gold, during the month, as follows: Thursday, February 23, $1,000,000. And buy in Five Twenties as follows: Wednesday, February 22, $2,000,000.

The export drain was $905,152 last week against $741,721, same week preceding year. The shipments since July 1, 1870, have been $45,523,106, against $20,829,909 same time in 1869–'70.

The customs demand for Gold last week averaged $463,000 a day; thus far, this week, it has averaged $441,746 a day, or equal to a weekly aggregate of $2,650,476. The arrivals of specie from Europe, Havana and other foreign ports last week were $80,875, and since Jan. 1, 1871, $275,649, against $2,271,620 same time in 1870. The total customs revenue of the Government, in coin, at this port, since July 1, 1870, has been $87,921,222, against $79,246,771 same time in 1869–'70.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt since July 1, 1870, $61,528,855 against $62,527,837 same time in 1869–'70.

Foreign Exchange has been in limited supply and demand, but quoted strong in price. Bankers' sixty day bills on London closed on Wednesday at 109⅜@109½; sight bills on London, 110¼@110⅜.

Government securities have been quite active, most of the week, opening at advancing prices, but closing a fraction off the highest figures, influenced, in part, by the reaction in Gold. The offerings of bonds toward the close were rather more liberal, mostly on speculative account. The final dealings showed a steady market at the modified quotations.

On Wednesday, Government bought in two millions of Five-Twenties at 109 09@109 24, ex-interest. The amount of bonds offered was $4,596,200.

U. S. sixes of 1881 closed here on Wednesday of the current week at 114@114¼; U. S. Five-Twenties of 1862, 111⅝@111⅞; U. S. Five-Twenties of 1864 at 110⅞@111⅛; U. S. Five-Twenties of 1865, 110⅞@111⅛; U. S. Five-twenties of 1865 consolidated, 109¾@110; U. S. Five-Twenties of 1867, 109⅞@110; U. S. Five-twenties of 1868, 110½@110¾; U. S. Ten-forties at 110⅝@110¾; U. S. Six per cent. currency bonds, 112¾@112⅞.

State bonds have been in fair demand, at generally pretty well supported prices.

Railway bonds have been more freely dealt in the instances of the principal loans at generally higher prices. Central Pacific Sixes have been more active at advanced figures, closing at 94½@94¾. The January earnings of the Central Pacific Railroad show an increase of $111,376 over the same month last year, the figures having been $524,480 in January of this year, against $413,104 in January, 1870. Chesapeake and Ohio Sixes have been in better demand at 90 and interest. Union Pacific Sixes closed at 80½@80¾.

Railway and miscellaneous share property has been moderately active, but unsettled, closing about steady in most instances. Union Pacific stock closed at 21¾@21⅞. Western Union Telegraph at 46⅜@46⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 1.	Feb. 8.	Feb. 15.

" 1867	89¼	89⅛	89½
" 10-40s	89¼	89½	*87¾
Erie	18½	18	18¾
Ill. Central	110	109	109½
At. and Gt. West	29	28	29½

* Ex March coupon.

General business has been less active, and values have been quoted less firm, in most instances. Breadstuffs, Provisions, Petroleum, and Naval Stores closed less buoyantly. Middling upland cotton closed on Wednesday at 15⅛ cts. per lb. The receipts at all the ports, since Sept. 1, 1870, have been 2,508,252 bales, against 1,903,691 bales same time in 1869–'70; exports same time 1,595,888 bales, against 1,058,896 bales same time in 1869–'70; stock on hand at latest dates, 674,284 bales, against 509,455 bales same date 1869.

At the Live Stock markets, this week, Beeves have been less active at from 8½@15½c. per lb.; week's receipts, 5,631. Milch cows quiet at $40@$110 each, receipts, 59. Veal calves in moderate demand at from 5@12½c. per lb.; receipts, 1,240. Sheep in less request at from 5@8½c. per lb.; receipts, 29,757. Swine in better demand at 8½@8¾c. per lb., all live weight; receipts, 17,247.

Ocean freights have been less active, but quoted firmer. For Liverpool we quote flour at 2s. 6d. by sail, and 3s. by steamer per bbl.; grain at 6½d. by sail, and 7½d. by steamer per bushel; cotton at $\frac{5}{16}$@$\frac{3}{8}$d. by sail and $\frac{3}{8}$@$\frac{7}{16}$d. by steamer per lb.; and heavy goods 20s.@30s. by sail, and 30s.@50s. by steamer, per ton.

The imports for the week ending Feb. 11, and since the beginning of the year, have been as follows:

	1870.	1871.
Dry goods	$2,936,004	$3,502,786
Gen. merchandise	3,439,481	4,120,012
Total for the week	$6,375,485	$7,622,798
Previously reported	20,295,335	25,588,906
Since January 1	$26,670,820	$33,211,704

R., 21@21¼; George's Creek Coal, 60@69.

☞ The gross revenues for the year 1870, on the Chesapeake and Ohio Canal were $357,969 54. While this shows $18,701 06 less than in the year 1869, the expenses for the year 1870 show to be $15,874 08 less than the 1869. During the past year $155,000 have been appropriated to the payment of interest and principal on the repair bonds, to October 1st, 1870.

☞ The earnings of the Union Pacific railroad for the year ending December 31, 1870, were $7,268,858 72, and the expenses $4,676,780 26—leaving a balance of $2,592,073 46.

Proposed New York City Railroad.

We have in our office a photograph from a drawing by Mr. William Kohler, of 53 Exchange Place, this city, of a proposed elevated railroad to run from the City Hall via Third Avenue to Harlem, and also from the Battery via Greenwich Street and Third Avenue to Manhattanville. The following is a condensed description of Mr. Kohler's project, supplied by himself:

It is simple, effective, of easy construction and moderate cost. It consists of three lattice girders supported on three handsome iron columns; cross girders support two lines of rails, for an up and down track, and between them is placed an extra rail which, in case of an accident to the wheels or trucks, would assist materially in preventing the engine or cars falling through the cross girders; the systems of supporting columns may be placed at any distance from one another by lengthening the girders, as a convenient distance, fifty feet is taken. The cross girders supporting the tracks are strengthened with diagonal braces, and the three columns are firmly bound together at the capitals, to prevent oscillation, below the level of the cross girders, by a handsome, cast iron, open-work iron beam. It is proposed to place at the top of each outside girder a four feet platform exactly level with the floors of the cars, to insure a means of reaching without difficulty, on foot, the nearest station should any accident occur. The trains would be drawn by a locomotive (an English patent) noiseless and smoke consuming. The platform and cars would be reached at the stations by a light iron gallery thrown over the sidewalk from the second floor of any house bought or rented for this purpose, a staircase from the sidewalk through the first floor, would lead to a waiting room suitably arranged with every accommodation, and the rest of the premises would be let as stores or restaurant; the rent of these would pay the prime cost of the whole house. On the road level and between the columns there will be two tracks for horse cars—the actual space taken up by each column on the road would be but two feet. No snow can accumulate to impede the traffic, as there will be nothing wider than three inches for it to collect on.

scales lasted one year and 28 days, and passed a tonnage of 2,263,675 tons. The second set of iron rails were in use seven months and 19 days, and passed a tonnage of 1,524,870 tons. Steel rails laid May 28, 1869, have passed 5,509,381 tons and show no perceptible wear. The company has contracted for 1,000 tons of steel rails to be laid this year, and before many years the whole road will probably be relaid with steel.

☞ Col. Gilman Scripture and party, including a sworn surveyor, have commenced locating the line of the Nashua and Rochester Railroad, beginning at Rochester. The proposed road has recently received substantial encouragement from capitalists and the Nashua and Worcester Railroad, and the prospect now is that it will be put under contract early in the spring.

☞ Work has been commenced on the Cheyenne, Iron Mountain and Montana road. The company hope to secure a grant of land and interest capital sufficient to build to Fort Fetterman, 150 miles, during the present year. The engineers will locate the whole line in the spring.

HARVEY FISK. A. S. HATCH.

☞ FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,

No. 5 NASSAU ST.,
NEW YORK, Feb. 17, 1871.

The SIX PER CENT. GOLD BONDS of the CENTRAL PACIFIC RAILROAD COMPANY have an established character which renders them especially desirable for investments.

They are based on one of the most important and valuable railroad lines in the world, fully completed, amply equipped, and already earning large revenues, which must increase enormously with the growth of the country it traverses and the development of trade with Japan, China and Australia, a large portion of which must find its way across the American Continent.

Holders of FIVE-TWENTY BONDS (which are liable to be funded at a low rate of interest within a short time) may exchange them for CENTRAL PACIFIC BONDS, bearing the same rate of interest, and save from 15 to 18 per cent. for reinvestment, while their security remains as reliable as before.

They are dealt in at the New York Stock Exchange and at several of the more important Bourses of Europe. We have introduced them into our regular business upon the same basis as Government Bonds, and buy and sell them as freely at current market rates, and are prepared to furnish them to investors or others at daily quotations.

We buy and sell Government Bonds, Gold, and Coupons, execute orders in Miscellaneous Securities at the New York Stock Exchange, make collections, receive deposits subject to check at sight, allow interest on balances, and do a general banking business.

FISK & HATCH.

Journal of Railroad Law.

RAILROAD COMPANIES—DAMAGES—NEGLIGENCE OF DECEASED MUST BE PROXIMATE CAUSE OF HIS DEATH.

The facts in the late case of Kennayde *vs.* Pacific Railroad Company, (45 Mo., 255,) are fully and clearly stated in the following opinion by

WAGNER, J.—This was an action instituted by the plaintiff, the widow of Michael Kennayde, deceased, to recover damages for the killing of her husband, which was alleged to have been caused by the negligence, unskillfulness, and criminal intent of the officers, agents, servants, and employees of the defendant, whilst conducting, managing and running its locomotive and train of cars. The answer was simply a general denial. Trial by jury and verdict for plaintiff for five thousand dollars, the statutory penalty.

The facts are brief, and in substance, these: That the employees of the defendant, between seven and eight o'clock of a very dark night in December, 1867, were backing a portion of a train near the depot, in the City of Kansas, where the railroad track runs along in the street, and at or very near another street crosses the same. There were no lights in the rear of the train, no soundings of the whistle, as the rules of the Company required, nor was the bell rung as the statute prescribes. There was no flagman at the crossing, nor any person to give notice of the approach of the cars. There were two tracks close together, and the train was backing on the switch, and struck some loose cars standing on the switch and drove them suddenly over Kennayde and killed him. Kennayde had been employed at work up in the City and his residence was on the other side of the track, and when last seen before the happening of the accident he was entirely sober.

Whether the facts constituted such negligence as to render the company responsible, was a matter exclusively for the jury to determine, and if the Court did not mislead them by giving erroneous instructions, the judgment must be affirmed.

But before proceeding to notice the instructions, we will examine a question which has been raised as to the sufficiency of the petition. It is contended that the petition is defective as a common law pleading, and that it is not good under the statute. It is not necessary to notice the first objection, as it is admitted that at common law the action would not lie. It is beyond doubt that the pleader intended to found the action on the second section of the statute in reference to damages. He uses the exact words employed in the statute, giving a cause of action, sues in the name of the wife, and asks for the penalty given, in case of death, by that section.

The practice act declares that it shall not be necessary, in any pleading, to set forth any statute, public or private, or any special matter thereof: but it shall be sufficient for the party to allege therein that the act was done by the authority of such statute, or contrary to the provisions thereof, naming the subject-matter of such statute, or referring thereto, in some general terms, with convenient certainty. (2 Wagn. Stat., 1,020, § 41.)

Although this petition does not charge that the act was committed contrary to the form of the statute, yet it does set out the facts which constituted it a statutory cause of action, and appears to have been framed expressly upon the statute. It is only necessary for the party seeking to avail himself of it to state facts which bring his case within the provisions of the statute, though according to the rules of good pleading he ought to refer to it. All the circumstances essential to the support of the action must be alleged, or n substance appear on the face of the declaration.

In this case the facts and circumstances appear on the face of the petition. But if the matter was defectively stated in the petition the defendant should have made the point in the Court below, and the objection now being raised for the first time cannot be allowed.

At the instance of the plaintiff the Court gave the jury three instructions. The first declared that if they believed from the evidence that Michael Kennayde was the husband of the plaintiff, and that his death was occasioned by the negligence of any agent, officer, servant or employee of defendant, whilst running, conducting and managing any locomotive, car, or train of cars, in Jackson County, then the jury should find for the plaintiff, and return a verdict for the sum of $5,000, providing the suit was brought within six months from the time of his death.

The second instruction stated that the jury should determine from all the evidence, whether any agent, officer, servant or employee of defendant, whilst running, conducting and managing any locomotive, car, or train of cars, failed to exercise the diligence, care and foresight of a prudent man, and the absence or want of such diligence, care and foresight would constitute such negligence as would render the defendant liable.

The third and last instruction, and the one most complained of, is as follows: "It is the duty of all railroads to have a bell on each locomotive engine, and to ring them at a distance of at least eighty rods from the place where the railroad shall cross any traveled or public road or street, and be kept ringing until it shall have crossed such road or street."

For the defendant the Court gave two instructions. The first told the jury that unless they believed from the evidence that Michael Kennayde was killed by reason of the negligence or unskillfulness of the defendant, its agents, officers, servants, or employees, they should find for the defendant.

The second directed the jury, that if from the circumstances developed by the evidence they should find that the death of Michael Kennayde was occasioned in any manner by his own negligence, or that be contributed thereto by his own negligence, or that at the time of his death he failed to use proper care and precaution to protect himself from danger by reason of the passing of defendant's train, they should find for the defendant.

The defendant also asked a third instruction, that, unless the jury should find from the evidence that Kennayde was killed without any fault or negligence on his part, they should find for the defendant which instruction was refused.

It is needless to comment with any particularity on the two first instructions given at the instance of the plaintiff, as they embody mainly the requirements of the statute, and are in substance the same as those given in the case of Schultz *vs.* Pacific Railroad, (36 Mo., 13,) and which received the approbation of this Court.

The first instruction given for the defendant made it obligatory on the jury to find as an affimative fact that the killing took place by reason of the negligence or unskillfulness of the defendant, its agents, servants or employees, before they could find for the plaintiff. This cast the whole *onus* or burden of proof on the plaintiff.

The second instruction was on the subject of contributory negligence, and asserted that if the deceased at the time of his death failed to use proper care and precaution to protect himself from danger, then the plaintiff could not recover. This instruction went further than the previous adjudications of this Court warranted, and was as favorable as could have been given for the defendant. The third instruction refused was but a reiteration of the principle announced in the second, and was further objectionable in telling the jury that it was necessary to a recovery that the deceased should have been killed without any fault or negligence on his part. This ignored entirely the great leading paramount rule that it was incumbent on the company to exercise care and diligence, and that unless the acts of the deceased were the direct and proximate cause of the disaster, the defendant would not be excused.

Upon the whole the instructions, as noted above and given at the request of each party, presented the law fairly, and were certainly sufficiently favorable to the defendant.

Third instruction given for the plaintiff tells the jury that it was the duty of all railroads to have a bell on each locomotive engine, and to ring the same at a distance of at least eighty rods from

the place where the railroads should cross any traveled or public road or street, and to be kept ringing until it shall have crossed such road or street. The statute provides that "a bell shall be placed on each locomotive engine and be rung at a distance of at least eighty rods from the place where the railroad shall cross any public traveled road or street, and be kept ringing until it shall have crossed such road or street: or a steam whistle shall be attached to each locomotive engine, and be sounded at least eighty rods from the place where the railroad shall cross any such road or street except in cities," etc. (Wagn. Stat., p. 310, § 38.)

It is insisted here, in argument, that the obligation cast upon the company by the statute is in the alternative either to ring the bell or sound the whistle, and that the Court was guilty of misdirection in declaring that it was its duty to have the bell rung, without mentioning the sounding of the whistle. But it is evident from the plain reading of the statute that no error was committed. It is made the imperative duty of the road to either ring the bell or sound the whistle, as it seems fit to use either one or the other, in all cases, except in cities—there the bell can be used only.

The proof is clear and decisive that the whistle was not sounded, as the rules of the company prescribe, and the bell was not rung, as the statute requires. There was no light at the rear end of the car, and there was no one at the crossing to give the accustomed signals, warning footmen and travelers of the approaching danger. When the deceased passed on the crossing (on his way home, as may be reasonably supposed), he heard no signals, he saw no lights: everything was quiet, and he had a right to presume that he could pursue his course without danger.

The citizen who, on a public highway, approaches a railway track, and can neither see nor hear any indication of a moving train, is not chargeable with negligence for assuming that there is no car sufficiently near to make the crossing dangerous. (Ernst *vs.* Hudson R. R. R. Co., 35 N. Y., 9.) He has a right to assume that in handling their cars, the railroad companies will act with appropriate care: that the usual signals of approach will be reasonably given, and that the managers of the train will be attentive and vigilant. In Newson *vs.* New York Central R. R. Co., 29 N. Y., 390, Johnson, J. in delivering the opinion of the Court states the rule thus: "The law will never hold it imprudent in any one to act in accordance with the rights and duties of both." In the case of Gorden *vs.* Grand St. R. R. Co., 40 Barb., 550, the Court say: "A defendant cannot impute a want of vigilance to one injured by his act—as negligence—if that very want of vigilance were the consequence of an omission of duty on the part of the defendant."

In the case at bar, the defendant not only misled the deceased, by omitting all the usual and customary precautions to notify persons of the pending danger, but it acted in open and flagrant violation of the statute made for the protection of the public. The consequence of the omission was to put the victim off his guard, to disarm his vigilance, and lull him into a false sense of security. When the laws are broken and defied and homicides are recklessly committed, it is no part of the business of Courts to hunt up excuses or seize upon technicalities for the purpose of shielding the wrong-doers.

The unfortunate Kennayde had the same right to pursue his course that the defendant had to run the train on its track. The rights of the people of Kansas City to travel on and use their own streets and thoroughfares, are not inferior or subordinate to those of the railroad company. They each have a right to exercise their privileges in a lawful manner, and each are equally bound to use caution, care, and diligence to avoid accidents. The whole case was well submitted to the jury. They found Kennayde blameless, and the company negligent.

Let the judgment be affirmed. The other Judges concur.

List of U. S. Patents.

Issued for Improvements relating to Railroad Construction, Rolling Stock, &c., for the week ending Jan. 31, 1871, and each bearing that date. Reported for the AMERICAN RAILROAD JOURNAL, from the Office of DAVID A. BURR, Solicitor of Patents and Attorney in Patent cases, Washington City, D. C.

Wharton's Railroad Switch.

In connection with an article on another page describing the "merits" of this Switch, we give the following testimonial from Col. Scott, Vice-President of the Pennsylvania R. R. Co.:

PENNSYLVANIA RAILROAD COMPANY,
Philadelphia, January 25th, 1871.

A BARKER, Esq.,

President Wharton R. R. Switch Co.

My Dear Sir:—After careful experiment upon our road at several points where it could be most thoroughly tested, during which you have perfected the Wharton Railroad Switch, so that we think it adapted to all our wants, we have concluded to adopt it on our own road and the roads leased by us; and will give it place as rapidly as we can do so consistently with the proper maintenance and operation of the line.

I believe that it will prove of great practical value to all the railways of the country.

Very Respectfully Yours,
THOMAS A. SCOTT,
Vice President.

Circulars descriptive of this Switch, with illustrations, may be obtained by addressing "The Wharton Railroad Switch Co., No. 28 South Third St., Philadelphia, Penn."

Steel Rails.

In the last annual report of the Lehigh Valley Railroad Company some interesting facts are given concerning the use of steel rails on the road. The experience of the past year has been satisfactory. The steel rails laid in 1864, on the Beaver Meadow Division, look as well as they did a year since, with the exception of three rails, which show signs of wearing out. During the past year 13.93 miles of track have been relaid with steel, making the amount of steel track now 32.31 miles. In 1869 the company laid 1,530 tons of the best English iron rails, guaranteed to last from five to seven years; but they have not proved satisfactory, and the report says that it is demonstrated that "nothing short of all steel, or steel-headed rails, will prove economical under the present heavy and rapidly increasing traffic of the road." The relative value of steel and iron is illustrated by the experience at the scales at Packerton. The first iron rails laid upon the

☞ The Erie Railway Company has executed a new consolidated mortgage on all of its property for $30,000,000, of which $24,000,000 will be expended in the taking up of the existing mortgages at maturity, and the remainder, it is rumored, in laying a third rail between this city and Buffalo, and purchasing equipment for the connections with the narrow gauge railways thence to Chicago.

☞ The third section of twenty miles of the Atlantic and Pacific Railroad and Telegraph line has been accepted by the President, and he has ordered the usual land patents to issue.

WISCONSIN CENTRAL
late
Portage, Winnebago and Superior
RAILROAD.

Notice to Contractors.

Proposals will be received at the office of Capt. D. W. WELLMAN, Chief Engineer, at Menasha, Wis., until

Twelve o'clock Noon, on Wednesday, March 1, 1871,

for the Grading, Masonry and Bridging on that portion of the Wisconsin Central Railroad lying between Doty Island and the Wisconsin River at Stevens Point, a distance of about sixty-four (64) miles.

Proposals will be received for the work in each Section (of about (1) mile), or for the whole work; but parties making proposals for the whole will be required to specify the prices for each Section.

Blank forms, setting forth the different items for which proposals will be received, will be furnished on application; and Plans, Profiles and Specifications can be seen on and after Monday, January 23d, at the office of the Chief Engineer, and at the office of the undersigned, in Room 5 Ogden Building, corner Clark and Lake Streets, Chicago, Ill., on and after Monday, February 6th, 1871.

Proposals, accompanied by Plans, are also invited for the Construction of the Railroad Bridge across Wolf River—to be either of Wood or Iron—consisting of one span of one hundred and fifty (150) feet, and one draw of sixty (60) feet, clear space. The bridge to be first class in every particular, and able to meet the requirements of a first class Road.

Saperate proposals will also be received for the whole of the Span Bridging on the above-described work.

Right is reserved to reject all bids not deemed advantageous to the Company.

PHILLIPS & CROSBY,
Contractors.

Chicago, January 18, 1871.

THIRTY-NINTH DIVIDEND.—WASHINGTON INSURANCE COMPANY, No. 172 Broadway, NEW YORK, Feb. 8, 1871.

CASH CAPITAL	$400,000
CASH ASSETS, Feb. 1, 1871	806,060

A Dividend of (7) SEVEN PER CENT. is this day declared payable on demand, in CASH, to Stockholders.

Also, an Interest Dividend of (6) SIX PER CENT. on outstanding Scrip, payable First of April, in CASH.

Also a scrip Dividend of (50) FIFTY PER CENT. on the earned premiums of Policies entitled to participate in the profits for the year ending 31st January, 1871. The Scrip will be ready for delivery on and after the First of April next.

FIFTY PER CENT. of the Scrip of 1864 will be redeemed on the First of April next, from which date interest thereon will cease.

WM. K. LOTHROP, Secretary.

Tenders for Iron Bridge Superstructures.

The Commissioners for the construction of the Intercolonial Railway are prepared to receive Tenders for TWENTY ONE SPANS OF IRON BRIDGE SUPERSTRUCTURE of one hundred feet for each span, and also for sixteen spans of Two Hundred feet for each span.

Printed specifications showing the tests which each span will be required to bear; information as to the location of the different bridges; and forms of tender, can be obtained at the offices of the Commissioners or at those of the Chief Engineer, at Ottawa, Canada; or at the Banking House of Messrs. Morton, Rose & Co., Bartholemew Lane, E. C., London, England.

Parties tendering must submit their own plans of the mode in which they propose to construct the Bridges, and must state the price of each span f. o. b., at the place of shipment; and also the price of each span completed in place.

Tenders for additional spans of one hundred feet, and for spans of eighty feet, will also be received at the same time. Specifications are being prepared and can be had within a few days on application at the places above named.

Tenders marked "Tenders for Bridges" and addressed to the Commissioners, at Ottawa, will be received up to 6 O'CLOCK P. M., of THURSDAY, the 6th day of APRIL, 1871.

The Commissioners will not be bound to accept the lowest or any tender.

A. WALSH.
ED. B. CHANDLER.
C. J. BRYDGES.
A. W. McLELAN.

Rolling Mill Property
FOR SALE,
OPPOSITE NEW YORK CITY.

The well-known NORTH RIVER OR DURBIN ROLLING MILL, situated at Prospect and North 5th St., Jersey City, New Jersey. The Real Estate consists of sixteen city lots, 25x100 feet each, with two large Dwelling Houses, well built and in good order. Also a large building occupying two lots, suitable for a Machine Shop or other purposes, a Stable, &c.

The Rolling Mill was built for the manufacture of Locomotive and other descriptions of Boiler Tank and Plate Irons, contains a heavy Roll Train, Engines, Furnaces, Machinery, &c. to suit, in good order. It can be seen running, and has been successfully run from its establishment in 1855. Situated near the Hudson River, a short and nearly equal distance from all the New Jersey Railroad Depots and Ferries, the Erie Depots and Ferries and the Hoboken or Delaware & Lackawanna Depots and Ferries, from its proximity to the New York Market, the large Locomotive and Railroad Shops of the City and Paterson, the facilities for forwarding to all points by water or railroad, it cannot be surpassed.

The Real Estate is rapidly increasing in value the vast R. R. Interests and dock improvements mentioned having taken up almost the entire River front and space below the mill property from the Cortland St. to Hoboken ferries. The reputation and business established The Proprietor intends retiring from the business, and for further particulars can be addressed or seen daily at the

Office, 140 HUDSON STREET,
Jersey City N. J.,
In the First National Bank Building.

Propositions for Lease or Selling the Machinery for removal entertained.

Map can be seen and General Information may be obtained also of WM. H. WALLACE & Co., Corner of Liberty and Washington Streets, N. Y., City Agents; and R. R. CHRISMAN, Supt. Central Iron Works, Harrisburgh, Pa. (formerly a Proprietor.)

No. 15 La Salle Street, CHICAGO.

RAILROAD IRON.

1,000 tons LLYNVI VALE.
1,000 " BAILEY BROS.

50 LBS. ERIE PATTERN. Now in yard and for sale by

DANAS & LITCHFIELD,
49tf **18 William street.**

PETER W. KUMBEL,

(Successor to WM. KUMBEL & SON,)

MANUFACTURER OF

LEATHER BELTING,

27 Ferry St,, New York.

D. N. BEARDSLEY, Wholesale Dealer in Railroad Ties, Hemlock Timber, Chestnut Posts and Wood. Office, 251 West Street, near Hubert Street, New York. N. B.—Cargoes sold on commission. Advances made on consignments.

THOMAS D. STETSON, Solicitor of American and Foreign Patents, and Professional Expert in Patent Cases. No. 5 Tryon Row, New York.

Manhattan Oil Company,

Office, 16 Broadway, New York.

JAMES M. MOTLEY, President.

Mason's Sperm, Manhattan Signal, Extra Lard, Tallow, and Mystic Coal Oils.

Also, Sperm, Elephant, Whale, Paraffine, Machinery, Elaine, and Olive Oils, for Railroads, Steamers, Woolen and Cotton Factories, Machinery and Burning.

DIRECTORS:

James M. Motley, Edward Rowe, T. M. Niven, James Murphy, Nathan A. Baldwin, J. Carothers, George W. Quintard, William A. Seaver, Phillip M. Millspaugh.

PHILLIPSBURG Manufacturing Company.

MANUFACTURERS OF

Hot Pressed Nuts ⅛ for ⅜ Bolts to 3¼x2 for 2 in. Bolts either Square or Hexagon.

Bridge and Truss Bolts ¾ in. to 3½ in. in diameter any length with upset ends.

Car Bolts either Blank or Finished.

Machine Bolts Square or Hexagon Heads and Nuts.

Car Forgings, Car Trucks, and Iron work for Cars in general.

Coach or Lag Screws, Washers, Nut Hinges, Crow Bars, Miners' Drills, and a superior article of Boiler Rivets.

Railroad Spike Bolts and Fish Plates.

PHILLIPSBURG,
Warren Co., N. J.

Established 1826.

William J. Young & Sons,

SUCCESSORS TO

WM. J. YOUNG, WM. J. YOUNG & CO., WM. J. YOUNG & SON,

Mathematical & Engineering

Instrument Manufacturers,

AT THEIR OLD LOCATION,

43 NORTH SEVENTH STREET,

PHILADELPHIA,

Have so increased their facilities as to believe they can in future keep a full supply of instruments on hand.

Steele's Feather Dusters

FOR RAILROAD USE.

OUR **Extra** CAR **Duster,** made very strong and full of selected Ostrich Feathers, is the most durable and economical brush for Railroad Car use.

Car Washers, AND 300 varieties of Dusters adapted to the use of Stores, Offices and Dwellings, all of the superior quality that has characterized our Dusters for 35 years past, at low prices. Price List on application.

STEELE & CO., Manufacturers,
3 Park Row, opposite Astor House, N. Y.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY, NEW YORK, Jan. 7, 1871.

A DIVIDEND OF FIVE PER CENT., in gold, free of Government tax, has been declared by the Board of Directors of this Company, payable on the 30th day of January inst., to the holders of full paid shares registered at the close of the 14th day of January inst., after which date, and until the 4th day of February next, the transfer books will be closed.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY
VERREE & MITCHELL,
IRON AND STEEL MANUFACTURERS,
No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail,* with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

PETELER PORTABLE RAILROAD CO.
OFFICE, 42 BROADWAY, NEW YORK.
TO CONTRACTORS, MINERS, ETC.

By this invention one horse does the work of ten, and one man the work of eight.

Extensively Used, Highly Approved by all.

FRAUDS IN RAILROAD MANAGEMENT, AND THEIR REMEDIES.

MILWAUKEE AND ST. PAUL RAILROAD COMPANY.

The managers of railroads have a great many different ways of robbing the people. Commodore Vanderbilt does not build railroads, he buys them, doubles, by his waterings, their share capital, and doubles in the same way his profits—provided, always, he can make the people pay dividends on his watered stock. This is the measure and scope of his wonderful genius as a railroad man. In the Chicago and North-Western there was a different role. Contractors and speculators, (outsiders, mainly) made the money here. They found pliant and supple directors to take the shells and give them back the oyster. The public, unfortunately, has to pay for the shells the full price of the bivalve, in the increased charges upon whatever they eat, drink or wear. For every blunder, for every act of unfaithfulness or fraud, the people pay the penalty. It may be all the same to the parties building, or owning, a road, whether it cost $50,000 or $100,000 per mile. To the public the difference is that between the amount of dividends paid on these sums.

The method with the Milwaukee and St. Paul managers has been different from either of those named. The money made here is by an inside "ring" who build and buy railroads, and sell them, at their own price, to the one they control. This is a safe and easy way, but contrasts poorly with the brilliant effrontery of Commodore Vanderbilt, who despises and defies public opinion. Everybody feels it to be a mean and sneaking thing for A B, as contractor, to sell his wares to A B, as railroad director, because the offender can so easily cover his trail that detection or punishment—removal from office, which is the penalty most feared, because it removes from opportunities to plunder—is almost impossible.

The Milwaukee and St. Paul road is a patchwork, made up of all kinds of material and taken in at prices which best suited its managers. What the several portions cost it is impossible to tell, as they are all lumped together in one mass. It is equally impossible to tell what the several pieces earn, or what they are worth. One of these, the Mc Gregor and Yancton line, which had a land grant of 1,536,000 acres, is now being built by a "ring" controlled by Milwaukee and St. Paul Directors, and, as fast as built, turned over, without equipment, to this Company, minus the lands and at twice its cost. Already 126 miles have been built. The land that will, in this way, be secured to the "ring" will be worth, probably, $10,000,000! The road is being built through a country almost destitute of population, and cannot, for a long time pay much, if any, more than running expenses.

Another land grant line, which now composes a portion of the Milwaukee and St. Paul Road, was the Minnesota Central. The land grant calls for 648,408 acres. This link was put into the consolidated company at the price demanded by the "ring" who built it, and after they had severed from it the lands, to be confiscated for their own benefit and use.

Another land grant road which the Milwaukee and St. Paul Ring have got hold of, is the Hastings and Dakota, which is entitled to a grant of 550,000 acres. Of this line, fifty miles are built. It is fair to presume that this road is to be built and put upon the Milwaukee and St. Paul in the same manner as have been the other land grant lines already named.

Another, or the same, "ring" are building a direct line of road, upon the banks of the Mississippi, from St. Paul to La Crosse, to be sold to the Milwaukee and St. Paul Company when the rails are laid. This is a rival line to one already in operation, and belonging to the same Company. The two are parallel to each other, and will compete mainly for the same traffic. A third road, the West Wisconsin, now being built by another railroad company, will also be parallel to the two named. When completed, which it speedily will be, there will be three roads competing for a business sufficient to support one.

Another magnificent operation, and in which vast genius for railroading was shown, was the leasing of the Western Union Railroad to the Milwaukee and St. Paul. The former was a thoroughly broken down concern, never having paid a dollar, either in interest or dividends. By the last annual report of this Company, made for 1868, its share capital was put down at $3,267,693; its funded debt at $4,000,000, and its floating debt at $1,396,446! The gross and net earnings for four years after its opening were stated as follows:

	Gross Earnings.	Net Earnings.
1865	$688,247	$87,432
1866	815,954	142,793
1867	775,073	128,659
1868	758,786	148,160

The net earnings for the four years averaged 127,008 annually. But with these earnings the Company became each year all the more involved. It is not probable that a single dollar was earned that could be made applicable either to interest or dividends. The road might literally be said to start from nowhere, and to run to nowhere. It was growing worse and worse every year—being ground to powder by the Chicago and North-Western and other rival lines. But this was just the field for a grand display of railroad skill. A portion of the Milwaukee and St. Paul Ring bought up a controlling interest in its stock, and sold it to their Company—or, rather exchanged stock for stock, to the amount of $1,507,500, whereby said Company become possessed of this wonderful property. I believe that, as a part of the transaction, the bondholders consented to reduce their bonds to $3,500,000. Upon this sum the Milwaukee and St. Paul is to pay at the rate of 7 per cent., $245,000 annually. In addition, it pays dividends upon the stock issued in exchange for that of the Western Union, at the rate of 7 per cent., and amounting to $105,525 annually. The total rental paid for the Western Union Road, assuming that the Milwaukee and St. Paul continues to pay dividends, amounts to $345,525 annually—and all this for a property the net earnings of which were not sufficient to keep the Company on its legs. But even with the net earnings claimed (of $127,008,) the annual balance against the Milwaukee and St. Paul, resulting from the transaction, amounts to $218 517. No portion of the lines of the two roads came within twenty miles of each other. They run, in fact, in opposite directions. Their eastern termini, on Lake Michigan, were more than twenty miles apart; their western, on the Mississippi River, were 200 miles apart. The interests of the two Companies were neither mutual nor antagonistic. The St. Paul, as far as any benefit was to be derived, might as well have leased the Hoosac Tunnel or the road of the Boston, Hartford and Erie.

Is it to be wondered at that scrip dividends are the order of the day, with the Milwaukee and St. Paul, in spite of the boast of its directors, in their report of 1869, that, "having completed their improvements and paid therefor from the earnings of the road for 1866, the policy of the directors in future will be to divide the net earnings in cash to the shareholders." The next dividend made was a proper commentary upon all these high-sounding but hollow promises. The net earnings of the Company, instead of being applied to cash dividends, have been, and must be, used to sustain the worthless railway property which the managers of this company have purchased and sold to it. When dividends are earned and paid in cash on the common stock of the Milwaukee and St. Paul Railroad, by the present management, the millenium will not be far off.

By the declaration of dividends in stock all the losses resulting from misconduct and frauds are sought to be thrown upon the people, in increased charges for transportation. The only way to meet and correct such abuses is by law, which shall, by the severest penalties, prohibit, altogether, scrip dividends. Those already declared by the Milwaukee and St. Paul amount to $3,152,847—to pay 7 per cent. on which the people are to be taxed $220,695 annually. To this fictitious capital is to be added the sum of $1,507,500 of capital issued to the Western Union, making a total watered capital of $4,760 347, in addition to that paid in the purchase of land-grant lines. I judge, however, that such dividends are about played out, even in the Milwaukee and St. Paul, as the last one of the kind caused a fall of some ten per cent. in its stock. It was a transaction too barefaced for even a credulous public—it was a further watering of that which before had neither consistency nor color left.

The Company opened last year 100 miles of new line. It increased its share capital in the meantime $5,238,609, and its funded debt $1,050,932. The aggregate of these, for 1869 was $34,564,213; for 1870 it was $40,553,554. The increase was $6,389,341, or nearly twenty per cent. The increase of earnings was from $7,250,668 to $7,420,061, or at the rate of little over two per cent. This is the way watering works: Increase of capital, twenty per cent.—of earnings, two per cent. Nor is this the only way watering works. On those roads, whose capital stock has been largely watered by the issue of additional stock and scrip dividends, *everything* is made subservient to the one necessity of securing sufficient net earnings to pay the promised eight per cent. on these illegal issues. Not only are the charges of transportation advanced but the expenses of the road are curtailed and an economy practiced, profitable, no doubt, to the holders of the fraudulent stock, but perilous to the traveling public. First-class men, unwilling to give their services at less than their fair market value, are replaced by ignorant and inferior workmen, who contract to do *double* duty for *half* wages; a brakeman is discharged here and a flagman there; passenger trains are permitted to make up lost time, by running *at full speed* over draw-bridges—no matter how dark and frosty the night—and to meet heavy freight trains, while they are crossing the same structure. The worn-out running gear yields to the frost; an axle snaps; oil cars jump the track and block the way of a late and rapidly approaching express; there is no one to haul down the white signal-light which proclaims all right; a fearful collision is the result, the oil is ignited, and, in turn, fires the passenger cars; the bridge—a weak wooden structure unable to stand the weight and jar—gives way, *and five and twenty roasting human beings* are dashed on and under the ice that covers the river below. But these are *unavoidable accidents*. These Companies keep as many employees as they can, *consistent with their dividend obligations*, and as these obligations increase, expensive safeguards must be dispensed with, even though a frightful increase of the dangers attending railway travel be the result.

Of all the varieties of fraud and mismanagement there is none so dangerous and fatal as for directors of railroads to engage in the construction or purchase of these works for the purpose of foisting them, at their own price, upon those they control. The only question considered in such cases is the ability of the companies to take and pay for them. Now, no road should be built (except as a private enterprise) where there is not the promise of a fair return upon its cost. Where the parties building are responsible to themselves alone for their blunders and losses, no others will be undertaken. Such as are built will be economically constructed and managed. But where parties are relieved of all such responsibility utter disaster and ruin are the certain result. They never stop until compelled to do so by the poverty or bankruptcy of their victims. The "ring" in the Milwaukee and St. Paul are fast getting to the end of their tether. A few more additions of unproductive and competing lines, a few more dividends in scrip, and all will be up with this concern.

The diversion of land grants from the purposes for which they were made, has already become a colossal evil, and should immediately engage the attention of Congress. There are three great lines in Iowa alone from which the land grants have been severed, to wit: that made to the Cedar Rapids and Missouri Railroad, of 1.422,109 acres; that made to the McGregor and Yancton Railroad, of 1.536,000 acres, and that of the Dubuque and Sioux City Railroad, of 1,226,163 acres. These grants included 4,184 270 acres—an area equal to that of the State of Massachusetts, or about 7,000 square miles. This immense domain is now held by absentees, on speculation—a most odious and injurious mode of holding our wild lands. All these three lines have been leased. The owners of the lands, consequently, have no motive but to get the most they can for their land grants, which have been wholly diverted from the objects for which they were made. The same parties have realized immense sums from the construction of the roads. At $7 per acre for these lands they have an additional profit of nearly $30,000,000 left. The vast sum is to be rung from the sweat of the pioneer. In the meantime the roads must remain without traffic till the lands are sold and settled. The interests of the absentee owners and of the railroads are now wholly antagonistic.

Had the railroads held the lands they would have promoted their early settlement, and would, of necessity, have proved kind and beneficent landlords. The absentees are certain to prove most indifferent and selfish ones. Congress should immediately interpose in all such cases, and forbid any further severance of the land grants from the lines to which they were made. Such a step, to be sure, is locking the stable door after all the best horses have been stolen. Where the grants have been misappropriated, they should, in all cases, be resumed. There are many valuable grants undisposed of. Others may yet be made. All such grants should be the basis of all securities that may be issued for the purpose of building the roads. The mode of their sale, and the prices to be paid, should be accurately defined, so that the grants, while they promote the construction of railroads, will, at the same time advance the public welfare.

***

United Companies' Loan.

The London *Times*, of 28th ult., says that Messrs. Morgan & Co., London, invite subscriptions for $2,500,000 six per cent. mortgage bonds of the Camden and Amboy Railroad and Transportation, Delaware and Raritan Canal, and New Jersey Railroad and Transportation Companies. The price is to be 92, or about 91⅙ reckoning allowances, at which they will yield rather over 6½ per cent., and the principal to be redeemed at par in 1894. The *Times*, in its notice of this loan, says "the united companies control the traffic between New York, Philadelphia, Baltimore and Washington; their share capital is equal to £8,315,000, earning dividends of 10 per cent. per annum, and the entire bond and funded debt (including the £396,200 sterling bonds issued in 1869 and the present issue of £500,000) is covered by a mortgage security representing £4,000,000." The quotation in the London market of the existing issue of £869,200 is 96 to 98.

Eastern (Mass.) Railroad.

The receipts of this company for the fiscal years ending November 30, 1869 and 1870, were as follows:

	1869.	1870.
From passengers	$1,117,670 35	$1,189,222 52
" freight	423,880 78	458,091 54
" express	36,840 73	38,990 94
" extra baggage	1,618 57	1,965 53
" U. S. mail	15,097 66	14,906 48
" miscellaneous	12,241 52	15,578 04
" property acc'ts	67,886 98	67,514 60
	$1,675,238 59	$1,786,269 76
Expenditures, viz:		
Maintenance of way	$183,309 52	$189,529 77
Locomotive power	162,240 57	168,141 56
Fuel	139,049 86	149,756 21
Train expenses	259,293 15	266,001 05
Station expenses	124,232 00	138,228 35

Office establishment	44 884 88	50,586 17
Insurance and taxes	27,669 13	30,543 12
U. S. tax	28,327 82	24,816 49
	$969,432 87	$1,018,039 14
Balance	$705,755 72	$768,230 62
Rent of B. & M. R.R.	$3,215 08	$3,215 04
Int. paid and accrued	172,626 90	203,785 67
Total rent and int.	$175,841 98	$207,000 71
Net income	$529,913 79	$561,229 91

From the foregoing statement it will be seen that the actual receipts from the business of the railroad, exclusive of property account, have been $1,718,755 16 against $1,607,349 61 for the preceding year; an increase in ordinary revenue of $111,405 55. Our expenses for the same period were $1,018,039 14, against $969,482 87, being an increase of $48,556 27.

During the year we have built in our own shops three first class locomotive engines, rebuilt two, and made large and general repairs upon thirty-one others, putting in nine sets of steel tyres. We now have forty-eight engines.

In our car-shops we have built ten new passenger cars, and eighty-five new freight cars, and we have purchased two new passenger cars and fifteen freight cars. We now have 86 passenger cars, 25 baggage and express and postal cars, 531 freight and 250 coal cars.

We have laid down 2,300 tons of rails within the year, of which 300 tons are steel, and 100 tons with the steel top or heads. In addition, we have laid 670 tons of welded rails. We have put down 43,732 sleepers, and our gravel trains have been constantly employed through the season in ballasting road-beds, grading side-track, &c., for which the pay roll alone of the men working on them has amounted to $35,497 70.

We have re-built both the bridges on the Lyon marshes, to wit: across the Saugus River and at Oak Island; have built a new iron bridge across Ipswich River, and have done a large amount of work on the Boston bridge. We have also widened and extended the bridge this side of Prison Point, and built an additional coal shed, 200 feet in length, thereon.

We have erected a new passenger depot at Marblehead, and have also purchased their ample grounds for freight purposes, and fitted up a convenient freight house. At Everett we have established a station and built a new depot, which is a great convenience, and gives much satisfaction to the citizens of that growing town. At Ashbury Grove we have also built a station house. We have built a new engine house, with four stalls,

and also a new paint shop at Salem. These and other expenditures in our carpenters' department, have amounted to the large sum of $72,468 84. We have purchased additional lands, for depot accommodation, at a large number of stations on the line of the road at Swampscott, at Seabrook, Hampton, Portsmouth, Danvers, North Andover, Peabody, at Newbury, Newburyport, and at Salem for a car shop, at Everett, Lynn, Manchester, Gloucester, and Ipswich, at a total cost of $30,944 45. In the preceding year our expenditures for like purposes were about as much, and the demand for more depots grounds and accommodations is all the while increasing with the increase of business.

Last spring we built a track from our station to the camp-meeting grounds in Hamilton, something over a mile, at a cost of $19,110 83. This we did under a charter granted by the Legislature to the camp-meeting association, which has been transferred to us by virtue of powers for that purpose contained in the charter itself. The convenience of this track, and the relief it affords from crowds and detentions on our main road at that station, are very important to us and to the travelling public, and we moreover get an additional compensation for carrying passengers over it, probably more than sufficient to pay the interest on the outlay.

The number and frequency of our trains has become so great that an extension of the double track beyond Beverly is necessary, and we have begun the work. The question of the enlargement of the Salem tunnel, so as to admit of another track, will soon force itself upon the consideration of the officers of the road, and the authorities of that city. For both must concur in making the improvement, inasmuch as the grade, width, and perhaps direction of some of the streets will have to be changed.

In our last annual report we adverted to the fact that the draws in our bridges across Charles and Miller's Rivers, originally constructed under authority of the Legislature, of the width of thirty feet, were, by another act of the Legislature, passed May 19th, 1869, required to be forthwith widened, at great cost, and without compensating advantages, to us, to the width of forty-four feet. Subsequently the Legislature again passed another act, to wit, the act of June 1st, 1870, requiring those draws, as well as all the other draws on this side of the city, to be of the width of thirty-eight feet. After three weeks further consideration the Legislature deemed it expedient to make still another change, and by act of June 28d, 1870, required those draws to be thirty-six feet wide. These alterations of opinion and enactment show how difficult is the problem to be dealt with, of reconciling the conflicting claims of navigation on the river, and the rights of travel and transportation by rail, and otherwise, across the river. In the meantime, the Harbor Commissioners, who have the interests of navigation specially in charge, co-operating in this case, however, with the Railway Commissioners, under the act of June 1st, 1870, have prepared a plan, alike bold and effectual, for the consideration of the Legislature at its present session, whereby both the draws and the bridges shall be altogether removed; not ours only, but those of the other railroads below us, and including the Lowell passenger bridge, and all these roads shall be brought across the river on one wide bridge, at, or near, the Lowell freight track bridge. This plan also includes, as do other plans submitted by members of the Railroad Commissioners, a rearrangement of depots within the city, and a great increase, especially to us, of freight and passenger accommodation.

Copies of the lease of the Portsmouth, Great Falls and Conway Railroad to the Eastern Railroad in New Hampshire, and the guarantee of this corporation, are hereto annexed.

The work of construction on the Portsmouth, Great Falls and Conway Railroad, was commenced early in November last, and is being prosecuted with vigor. The contractors have stipulated that he road-bed as far as West Ossipee shall be ready for the rails in June next, and the ability and energy they have hitherto displayed, give us good ground for hope that we may have the road in use for the mountain travel the coming season. This will open for tourists a new route by the Ossipee Valley, amidst scenery of unsurpassed beauty and grandeur.

We issued and sold, early in the year, 248 shares of new stock, but discontinued the issue on the passage of the law of the last session of the Legislature, requiring a new stock to be first offered to the stockholders, and certain other formalities to be complied with. This law applies to all corporations of whatever description in the Commonwealth, with the single exception of one railroad company, specially exempted after the passage of the above-named law.

By the terms of the lease of the Portland, Saco and Portsmouth Railroad to the Eastern Railroad, and the Boston and Maine Railroad, of April 1st, 1847, either party was authorized to terminate the lease and contract by giving 180 days' notice of an intention so to do, and paying to the other $200,000. In July last, the Portland, Saco and Portsmouth Railroad Company gave notice of their intention so to terminate the contract, on the 20th day of January current.

The number of miles run by locomotives has been 1,034,320. Number of passengers carried, 4,269,089. Tons of freight carried, 846,566.

TRIAL BALANCE, NOVEMBER 30.

	1869.	1870.

Taxation in New York and Elsewhere.

INEQUALITIES AND DISCRIMINATIONS—METHODS OF ASSESSMENT AND COLLECTION.

The report of the Commissioners—David A. Wells, Edwin Dodge, and George W. Cuyler—appointed under the joint resolution of April 26th, 1870, to revise the laws for the assessment and collection of taxes, was presented to the Legislature on the 16th inst. It opens by showing the recent increase of taxation throughout the country. In New York the aggregate of taxation has advanced from $20,402,276 in 1861 to $50,328,684 in 1870. The taxation per capita of several States is as follows: New York, $11.55, or deducting the population and taxation of New York city, $7.54; Massachusetts, $14.35; Ohio, $8.72; Vermont, $5.29. Taking the known revenues of the Federal Government, and the per capita rate of New York as representing the average rate of all the States, the aggregate taxation of the whole country for the past year would have been $851,705,000. Taking the rate of Ohio as the average, it would have been $751,335,000; of Vermont, $627,535,000. The per capita of the whole country at the minimum would be $16.09.

RATES OF CITY TAXATION.

The following table presents the taxation per capita of various cities in this and other States:

	Rate.	Tax per capita.
New York	$2 27	$29 54
Brooklyn	3 87	19 02
Albany	4 57	20 12
Rochester	6 70	15 25
Montreal	— —	5 28
Troy	$4 80 to 5 24	18 00
Boston	1 58	36 10
Philadelphia	1 80	13 73
Cincinnati	3 19	19 00
Chicago	1 50	21 65
Hartford	— —	17 24
Buffalo	— —	12 83
Springfield, Mass.	— —	14 58

The taxation of London for local purposes in 1867 was $16,458,309, or $5.85 per capita. About half of this was on account of the poor. The local taxation of England and Wales was at the rate per capita of $3.87. The yearly expenses of Paris previous to the war were reported at about $25,000,000. With the exception of that city, the general taxation in this country exceeds that of any other community.

Taxation is not in itself an evil more than any other necessary or desirable expenditure; but it is an evil when rendered excessive through injudicious or wasteful expenditures; or when ill-adjusted. The necessity of reform in existing systems has long been felt. New York took the lead in 1862 by appointing a joint Committee of the Legislature of which Hon. James A. Bell was Chairman, which presented a report with a bill and digest of the mode and machinery of taxation then existing in the remaining States. Others have followed the example, but nothing has been done. The need is now imperative.

WHY REFORM IS NECESSARY.

In 1862 the aggregate valuation of the State was $1,449,303,948, the aggregate of all taxes was $19,456,288, and the average rate 1.342. In 1869, the aggregate valuation being $1,860,120,770, the aggregate of taxation had risen to $46,161,531 and the average rate to 2.482. In other words the valuation has increased but 30.3 per cent, and the taxation 140 per cent. Moreover, such changes have been made in the tax system of several of the States contiguous to New York as to place our State relatively at a great disadvantage and to call for the adoption of measures which will prevent the arrest of its development and the deviation of its legitimate capital, population and enterprise. Thus, for example, New Jersey has exempted, in certain cities and counties next to New York, all mortgages from taxation. In Pennsylvania, personal property under a system of taxation in many respects far more liberal than that of any other State, is either wholly or practically exempt. In a majority of the counties, mortgages, judgments, recognizances are likewise exempt for State purposes. The shares of national banks are virtually taxed only three-tenths of one per cent.

The revenue of Pennsylvania is derived mainly from the following sources: 1. A tax of one-half of one mill on each one per cent. of all dividends declared by corporations of the State, except banks, savings institutions and foreign insurance companies. 2. Taxes on tonnage. 3. Taxes, in a

small degree, on personal property. 4. A tax of three-fourths of one per cent. on the gross receipts of transportation companies. 5. A tax of five per cent. on every dollar of interest paid by the corporation of the State to its bond holders with certain set offs. 6. A tax of three per cent. on the annual net earnings of every private banker and incorporated institution, with certain exceptions. 7. A license tax of $500 per annum on every foreign insurance company doing business in the State, and of three per cent. on the entire amount of the premiums or commissions received. 8. Taxes on the enrollment of all acts passed for the benefit of private parties, varying according to their character. 9. Taxes on the emoluments of officers to the amount of two per cent. on all in excess of $200. 10. Retailers' licenses. 11. Tavern licenses. 12. Amusement licenses, &c. 13. Taxes on collateral inheritances. 14. Taxes on wills, writs and deeds. 15. Auction duties and commissions,—the sum total for 1869, being $5,096,679, as compared with $8,138,000, the State revenue of New York from taxes for the corresponding period. The taxation is apportioned in Pennsylvania so as to enhance in the least degree the cost both of capital and of production. In order to show this more in detail, the report examines by items the taxation of Philadelphia and Pittsburg, the valuation of real estate in the former being $470,851,800, and of personal property $8,188,873. The conclusion is reached that great and substantial advantages are offered by Pennsylvania over and above any which are afforded under the existing laws of New York to capital seeking investment in real estate, mortgages, or the business of manufacturing, mining or shipping. The results of her liberal system are, partially, indicated by the census. Pennsylvania, starting in 1860 with a population of 2,906,215, has gained 609,778 in population, while New York, starting with 3,880,735, has gained only 483,640.

In Lower Canada there is comparatively no taxation upon bank capital, money at interest, manufacturing establishments, shipping or other personal property. Maine and Vermont, with a view of developing their own resources, have enacted laws to exempt from taxation for a period of years, manufacturing establishments of every character, together with the machinery and capital employed in operating them. New York is yearly becoming more of a manufacturing and commercial State, and is brought directly in contact with foreign countries and their system of taxation. In Great Britain, France, Belgium, Prussia and Holland, there are no direct taxes on personal property, and special care is taken that the incidence of taxation shall not increase the cost of production. How the inequality operates as a bar to State and National progress the report thus shows:

"Let us suppose the projection of a new line of steamships to run between the City of New York and Europe in competition with existing lines, now controlled by foreign capitalists and registered under a foreign flag. If the nationality of the company is to be American, and its location New York city, the State, city and county would have levied, or have authorized the levying, during the past year, on the whole accessible capital or property of the company, in the forms of vessels, wharves, storehouses, machine shops, offices and floating capital, a tax of $2.27.

"Beyond this, the national government would have imposed an average tax under the tariff, on all articles of foreign growth or importation used in the vessels of the line, of forty-eight per cent.; on the profits or dividends of the company (if perchance there should be any), an income tax; on all tickets for passage, a tax varying from fifty cents to one dollar and a half; and until quite recently would have also taken two and one-half per cent. on all gross receipts from both passengers and freight.

"If on the other hand, the *situs* of the company is made foreign, and its location fixed at Liverpool, the whole amount of local taxation to which the company would have been subjected would be merely an assessment to the extent of from ten to twenty-five per cent. on the rental value of the premises occupied either as offices, storehouses, or machine shops. Beyond this the British Government would have levied in the year 1870 an income tax on the profit of the individual stockholders or owners, of *four* pence on the pound sterling, equivalent to one and two-thirds per cent., and omitting all other forms of direct taxation, would have allowed all articles subject to taxation either under the excise or tariff, such as distilled spirits, teas, sugars, coffee, wines and tobacco, which may be required for use on board the steamer in question, to be taken from bond free of duty. The difference in the return on the investment, therefore, growing out of the difference merely on the fiscal systems recognized in the different locations specified, would be of itself sufficient to afford to the foreign capitalist a dividend on his stock nearly or quite equal to the ordinary rate of European interest on the capital employed; while to the American investor, the disadvantage would have an expression at least two-fold greater through an increase of expenses and a diminution of profit which can be traced directly to a system of taxation and currency, which has enhanced the price of everything that has entered into the steamer, from the laying of her keel to the coal that feeds her engines.

With such a state of things competition is out of the question, and it is not strange that no American steamship sales from New York. Pennsylvania has recently incorporated a transatlantic steamship company with its situs at Philadelphia and all its property exempt from taxation. Take the manufacture of cotton as another example. In Great Britain the incidence of taxation extends only to the rental value of the buildings and does not regard the value of the machinery or the capital employed. In New York and other States except Pennsylvania, it falls upon everything, and the result is a rate of taxation which actually exceeds in many cases the average rate of interest abroad. Manufacturers are thus burdened by our domestic legislation.

Apart from these diversities, there is a need of inquiry and reform from the inequality and inadequacy of the existing system to accomplish the work assigned to it. It has various imperfections and anomalies. On this branch of the subject, the first point relates to irregularities in methods of valuation. These will be found so great—Massachusetts and the city of Philadelphia possibly excepted—that the word *chaotic* properly characterizes the systems and the practice. In New York, the valuation has increased in ten years 31 per cent.; in Massachusetts 48; in Connecticut 30.5; in Rhode Island 54.9; in New Jersey 13 per cent. in three years.

VALUATION OF REAL ESTATE.

The Assessors in this State take an oath that they have estimated the value of the real estate at "the full and true value thereof, and at which they would appraise the same in payment of a just debt due from a solvent debtor." Yet in some instances in New York the valuation for taxation is as low as twenty per cent. of the real value. In a majority of cases in the country the rate varies from twenty-five to thirty-five per cent., and rises in the cities to fifty and possibly sixty. Several counties are cited as illustrations. In Oneida the assessed valuation has increased only $4,656,740 in twenty-seven years. The value of the dwelling houses alone in 1865 was, according to the census, more than the assessed valuation of all the real estate. In Dutchess there has been an actual decrease in eleven years of $242,703, and in Monroe of $1,300,541.

VALUATION OF PERSONAL PROPERTY.

The inequalities and abuses here are still greater. The Report concurs with the opinion expressed by George Opdyke, in 1851, that "the market value of the aggregate of land and that of the aggregate of productive capital are equal," and that in highly civilized and densely populated States the aggregates of real and personal property are substantially equal. Yet practice shows little conformity of valuation in the two classes. The following table shows the assessed valuations of real and personal property for the several States named, with the ratio between them:

States.	Valuation of real estate. 1869.	Valuation of personal property, 1869.	Ratio of per'l to real.
New York.	$1,532,720,907	$434,270,278	1 to 3.50
Iowa	222,561,061	71,971,191	1 to 3.09
Illinois....	346,587,734	142,407,041	1 to 2.43
Massach'ts.	338,083,415	503,085,988	1 to 1.64
Ohio.....	607,418,203	459,762,252	1 to 1.51

We also append a table of a few cities:

Cities.	Valuation of real estate.	Valuation of personal property.	Ratio of per'l to real.
Brooklyn..	$183,689,579	$17,559,980	1 to 10.46
Rochester..	9,725,736	1,501,600	1 to 6.47
Buffalo....	30,904,139	6,735,915	1 to 4.58
Albany....	25,144,980	5,915,278	1 to 4.11
Chicago...	211,371,240	54,688,655	1 to 3.86
Springfield	17,665,610	5,901,570	1 to 2.99
Jersey City	21,996,460	8,735,610	1 to 2.51
N. Y. City.	634,140,768	281,142,696	1 to 2.43
Worcester.	21,608,800	9,642,550	1 to 2.24
Milwaukee.	29,382,695	14,110,918	1 to 2.08
Troy	10,654,144	5,366,965	1 to 1.98
Lowell....	16,195,125	8,595,871	1 to 1.88
Boston ...	365,598,100	218,498,300	1 to 1.67
Cincinnati.	72,243,844	58,471,666	1 to 1.23
Providence	50,908,400	42,162,500	1 to 1.20

In 1858, the personal property of Albany county was assessed $8,810,141; in 1870 at $7,536,171, showing a decrease in twelve years of $874,970. Other counties show similar results. The whole system of valuation is a mere semblance. Massachusetts and Connecticut have attained the greatest measure of success in subjecting real and personal property to a uniform rule of taxation. In Massachusetts, especially, the system is regarded as practically successful, and yet even there full one-third of the personal property escaped assessment. The personal property of New York as returned for taxation would give $99.13 per capita; of Massachusetts, $345.19. The Report presents a schedule of property in this State which would be classified as personal, and which, exclusive of the estimated annual value of the products of agriculture and manufacturing industry, amounts to $1,665,018,262. Arguing upon the exhibit of the income tax and its results, the Report concludes that there must be five thousand

millions of productive property in the State. Various illustrations and proofs are given of the utter inadequacy of the valuation.

DISCUSSION OF REMEDIES.

The first end is to secure equality and certainty in assessment and collection. It is not necessary to tax all descriptions of property, but it is indispensable that the system should act uniformly and equally upon all property of the same kind. Two courses are open to remedy the evils, first, to attempt to amend and strengthen the present system; second, construct a new system. As to the first, so far as relates to valuation of real estate, the present law is clear and explicit. If it fails the fault is in the administration, and the remedy must be found in making that more effective. This can be done by the creation of some central authority, either a single Commissioner of Taxes, as in Massachusetts, or a Board, and who should be required to enforce the laws, re-assessing where necessary and prosecuting officers for derelictions. There does not seem to be any difficulty in the way of accomplishing this. In Philadelphia the plan has been tried, and the valuation was advanced the first year from $160,850,666 to $445,563,321, while the rate of taxation was reduced from $4 to $1 40.

In the valuation of personal property, the case is widely different. The difficulties are such that most nations have abandoned all attempts to levy a direct tax upon this sort of property in the possession of individuals as something beyond the reach of law, while the efforts to enforce such laws are prejudicial to the morals and material development of the State. In Scotland, the Court of Sessions at Aberdeen came to the decision that it was a preferable plan to take the rents of occupied premises as an index of "means and substance" rather than attempt to get at the "means and substance" themselves. In Rome during the latter days of the Empire, the officials who assessed personal property were authorized at their pleasure to administer torture, recognizing that extraordinary means must be used, if a search was to be made for that which is in itself incorporeal, invisible and intangible.

If it be deemed advisable to maintain the present system, then the law must be made far more stringent, severe and mandatory. The Massachusetts and the Connecticut laws or the work of the Board of Equalization of Illinois will serve as models. The New York Committee of 1862–'8 proposed to make every man, under the solemnity of an oath, become his own assessor, or, in other words, to adopt the method known by the name of listing. And yet they concluded it was best to confine the details of the examination to the knowledge of the assessor and the party alone. In Connecticut the law provides that if any person refuses or neglects to hand in a list the assessors shall made it out to the best of their knowledge, and then add ten per cent. The Massachusetts law is still more stringent. It provides that all persons shall furnish lists of their personal property under oath, and that any person failing to do so shall be taxed fifty per cent. in excess. If any person shall deliver a fraudulent list, he shall be subject to fine or imprisonment. Although this Massachusetts' system is the best in theory and practice, the Commissioners feel themselves debarred from recommending its adoption, because; first, an analogous system was presented by the Joint Committee of 1862–'8, and all subsequent Legislatures have refused to consider it, and second, because when the last Constitutional Convention adopted this provision:—"Real and personal property shall be subject to a uniform rule of assessment and taxation," and when it was separately submitted to the people they rejected it by a vote of 278,260, out of a total of 457,211. Singularly enough there was an adverse majority in many of the rural counties which it was supposed would favor it.

TAXATION OF INDEBTEDNESS.

Another difficulty grows out of the question of indebtedness. In Massachusetts the laws do not allow indebtedness to offset or diminish the amount of tangible property. Thus a merchant in Boston worth $100,000 capital, and goods in store to the value of $500,000, would be assessed upon the average amount of goods in the store during the year preceding ($500,000, if replacing goods as fast as they were sold). With such a system in the city of New York, where the rate is 2.27, the merchant would be liable to pay 11 3-10 per cent. upon his capital; in Brooklyn 19 3.10; in Albany 22.8. An institution like the Park Bank would practically be taxed 2.27 on $23,400,000, or 26 per cent. on its capital. And yet it is difficult to see how a system taxing personal property can be made to work uniformly, unless the right to offset by indebtedness is strictly forbidden, as this very privilege affords the opportunity by which most of the property evades taxation. Nothing is easier than to create debt. The report gives this example.

"Thus, for example, an individual desiring to evade taxation on capital invested in general, mercantile or speculative business, first purchases United States bonds, we may suppose, to the amount of $100,000. He then borrows on his promissory note, using the bonds as collateral, $100,000, or some smaller sum, and invests the money so obtained in the business in question. When the day of assessment comes round, a return is made, under oath, if need be, of $100,000 business capital; $100,000 just debts and liabilities; no personal property subject to taxation. If inquiry is made further respecting the United States bonds purchased, the answer is made legitimately, that in respect to these the State authorities have no jurisdiction. Since the commencement of the present year, moreover, a case involving this very principle of exemption, has been brought before the Supreme Court of New York (General Term, Jan. 3, 1871), by the Tax Commissioners of the city of New York, and a decision given in favor of its legality; thus illustrating how difficult it is, holding on to a system of universal taxation, to once exempt any description of intangible, incorporeal property from assessment, without at the same time opening a door to innumerable opportunities for fraud and evasion. And it should be further borne in mind, that this door has been most effectually opened, both by National and State authorities, and that it is now entirely beyond the power of any individual State to close it."

Various other methods are resorted to. The Commissioners say that they are at a loss to know what remedial measures are practicable. Another circumstance bearing upon the matter is that the Savings Banks have largely changed their character, and have become the depositories of those who are not poor; and it is intimated that they should cease to be regarded with the favor they have heretofore received. In recognition of this state of affairs Massachusetts, in 1868, increased the State tax on Savings Banks from one half of one per cent. to three-quarters of one per cent., and the Governor, in his recent message, suggests a further increase. The character of the banks is well illustrated by a letter from Rochester to one of the Commissioners:

"The stocks of corporations legally taxable in this city aggregate over $1,300,000. The aggregate assessment of 'personal' in 1869, the latest figures in my possession, was $1,568,300. Assuming that these stocks were (although they, in fact, were not) assessed according to law, there would remain $268,300 as the taxable 'personal' of our whole population, aside from their investments in local stocks! The savings banks deposits, January, 1869, amounted to $6,680,590 88; deduct 'personal' (in excess of stocks) assessed 1869, $268,800, and we have an excess of $6,412,290 88 'personal' in the single form of savings bank deposits, above the aggregate of 'personal' exclusive of stocks legally subject to taxation in 1869. In other words, these deposits, composed of money, amount to twenty-five times the amount of personal assessed in excess of taxable stocks.'

In Connecticut, a tax of three-fourths of one per cent. is imposed on the whole amount of deposits and stock, and then in consideration of this and the federal tax the banks are permitted to add a compensatory amount to the legal rate of interest on all their loans, and to take the interest in advance; the effect of which is to throw the whole amount of tax off from the bank on to the borrower, who, in many cases is a man of small means who wants the money for local improvement.

As to the use and value of oaths, the Commissioners say it is the unanimous opinion of all who have had extensive experience, that, as a matter of restraint, or as a guarantee of truth, they have ceased to be effectual. An illustration is given of an individual who was assessed $20,000 on personal property, who swore it off year by year until the amount was reduced to $1,000, and who then dying, left $150,000 of personal property to be divided among his heirs.

In France, one of the causes which led to the revolution was the inequality and multiplicity of taxes, and one of the first acts of the National Assembly was to repeal all inquisitorial taxes of every nature. In place of direct taxes on personal property, it substituted a taxation of the *indicia* or signs which each individual may present of his possession of such property; and further recognized the rent or rental value of the premises, which each person occupies as such signs of *indicia*. That system still prevails, and the tax is fixed at one-twentieth part of the rent paid by each resident.

Alexander Hamilton as a member of the Conventions which framed the Constitutions of the United States and of New York, advocated the restriction of all internal or local taxation to visible, tangible objects, and to the assessment of these specifically and by some uniform and simple rule.

(To be continued.)

☞ The citizens of Lynchburg, Va., by a majority almost unprecedented, have voted the subscription of two hundred thousand dollars asked for to insure the construction of the Lynchburg and Danville Railroad. It is an extension practically of the Orange and Alexandria road, with which Baltimore has its connections for the great line southward.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal

Saturday, February 25, 1871.

Stock Exchange and Money Market.

There has been a further material increase in the offerings of Money to the leading street borrowers, since our last, and the tendency of rates, as noted in our last, has been continuously favorable to parties, in good standing, requiring accommodations. Call loans have been quoted down to 3@5 per cent., with some thirty to sixty day advance reported, on the pledge of Government securities, at 4@5 per cent. per annum. Mercantile credits have been more readily marketable on the basis of 6@7 per cent. per annum for the best grades of business paper. The prevailing figures show an easier range of rates for the borrowing interests than those current in February for some years past. The city banks in their last weekly returns exhibited a further addition of $2,229,458 to their deposit averages, and of $593,847 to their legal tender reserve, with a loss of $953,337 of specie. They increased their loans $3,641,175, and reduced their circulation $52,328. The banks begun the current week with a legal tender reserve (gold and greenbacks) of $19,061,940 in excess of the 25 per cent. of their liabilities required by the national banking act. The U. S. Sub Treasury reduced its currency reserve, last week, $699,992 and added $959,458 to its coin balances. It closed the week with a reserve of $63,383,013 in coin and uncancelled coin certificates, and $9,919,967 of currency.

The specie reserve of the city banks according to the latest return is $24,707,337, against $37,264,387 same time last year. The city bank deposits are now $216,290,338, against $212,138,882 week ending Feb. 20 1870. The legal tender reserve amounts to $56,366,640, against $55,134,066 same time last year. The circulation now stands at $31,757,814, against $28,694,371 same time last year. The loans are now $275,002,520, against $267,327,368 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $77 524 569 a day, against a daily average of $81,175,817 the preceding week. The current week's exchanges average about 80½ millions a day. The city banks, last week reported a loss of $958,337 of specie, with a gain of $2,229,458 of deposits, and $593,337 of legal tender notes. They increased their loans $3,641,175; and reduced their circulation, $52,323.

National Bank notes to the amount of $482,990 were issued last week by the Treasury Department. Deducting from the grand total issue to 1741 banks the currency returned, including worn out notes, amounting to $37,962,728, the existing 1,648 banks, (with an aggregate capital of $435,356,084,) retain an actual circulation of $308,585,728. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $351,253,000; and for the public deposits, $15,919,500—making a total of $367,172,500. The Treasury Department last week redeemed and destroyed $649,100 of worn and mutilated fractional currency, and issued $673,277 of new.

The U. S. Sub-Treasury, on Thursday morning of this week, held a balance of $9,616,347 in currency, and $64,713,810 in coin, against a balance a week previous of $11,673,258 currency, and $63,709,214 coin.

The U. S. Sub-Treasurer retired, last week, $2,788,503 of coin certificates, received for customs.

The Government revenues have been yielding fairly since our last. The customs at the port of New York, last week were $3,072,503; and at the outports, equal to about a million more, all in coin, or coin certificates. The internal revenue yield thus far in February has been about seven millions and since July 1, 1870, about 100 millions.

There has been only a moderate movement in gold in the aggregate through the week. The speculative inquiry has been on a restricted scale. The customs drain has been liberal and the export call fair. The unusually early trade inquiry for Foreign Exchange, in settlement of foreign merchandise imports recently marketed, together with the extreme ease in Money, having operated in favor of the maintenance of the price of gold, the range of the week has shown an even temper in the dealings, the business having been within the extremes of 110⅞ and 111½, closing on Tuesday evening at 111⅜ against 111⅛ the preceding

Wednesday. As Wednesday of the current week was the anniversary of the birth of Washington, and a legal holiday, all the financial and commercial centres of the city were closed all day. Hence our review, this week, covers the movements of only five business days. The outflow of specie last week was over a million dollars (having been precisely $1,170,554 in the aggregate) and thus far in 1871, the shipments hence have been $5,481,227, against $4,350,860 same time in 1870, $5,139,171 in 1869, and $9,657,851 in 1868. The aggregate of the week's imports of foreign specie was $85,759, and since Jan. 1, $391,408 against $2,836,973 same time in 1870. On Thursday of this week, Government sold a million of Gold at equal to the current market rates, closing the Treasury operations in Bonds and Gold, for the month of February. The shipments of specie, on Wednesday and Thursday of the current week were quite light.

The Gold Exchange Bank clearances on Thursday of last week were $43,069,000; on Tuesday of this week $25,020,000, the extremes since our last.

The export drain was $1,170,554 last week against $676,446, same week preceding year. The shipments since July 1, 1870, have been $16 693,-660, against $21,006,415 same time in 1869–'70.

The customs demand for Gold last week, averaged $528,823 a day; thus far, this week, it has averaged $734,000 a day, or equal to a weekly aggregate of $3,670,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $85,759, and since Jan. 1, 1871, $391,498, against $2,836,973 same time in 1870. The total customs revenue of the Government, in coin, at this port, since July 1, 1870, has been $91,096,698, against $83,154,303 same time n 1869–'70.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt since July 1, 1870, $62,082,024 against $62,881,173 same time in 1869–'70.

Foreign Exchange has been quoted a shade firmer, since our last, on a comparatively limited offering of prime bills, and a fair demand, chiefly from importers. Bankers' sixty day bills on London closed on Wednesday at 109⅜@109⅝; sight bills on London, 110¼@110⅜.

The dealings in Government securities have shown a stronger, though not an active, market. The Six per cents of 1881, the later issues of the Five Twenties, the Ten Forties, and the Currency Sixes have been the favorites, and have been offered with reserve at the Stock Board, and in the open market. It is now deemed quite probable that we shall soon have to note a renewal of an active demand for our national securities and other American Stocks, for the English and Continental markets; and confidence is already expressed in some circles that the new 5 per cent. Funding Loan will, on the opening of the subscriptions, on the 6th March, command the equivalent of par in Gold, on both sides the Atlantic, or so near it as to induce large conversions of the Five Twenties in anticipation.

On Tuesday, Government bought in two millions of Five-Twenties at 109 42@109 62, ex-interest. The amount of bonds offered was $3,718,000.

U. S. sixes of 1881 closed here on Tuesday of the current week at 114¼@114⅜; U. S. Five-Twenties of 1862, 111⅞@112 U. S. Five-Twenties of 1864 at 111⅝@111¾; U. S. Five-Twenties of 1865, 111⅝@111¾; U. S. Five-twenties of 1865 consolidated, 110½@110⅝; U. S. Five Twenties of 1867, 110½@110⅝; U. S. Five-twenties of 1868, 111⅛@111¼; U. S. Ten-forties at 110¾@111; U. S. Six per cent. currency bonds, 113⅛@113¼.

State bonds have been in moderately active demand, at generally firm and buoyant prices.

Railway bonds have been in good request, the instances of the principal loans at well supported prices. Central Pacific Sixes have been quite active, closing at 94⅜@94½. Chesapeake and Ohio Sixes have been in moderate demand at 90 and interest. Union Pacific Sixes closed at 82¼ @82½.

Railway and miscellaneous share property has been less generally active, but, on the whole, strong as to values, closing about steady. Union Pacific stock closed at 22⅛@22¼. Western Union Telegraph at 48½@48⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 8.	Feb. 15.	Feb. 21.
Consols	92	92 1/16	91⅞

* Ex March coupon.

General business has shown but little animation in the line of domestic produce, though in foreign imports, there has been a free movement. Breadstuffs and Provisions closed in favor of buyers as a rule. Naval stores, buoyant. Middling upland cotton closed on Tuesday at 15¼@15⅜ cts. per lb., on a better inquiry. The receipts at all the ports, since Sept. 1, 1870, have been 2,648,805 bales, against 1,198,315 bales same time in 1869–'70; exports same time 1,574,002 bales, against 1,121,661 bales same time in 1869–'70; stock on hand at latest dates, 718,879 bales, against 532,262 bales same date 1869.

Ocean freights have been comparatively steady, but remarkably active. The exception of weakness has been in steam rates to Liverpool, which have been quoted easier for Cotton and Provisions, on a more liberal offering of room. For Liverpool we quote flour at 2s. 6d. by sail, and 3s. by steamer per bbl.; grain at 6½d. by sail, and 7½d. by steamer per bushel; cotton at 1/4@5/16d. by sail and 1/4@5/16d. by steamer per lb.; and heavy goods 17s. 6d.@30s. by sail, and 30s.@45s. by steamer, per ton.

The imports for the week ending Feb. 18, and since the beginning of the year, have been as follows:

	1870.	1871.
Dry goods	$2,387,488	$2,663,591
Gen. merchandise	2,146,761	4,341,556
Total for the week	$4,534,199	$7,005,147
Previously reported	26,670,820	33,211,704
Since January 1	$31,205,019	$40,216,851

The following will show the exports (exclusive of specie) from New York to foreign ports or the week ending February 14th, and since the beginning of the year:

	1870.	1871.
For the week	$2,247,559	$4,281,530
Previously reported	18,136,556	26,068,147
Since Jan. 1	$20,384,115	$30,349,677

Washington Insurance Co.

This firmly established and successful company make an excellent exhibit, in the announcement of its thirty-ninth dividend of seven per cent. which cannot fail to be highly gratifying to its stockholders and customers. We direct the attention of our readers to the card of the "Washington" in another column.

The United Companies of New Jersey.

The following is an abstract of the Annual Report of the Camden and Amboy Railroad Co., the Delaware and Raritan Canal Co., and the New Jersey Railroad and Transportation Co., for the year ending December 31, 1870:

Capital stock paid in of the Delaware and Raritan Canal Company, $5,847,400; Camden and Amboy Railroad, $5,847,800; New Jersey Railroad and Transportation Co., $7,295,200; fractional scrip of 1868 (Delaware and Raritan Canal Co.,) $277 50; total, $18,990,677 50.

The funded debts of the Joint Companies are: English debt, £288,600 at $4.84, $1,396 824; extra dividend loan overdue, $495; loan of 1870, $2,540; loan of 1875, interest at 6 per cent., $765,000; loan of 1883, $1,700,000; loan of 1889, $866,000; consolidated loan, due 1889, $4,929,200; total, $9,570,059.

The debt of the New Jersey Railroad and Transportation Co. is: Loan due 1875, $300,000; loan due 1878, $450,000; loan due the State of New Jersey, $100,000; total, $850,000. Of the United Companies of New Jersey, sterling loan, £369,200, at $5, and $154,000—$2,000,000. Bonds and mortgages of the United Companies, $1,353 502 75; sinking fund of New Jersey Railroad and Transportation Co., $168,679 69; other debts, $1,674,524 33; undivided earnings, represented by cash, $638,186 14; grand total, $35,245,629 41.

Cost of the Camden and Amboy, including branches, steamboats, real estate, &c., $12,527,-160 14; of the Delaware and Raritan Canal and appurtenances, $4,735,353 53; New Jersey Railroad, equipments, property, &c., $8,955,995 76; real estate and capital payments of the United Companies of New Jersey, $642,112 86; total cost, $26,860,620 66.

Investments in and advances to auxiliary works—stocks, $4,555,905; bonds and mortgages, $356,750; advances, $2,064,728 58; sent to England for extinguishment of debt, $70,708 17, sinking fund for extinguishment of sterling loan, $57,752 04; unappropriated materials on hand, $447,880 30; cash in hands of Treasurers, $831,-285 26; amount, $35,245,629 41.

Receipts from passengers, mails, expresses, canal tolls, &c., $7,260,240 78; expenses operating canals and roads, $4,549,185 60; balances, $2,711,955 18; interest, general expenses, duty, taxes, sinking fund, $1,486,488 30; profit and loss carried to surplus earnings, $1,224,566 88.

Marietta and Cincinnati Railroad.

At the annual meeting of the stockholders of this company, held in Cincinnati on the 15th inst., the following gentlemen were elected Directors to serve for the ensuing year, viz: John King, Jr., Johns Hopkins, Thomas Whitridge, Allan A. Chapman and John Donnell Smith, of Baltimore; R. M. Bishop, Nathaniel Wright, W. W. Scarborough and L. D. Lehmer, of Cincinnati; Wm. T. McClintick and John Maderia, of Chillicothe; I. N. Camden, of Parkersburg, and Wylie H. Oldham, of Marietta.

The new Board organized by electing the following officers; John King, Jr., President; C. F. Low, Secretary and Auditor; W. H. Oldham, Treasurer; Wm. E. Jones, Cashier and Registrar.

Pennsylvania Railroad.

At the annual meeting of this company in Philadelphia on the 21st inst., Vice President Scott, in reply to inquiries, said:

"There are pending negotiations for a lease of the Camden and Amboy Railroad, which, we think, will be highly beneficial to this company. The Pennsylvania Railroad has no interest in the Union Pacific Railroad. The extensions of the Pennsylvania Railroad now are limited to Chicago, St. Louis, Louisville, Cincinnati, and as leading from these centres, others forming connection with New Orleans and lines to the Pacific coast."

HARVEY FISK. A. S. HATCH.

☞ FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,

No. 5 NASSAU ST.,

NEW YORK, Feb. 24, 1871.

The SIX PER CENT. GOLD BONDS of the CENTRAL PACIFIC RAILROAD COMPANY have an established character which renders them especially desirable for investments.

They are based on one of the most important and valuable railroad lines in the world, fully completed, amply equipped, and already earning large revenues, which must increase enormously with the growth of the country it traverses and the development of trade with Japan, China and Australia, a large portion of which must find its way across the American Continent.

Holders of FIVE-TWENTY BONDS (which are liable to be funded at a low rate of interest within a short time) may exchange them for CENTRAL PACIFIC BONDS, bearing the same rate of interest, and save from 15 to 18 per cent. for reinvestment, while their security remains as reliable as before.

They are dealt in at the New York Stock Exchange and at several of the more important Bourses of Europe. We have introduced them into our regular business upon the same basis as Government Bonds, and buy and sell them as freely at current market rates, and are prepared to furnish them to investors or others at daily quotations.

We buy and sell Government Bonds, Gold, and Coupons, execute orders in Miscellaneous Securities at the New York Stock Exchange, make collections, receive deposits subject to check at sight, allow interest on balances, and do a general banking business.

FISK & HATCH.

Journal of Railroad Law.

RAILROADS—DAMAGES—BURNING FENCES—WHEN NEGLIGENCE MAY BE INFERRED.

The facts in the recent case of Fitch *vs.* The Pacific Railroad Company, (45 Mo., 822,) are fully and clearly stated in the following able opinion by

BLISS, J.—The plaintiff charges defendant with negligently and carelessly, and for want of due care and prudence in running its locomotives and cars, setting fire to and burning up his fences and corn fields, etc. Defendant joined issue, and judgment was recovered by the plaintiff in the Johnson Court of Common Pleas, which was reversed in the District Court.

At the trial, the plaintiff gave evidence tending to prove that the fires were kindled by sparks from the smoke-stacks of defendant's engine; that an unusual amount of smoke and sparks were emitted at the time; that the fire caught near the railroad track, in the dry grass, and also in the plaintiff's contignous inclosure, and ran through his field and burned up his fences; that one of defendant's engines which ran that season upon this road was without the usual and suitable screens upon the smoke-stack to prevent the escape of fire, and that fire had frequently caught near the track from that engine; but it did not affirmatively appear that the fire was kindled by that engine, or that it was running at the time. The defendant gave evidence tending to prove that the company used the best machinery and contrivance to prevent the escape of sparks; that its engines always left the stations in good condition; that the fissures in the fire screens were about one eight of an inch in width; that the small sparks that could escape through these are not dangerous, and could not fire the grass; and that the engineers employed were competent and careful. Evidence was also given tending to show that both in the plaintiff's field near the railroad, and also inside of the railroad fence, there was dead grass which was easily ignited. The court gave to the jury all the instructions requested by defendant's counsel and also gave several instructions asked by the plaintiff, to which exceptions were taken.

The relation to the injury is not one of time or space, and it is not easy to give such perfect definitions as shall apply to all cases. Yet, as injuries from mutual negligence arise, it is seldom difficult to fix upon the proximate cause. The natural reason—our judicial instincts—seize at once upon it and separate it from those more remote, although the injury could never have been inflicted without the latter.

Light may be thrown upon the question by applying the old distinction between causes and instruments, making the remote causes but the instruments, in the scholastic sense, through which the direct causes could operate. And no better illustration of this distinction can be given than the case at bar. The plaintiff's fences and corn were destoyed by the fire kindled by defendant's engine. Assuming that the kindling of this fire was the result of defendant's negligence that negligence was the proximate cause of the destruction. But the fire, it is assumed, would not have destroyed the plaintiff's property had he kept his fields and fence corners thoroughly free from dried grass and herbage. This fuel, then, thus in part furnished by the plaintiff, was the remote cause—the instrument through which the defendant's negligence was enabled to do the mischief.

The modern decisions in our own State have contributed to remove the ambiguity. Huelsenkamp *vs.* Citizens Railway Co. 37 Mo. 537, is the leading case, and in it the authorities are reviewed, and the kind of contributory negligence that will excuse a defendant is defined as applied to passenger carriers (see p. 549). The more recent case of Morrissey *vs.* The Wiggins Ferry Co., 43 Mo. 480, affirms the former decision and restates the rule to be "that the carrier shall be guilty of some negligence, which mediately or immediately produced or enhanced the injury, and that passengers should not have been guilty of any carelessness or imprudence which directly contributed to the injury, since no one can recover for an injury of which his own negligence was, in whole or in part, the proximate cause; and that, although the plaintiff's misconduct may have contributed remotely to the injury, if the defendant's misconduct was the immediate cause of it, and, with the exercise of prudence, he might have prevented it, he is not excused." We have only to apply the rule to cases like the one at bar, so far as their different character will permit.

Firstly, the jury, in order to charge the defendant, must find affirmatively that the fire escaped from the smoke stacks of its engines, through the negligence of its agents and servants. Smith *vs.* Han. and St. Jo. R. R. Co., 37 Mo. 287.) The burning, the damage, the escape of the fire, and the negligence, are all the facts to be charged and proved. But they must be proved, like all other facts, by such evidence as shall satisfy a reasonable mind of their existence. It is sometimes said that negligence is presumed from the escape of the fire. (Ill. Cent. R. R. Co. *vs.* Wells 42 Ill. 407.) But, while this can hardly be called a presumption, as the term is generally used, it may be a fair and reasonable inference. The language of Judge Holmes, in Smith *vs.* Han. and St. Jo. R. R. Co. 295, is very strong and liable to misconstruction unless compared with the case and the rest of the opinion. If the plaintiff were required to prove affirmatively and specifically the condition of the peculiar smoke stack from which the fire escaped—if he were bound to show the specific negligence that permitted its escape—it would be equivalent to denying him relief altogether. The farmer along whose fields the train flies, from the nature of the case, can know nothing about these things. He can not know the engine nor can he tell the contrivances needed, used or neglected. All that he can in most cases show is that the fire escaped and destroyed his property. It is an inference of reason that fire should not so escape. When as dangerous, as well as useful, an instrument of locomotion as a steam locomotive is used, its managers are bound to a care and precaution commensurate with the danger. They have a right to use the instrument, but have no right to scatter fire along their track; and when it is found that this is done, with no explanation of the cause, the jury is warranted in inferring that there has been some neglect. To rebut that reasonable inference, the defendant should show that the best machinery and contriv, ance were used to prevent such a result, and that carefu' and competent servants were employed (Vaughn *vs.* Taffvale R. R. Co. 3 H. & N. 743.) Secondly, as to contributory negligence, if the plaintiff was guilty of some act or negligence that directly or immediately caused the result, he can not recover, notwithstanding the neglect of the defendant. But if the plaintiff's neglect was slight or remote, and if the conduct of the defendant's agents was the immediate and direct cause of the injury, and if, with the exercise of prudence and the use of proper appliances on their part, the result might have been prevented, the defendant is not excused.

In our view of both these propositions, the instructions were sufficiently full, and the verdict is warranted by the evidence. As to the negligence of defendant, the plaintiff made more than a *prima facie* case; for he not only proved the unusual escape of fire, but he also proved that an imperfect engine was used on the road, although it was impossible for him to show that it was the one that set the fire. On the other hand, the defendant whose servants had charge of the engine, proved nothing in regard to this particular one that set the fire, but did show general good management in regard to the smoke-stacks which might be true and consistent with negligence in a specific instance. As to the fact of contributory negligence, the evidence shows that the grass along the fence separating the plaintiff's farm from the defendant's road was left in its natural condition and of course some combustible material accumulated in consequence. It is claimed because of this accumulation the fire was fed and made sufficiently strong to do the injury complained of, that thus the plaintiff contributed to it, and consequently can not recover.

But the neglect charged can not be called the cause of the loss. The words "directly and immediately" are not used to denote time in the chain of the causation, but rather efficiency. An idea of necessity is always involved in the relation cause and effect. Both parties carelessly left on the ground the materials for the fire; but it was the fire and not the materials, that burned the fences. There is a necessary connection between kindling the fire and the combustion, we can not help associating them as cause and effect. I have spoken of it as the instrument, it might be styled the remote cause; it certainly was not the efficient moving or rather *the* cause. The careless leaving of the dead grass upon the ground was not then the proximate cause of the loss, and was not such contributory negligence as will excuse that of defendant.

Had the charge been that by accident, and without negligence fire was kindled in the dry grass along defendant's road, and in consequence of negligence in not removing the grass, and in suffering such combustible material to accumulate, the fire spread and ran into plaintiff's inclosure, burned his fence, etc., it would then, I conceive, be competent for defendant to show that the plaintiff had also suffered a similar accumulation and that without it he would have suffered no injury. Both causes were equally remote, and the proximate cause was an accident. We are referred by defendnt's counsel to a newspaper report of a decision of the Suprume Court of Illinois in Ohio and Mississippi Railway Co. *vs.* Shanafelt, not yet published, but it goes no further than this, no negligence was charged or attempted to be proved against the company in setting the fir

—only in not removing the grass. The parties were equally negligent, and in the same matter precisely, and one could not with a good face charge the other with a specific neglect of which he was also guilty. But the case at bar is entirely different. Without saying that any negligence in relation to the grass was in fact established, the jury might without error have been told, as they were not, that the fact that the natural growth of the year previous had not been removed was no excuse for setting it on fire. The wrongful act of kindling the fire is the proximate cause of the injury, and not the neglect of cleaning up the fence corners, of which, unfortunately, most of our farmers are guilty.

The defendant has no reason to complain of the instruction in this regard, and the judgment of the District Court, reversing that obtained by the plaintiff below, is reversed. The other judges concur.

Jeffersonville, Madison and Indianapolis Railroad Company.

List of U. S. Patents.

Issued for Improvements relating to Railroad Construction, Rolling Stock, &c., for the week ending Feb. 14, 1871, and each bearing that date. Reported for the AMERICAN RAILROAD JOURNAL, from the Office of DAVID A. BURR, Solicitor of Patents and Attorney in Patent cases, Washington City, D. C.

No.

111,767.—Car Coupling, James W. Musser and Randolph Carkhuff, Lewisburg.

111,824.—Railway Alarm, George Draper, Hopedale, Mass.

111,862.—Construction of Car Axles and Shafts, James Montgomery, Croton Landing, N. Y.

111,872.—Stock Car, Amos Rank, Salem, Ohio.

111,873.—Railway Stock Car, Amos Rank, Henry King and Joel Sharp, Salem, Ohio.

111,884.—Locomotive Boiler Furnaces, Andrew J. Stevens, San Francisco, Cal.

☞ The earnings of the Pennsylvania Railroad Company for the year ending December 31, 1870, amount to $17,531,706 82, being an increase over last year of $280,895 09. The net earnings for the year amount to $6,271,621 67. The revenues of all the lines operated by the company are $29,665,206 36, and the net profits, $6,399,888 85.

Cotton in Europe.

The following statistics of cotton in Great Britain and in the whole of Europe for 1870, with estimate of available supply for the present year, is from the N. Y. *Express*:

	Bales.
Stock on hand in Great Britain Jan. 1, 1870	460,180
Imports from America (U. S.)	1,664,010
" " India	1,063,540
" " Brazil	402 760
" " Egypt	192,790
" " other countries	139,280
	3,462,330
Total supply	3,922,510
Taken for consumption in Great Britain	2,797,090
Taken for export from Great Britain	658,430
	3,455,520
Leaving stock on hand Dec. 31, 1870.	446,990

	Pounds.
The average weight of bales imported in 1870, was 380 pounds, making an aggregate weight of	1,315,397,730
The average weight of bales imported in 1869 was 354 pounds, making an aggregate weight of	1,198,354,550
Increase in 1870	117,043,180
The average weight of bales consumed in Great Britain during 1870 was 386 pounds, an aggregate of	1,078,204,510
That of 1869 was 358 pounds, an aggregate of	941,585,520
Increase in 1870	136,618,990

The increase in the consumption of cotton in Great Britain is noted in the following table:

	Pounds.		Pounds.
1850	588,200.000	1861	1 007 400.000
1855	839,100,000	1366	890,700,000
1856	891,400,000	1867	954,500,000
1857	826,000,000	1868	985,475,700
1858	905,600,000	1869	941 585,500
1859	976,600,000	1870	1,078,204,500
1860	1,079,321,000		

The cotton statement for 1870 in the whole of Europe was as follows, partly estimated:

	Bales.
Stock on hand in ports, Jan. 1, 1870	587,000
Imports to Great Britain	3,462,330
Imports to continent	1,100,000
	4,562,330
Total supply to Europe	5,149,330
Taken for consumption—	
Great Britain	2,797,090
Continent	1,510,000
	4,307,090
Stocks on hand Dec. 31, 1870	842,240
Consump. in 1869	1,617,200,000 lbs. (854 lbs. p.b.)
Consump. in 1870	1,658,000,000 lbs. (884 lbs. p.b.)

The following is an estimate of the available supply of cotton in Europe for the present year

	Bales.
Stocks of cotton on hand in European ports Jan. 1, 1871	842,240
Imports from America	2,750,000
India	1,650,000
Egypt	300,000
Other countries	700,000
	5,400,000
Supply available	6,242,240

☞ The last rail on the Evansville, Henderson and Nashville Railroad was laid on the 20th inst., and through trains are now running to Nashville.

The California and Oregon Railroad.

The papers of the city have alluded more than once to the California and Oregon branch of the Central Pacific Road, but their allusions have generally been very indefinite, and the fact has not been mentioned that the road is one of the most important on the coast, and is certain to be one of the most profitable. We append a few facts about this great line, which has received from the Government one of the richest land subsidies ever bestowed upon a railroad. The California and Oregon Railroad commences at Roseville, at the Central Pacific line, eighteen miles north of Sacramento, and is completed to Tehama, a distance of one hundred and seven miles north of Roseville. The surveys for its extension all through the Sacramento Valley and on the Oregon boundary are, we believe, completed, and work will be prosecuted northward when the rainy season closes. The California and Oregon Road is in direct connection with its parent line —the Central Pacific—and is, therefore, in daily communication with San Francisco, Nevada, Utah, Idaho, Montana and the Atlantic States; while, in addition to this, it runs through our largest, richest and most thickly settled valley. It is a road the profits from which are not likely to be exceeded by any on the coast. Its consolidation with the Central Pacific line allows its long lines of wheat and wool cars to run down to the Central Pacific's deep water docks at Oakland, directly alongside of the vessels that load for Europe with these and other products of the great valley. The California and Oregon Railroad carries the United States mails and does the express business. * * * * * The completion of the California and Oregon branch of the Central Pacific Road, and that of the Great Southern Pacific line, will give us railroad communication from one end of the State to the other, north and south. In future articles we shall speak of the San Joaquin Valley and of the Southern Pacific Roads. All of these railroads will aid us vastly in building up the city and State, and all of us are interested in knowing the facts about them. —*San Francisco News Letter.*

☞ The following gentlemen have been elected directors of the Allegheny Valley Railroad Company for the ensuing year: Wm. Phillips, J. Patton Lyon, Wm. K. Nimick, Wm. M. Lyon, B. J. Jones, Felix R. Brunot, James Park, Jr.

☞ The New Haven and Northampton Railroad Company have recently laid one hundred tons of fish jointed steel rails on their road.

THIRTY-NINTH DIVIDEND.—WASHINGTON INSURANCE COMPANY, No. 172 Broadway, New York, Feb. 8, 1871.

CASH CAPITAL.....$400,000
CASH ASSETS, Feb. 1, 1871.....806,060

A Dividend of (7) SEVEN PER CENT. is this day declared payable on demand, in CASH, to Stockholders.

Also, an Interest Dividend of (6) SIX PER CENT. on outstanding Scrip, payable First of April, in CASH.

Also a scrip Dividend of (50) FIFTY PER CENT. on the earned premiums of Policies entitled to participate in the profits for the year ending 31st January, 1871. The Scrip will be ready for delivery on and after the First of April next.

FIFTY PER CENT. of the Scrip of 1864 will be redeemed on the First of April next, from which date interest thereon will cease.

RAILROAD.

Notice to Contractors.

Proposals will be received at the office of Capt. D. W. WELLMAN, Chief Engineer, at Menasha, Wis., until

Twelve o'clock Noon, on Wednesday, March 1, 1871,

for the Grading, Masonry and Bridging on that portion of the Wisconsin Central Railroad lying between Doty Island and the Wisconsin River at Stevens Point, a distance of about sixty-four (64) miles.

Proposals will be received for the work in each Section (of about (1) mile), or for the whole work; but parties making proposals for the whole will be required to specify the prices for each Section.

Blank forms, setting forth the different items for which proposals will be received, will be furnished on application; and Plans, Profiles and Specifications can be seen on and after Monday, January 23d, at the office of the Chief Engineer, and at the office of the undersigned, in Room 5 Ogden Building, corner Clark and Lake Streets, Chicago, Ill., on and after Monday, February 6th, 1871.

Proposals, accompanied by Plans, are also invited for the Construction of the Railroad Bridge across Wolf River—to be either of Wood or Iron —consisting of one span of one hundred and fifty (150) feet, and one draw of sixty (60) feet, clear space. The bridge to be first class in every particular, and able to meet the requirements of a first class Road.

Saperate proposals will also be received for the whole of the Span Bridging on the above-described work.

Right is reserved to reject all bids not deemed advantageous to the Company.

PHILLIPS & CROSBY,
Contractors.

Chicago, January 18, 1871.

INTERCOLONIAL RAILWAY OF CANADA.

Tenders for Iron Bridge Superstructures.

The Commissioners for the construction of the Intercolonial Railway are prepared to receive Tenders for TWENTY ONE SPANS OF IRON BRIDGE SUPERSTRUCTURE of one hundred feet for each span, and also for sixteen spans of Two Hundred feet for each span.

Printed specifications showing the tests which each span will be required to bear; information as to the location of the different bridges; and forms of tender, can be obtained at the offices of the Commissioners or at those of the Chief Engineer, at Ottawa, Canada; or at the Banking House of Messrs. Morton, Rose & Co., Bartholomew Lane, E. C., London, England.

Parties tendering must submit their own plans of the mode in which they propose to construct the Bridges, and must state the price of each span f. o. b., at the place of shipment; and also the price of each span completed in place.

Tenders for additional spans of one hundred feet, and for spans of eighty feet, will also be received at the same time. Specifications are being prepared and can be had within a few days on application at the places above named.

Tenders marked "Tenders for Bridges" and addressed to the Commissioners, at Ottawa, will be received up to 6 O'CLOCK P. M., of THURSDAY, the 6th day of APRIL, 1871.

The Commissioners will not be bound to accept the lowest or any tender.

A. WALSH.

Rolling Mill Property

FOR SALE,

OPPOSITE NEW YORK CITY.

The well-known NORTH RIVER OR DURBIN ROLLING MILL, situated at Prospect and North 5th St., Jersey City, New Jersey. The Real Estate consists of sixteen city lots, 25x100 feet each, with two large Dwelling Houses, well built and in good order. Also a large building occupying two lots, suitable for a Machine Shop or other purposes, a Stable, &c.

The Rolling Mill was built for the manufacture of Locomotive and other descriptions of Boiler Tank and Plate Irons, contains a heavy Roll Train, Engines, Furnaces, Machinery, &c. to suit, in good order. It can be seen running, and has been successfully run from its establishment in 1855. Situated near the Hudson River, a short and nearly equal distance from all the New Jersey Railroad Depots and Ferries, the Erie Depots and Ferries and the Hoboken or Delaware & Lackawanna Depots and Ferries, from its proximity to the New York Market, the large Locomotive and Railroad Shops of the City and Paterson, the facilities for forwarding to all points by water or railroad, it cannot be surpassed.

The Real Estate is rapidly increasing in value the vast R. R. Interests and dock improvements mentioned having taken up almost the entire River front and space below the mill property from the Cortland St. to Hoboken ferries. The reputation and business established. The Proprietor intends retiring from the business, and for further particulars can be addressed or seen daily at the

Office, 140 HUDSON STREET,
Jersey City N. J.,

In the First National Bank Building.

Propositions for Lease or Selling the Machinery for removal entertained.

Map can be seen and General Information may be obtained also of WM. H. WALLACE & Co., Corner of Liberty and Washington Streets, N. Y., City Agents; and R. R. CHRISMAN, Supt. Central Iron Works, Harrisburgh, Pa. (formerly a Proprietor.)

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

PETELER PORTABLE RAILROAD CO.

OFFICE, 42 BROADWAY, NEW YORK.

TO CONTRACTORS, MINERS, ETC.

By this invention one horse does the work of ten, and one man the work of eight.

Extensively Used, Highly Approved by all.

CARS & TRACKS FOR SALE OR TO LET.

OFFICE OF FISK & HATCH, BANKERS,
No. 5 NASSAU STREET NEW YORK,
Feb. 27, 1871.

THE FIRST MORTGAGE BONDS OF THE

Chesapeake and Ohio Railroad Company,

Originally offered by us last Winter, were so rapidly taken that, prior to the 1st of June last, a sufficient amount had been sold, (upward of $5,000,000,) to supply the Company with all the money that would be required until March or April of the present year.

The CHESAPEAKE AND OHIO RAILROAD—A NEW TRUNK LINE FROM THE SEABOARD TO THE WEST—is already completed and in operation from Richmond to the celebrated White Sulphur Springs, 227 miles, and there remain but 200 miles, now under construction, to complete it to the Western terminus on the Ohio River, 315 miles below Pittsburg, at the head of *reliable and continuous* navigation.

During the past year the work on the Western Division, between the Ohio River and the Falls of the Kanawha, about 100 miles, has been prosecuted with great vigor, and as rapidly as a due regard to economy would permit, over 4,000 men having been employed during a great portion of the time. This division—which will bring the Kanawha coal mines into immediate connection with the Western markets, and with the iron furnaces of Southern Ohio, and thus commence at once the development of the coal traffic of the road—is now nearly ready for the track, which will be laid, and the division put in operation, by the month of August next, (1871.)

Meanwhile the work on the intermediate section, between the Falls of the Kanawha and White Sulphur Springs, is being carried forward, so as to be completed and ready for traffic as soon as the tunnel at the Big Bend of the Greenbrier can be opened.

The entire road will be completed and trains running through from Richmond to the Ohio River during the Summer of 1872.

Provision is made in all necessary particulars for a *double track*, which, it is believed, will be imperatively demanded for the accommodation of the traffic of the road within a very short period after it is opened for through business.

The completed portion of the Road is already doing a GOOD LOCAL BUSINESS, which will be enormously increased as it progresses and opens the immense mineral riches of Virginia and West Virginia, whose coal and iron are celebrated for their quality and abundance, and would alone enrich the means of communication which affords them access to the markets East and West.

The advantages of the Chesapeake and Ohio Railroad AS A GREAT EAST AND WEST THROUGH LINE, for the transportation of the heavy freights (which constitute the principal part of the East and West through traffic), are numerous and important.

1. A SHORT ROUTE, connecting the Atlantic coast with the principal produce centres and markets for the consumption and production of Eastern manufactures and imported goods, throughout the West and Southwest.

2. LOW GRADES.

3. LIGHT CURVES.

4. A GENIAL CLIMATE, which renders the entire route remarkably free from extremes of heat and cold, ice, snow, and climatic obstructions generally, and imparts to it in this respect a marked and important superiority over the more Northerly routes, and admits of safe, economical, and rapid railroad operation throughout the year.

5. A WESTERN TERMINUS at the head of reliable navigation on the Ohio River, at a point *below* the principal obstructions to navigation, from which communication by water with the West, Southwest and Northwest is reliable and almost uninterrupted throughout the greater portion of the year, *and which is nearer to Cincinnati by 315 miles than the western terminus of the Pennsylvania Railroad at Pittsburg, and by 225 miles and 131 miles, respectively, than the western termini of the Baltimore and Ohio Railroad at Wheeling and Parkersburg.*

6. AN EASTERN TERMINUS, on the waters of the Chesapeake Bay, at the centre of the Atlantic coast line of the United States, where is found the best and most commodious harbor on the entire coast for the entrance, shelter, loading and exit of sea-going vessels; with abundance of water for ships of the deepest draught, and always free from ice.

7. A COMPARATIVELY LIGHT CAPITAL AND DEBT, representing cost of construction, and consequently a light tax upon traffic for payment of interest and dividends.

All these conditions favor a cheap and economical working of the line, and enable the Chesapeake and Ohio route to compete successfully for as much of the through *Western* traffic as it can accommodate; and to do a profitable business at rates which would not pay by the more difficult and costly lines.

It will also control a *Southwestern through trade*, peculiarly its own, the area and amount of which will be enormously extended and increased by the establishment of this route, a trade which has now no profitable access to the Atlantic Coast markets, and which no existing route can expect to share.

The most apparent and pressing want of the grain, pork and wool producing regions of the West at the present time, is more economical transportation to the seaboard; and any line of communication which can reduce the cost of this transportation, by ever so little, will widen the area of profitable produc-

tion, and draw to itself a full traffic, by a law as certain and as prompt in its operation as the law of gravitation itself.

The waters of the Ohio River, which flow by the western terminus of the Chesapeake and Ohio Railroad, connect with more than 12,000 MILES OF RELIABLE RIVER NAVIGATION, and 8,000 MILES ADDITIONAL which are available for portions of the year; and with over 20,000 MILES OF RAILROAD.

These rivers and railroads wash the shores and traverse the territory of SIXTEEN MAGNIFICENT, POPULOUS, AND GROWING STATES, containing 1,000,000 square miles; unite more than 200 towns and cities, of which at least twenty-five contain each a population of 20,000 and upward; and minister to the wants of ten millions of people.

The tonnage of the upper Ohio, in steamers, barges and boats exceeds that of New York; and the trade of the Ohio River, as estimated by Government engineers, exceeds the entire foreign commerce of the United States.

To all this vast area, with its magnificent internal systems of water and railroad transportation, its teeming population, its wealth of production, and its enormous commerce, THE CHESAPEAKE AND OHIO RAILROAD OPENS AN ACCESSIBLE, SHORT, EASY AND ECONOMICAL OUTLET TO THE ATLANTIC COAST, upon whose shores the great West and South west must find the chief market for their products, and whence they must mainly draw their supplies of manufactured and foreign goods.

Among the officers and Directors are some of our best known and prominent business men.—Mr. C. P. Huntington, whose financial management of the great Central Pacific Railroad has been so successful, is President of the Company, with Messrs. W. H. Aspinwall, A. A. Low, F. G. Clark, Richard Irvin and others, well known merchants of New York, as Associate Directors.

We are now authorized to sell an additional amount of the

FIRST MORTGAGE 6 PER CENT. GOLD BONDS of the Company, at the original price of 90 *and accrued interest.*

The Bonds are secured by a mortgage upon the entire road, franchises, and property of the Company, WHICH NOW, IN COMPLETED ROAD AND WORK DONE, EXCEEDS THE ENTIRE AMOUNT OF THE MORTGAGE; and which, when completed, will be worth at least $30,000,000.

A *Sinking Fund* of $100,000 per annum is provided for their redemption.

They are issued as Coupon or Registered Bonds, and in denominations of

$100, $500, and $1,000.

Interest payable May and November, in the City of New York.

The superior advantages, valuable property and franchises, and able and honorable management of the Chesapeake and Ohio Railroad Company render it one of the most substantial, reliable and trustworthy Corporations in the country, and commend its Securities to the unhesitating confidence of capitalists and investors.

Pamphlets, maps and full particulars furnished upon application.

FISK & HATCH, Bankers.

Springfield and Illinois Southeastern R. R.

The annual meeting of the stockholders of this company was held at their office in Springfield, Ills., on the 22d ult., for the purpose of electing thirteen Directors for the current year. Nearly the entire amount of stock was represented, and the following named persons were chosen Directors, viz: Thos. S. Ridgeway and Charles Carroll, of Shawneetown, Ills.; Hon. Wm. P. Cutler, General Orland Smith, and Col. E. C. Dawes, of Ohio; Charles A. Beecher, of Fairfield, Ill.; M. H. Bloodgood, of New York; Dr. W. B. Wilson, of Flora, Ill.; Hon. Alex. Starne, Hon. J. W. Priest, Geo. N. Black, C. W. Matheney and F. W. Tracey, of Springfield.

At a meeting of the newly elected Board of Directors, the following were chosen as the officers for the ensuing year: Thos. S. Ridgeway, of Shawneetown, Ill., President; C. A. Beecher, of Fairfield, Ill., Vice President; Geo. N. Black, of Springfield, Ill., Secretary; Col. E. C. Dawes, of Cincinnati, Ohio, Treasurer; Gen. Orland Smith, of Chillicothe, Ohio, General Superintendent; Geo. W. Norris, of Flora, Ill., Superintendent Southern Division.

The Springfield *State Journal*, from which the above is taken, says the result of the operation of the completed portion of this road during a part of the year 1870, fully demonstrates the necessity and practicability of a railroad through the territory traversed by this line, extending from Shawneetown on the Ohio, to Beardstown on Illinois river, a distance of two hundred and twenty-six miles, and crossing in its course thirteen other railroads, thus giving to residents along its line easy communication with all points of the country. Of this distance (226 miles) there is completed and in operation ninety-six miles from Shawneetown to Edgewood, Illinois, and sixty four miles from Pana to Ashland; in all, one hundred and sixty miles. Of that portion from Ashland to Beardstown, a distance of twenty-four miles, the grading is nearly completed, and ties and iron on the ground for the entire distance, and the iron laid on about five miles; and it is confidently expected that trains will run over this line to Beardstown by the first of May. Arrangements are being made for the construction, during the coming summer, of that portion from Edgewood to Pana, which will open a line that will command a very large amount of trade.

Lamps for Railroad Cars.

Messrs. WILLIAMS, PAGE & Co., Boston, Mass., manufacturers of Passenger Car Lamps, have recently introduced to Railroads a new Lamp, with flat wicks, which burns the Downer Mineral Sperm Oil for Passenger Cars. This oil is not Kerosene, but a product of the heavy oil, after the Kerosene and light oils have passed off. It stands, according to Prof. Hayes, State Assayer and Chemist, Mass., a "fire test" of 306 degrees, or nearly 100 degrees above the heat of boiling water, and nearly three times the legal standard of Kerosene. The oil is straw colored, has but very slight odor of any kind at 60 degrees, and a specific gravity of 868. This Lamp is advertised in another column. In the advertisement allusion is made to statements of Professors Silliman and Chandler regarding the safety of this oil, in comparison with sperm. Prof. Chandler considers it safer than any other hydro carbon oil in use at the present time, and fully as safe as sperm oil. It stands a flashing test of 250 degrees, and a burning test of 292 degrees. (The legal standard is: flashing point 100, and burning point 110.) Numerous experiments with different lamps, showed that the temperature of the oil never rises in practice above 100, which is 150 below the flashing, and 192 below the burning point of the Mineral Sperm. Prof. Silliman esteems it as safe, in all respects as sperm oil, and much superior in duration and in purity of illumination, and absence of carbonization of the lamp wick, to any other known to him, whether animal, vegetable or mineral. The boiling point of this oil is about the same as that of sperm, viz: 500 to 550 degrees. The use of the oil is approved by Insurance Companies. For Circular, giving full description and explanations, address Messrs. WILLIAMS, PAGE & Co., 91 Water St., Boston, Mass.

Boston and Albany Railroad.

The receipts and expenditures of this road for ten months of the financial year which terminated September 30, 1870, were as follows:

Receipts:		
From passengers		$2,188,192 20
" freight		3,265,481 67
" mails and other sources		332,313 27
		$5,785,987 14
Expenses, viz:		
Repairs of roadway	$761,968 14	
Repairs of engines	367,995 28	
Repairs of passenger and freight cars	518,880 63	
Repairs of buildings, ferry, etc.	216,188 89	
Transportation exp.	2,040,282 71	
General expenses	50,357 67	
		3,995,673 32
Net balance of income		$1,830,313 82
From this deduct—		
Interest on state loans and exchanges	$315,893 13	
Five per cent. July dividend, including Government tax	863,189 45	
Dividend on Pittsfield and North Adams R. R, three per cent.	13,500 00	
		1,192,582 58
Surplus not divided		$637,731 24

—subject to a charge of $40,000 to Sinking Fund, and second dividend to Pittsfield and North Adams railroad of $13,500=$53,500.

SINKING FUND.

Value of Massachusetts Sinking Fund, Nov. 30, 1869		$1,665,231 03
Earnings in 1870		120,653 87
		$1,785,884 90
Paid £180,000 due April 1, 1870, at $4.80	$864,000 00

		948,860 20
Value of fund Nov. 30, 1870		$837,024 70
Value of Albany sinking fund, Nov. 30, 1869	$506,560 54	
Earnings in 1870, including taxes refunded by Government	36,943 88	
	$543,504 42	
Interest paid in 1870	26,000 00	
	$517,404 42	
Bonds paid in 1870	219,000 00	
Value of fund Nov. 30, 1870		298,404 42
Value of both funds, Nov. 30, 1870.		$1,135,429 12

The gross receipts for the year ending November 30, 1869, were $6,796,456. For the ten months ending September 30, 1870, the receipts

were $5,786,987; and for the months of October and November, $1,367,602—making a total for the year 1870 of $7,153,589; showing an increase over the year 1869 of $357,133. The report says:

The balance of the sterling debt, viz., £157,400, will be due in London on the first day of April next. A portion of these bonds, viz., £30,600, are now in the hands of the Commissioners of the Sinking Fund, the assets of which fund, together with the usual annual contribution, will, it is confidently believed, enable the Commissioners to remit in full for the balance of these bonds at their maturity. Should anything further be required, however, it will be furnished by the corporation, and thus the final obligation to the Commonwealth for money loaned to build the road, will on the first day of April be paid in full.

The Albany bonds, unfortunately not yet due, are provided for by the Albany Sinking Fund. The corporation would be glad to treat these obligations also as due the present season, and to that end, the holders are invited to present them for payment.

The rolling stock and roadway have been much improved; the former by the addition of new and improved cars and engines, and the latter by the substitution of steel rails, though not to so great an extent as we had expected, owing to the failure of the English makers with whom we have large contracts, to deliver their rails according to agreement. The widening of the roadway into the City of Boston, the raising of the bridges, and the construction of new iron bridges over Harrison Avenue and Washington Street, have been successfully completed. New engine houses have been built in Boston and West Springfield, extensive car shops at Allston, and the works in progress at East Boston at the commencement of the year have been completed. Nothing has yet been done to improve the South Boston Flats, except to deposit thereon the material dredged from the docks and bar in front of the same at East Boston. The future of this enterprise must depend largely upon the action of the Commonwealth, or the Harbor Commissioners, since the work of filling and protecting this territory by proper sea walls can not be effectually prosecuted except in connection with the Commonwealth and other parties, owning a much larger water front than we have contracted for.

Contracts have been entered into for a double track iron bridge at Albany by the Hudson River Bridge Company, of whose capital stock we are one-fourth owners. This bridge is already under way, and will be completed in the season of 1871. The lengthening of the piers of the bridge at Springfield preparatory to building a double track iron superstructure has also been commenced.

The matter of improved depot accommodations, both at Springfield and Worcester, has received the careful attention of the Board, but owing to the diversity of interests, public and private, which it is found necessary to reconcile in large changes of this character, no definite plans have yet been agreed upon. At Boston, also, the necessity of enlarged and improved depot accommodations is becoming daily more and more apparent. One of the chief obstacles to be encountered in any enlargement of our accommodations at or near the present site grows out of a disposition manifested by neighboring proprietors to speculate upon what they deem the necessities of the Corporation. While this state of things is to be regretted, it will not permanently interfere with the accomplishment of our purposes, but may lead to the adoption of another and not less favorable location for this business.

In conformity to the law of 1869, the day for making our annual return has been brought forward two months, thus giving but ten months business upon which to make up the present report, and affording four instead of six months' receipts for the present dividend. The balance required for this dividend, after applying the net earnings of the four months' business, has been charged to the Contingent Fund, which represents the unexpended earnings of former years. In the future, in order to close each year's business by itself, it is proposed to change the dividend day from July and January to May and November.

The consolidation of the Boston and Albany, the Albany and West Stockbridge, and the Hudson and Boston Railroads into one corporation, under the authority granted by the Legislature of the States of New York and Massachusetts, has this day been consummated, by more than two-thirds of the votes of the stockholders of this corporation.

By this act, all the powers, privileges, rights, franchises and property of the several companies vest in the new corporation, under the name of The Boston and Albany Railroad Company.

The company have 50 passenger and 113 freight locomotives; 118 passenger, 40 baggage and postal, 3,045 merchandise, 137 gravel and 100 hand cars. Also, 98-234ths of 46 passenger, 4 express, 5 post office, and 12 baggage cars of the New York and Boston Express Line, and 2 5ths of 2 passenger and 2 baggage cars on Steamboat Train.

The number of miles run by locomotives with passenger trains, was 905,053; with freight trains, 1,887,995; with gravel trains, etc., 84,492—total, 2,877,540.

The number of through passengers carried, was 57,322; way do., 3,697,411—total, 3,754,733. Number of passengers carried one mile, 78,808,929.

The total number of tons moved was 1,531,149, of which 502,564 went west, and 1,028,585 east. The through tonnage westward amounted to 84,168; do., eastward, 241,308. All other tonnage westward, 418,396; do., eastward, 787,277. Equivalent number of tons carried one mile, 148,871,491—equal to 744,357 tons carried over the whole road.

An aggregate of 227,680,420 passengers or tons of freight carried one mile in 1870, against 254,257,409 passengers or tons of freight carried one mile in 1869.

The cost of transportation for each passenger and each ton of freight one mile this year has been 1.787 cents, against 1.888 cents in 1869.

The cost of the Boston and Albany, Albany and West Stockbridge, and Hudson and Boston Railroads to September 30, 1870, has been as follows:

Boston and Albany Railroad	$14,628,725 08
Equipment	2,861,337 78
Albany and West Stockbridge R.R.	2,411,055 75
Hudson and Boston Railroad	203,036 01
West Stockbridge Railroad stock	13,000 00
Grand Junction Railroad	1,378,751 26
South Boston Flats	442,722 73
Total	$21,938,628 61

INEQUALITIES AND DISCRIMINATIONS—METHODS OF ASSESSMENT AND COLLECTION.

(Continued from Page 209.)

TAXATION OF MORTGAGES.

A universal and uniform system of taxation according to the popular acceptation, would of necessity require that mortgages of real estate should be taxed in common with other property, and such is the case in New York, Massachusetts, and most of the States. The subject has been much discussed and in the late Constitutional Convention of New York, the weight of opinion seemed to be that if the present practice of allowing indebtedness to offset the valuation of personal property is to be recognized, the deduction of the value of mortgages from the value of real estate should be allowed. The New York Commission of 1862–'63 reported a law to the effect, "that the net value only of every person's taxable estate, whether invested in land or in any other species of property," should be taxed; and that the taxes levied on mortgaged real estate should be proportionably assessed on the land and on the possessor of the mortgage, and that the mortgage thus assessed should not be otherwise taxed. The commissioners of New Jersey and Connecticut, on the other hand, came to an exactly opposite conclusion, and recommended that both the land and the mortgage be taxed on their full valuation, holding that the two are independent property, and that the taxation of both would not be, therefore, double taxation. Writers differ, but the test of experience is decisive. On this point the report says:

"The land owners desires the use of capital in order to improve his property; it may be to drain it, fence it, build on it, or otherwise improve. It is especially for the interest of the State that this should be done; to increase the area and amount of its crops; to provide comfortable and abundant homes for its citizens and working classes; to attract population; and, to speak plainly, increase the value and amount of real, tangible property, such as shall serve as a basis of, and not evade, taxation. But the capitalist is entitled to and will have the legal rate of interest on his money; and abundant opportunities are

afforded him for obtaining that, and even more; as by investing in national, State and railroad bonds, exempt by law from taxation, or sold at a discount sufficient to compensate for taxation; or in bonds and mortgages on real estate in New Jersey and Pennsylvania, or in many of the Western States and cities or in Connecticut, where the statute allows the lender of money on mortgage to add to the legal rate of interest the rate of taxation and also the premium for insurance; or in ground rents, a condition of which may be that the taxes are to be paid by the occupier.

"On the other hand, the State of New York, by taxing mortgages, virtually says to the lender of money on these securities, "You shall not have in return the legal rate of interest;" for the mortgage, being matter of record, cannot be concealed, and accordingly, by requirement of law, is usually taxed at its full valuation. But it is obvious, if it is so taxed, that the investor generally will receive not only less than the legal rate of interest, but less than would be afforded by an nvestment of his money in almost any other security. Nay more, there have been instances in New York in which the holder of a mortgage, if taxed according to law, would lose not only his entire interest, but would further be obliged to pay a sum additional for the privilege, as it were, of holding such an investment. Thus, for example, a mortgage in New York city cannot today, without a violation of the usury laws, or a dereliction of duty on the part of the assessors, or except purchased at a discount, yield over 4 7-10 interest; in Brooklyn, 3 1-10; in Albany, 2 4-10; and in Rochester, but three tenths of one per cent.; and as the rate of taxation in the latter city in former years has been in excess of seven per cent., it is clear that money loaned on real estate mortgages in that locality must have theoretically paid more in taxes than it received in interest."

The result is exactly what might have been expected. Capital which formerly found its way into real estate mortgages is now directed into other channels, and to such an extent that it is difficult to obtain money for the improvement of real estate on the pledge of the property.

"Again, it was formerly a very general custom to embody in wills a provision that property bequeathed, or to be held in trust, should be invested in mortgages; but this custom, the Commissioners are informed, is now almost entirely done away with, while executors and trustees are continually importuned by legatees to change the character of such investments on the ground that they no longer continue to afford a fair interest. In one instance, the Commissioners were frankly informed by a Board of Assessors, that their feelings as men would not allow them to assess mortgages, according to the strict provisions of the law, when they knew that by so doing they would deprive widows and orphans of almost their entire income. In another instance it was pleaded that the interests of a city would not allow its Assessors to tax its local mortgages, inasmuch as so doing would inevitably restrict growth, and that a certain annual growth or land improvement was absolutely essential in order to prevent the rate of taxation by reason of annually increasing expenditures, from becoming unbearable."

Connecticut taxes mortgages at their full valuation, but provides that as between residents of the State indebtedness might be deducted from valuation, when, at the instance of the debtor, the debt could be transferred for taxation, to the list of the assets of the creditor. An additional law was enacted, reading as follows: "No contract shall be deemed usurious by reason of the borrowers' paying, or agreeing to pay, the taxes assessed and paid on the sum loaned, or the insurance upon the estate mortgaged to secure the same"—the practical effect of which is to throw the onus of the taxation on the debtor and entirely exempt the creditor. New Jersey and Pennsylvania have more wisely exempted mortgages from taxation over a large part of their territory, and the demand came not from the capitalists but from the small landholders and the working classes. The effect has been excellent. The Commissioners are of the opinion that this discriminating legislation of contignous States imperatively requires that the same exemption shall be granted here, and furthermore, that so far from diminishing the taxable property of the State, the effect of such exemption will be (at least after a little time) to greatly increase it; and at the same time prevent diversion of a large amount of the legitimate capital of the State beyond its borders.

OTHER CONDITIONS AFFECTING TAXATION.

Another point of great importance is the consideration how far personal property, from its very nature, and from the action of laws, national and State, is placed beyond the jurisdiction of the State for assessment and taxation. As partaking of such a character, the following descriptions of personal property may be enumerated. 1. Imported goods, wares and merchandise, in original packages, in possession of the merchant importer. 2. Bonds, notes and other securities or evidence of indebtedness of the United States. 3. The deposits and the surplus of the savings banks of the State. 4. Indebtedness. 5. Personal property belonging to citizens of New York, but actually situated out of the State. Upon this point the Report cites legal opinions and constructions as to the *situs* of personal property. 6. Property in transitu. 7. Negotiable instruments. On this point the report examines first, the practicability and, second, the expediency of such taxation, and, third, the extent of the jurisdiction of the State over such instruments. Legal decisions are referred to at length. The Commissioners conclude that such taxation is both impracticable and inexpedient. 8. Situs of ships for the purpose of local taxation. 9. Exemption of Property from Taxation through extra legal or Adventitious Circumstances. It may be taken as an axiom that no tax law can be fully and permanently executed which is in opposition to any considerable public sentiment, or which in itself contains extraordinary inducements for its violation. The old Government tax of two dollars on whiskey may be cited as an example. Philadelphia imposes an annual tax on watches, and the assessors could find only 12,871 watches. In Boston the decrease in personal valuation during the past year has been $6,452,900, a large proportion of wealthy citizens leaving to escape taxation. In one of the cities of New York the assessors informed the Commissioners that they had tried the plan of assessing wealthy citizens at an approximate full valuation for personal property, and finding the result universally one of detriment to the city had desisted. Experience had shown that a tax on full valuation was never paid by such citizens but once, for they then sold their property and changed their residence. In Massachusetts, under the system now prevailing, forty-two per cent. of the voting population have no taxable property. The report says:

"The facts and statements submitted also make clear that of the personal property of the State of New York, the following descriptions or classes are already exempt from taxation or beyond the jurisdiction of the State for such purposes: 1. Imported goods, in original packages. 2. Bonds, notes, and securities of the United States. 3. Visible personal property of citizens of the State located without the State. 4. Property brought within the territory of the State for sale. 5. Deposits in savings banks. 6. Personal property represented by indebtedness; custom and the temptation for evading taxation, including under the head *constructive* as well as *actual* indebtedness. 7. Personal property of citizens of the State in the hands of trustees residing without the territory and sovereignty of the State.

"Of property whose taxation by the State involves the exercise of doubtful powers, we have: 1. Mortgage bonds, or evidence of indebtedness created by different States or corporations of such State, over which another State sovereignty is claimed and exercised. 2. Negotiable instruments, the property of citizens of New York having an actual *situs* without the State. 3. Ships belonging to citizens of the State, but registered without the State."

PROPOSED NEW SYSTEM OF TAXATION.

The Commissioners propose a new system of taxation with the following points:

First.—Provide for the taxation of all corporations created by the State which are in the nature of a Monopoly. Of such the gas company is the type. Other corporations approximating in character would be the national banks, the State banks, railroad corporations, omnibuses, ferries and bridges. Manufacturing firms and corporations would not be included. Private banks should be taxed and the surplus of savings banks, insurance and trust companies can be taxed moderately without detriment. The Commissioners believe that on a true valuation of property on this plan a revenue would be derived equivalent to that now obtained on the whole valuation of personal property. The present system of taxing railroads by the different towns through which they run is very objectionable, and the commissioners recommend that the State, take the whole taxation of railroads into its own hands, as in Massachusetts. In the latter State indeed, the Courts have decided that the roadway of the railroads being taken in the exercise of the right of eminent domain is not liable to local taxation.

Second. The second provision of the plan of taxation recommended by the comissioners would be, to tax land exclusive of building at a uniform valuation of fifty per centum of its true marketable or fair value.

It is obviously immaterial, so far as equity is concerned, what standard of valuation is adopted for any given class of property, provided that the standard be uniform; but the reasons for recommending *fifty per centum*, or some valuation less than a full one, are connected with the next and third provision of the proposed system of the commissioners.

Third. The problem here presented is: Can the present imperfect system be done away with, and personal property at the same time be made to sustain its equitable and proportionate share of the public burdens?

To this the commissioners reply unqualifiedly in the affirmative, and for the following reasons:

Every person possessed of personal property, unless he convert such property into money and refrains from all use of it, affords some sign or index of its possession.

In England, France, Belgium and Holland (in

all of which countries, at the commencement of the seventeenth century, the same system of indiscriminate and universal taxation prevailed as now in the United States), experience has led to the conclusion that the rental value of houses or other occupied buildings is the most certain index of the value of the personal estate of the owners and occupiers, and the best measure of their ability to pay. The Commissioners, therefore, propose, as the third provision of their new system, one of the following plans:

"1. Tax the house or building as real estate separately, at the same rate of valuation as the land, that is, fifty per cent; and then assuming that the value of the house or building, irrespective of its contents, be such contents furniture, machinery or any other chattels whatsoever, is the sign or index which the owner or occupier puts out of his personal property, tax the house or building on a valuation of fifty per cent. additional to its real estate valuation, as the representative valuation of such personal property: or in other words, tax the land separately on fifty per cent. of its fair marketable valuation, and tax the building apart from the land, as representing the owner's personal property on a *full* valuation, as indicated by the rent actually paid for it or its estimated rental valuation.

"Or as a substitute for the above third provision the following:

"2. Tax buildings conjointly with land as real estate at a uniform valuation: and then as the equivalent for all taxation on personal property, tax the occupier, be he owner or tenant of any building or portion of any building used as a dwelling, or for any other purpose, on a valuation of three times its rental or rental value of the premises occupied. Tenement houses occupied by more than one family, or tenement houses having a rental value not in excess of a fixed sum, to be taxed to the owner as occupier.

"All property not embraced under one of the three provisions as above stated to be entirely exempt from all taxation."

To recognize clearly the principle of these provisions, it is necessary to remember that the market value of real estate is always proportional to and dependent on the amount of personal property, or rather productive capital placed upon it, or in its immediate vicinity. Applying the system practically to this State, taxation would be the lowest in the most sparsely settled agricultural regions. Property here is mainly in land, whereas in the cities the value of the building generally exceeds the value of the land on which it is situated. The sum of three times the rent or rental value is taken as the basis of the valuation of personal property on the assumption that this is the minimum rate that exists between rent paid, or rental value of the building occupied, and the other available means or income of the tenant or owner.

CONSIDERATION OF OBJECTIONS.

It may be objected that the plan would offer a premium for tame architecture and cheap structures, but the Commissioners answer that there is nothing in which wealth so instinctively seeks to display itself as in ornamentation. The Report meets another objection thus:

"Again let us consider how the proposed system of taxation will affect persons of small means, who, by long continued effort and saving, have obtained a homestead, but, through inability to completely pay for the same, have given a mortgage upon the premises. As the case now stands, they are liable to taxation under the existing law on its full valuation of their real estate, and also on their furniture and other personal property. The mortgage on the property is also subject to taxation, which, as before demonstrated, is also, either directly or indirectly, paid by the borrower or mortgagor. And here it is to be remembered that the present system already practically imposes the bulk of the taxes on real estate, and that, under the recent legal decisions, the amount of personal property that can be directly made subject to taxation will every year become proportionably less.

"Let us suppose the property in question to be located in Brooklyn, Troy, Albany or Rochester, in all of which cities the present rate of taxation is in excess of four per cent. If the assessment is made on a full valuation of $4,000, the annual taxation of four per cent. would be $160; and if on a valuation of fifty per cent. (which valuation must soon be exceeded, if personal property is to continue to evade its liabilities), eighty dollars.

"Under the proposed system of the commissioners, the rate cannot be in excess of *two* per cent., and will probably be much less. *Two* per cent. on a fifty per cent. valuation of the land, supposing the value of the property to be equally divided between the land and the building, would be twenty dollars. Two per cent. on a full valuation of the dwelling would be forty dollars; total sixty dollars annual taxation. Or according to the basis of the second proposition of the commissioners, in which *three times* the rent or rental value of the premises is taken as the representation of the personal property, the taxation would be as follows: *Two* per cent. on a *fifty per cent.* real estate valuation of the whole property would be $40.

"Assume then the rental to be equivalent to ten per cent. on the full value of the property, or $400; *three times* this would be $1,200, on which the taxation at two per cent. would be twenty-four dollars; making the total taxation sixty-four dollars, as compared with sixty dollars according to the basis of the first proposition; and eighty dollars according to a fifty per cent. valuation under the existing laws, *plus* the taxes on the mortgage encumbrance, and on all the personal property of the owner. And yet, while every real estate owner in the State will, under the proposed system, equitably pay less than now on his real estate, the valuation of the State, through a real and unavoidable inclusion of its personal property, will be very greatly increased."

The Commissioners show by figures that the effect of the system upon the valuation of the State would be to increase it over a thousand millions. In New York city it would give a valuation representing personal property of $504,000,000 as compared with the present valuation of $281,000,000. The system would also practically place other securities upon the same footing as Government bonds, thus stripping the latter of their exclusive privileges. Another advantage is that the individual would see and feel in a consolidated form the proportion of the public burden he sustains, and would have his attention directed more powerfully to the manner in which the revenues are disposed of.

"A striking illustration of the truth of this proposition is now afforded in the case of the city of Philadelphia, one of the cleanest, most convenient and prosperous cities of the country. Taxation for municipal and county expenditures, as has been before shown, are here assessed almost exclusively upon land and buildings, and yet in no other city in the country are rents so moderate, the buildings so tasteful and the investment in real estate mortgages regarded with more favor. While New York city, with a population of 927,000, in the years 1869 and 1870, built or proposed to build 4,537 buildings; Philadelphia, with a population of 657,000, issued permits for erection within its limits, during the same period, of over 10,000 buildings, a large proportion of which were for dwellings."

On the subject of a uniform regulation of the rate of taxation, the report says:

"A peculiar feature, which has for some time characterized the tax system of France, seems to the commissioners worthy of being incorporated also, in any new system which may be adopted for New York, viz., that of limiting, by legislative authority, the rate according to which taxes may be levied in any one year. The Revised Statutes of France provide that the *Corps Legislatif* shall annually establish the maximum rate of taxation, above which no real estate shall be taxed. Then the *Corps Legislatif* annually apportions the amount to be raised by the several departments, and limits the rate of taxation which the *conseils generaux* (boards of supervisors) may levy in apportioning the rate for the expenses of the *cantons* (counties) and also for the municipalities.

"The *Corps Legislatif* also, in annually levying the direct taxes, gives authority for the levy of a special tax at a small rate, the proceeds of which are to be used exclusively in paying pressing claims on the departments, cantons, or municipalities, in case other sources are not sufficient to meet and discharge such immediate liabilities. A permanent law then defines what shall be considered as 'pressing liabilities,' viz., the maintenance of the buildings of the 'prefecture,' the salaries of the judiciary, the interest of debts lawfully contracted, and the judgment of the courts."

On disproportionate taxation, the Commissioners remark:

At present if an individual is assessed on a valuation in excess of the true value of his property, he can obtain relief by personally appearing before the board of assessors and, as it is termed, "swearing down" his valuation. But if he is assessed through error or partiality of the assessors, on a valuation disproportionate to his neighbors, and yet not in excess of the true value of his property, there is no mode of obtaining relief now open to him under the existing system.

"To remedy this defect, and insure equality, the Commissioners have proposed a plan believed to be entirely new in American tax systems, and which in substance is as follows: The individual aggrieved may appear before the assessor or tax commissioners sitting as a board of review; and if he can show by the testimony of creditable witnesses that he has been disproportionately assessed by the undervaluation of the property of his neighbors, the assessors or tax commissioners shall immediately raise the valuation of all such property undervalued to a full and fair valuation, and thus give relief to the aggrieved party by a full, fair and just valuation."

The appendix embraces the following points:

"Appendix A, Local taxation in Canada; appendix B, A detailed analysis and review of the legal questions and court decisions involved in the determination of the situs of personal property, and the jurisdiction of States in respect to the same; appendix C, Outline codes of law in accordance with the provisions of the new system of taxation recommended by the commissioners."

☞ The Media (Penn.) *American* says: The grading on most of the sections of the new bed of the Philadelphia, Wilmington and Baltimore Railroad is rapidly proceeding. The filling in across Stone Creek will be thirty-five feet high. The contract for the bridge over the creek has been given to Armstrong, of Philadelphia. A bridge will also be erected at Hickman's mill.

☞ As the spring begins to open, operations on the Alexandria and Fredericksburg railroad are increasing in magnitude. Large gangs of laborers are now at work at different points along the line of the road, and in a few weeks the entire route between Alexandria and Fredericksburg will be in progress of construction.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, March 4, 1871.

Stock Exchange and Money Market.

With the increased activity in the dealings at the Stock Exchange, Money has been in livelier demand, for speculative purposes, but has been offered freely up to the close, on the basis of 4@5 per cent. as the prevailing rates on call to the leading borrowers. Mercantile credits have been in good request at 6@7 per cent. per annum, for all prime grades of business paper. The city banks, in their weekly returns, show a gain of $811,769 in their legal tender reserve, with an addition of $1,338,783 to their deposit line, while the specie item exhibits a falling off of $1,145,289. The loan and discount averages have been increased $3,093,479, and the circulation has been reduced $17,396. The U. S. Sub Treasury closed the week with a currency reserve of $7,496,156, against $9,919,967 the preceding Saturday; and a coin balance of $65,015,680, against $63,383,013 on the 18th ult. The peace reports from Europe, and the more liberal financial programme of the Treasury Department for March have tended to strengthen confidence in financial values, in the immediate future, and the transactions at the Stock Exchange in the Public Funds, Railway property, and miscellaneous shares have been on a much more extensive scale at higher and rising prices.

Under the Treasury programme for March, Government will sell at least seven millions of Treasury Coin, beginning on Thursday, March 2, with $1,000,000, and continuing through the month, as follows: Thursday, March 9, $2,000,000; Thursday, March 16, $1,000,000; Thursday, March 23, $2,000,000; Thursday, March 30, $1,000,000. And buy in, at least, two millions of Bonds on each of the five Wednesdays of the month, beginning with Wednesday, March 1, and ending with Wednesday, March 29, making an aggregate of at least ten millions, the Department reserving to itself the usual privileges.

Washington advices to Wednesday evening make the net reduction in the Public Debt in February $7,817,960. The reduction since March 1st, 1870, is given at $117,619,630; and March 1st, 1869, at $204,754,418.

The coin reserve of the Treasury on March 1, was $103,174,209, including $20,657,500 on private deposit; currency reserve, $20,854,606.

The specie reserve of the city banks according to the latest return is $23,562,048, against $35,694,289 same time last year. The city bank deposits are now $217,629,116, against $211,132,943 week ending Feb. 27, 1870. The legal tender reserve amounts to $57,178,408, against $53,771,824 same time last year. The circulation now stands at $31,720,445, against $23,820,905 same time last year. The loans are now $278,005,999, against $268,485,642 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $79,911,803 a day, against a daily average of $77,524,569 the preceding week. The current week's exchanges average about 104½ millions a day. The city banks, last week reported a loss of $1,145,289 of specie, with a gain of $1,338,783 of deposits, and $811,769 of legal tender notes. They increased their loans $3,093,479; and reduced their circulation, $17,396.

National Bank notes to the amount of $241,940 were issued last week by the Treasury Department. Deducting from the grand total issue to 1741 banks the currency returned, including worn out notes, amounting to $38,612,767, the existing 1,648 banks, (with an aggregate capital of $485,356,084.) retain an actual circulation of $308,889,228. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $352,575,000; and for the public deposits, $15,899,500—making a total of $368,474,500. The Treasury Department last week redeemed and destroyed $302,200 of worn and mutilated fractional currency, and issued $176,472 of new.

The U. S. Sub-Treasury, on Thursday morning of this week, held a balance of $10,288,890 in currency, and $64,894,428 in coin against a balance a week previous of $9,616,347 currency, and $64,713,810 coin.

The U. S. Sub-Treasurer retired, last week, $3,324,921 of coin certificates, received for customs.

The total receipts of the Sub Treasury in February were $45,188,557, including $12,681,658

from customs at the port; total payments, $46,783,829, including $2,454,112 of coin interest. Aggregate coin balance at the close of February $72,600,662, against $74,125,933 at the close of January.

Government revenues have been yielding quite liberally, since our last. The customs at the port of New York, last week were $3,610,921; and at the outports, equal to about $1,200,000 more, all in coin, or coin certificates. The internal revenue yield thus far in the current fiscal year beginning with July 1, 1870, has been about 102 millions.

Gold has been more active, but less firm, having fallen to 110¾ and closing on Wednesday at 111, under the more liberal offerings, and the somewhat improved political and financial situation in Europe, which has served to strengthen confidence in the home market. The Government office has already disbursed about 2¼ millions of coin on account of the March interest on the Ten-Forty Loan, the payment of which, without rebate, was commenced on Friday, Feb. 24, under instructions from Secretary Boutwell.

On Wednesday the steamer *Wisconsin* took out $2,500,000 in Mexican silver, a trans-shipment. The *Cuba* took out $178,500 in specie.

The Gold Exchange Bank clearances on Thursday of last week were $17,696,000; on Tuesday of this week $54,809,000, the extremes since our last.

The export drain was $690,048 last week against $521,782, same week preceding year. The shipments since July 1, 1870, have been $47,383,708, against $21,529,200 same time in 1869–'70.

The customs demand for Gold last week, averaged $725,000 a day; thus far, this week, it has averaged $564,000 a day, or equal to a weekly aggregate of $3,284,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $28,326, and since Jan. 1, 1871, $419,784, against $3,051,570 same time in 1870. The total customs revenue of the Government, in coin, at this port, since July 1, 1870, has been $94,721,608, against $86,271,303 same time in 1869–'70.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt since July 1, 1870, $64,561,000 against $64,343,737 same time in 1869–'70.

Foreign Exchange has been in less confident demand and quoted a trifle cheaper. Bankers' sixty day bills on London closed on Wednesday at 109¾@109⅞; sight bills on London, 110¼@110⅜.

Government securities have been in brisk request at advanced and buoyant price.

On Wednesday, Government bought in two millions of Five-Twenties at 109 92@109 98, ex-interest. The amount of bonds offered was $4,804,600.

U. S. sixes of 1881 closed here on Wednesday of the current week at 114⅝@114¾; U. S. Five-Twenties of 1862, 112@112⅛; U. S. Five-Twenties of 1864 at 112@112⅛; U. S. Five-Twenties of 1865, 112@112⅛; U. S. Five-twenties of 1865 consolidated, 111@111⅛; U. S. Five Twenties of 1867, 111@111⅛; U. S. Five-twenties of 1868, 111⅛@111¾; U. S. Ten-forties at 109⅞@110 ex-coupon; U. S. Six per cent. currency bonds, 113¼@113½.

State bonds have been in more demand, at generally firmer prices.

Railway bonds have been in good request, the instances of the principal loans at buoyant prices. Central Pacific Sixes have been quite active, closing at 95½@95¾. The demand for this Loan has been stimulated as well by the reported admission of the bonds to the regular dealings at the London Stock Exchange, as by the Washington advices of the action of the Senate Committees on the issues pending between the Government and the great Pacific Railways, which strengthened the belief that the final ruling would be in favor of the Road. The Chesapeake and Ohio R. R. First Mortgage six per cent. gold bonds have been in quite active request at 90 per cent. and accrued interest. The first portion of this Loan marketed through the earlier half of 1870, yielded enough money to meet all the requirements of the Company, including all the large construction claims, up to March or April of the current year. In view of the prevailing cheapness of Money, and the growing call for safe and profitable forms of investment, yielding a liberal fixed and certain income to investors, the management of the Company has authorized Messrs. Fisk & Hatch, the financial agents, to again offer an additional portion of the Loan at the original price. The loan is secured by a first mortgage on all the property of the Company, which will include the completed road through from Richmond to the Ohio, with its equipments, franchises, &c., of an estimated value of at least thirty million dollars. The finished portion of the road from Richmond to the White Sulphur Springs—227 miles—and the actual work done on the portion yet in process of construction—200 miles—are deemed of much greater value than the aggregate amount of the Loan, thus giving ample protection to the interests of the creditors of the enterprise, which is, under a capable and responsible management, favorably known to the business community. Union Pacific Sixes closed at 85¾@85⅞.

Railway and miscellaneous share property has been unusually active, and, on the whole, much stronger as to values, closing buoyantly. Union Pacific stock closed at 29¾@30. Western Union Telegraph at 51¾@51⅞.

There has been a ready sale reported for the Northern Pacific 7-30 Gold Bonds, the claims of which to favorable consideration by the business public are presented by Jay Cooke & Co., the financial agents of the Loan, on another page of this paper.

☞ RAILROAD BONDS.—Whether you wish to buy or sell, write to CHARLES W. HASSLER, 24 Broad Street, New York.

Participation the True Principle of Fire Insurance.

We have several times taken occasion to commend the cardinal advantages of the approved plan of joint participation which has, from time to time, been adopted by some of our leading and most reliable underwriting incorporations; and the experience of each year gives increased evidence of the superiority of the system, it combining absolute safety with the greatest economy, and giving the utmost satisfaction throughout. The statement just announced by that always reliable and sterling organization, the Washington Insurance Company is yet another bright example. The Washington has a cash capital of $400,000, with total assets of more than double that sum, and issues policies with or without participation, as their patrons elect. At a meeting of its directors, on the 8th inst., a dividend of seven per cent. was declared, payable in cash, on demand, to the stockholders; also an interest dividend of six per cent. on outstanding scrip, payable on the first of April next, in cash; and yet further, a scrip dividend of fifty per cent. on the earned premiums of policies entitled to participate in the profits of the year ending January 31, 1871. The scrip will be ready for delivery on the first of April next, at which time fifty per cent. of the scrip of 1864, will be redeemed, and from which date interest will cease thereon. When it is taken into consideration that the last year was rather a trying one for underwriters, the success achieved here can be considered remarkable, and eminently due to the approved system by which it was accomplished. The headquarters of the Washington Insurance Company is at No. 172 Broadway, corner Maiden Lane. This company, has long enjoyed an enviable reputation for the fidelity and promptness which pervade its transactions throughout. The prevailing participating rates of premiums are as low as commensurate with perfect safety, and losses are adjusted promptly and equitably. In short, it is the very company to transact your business satisfactorily and economically, as such has been our experience after twenty years' connection with it.—*New York Com. Advertiser.*

Chesapeake and Ohio Railroad.

H. D. Whitcomb, Esq., Chief Engineer of this road invites sealed proposals to be sent to Richmond, Va., by the 28th of March, for the Graduation and Masonry on 108 miles of the road west of White Sulphur Springs, it being all the remaining unfinished portion of the road not now under contract. The work embraces 3,000,000 cubic yards in open cutting, 27,000 cubic yards in tunnels, and 60,000 cubic yards of masonry, of all classes, and is to be completed May 1st, 1872. Profiles and specifications can be had after the 14th March at the offices of the company, 54 William street, New York, at Richmond, Va., and at Huntington, West Virginia.

Plans for and proposals for building the iron superstructure of the New River Bridge at Miller's Ferry, Fayette county, West Va., will be received at the same time and place. There will be two spans of 250 feet each, and two of 70 feet each. Parties submitting proposals should see the site of the bridge, where further information may be had from the engineer in charge. The bridge must be completed by December, 1871.

☞ At a meeting of stockholders of the Martinsburg and Potomac railroad, on the 18th ult., Hon. C. J. Faulkner was re-elected President. The following gentlemen were elected directors. James L. Campbell, J. Q. A. Nadenbousch, Wm. N. Riddle, J. B. A. Nadenbousch, Wm. T. Snodgrass, J. S. Haldeman, Barnet Cushwa, Jacob Ropp and E. S. Troxell.

NEW 7-30 GOLD LOAN.

SAFE! PROFITABLE! PERMANENT!

JAY COOKE & CO.

OFFER FOR SALE AT PAR AND ACCRUED INTEREST THE

FIRST MORTGAGE

Land Grant Gold Bonds

OF THE

NORTHERN

Pacific Railroad Co.

These bonds are secured, *first*, by a First Mortgage on the Railroad itself, its rolling stock, and all equipments; *second*, by a First Mortgage on its entire Land Grant, being more than Twenty-two Thousand Acres of Land to each mile of Road.

The bonds are free from United States Tax; the Principal and Interest are payable in Gold—the Principal at the end of Thirty-years, and the Interest Semi-annually, at the rate of SEVEN AND THREE TENTHS PER CENT. per annum.

They are issued in denominations of $100, $500, $1,000, $5,000 and $10,000.

The Trustees under the Mortgage are Messrs. Jay Cooke of Philadelphia, and J. Edgar Thomson, President of the Pennsylvania Central Railroad Company.

These Northern Pacific 7-30 Bonds will, at all times before maturity, be receivable at TEN PER CENT. PREMIUM (or $1 10) in exchange for the Company's lands at their lowest cash price.

In addition to their absolute safety, these Bonds yield an income larger, we believe, than any other first-class security. Persons holding United States 5-20's can, by converting them into Northern Pacifics, increase their yearly income *one-third*, and still have a perfectly reliable investment.

HOW TO GET THEM.—Your nearest Bank or Banker will supply these Bonds in any desired amount, and of any needed denomination. Persons wishing to exchange stocks or other bonds for these, can do so with any of our Agents, who will allow the highest current price for ALL MARKETABLE SECURITIES.

Those living in localities remote from Banks may send money, or other bonds directly to us by express, and we will send back Northern Pacific Bonds at our own risk, and without cost to the investor. For further information, pamphlets, maps, etc., call on or address the undersigned, or any of the Banks or Bankers employed to sell this Loan.

FOR SALE BY

JAY COOKE & CO.,

PHILADELPHIA, NEW YORK, AND WASHINGTON,

Fiscal Agents Northern Pacific Railroad Company.

By most National Banks, and by Brokers generally throughout the country.

Journal of Railroad Law.

HORSE RAILROAD COMPANIES—DEGREE OF CARE BETWEEN EMPLOYEES AND PASSENGERS AND REST OF GENERAL PUBLIC.

The facts in the late case of The Pendleton Street Railroad Company *vs.* Shires and ano., are fully and clearly stated in the following opinion by

BRINKERHOFF, J.—The defendant in error, Margaret, while sole, brought her action against the Street Railroad Company in the Superior Court of Cincinnati, and having married pending the suit, her husband was made a co-plaintiff with her. Her cause of action is stated in her petition thus:

"Plaintiff avers that the said defendant, on the 26th day of November, A. D., 1865, was the owner of a certain street railroad line, with its cars running thereon, which said cars are drawn by horses, from the corner of Fourth and Walnut streets to a point in the eastern portion of the City of Cincinnati, Hamilton County, and State of Ohio.

"Plaintiff further avers, that on Sunday the 26th day of November, A. D. 1865, she was walking upon the sidewalk on Pearl Street, between Lawrence and Ludlow Streets, in said city: the same being a public highway, open and free to all persons to pass and repass at all times, and at their will.

"Plaintiff avers that an excavation and ditch had been made and dug across said Pearl street, at or near Ludlow Street aforesaid and over which the track of said street railroad ran: that it was hazardous and dangerous to the defendant's horses and cars to pass over said excavation or ditch: and that for the better safety of said cars, and to prevent injury to their said horses, and in the prosecution of their said business, the said defendant through its agents and servants, caused the horses attached to a certain car, No. 4, on said road, to be unhitched therefrom, and attempted to drive said horses around said excavation or ditch; that in so unhitching said horses from said car, and taking or attempting to take them around said excavation or ditch, or across the same, the said defendant, its servants and agents, so negligently and carelessly conducted and managed said business and horses, that the said horses ran off and away from the servant of said defendant then driving the same and ran against the said plaintiff while she was walking as aforesaid on said Pearl Street, knocking her down, causing a fracture of three of her ribs, and serious internal injuries, and badly cutting and bruising her loins and body, and otherwise injuring her; whereby she became sick, sore and lame, and unable to attend to her necessary affairs and business," etc.

To this the Company filed an answer, as follows:

"The defendant admits that on the 26th day of November, in the year eighteen hundred and sixty-five, it was the proprietor of Street railroad routes number five and seven, in the City of Cincinnati, under and in virtue of a general ordinance of the Council of said city, passed on the first day of July, in the year eighteen hundred and fifty-nine, with several subsequent amendments, and, also, in virtue of an act of the Legislature of Ohio, entitled an act to pr de for and regulate Street Railroad Companies, passed on the tenth of April, in the year 1861; to which ordinance and statute, as matters of public record, the defendant hereby makes reference.

"The defendant admits, likewise, that said route number five extends from Lawrence to Ludlow Streets with double track, on East Pearl Street, in the city aforesaid, as, also, that on the 26th day of November, in the year 1865, the defendant was using said track for the transportation of persons by means of cars drawn by horses, as lawfully it might.

"The defendant admits, furthermore, that on said 26th day of November, in the year last aforesaid, an excavation of considerable depth and width had been made under said double track, in East Pearl Street, between Lawrence and Ludlow Streets, so as to prevent the horses attached to any car from directly crossing the same. But the defendant alleges that said excavation was not made by it, or any of its agents or servants, nor for its advantage; but was made by the Trustees of the Water Works of the City of Cincinnati, for the purpose of relaying or repairing the water-pipes underneath the surface of East Pearl Street.

"The defendant admits that it was necessary, in order to the use of its railway track, at the place aforesaid, to detach the horses from such car, and, while pushing the car by hand upon the track across said excavation, to drive the horses along those parts of East Pearl Street between the curb-stones, to which the excavation did not extend; which course was pursued, accordingly, with defendant's car No. 4 and the horses belonging, on the day and year last mentioned.

"But this defendant denies that either in detaching, driving, or attempting to re attach the horses as aforesaid, or in pushing said car upon the track across the excavation or in any other particular, was it (the defendant) or any of its agents or servants, guilty of any carelessness, negligence or default whatsoever. On the contrary the defendant alleges that all said business was conducted and managed by its agents and servants with the utmost possible degree of care, skilfulness, prudence and attention; and that the running away of said horses, when about to be re-attached to the car, was a mere sudden and unavoidable accident.

"And this defendant denies that the plaintiff, at the time of the supposed injury to her by said horses, was upon the sidewalk of East Pearl Street; it avers, on the contrary, that said plaintiff, instead of remaining upon the sidewalk, where she would have been safe, or of fleeing toward the houses or wall adjacent, unnecessarily and incautiously ran into the street and in front of said horses, while they were attempting to run away, and was thereby somewhat, but not seriously, injured.

"Whereupon the defendant prays," etc.

On this state of pleadings the case was tried to a jury; and evidence having been given by the parties tending to sustain their claims, respectively, as to matters of fact, the Court, among other things, charged the jury, that:

"If the servants of the defendant, by the use of means then well known, and within their power to employ, could, in a safer way than that used, have managed the horses attached to the car, and thereby prevented the accident; it was their duty to employ such means; and the neglect to do so may well authorize the jury to infer fault on their part; which will not be excused if the plaintiff, from fear or the sudden impulse of the moment did not pursue the safest course to save herself from injury."

Exceptions having been taken to this charge, and to other ruling of the Court on the trial, and the jury having returned a verdict for the plaintiff below, and judgment being entered thereon, the defendant below took the case, on error to the Superior Court, at General Term, where the judgment at Special Term was affirmed.

A petition in error is now prosecuted in this Court, alleging for error that the Court, at Special Term, among other rulings, erred in charging the jury as above set forth, and that the Court at General Term erred in affirming the judgment at Special Term.

As I do not propose to review all the questions raised on the record and discussed by counsel in the argument of the case, I have limited the above statement to such of its features as seemed to be necessary to present the single question on which we now and here determine it; and that question is, did the Court at Special Term err in charging the jury, that: "If the servants of the defendant, by the use of means then well known, and within their power to employ, could, in a safer way than that used, have managed the horses attached to the car, and thereby prevented the accident, it was their duty to employ such means; and the neglect to do so may well authorize the jury to infer fault on their part?" We think it did. The charge thus given seems to imply an obligation on the Company to exercise the highest degree of care, and to employ the very best possible well known means and appliances, in respect to their teams and cars, to insure the safety of the general public. If it had been a passenger on one of their cars that was injured, the charge would have been well enough; but as to the case of an individual of the general public, towards whom the company occupied no relation arising out of contract, express or implied, the rule is different, and is thus laid down in Cleveland, Columbus and Cincinnati Railroad Co. *vs.* Terry, 8 Ohio St., 570: "The degree of care required in such cases of the employees" of the company, "and also of the party injured, is merely ordinary care and prudence, the perils to be encountered, and all other circumstances under which the injury was inflicted and received, being considered."

It is possible that the Court below, at Special Term, did not intend to be understood by the jury in accordance with our interpretation of its words; but if it did not, it was certainly unfortunate in its choice of the language it employed, and the jury was liable to be misled by it.

Judgments of the Court below, both at General and Special Term, reversed, new trial awarded, and cause remanded to the Superior Court at Special Term.

☞ Engineers have commenced the location of a route for the Cincinnati and Dayton (Ohio) Short Line railroad.

☞ The Chicago, Burlington and Quincy Railroad declared, on the 22d ult., a 5 per cent. dividend, payable March 15, free of tax.

Improvement in Wheels and Axles.

EDITOR AMERICAN RAILROAD JOURNAL:

Will you permit me to suggest, for the consideration of those acquainted with such matters, what appears to me to be an improvement of importance, that might be adopted on all our Railroads, as regards both economy and safety of transportation. It came to my knowledge, many years ago, in the form of an application for a patent, which was not granted, for the reason, that it was held not to be new—it appearing that a similar arrangement, in part, had been casually mentioned in one of the early reports of a railroad company—I think the Baltimore and Ohio—though so far as I have ever learned, never adopted or used on any railroad.

The improvement, or suggestion, is simply this: having the flanges of the car-wheels on the outside, instead of inside, as at present, and one wheel loose on each axle, or all the wheels running independently.

There appears to be reason for supposing that such an arrangement would, to a great degree, obviate the breaking of axles, running off the track, and a large share of the present wear of the rails; besides rendering the running of the cars easier, and thus cheapening the cost of transportation.

The reasons for such opinion, I will briefly state, as intelligently as I may.

The present plan, of course, is to have wheels with flanges inside, and fastened inflexibly to, and running with, the axles. The effect of such arrangement is pretty generally known. The opposite wheels must revolve an equal number of times—neither more nor less. No matter what the inequality of the opposite rails, and no matter how frequent or sharp the curves, the difference in the rate of speed required for each wheel must be made up by the *sliding* of one of them more or less. The inevitable effect of this is to twist the axle, and, after a series of twists, backwards and forwards, occasionally an axle will break.

Again in passing a curve, when the outside wheel strikes the outer or longer rail of the curve, this is an obstruction to the passage of the wheels, the opposite wheel receives an impetus towards the obstruction, which causes the outside wheel to bind or crowd the rail still more, and thus a train will frequently shoot the track. The same movement causes a great wear of the rails.

Now what is the operation of cars running as I have suggested? As one wheel on each axle will be loose, there will not be such straining of the axle as I have referred to, nor the cars equal liability to breakage of the axle.

The flanges of the wheels being on the outside, instead of the inside, when a curve is reached, the inner wheel first crowds it, and the opposite wheel, being loose, relieves the first one from crowding so hard; and thus the curve is passed with comparative ease.

The same causes ensure less wear of the rails, greater ease of transportation, and, consequently, less expense.

If these be facts, they are susceptible of being demonstrated; and is it not the duty of some of our railroad corporations to test the operation of cars thus prepared. The principle could, probably, be sufficiently tested in a Horse Railroad; and such roads would be equally the gainers by a substantial improvement like this, if it shall prove to be one.

SUBSCRIBER.

Port Huron and Lake Michigan Railroad.

The business and prospects of the Port Huron and Lake Michigan Railroad continue in every way favorable. The traffic of the road is at present very heavy, especially in freight, and the prospects are that the receipts for February will exceed those of any previous month.

Mr. Dan. Runnels, who has the contract for building the new dock and slip, is getting the timber in readiness, and will soon commence spile driving. The cost of the dock and slip is expected to reach $30,000.

Cars have gone out to complete a line between Lapeer and Flint. The ties have been already distributed between these two points, and the iron will be laid as soon as spring opens. The ice storm some weeks ago rendered it impossible to proceed with the work at that time, and it was thought best to postpone further operations until spring. Ties are being delivered between Lapeer and Flint, ready for the completion of the road between these points.

A new station house is to be built at Emmet in the spring.

The Sarnia branch of the Great Western Railway will be reduced in April to 4 feet 8½ inches gauge, the same as that on the main line between Windsor and Komoka. By this arrangement, and with the aid of a suitable boat, the cars of the Port Huron and Lake Michigan road can then be sent eastward to any desirable point along the main line or the New York Central.—*Port Huron Times, Feb.* 24.

Chesapeake and Ohio Loan.

The loan of the Chesapeake and Ohio Railroad Company, which was so favorably received by the public, and which was virtually withdrawn from the market upon the outbreak of the war in Europe, is again brought forward by the financial agents of the Company, Messrs. FISK & HATCH. More than a third of this loan was sold during the first part of 1869—sufficient to enable the Company to press the work of construction to this time. About two-thirds of the expenditure on this line is made, and it is expected to be opened from tide-water to the Ohio river in about 15 months. This will give a new and much needed trunk line whereby the produce of the Western States and the coal of West Virginia can be brought to all Atlantic ports at very low rates, as the favorable grades and short routes are remarkable in contrast with those now in operation. The bonds bear six per cent. gold interest, can be had coupon or registered, and are offered for the present at 90 and accrued interest.

☞ From the statement of the New York Central and Hudson River R. R. Co., made to the Assembly on the 27th ult., it appears that the total number of tons of through freight carried on the Hudson River Railroad in 1870, was 1,041,248, amount $3,628,074 11; way freight 210,508 tons, amount $498,694 28; through passengers 378,575, amount $1,115,743 10; way passengers 2,728,902, amount $1,418,177 77. On the Central Railroad, through freight 1,549 002 tons, amount $6,013,423 93; way freight 1,523,247 tons, amount $4,187,226 16; through passengers 282,533, amount $1,356,736 77; way passengers 3,704,936, amount $2,847,934 37.

☞ Surveys have been commenced at Poughkeepsie, in view of erecting a bridge across the Hudson River at that point.

Northern Central Railroad.

At the annual meeting of the stockholders of this company in Baltimore on the 23d ult., the following gentlemen were re-elected directors for the ensuing year: J. D. Cameron, Wistar Morris, J. M. Kennedy, E. C. Biddle, Ed. Smith, J. P. Jones, A. E. Kapp, Wm. Colder, Henry Welsh, George Small, B. F. Newcomer and S. M. Shoemaker. The annual report of the President of the Company was submitted, which shows the total earnings of the road for the year to have been $4,088,624 58; the total expenses, $2,816,661 74—making the net revenue, $1,271,962 84. On motion of Mr. Kennedy, the following resolution was passed:

Resolved, That the Board of Directors be and they are hereby authorized to take such financial measures to provide for the payment at maturity of mortgage bonds on any of the lines leased by this company, or as may be required to aid other companies connected directly with this company, in securing means for the completion of their works, as they may deem best to protect and promote the interests of this company.

☞ At a recent meeting of the directors of the Androscoggin Valley Railroad in Lewiston, Me., the road was located so as to connect with either the Androscoggin or the Maine Central at that point, and a committee was appointed to confer with the directors of the Androscoggin and Maine Central roads respecting a lease of the Valley road.

☞ The Michigan Central Railroad Co. have commenced running freight trains over the air line. It is reported that the company will relay the track this season from Detroit to Jackson and from Niles to Chicago with steel rails.

☞ The bill incorporating the Washington and Richmond railway has become a law, having finally passed the Virginia House of Delegates on the 25th ult., with the Senate amendment, by a vote of 69 to 36.

☞ The Burlington and Missouri River R. R. Co. will pay its first dividend of 10 per cent. in stock on the 10th of March on both common and preferred shares.

☞ The work on the Queenstown and Kent Railroad, says the Centreville (Md.) *Observer*, progresses satisfactorily. The track-layers are now within about two miles of Hewitt's Station.

☞ The State railroad commissioners have accepted the location and lay-out of the Shepaug Valley (Conn.) Railroad, and the chief engineer says it will be in readiness for laying the rails in May.

☞ The improvements to the Bessemer Steel Works, at Troy, costing $80,000, have been completed, and with the additional facilities secured seventy tons of steel can be turned out every day.

☞ The Lake Shore and Michigan Southern Railroad Co. will shortly commence to lay a second track between Toledo and Buffalo, and from Elhart to Chicago, using steel rails.

☞ The Hackensack (N. J.) Extension Railroad is graded to Nanuet, 6½ miles beyond Hillsdale, and will be extended to Grassy Point at an early day.

☞ At an election for directors of the Cleveland, Columbus, Cincinnati and Indianapolis R. R. Co., held in Cleveland on the 1st inst., the old board was re-elected with two exceptions. Horace F. Clark and Augustus Schell, of New York, were elected in place of J. H. Wade and Stillman Witt, of Cleveland. Oscar Townsend was re-elected President, and the other officers of the road will remain unchanged.

Drexel, Winthrop & Co.,

OFFER FOR SALE

Houston and Texas Central Railway Company

FIRST MORTGAGE LAND GRANT

SINKING FUND

7 Per Cent. Gold Bonds.

Secured by a First Mortgage upon 6,400 acres per mile, and upon the whole and entire line of road, its franchises and property of every description.

RECEIPTS IN GOLD COIN.

Operating 141 Miles. 1869.	Operating 166 Miles. 1870.
$1,047,827 65.	**$1,538,420 00.**

The receipts for January, 1871, were $213,000, gold.

The net earnings for the year 1870 were more than sufficient to pay the interest upon $13,000,000, or over three times the present issue of Bonds.

The affairs of this Company have been examined by many capitalists, who have invested largely in the Bonds, and we are confident that a careful scrutiny will prove them to be the best and safest security now offered in this market.

FOR SALE AT 90 AND ACCRUED INTEREST

BY

DREXEL, WINTHROP & CO.,

No. 18 Wall-st.

THE PARTNERSHIP HERETOFORE EXISTING under the firm name of Burton & Macdonald, engineers and contractors, is hereby dissolved by the withdrawal of Charles Macdonald. Existing contracts will be completed by the late firm, and either party may sign in liquidation.

Dated March 1, 1871, 30 Broadway, New York.

A. B. BURTON, CHARLES MACDONALD.

CHESAPEAKE AND OHIO RAILROAD.

Notice to Contractors.

SEALED PROPOSALS will be received by the undersigned, at Richmond, Va., until 12 M. 28th March, 1871, for the graduation and masonry on one hundred and eight miles of this road west of White Sulphur Springs, it being all the remaining unfinished portion of the road not now under contract. The work embraces 3,000,000 cubic yards in open cutting, 27,000 cubic yards in tunnels, and 60,000 cubic yards of masonry, of all classes, and is to be completed May 1st, 1872. Profiles and specifications can be had after the 14th March, at the offices of the company, 54 William street, New York; at Richmond, Va., and at Huntington, W. Va. Plans for and proposals for building the iron superstructure of the New River Bridge, at Miller's Ferry, Fayette county, W. Va., will be received at the same time and place. There will be two spans of 250 feet each, and two of 70 feet each. Parties submitting proposals should see the site of the bridge, where further information may be had from the engineer in charge. This bridge must be completed by December, 1871.

INTERCOLONIAL RAILWAY OF CANADA.

Tenders for Iron Bridge Superstructures.

The Commissioners for the construction of the Intercolonial Railway are prepared to receive Tenders for TWENTY ONE SPANS OF IRON BRIDGE SUPERSTRUCTURE of one hundred feet for each span, and also for sixteen spans of Two Hundred feet for each span.

Printed specifications showing the tests which each span will be required to bear; information as to the location of the different bridges; and forms of tender, can be obtained at the offices of the Commissioners or at those of the Chief Engineer, at Ottawa, Canada; or at the Banking House of Messrs. Morton, Rose & Co., Bartholomew Lane, E. C., London, England.

Parties tendering must submit their own plans of the mode in which they propose to construct the Bridges, and must state the price of each span f. o. b., at the place of shipment; and also the price of each span completed in place.

Tenders for additional spans of one hundred feet, and for spans of eighty feet, will also be received at the same time. Specifications are being prepared and can be had within a few days on application at the places above named.

Tenders marked "Tenders for Bridges" and addressed to the Commissioners, at Ottawa, will be received up to 6 O'CLOCK P. M., of THURSDAY, the 6th day of APRIL, 1871.

The Commissioners will not be bound to accept the lowest or any tender.

Rolling Mill Property
FOR SALE,
OPPOSITE NEW YORK CITY.

The well-known North River or Dunbir Rolling Mill, situated at Prospect and North 5th St., Jersey City, New Jersey. The Real Estate consists of sixteen city lots, 25x100 feet each, with two large Dwelling Houses, well built and in good order. Also a large building occupying two lots, suitable for a Machine Shop or other purposes, a Stable, &c.

The Rolling Mill was built for the manufacture of Locomotive and other descriptions of Boiler Tank and Plate Irons, contains a heavy Roll Train, Engines, Furnaces, Machinery, &c. to suit, in good order. It can be seen running, and has been successfully run from its establishment in 1855. Situated near the Hudson River, a short and nearly equal distance from all the New Jersey Railroad Depots and Ferries, the Erie Depots and Ferries and the Hoboken or Delaware & Lackawanna Depots and Ferries, from its proximity to the New York Market, the large Locomotive and Railroad Shops of the City and Paterson, the facilities for forwarding to all points by water or railroad, it cannot be surpassed.

The Real Estate is rapidly increasing in value the vast R. R. Interests and dock improvements mentioned having taken up almost the entire River front and space below the mill property from the Cortland St. to Hoboken ferries. The reputation and business established. The Proprietor intends retiring from the business, and for further particulars can be addressed or seen daily at the

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail,* with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

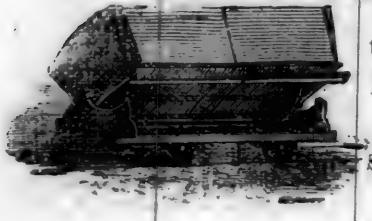
That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.



The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

Another Outlet for Western Produce.

The vast area of the Mississippi Valley, more than a million square miles, represents an enormous basis wherein the agricultural products are ten times more than are needed for the maintenance of its own population. On the Atlantic coast, and in Europe, are whole States whose agricultural productions fall short of their own proper consumption. The difference between the cost of the same articles of food where they are grown at the West, and the prices where they are consumed, at the East, is from one hundred to four hundred per cent.—and this enormous addition to their cost is due mainly to the insufficiency of the present means of conveyance to tide-water. For a large part of the year the principal outlets for this vast surplus are in the hands of four railroad corporations controlling the lines crossing the Alleghanies. In summer, with the aid of the Erie Canal and the St. Lawrence, the rates are out of proportion to the distances at which heavy freights can be carried; and in the winter months a combination of three of the four companies can force them much higher. The only lasting remedy for this state of things, which shall, at the same time, benefit the producer and consumer is in the multiplication of new and more economical means of conveyance. The roads now in operation and under construction across the Alleghany range may fairly be presumed to cover the best routes which engineers could discover. There is a line now building through Virginia, and which will be completed within a year and a half, which in point of shortness of route, grades, proximity and cost of fuel, mild climate, light capital charges, and termini at unfailing navigation, is unsurpassed by any of the existing or projected lines; and which will therefore be enabled to do its full share of the Western carrying trade at the lowest possible cost, and therefore will have an important influence on this problem of lower transportation rates.

From a pamphlet recently issued by the Chesapeake and Ohio Railroad Company we gather that they have secured the line of shortest portage between tide-water and western inland steamboat navigation, and also the shortest route from our most important western cities to coastwise vessels. This will be seen by the following comparison of distances by the old and new routes:

MILES FROM PORT OF	Richmond, via Ches. and Ohio.	Baltimore, via Balt. and Ohio.	Philadelphia, via Penn. R. R.	New York, via Erie Railway	New York, via N. Y. Central	Boston, via N. Y. Central
To Cincinnati.	552	591	668	861	888	941
To Louisville.	645	699	775	997	940	998
To St. Louis.	902	931	992	1,201	1,144	1,202
To Memphis.	992	1,070	1,152	1,354	1,354	1,426
To Nashville.	800	884	960	1,153	1,176	1,254
To Columbus, O.	564	617	705	755	761	829
To Indianapolis.	677	705	786	935	880	888
To Chicago.	*875	828	823	933	980	1,038

* By a contemplated line from the Ohio River to Dayton, this distance will be reduced to 822 miles.

The advantage in grades, however, is more conspicuous even than that of miles. This line from the Chesapeake to Cincinnati can be, and ultimately will be constructed as a freight road, having light grades going East, (the direction of heavy freights) averaging 10 feet and not exceeding 30 feet to the mile; and the same average and maximum going west, with a single exception at one point of 60 feet per mile. These grades will be recognized as something superior for roads traversing a prairie country, and for a line crossing a mountain range at an elevation of 2 000 feet are marvellous; and like conditions it would be impossible to find on any parallel route. Abundance of coal, iron ores, timber are also to be found along the line. The total cost of such a line when completed, owing to the benefactions of the State of Virginia, under whose auspices the work was in part constructed, will be about $30,000,000, against nearly three times that amount of Capital and Bonded Debt account to be borne by some of the other lines competing to the same points.

The Chesapeake and Ohio Road will enter the field, very soon then, with the most favorable set of conditions for doing a large traffic at the greatest ratio of profit, which has belonged to any enterprises begun for many years back. New York, of course, has been attracted by the advantages of the route, and some of the most eminent merchants and ship owners of the United States are to be found in its list of directors.

Frederick and Pennsylvania Line R. R.

The Hanover (Pa.) *Spectator* is informed that sufficient iron has been purchased of the Lochiel Iron Works at Harrisburg by the Frederick and Pennsylvania Line Railroad Company to lay the track from Littlestown as far as Taneytown—a distance of some 9 or 10 miles, and that the work of laying the rails will be commenced at once. The completion of the entire line to Frederick is expected by the middle of July next. The Hanover Branch Railroad Company have secured the contract to operate the road on its completion.

☞ Hon. T. Jones Yorke has been re-elected President, and George J. Robbins, Esq., Secretary and Treasurer, of the West Jersey Railroad Co.

Railroads of New Jersey.

The following is an abstract of the Reports of the Railroad companies of New Jersey, made to the Legislature for the year ending December 31, 1870—not including the Report of the Joint Companies, which was given in a previous issue:

CENTRAL RAILROAD OF NEW JERSEY.

Capital stock, $15,000,000; old mortgage bonds, $394,000; mortgage bonds of 1890, $2,837,000; accounts payable, $1,568,043 35; total, $19,799,043 35. Invested in railroad, $7,764,112 25; Jersey City station, $964,448 10; Port Johnson, (coal,) $695,076 01; Elizabethport, $300,146 10; station houses, shops, &c., $546,035 39; total, $10,269,817 85; engines, $1,193,000; cars, $1,481,000; total, $2,674,000; ferry boats, $525,000; other property, fuel, materials, &c., $3,414,951 80; total, $3,939,951 80; cash and accounts receivable, $2,915,273 70. Receipts for 1870, $4,398,514 12, as follows: Passengers, $1,118,147 20; merchandise, $1,172,870 63; coal, $1,964,550 56; mail, express, rents, &c., $147,945 73. Merchandise, 702,529 tons, carried 42,792,171 miles; coal, 2,052,184 tons, carried 115,304,381 miles; total, 2,754,713 tons, carried 158,096,552 miles; number of passengers carried, 3,291,034; do. carried one mile, 40,499,888.

MORRIS CANAL AND BANKING COMPANY.

Capital stock paid in, $2,200,000; debts, funded and other, $1,132,492 89; cost of canal and appurtenances, $3,879,167 25; repairs of 1870, $136,181 86; navigation (lock and plane tending, &c.), $54,083,79; superintendence and management, $29,612 92; income from passengers, tolls and other sources, $390,780 33; dividend paid in cash, $58,750.

CAMDEN AND ATLANTIC RAILROAD.

Cost of road and equipment, $1,607,637 78; capital stock paid in $1,130,795 59; funded debt, $1,075,603; floating debt, $96,471 14. Receipts of road, $234,444 23; working expenses, $175,215 28; interest paid during year, $94,534 12; taxes, insurance, &c., $17,840 47; total expenses, $287,589 82; balance, $46,854 41.

MORRIS AND ESSEX RAILROAD.

Capital stock, $11,900,950; funded debt, $12,184,000; other indebtedness, 20,205 57; construction account, $23,300,000. Receipts for the past year, $2,858,452 68; expenses, $1,900,931 18. balance, $957,521 50. Two payments of interest of 7 per cent. have been made to the stockholders by the lessees.

NEWARK AND BLOOMFIELD RAILROAD.

Capital stock, $103,850; the road is rented for $6,600 per annum; two interest dividends have been made during the year, amounting to $3,115 50 each.

ORANGE AND NEWARK HORSE CAR-RAILROAD.

Capital stock, $289,550; funded debt, $546,000; mortgage on depot and stables, $3,200; bills payable, $46,500; Belleville Railroad stock, $15,000; mortgage on Orange property, $5,000. Total, $905,250, represented as follows: Superstructure, depots, rails, &c., $808,022 52; cars and snowploughs, $44,800; horses, harness and fixtures, $44,200; cash, January, 1871, $8,227 48. Receipts from passengers, $187,192 55; tolls, $4,858 63; sundries, $3,310 43. Total, $195,356 61. Expenses of maintaining and operating road, $157,481 77; balance, $37,874 84. Interest paid during year, $39,033 34; no dividends; passengers carried, 2,640,258.

PATTERSON AND RAMAPO RAILROAD.

This is the connecting link of the Erie Railway at Paterson. Capital stock paid in, $248,000; amount of funded debt—bonds outstanding, $85,000; bonds redeemed, $15,000; cost of road and equipments, $350,000; income rent from Erie Railway Company, $26,500; income interest from sinking fund, $2,951 75; dividends, 5½ per cent. on $248,000, $13,640; expenses for contingencies, taxes, &c., $4,551 93; paid sinking fund to redeem bonds, $5,000; interest on bonds ($85,000 at 7 per cent.), $5,950.

PATERSON AND HUDSON RIVER RAILROAD.

This road is leased by the Erie Railway Company, and reports: Capital stock $630,000, which is all invested in the cost of road, including land, buildings, &c.; rent of road, $53,400; one dividend of 4½ per cent., $28,350; do. of 4 per cent., $25,200. Total dividends, $53,550.

SUSSEX RAILROAD.

Capital stock issued, $317,850 00; funded debt, $200,000; floating debt of old road, $3,873 92. Total, $521,723 92. Estimated debt for the construction of extension of the road now completed from Newton to Franklin and Branchville, payable in capital stock of the company not yet issued, $150,000; total estimated cost of road, $1,171,728 92. Receipts for passengers, freight, &c., $95,258 23; expenses, $92,965 78, as follows: Operating expenses, $42,510 03; repairs to road and equipment, $20,781 59; interest on funded debt, $12,500 00; revenue taxes, $710 11; interest and dividend, paid 1870, $16,464; surplus, applicable for debt, $2,187 50. Number miles run, 51,712.

CHESTER RAILROAD.

Amount paid in on capital stock, $36,596 68; funded debt, $100,000. This road is leased to and operated by the Morris and Essex Railroad Company.

JERSEY CITY AND BERGEN RAILROAD.

Cost of road, $486,920 50; one-half of one per cent. tax thereon, $2,434 60; local taxes paid, $939 03; deduct excess over amount authorized to be deducted, $330 38; balance, $608 65; amount of tax due, $1,825 95.

PERTH AMBOY AND WOODBRIDGE RAILROAD.

Capital stock and floating and funded debt, $214,581 57; cost of railroad, $214,581 57; receipts on passengers, freight, &c., $21,307 18; expenses, $12,140 05; balance, $9,167 18. Passengers carried over whole road, 78,816.

SOUTH BRANCH RAILROAD.

Cost of road, $362,370 39; paid on account of right of way, $51,573 65; station houses, $25,750 38; amount received in capital stock, $438,800. The road is leased to the Central Railroad of New Jersey, at an annual rent of 6 per cent.

WEST JERSEY RAILROAD.

Capital stock, $1,208,900; fractional scrip, $100; bonded indebtedness, $2,379,000; other indebtedness, $20,000. Cost of West Jersey Railroad, $1,449,024 01; cost of Millville and Glassboro Railroad, $221,020—total cost of construction of consolidated roads, $1,670,044 01; premium paid Millville and Glassboro road for consolidation, $184,000; discount and interest paid in construction of West Jersey Railroad and auxiliary works, $350,420 54; sinking fund to redeem bonds of loan of 1869, $71,500; investment in auxiliary works, $1,829,823 47. Receipts, $638,616 58; expenses, $419,706; taxes, $10,073 84; interest, $101,791 41; sinking fund, $12,500. Three cash dividends of 5 per cent. have been paid during the year.

BELVIDERE DELAWARE RAILROAD.

Capital stock paid in, $995,800; funded debt, $2,244,500; special loan, $198,845 48; due other companies, $771,622 51; total indebtedness, $3,214,967 99; total stock and debt, $4,210,767 99; cost of road and equipment, $4,125,865 30. Receipts, $872,226 72; expenses, $634,432 67; balance, $237,794 05; expended for working Flemington Railroad over receipts, $22,559 39; net earnings, $215,234 66; interest paid during the year, $187,831 61; balance, $27,403 05. Receipts and expenses for the Flemington Railroad, worked by the Belvidere Delaware Railroad: receipts, $17,549 84; expenses, $40,109 23; excess of expenses over receipts, $22,559 39. Two dividends have been declared upon the capital stock of the two roads, one of 4 per cent. from the earnings of 1869, and one of 2 per cent. from those of 1870.

WARREN RAILROAD.

Capital stock issued prior to April, 1870, $1,547,650; first mortgage bonds of 1875, $511,400; capital stock issued since April, 1870, for construction, $252,350. Total cost of road, $2,311,400. Earnings of the road for the year, passengers, freight, mails, express, &c., $574,203 92; expenses for running, repairs and wages, $401,942 74—$172,261 18; interest and dividends paid, $152-965 25—$19,295 93; estimated tax due State, $11,261 75; balance applicable to paying government and other taxes, $8,034 18. The Company owe an unadjusted debt to the Delaware, Lackawanna and Western Railroad for double track, tunnel, &c., claimed to amount to $643,164 85.

Iron and Steel Rails.

The following is an extract from the Report of C. J. Brydges, Esq., Managing Director of the Grand Trunk Railway of Canada, to the Canadian Dominion Board of Trade, under date January 31, 1871:

During the ten years from 1861 to 1870, there have been put in, upon the 798 miles of main line, between Portland and Sarina, 2,763,085 new sleepers. The original quantity of sleepers put in on the main line was 1,685,376, so that every sleeper has been renewed in about five and a quarter years. The sleepers are, therefore, as sound and in as good condition as it is possible for them to be, upon any line of railway in the world.

As regards rails, 1,132 miles of new rails have been put down upon the 798 miles of railway in the ten years. This is to say, the average life of every rail has not been allowed to go beyond seven years—the whole line having been renewed in the ten years nearly once and a third times. These rails have been procured from the best makers in England, many of them at a high price, and guaranteed as to their wear—from the rolling mill at Toronto, where they have been manufactured with great care, and under a very stringent specification, and for the Portland line, from one of the best mills in the United States.

Iron rails having been proved not to be entirely satisfactory in cold climates, this Company began five years ago an experiment with steel rails. It had to be done cautiously, as engineers had doubts if the material would not break in severe cold.

Five years' trial has proved that steel will stand, where iron breaks, and accordingly in 1870 the

Grand Trunk Company imported and laid in sixty miles of steel rails, which have stood perfectly the severe cold of the present month. Eighty-five (85) miles have been ordered from England for this year, and if they can be procured, I hope that after this year nothing but steel rails will be laid down.

This Company was the first to introduce steel rails into Canada; but the experiment having succeeded, the Great Western Company is following our example, their experience of iron being as much against it as ours, although their climate is, on the whole, so much less severe.

Pennsylvania Railroad Company.

TWENTY-FOURTH ANNUAL REPORT.

OFFICE OF THE PENNSYLVANIA RAILROAD CO.
PHILADELPHIA, February 18, 1871.

To the Shareholders of the Pennsylvania Railroad Company:

Your directors have the pleasure to submit to you a very satisfactory report of the results of the business of the company for the past year. During that period the operations of the company have been very extensive, and have been attended with gratifying success. The earnings of your Main Line and Branches were:

From passengers	$8,595,871 20
" from emigrant passengers	162,671 92
" mails	146,743 45
" express matter	310,785 78
" general freights	12,793,160 47
" miscellaneous sources	522,974 00
	$17,531,706 82

Expenses:

For conducting transportation	$3,562,084 60	
For motive power	3,240,606 69	
For maintenance of cars	1,136,945 17	
For maintenance of road	3,058,685 78	
For general expenses	211,762 82	
		11,260,085 15
Leaving net earnings for 1870 of		$6,271,621 67

The total amount of revenue compared with last year is:

1870	$17,531,706 82
1869	17,250,811 73
Increase	$280,895 09

The changes in the sources of revenues are shown below:

Increase in first class passengers	$95,300 14
" emigrants	31,605 99
" mails	27,781 54
" express matter	8,131 24
" miscellaneous sources	257,572 59
	$420,391 50
Decrease in freight	139,496 41
Increase, as above stated	$280,895 09

The only item of income that shows a decrease is from freights, and this has occurred under an increased tonnage of 401,060 tons, and is mainly accounted for by the reduction of freight charges—without any legitimate object—during the past summer and autumn, by the New York lines, to a point much below the cost of transportation.

The gross revenues for 1870 are equal to $48,971 25 per mile for the main line of railroad.

The whole number of passengers carried in 1869 was 4,229,363, and in 1870, 4,352,769, an increase of 123,406, or nearly 3 per cent. The average distance traveled by each passenger was 34 65-100 miles, being 43-100 of a mile greater than in 1869.

The number of tons of freight moved (including 376,650 tons of fuel and other materials transported for the company) was 5,804,051, embracing 2,550,389 tons of coal. It was last year 5,402,991 tons.

The average charge per net ton per mile upon freights, during the year, was 1 549-1000 cents, against 1 718-1000 cents last year and 1 9-10 the year previous; and per passenger, 2 49-100 cents per mile, against 2 51-100 cents last year, or an average decrease in freight charges of 9 8-10 per cent., and in passenger charges of 8-10 of one per cent. per mile.

The actual cost of operating your railroad, including branch lines, in 1870, was 59 15-100 per cent. of its receipts.

The earnings of the Philadelphia and Erie Railroad in 1870 were:

From passengers	$606,488 31
" freights	2,459,154 52
" express matter	33,111 95
" mails	25,000 00
" miscellaneous sources	20,339 93
Total (nearly $11,000 per mile of road)	$3,144,044 71

The operating expenses during the same period were:

For conducting transportation	$712,179 28	
For motive power	736,926 66	
For maintenance of cars	260,710 23	
For maintenance of way	867,912 25	
		2,577,728 42
Showing a balance to credit of P. & E. R. R		$566,316 29

The number of tons moved over this railroad during the year was 1,614,287 against 1,302,041 tons in 1869. The average charge made per ton per mile on freight was 1 290-1000 cents, which is within 304-1000 cents of the actual cost of its transportation. The road passes through a sparsely populated region and meets the direct competition of the Erie Railway, the rates upon which have not for many years been adjusted with a view to dividends to its shareholders.

The revenues of the lines operated by this company and the amounts paid for their working expenses, interest and dividends are as follows:

From the Pennsylvania Railroad and branches	$17,531,706 82
From the Pittsburg, Ft. Wayne and Chicago Railway	8,118,595 60
From the Erie and Pittsburg Railway (10 months)	870,859 23
From the Philadelphia and Erie Railway	3,144,044 71
	$29,665,206 36

And the expenses of operating these lines were:

Pennsylvania R. R.	$11,260,085 15	
Pittsburg, Ft. Wayne and Chicago Railway includ'g rent, etc	7,052,011 95	
Erie and Pittsburg Railway, includi'g rent, &c. (10 ms.)	642,281 76	
Philadelphia & Erie Railroad (including $566,316 29 net earnings paid to that company)	3,144,044 71	
The loss upon advances to the Columbus, Chicago and Indiana Central Railway Company, to meet its floating debt, etc., and on the operations of the lease of the said company for 1870, amount, under an agreement & settlement with the lessee, to	1,166,892 94	
		23,265,317 51
Leaving the net profits of the year 1870 upon all the operations of the company		$6,399,888 85
From which deduct dividends declared in May and November (each 5 per cent.) with the taxes paid thereon	$3,455,857 50	
Balance to debit of interest account and the amount allowed discount on sale of bonds	1,799,161 38	
Due for the lease of the Harrisburg and Lancaster Railroad	134,821 89	
Annual payment to the State of Pennsylvania on account of interest and principal due upon the purchase of her works between Pittsburg & Philadelphia	460,000 00	
		5,849,330 77
Leaving a balance of credit to profit and loss of		$550,648 08

It will be noticed that this balance is the result of the business of the year, without bringing forward a similar suplus in 1869 amounting to $463,533, and after charging to expense account the additional cost of substituting iron bridges on the main line of your road for those originally constructed of wood; the change of steel for iron rails; the cost of the straightening of the old Philadelphia and Columbia Railway, purchased of the State, and the extension of the shops at Altoona; neither of which items of expenditures will add to the productive capacity of your railroad, but they may prevent serious interruptions to your traffic, and in time materially reduce the cost of operating the line.

The operations of the Pittsburg, Fort Wayne and Chicago Railway continue to show the favorable results confidently anticipated at the time the lease was made.

The earnings during the year 1870 were	$8,118,595 60
And the operating expenses	4,371,987 53
Balance	$3,746,608 07
The annual rent, with interest on the bonds of the company, expenses of maintaining the organization, annual contribution to the sinking fund, etc., etc., amounted to	2,680,024 42
Showing the surplus of the lease to be	$1,066,583 65
The earnings of the Erie and Pittsburg Railroad from March 1 to December 31, 1870—10 months—(operated under the General Manager of the Pittsburg, Ft Wayne & Chicago R. W.), were	$870,859 23
And the expenses for the same period were	383,425 76
Balance	$487,433 47
The interest on the b'ds of the company, expenses of maintaining organization, &c.,&c., during this period, amounted to	258,875 00
Showing a profit of	$228,576 47
Giving a profit on the leases of these two roads of	$1,295,160 12

The net revenues of the Pennsylvania Railroad Company from investments in other lines, it is confidently expected, will, after 1871, yield an amount sufficient to meet the interest upon the

whole mortgage indebtedness of the company—a source of income which may be expected to continue and annually increase.

It is not the intention of the Directors that the mortgage indebtedness of the company shall be increased beyond the thirty five millions of dollars already authorized, as they consider that the other assets of the company, after exhausting this issue, will be ample to meet any enlargement of their works that may be required to comply with the public demand for transportation facilities.

The value of the existing Sinking Fund, instituted for the payment of the second mortgage bonds, will not only be sufficient to cancel the bonds issued under it when due, but a balance will be left which, if judiciously administered, will also pay off at maturity not only the first mortgage bonds, but also those of the general mortgage; while the lien of the State upon the Philadelphia and Columbia Railway is being paid off by the annual reduction of its principal, in accordance with the act of Legislature, to an extent which will extinguish it before its maturity.

From this summary the shareholders will notice that the interest upon the mortgage debt of the company after 1871 may be provided from the interest upon installments outside of your railroad, and that this debt may be all cancelled at maturity by the existing sinking fund, leaving the net earnings of your railroad, which the past year amounted to $6,271,621 67 (after meeting the annual payment of $450,000 to the State) for the stockholders.

The Treasurer's statement, annexed to this report, will exhibit the condition of the finances of the company at the close of the year. The discount allowed upon the large amount of general mortgage bonds sold in this country and Europe, to take up the company's debentures and meet its other obligations, has been met, as heretofore, by the net revenues of the company for 1870, instead of charging this item, as is usual with other companies, to the cost of the investment.

To meet the demands upon the Treasury during 1871, to complete the works in progress that are deemed essential to protect the existing interests of the company, and pay the debentures amounting to $1,109,224 falling due in July, the Board propose to give to each shareholder the privilege of subscribing for one share of stock for every six that may be standing in his name upon the books the company on the 30th of April, at par. Under the terms of the general mortgage, there can be issued only one million one hundred and ninety-two thousand dollars of these bonds in addition to those already sold, until the debentures due in July are cancelled, and further payments are made upon the State debt and prior mortgages upon its line, when an additional issue equal to such reduction and payments may be made. The net revenues of the company in 1870 were in excess of the amount required to meet dividends of 10 per cent. upon the proposed increase of capital, and there is no reason to expect less favorable results in the future. To enable the company to provide for this distribution of stock, the Directors accepted the provisions of the general act of Assembly of Pennsylvania, approved December 29, 1869, authorizing the increase of the capital of all railway companies 50 per cent.

The Directors, in their last annual report, referred to the motives which induced them to depart from their original policy in extending their direct control of railways west of Pittsburg. As this change has been made the subject of much public comment the Board will be pardoned if they again briefly refer to it.

In consequence of the failure of the mixed system of canals and railroads of the Commonwealth of Pennsylvania, and their connecting lines beyond Pittsburg, to attract a reasonable share of the traffic between the East and the West, or successfully compete with the avenues built by New York, all the lines of railway that were first built in the West to reach the Atlantic market were directed towards Buffalo as the then best and cheapest route to the East, leaving to this company, if it entered the list of competitors for this distant traffic, to endeavor without delay to secure in its interest railway connections with the commercial centres of the West as feeders to your main line. Sensible of the prejudice against large corporations since the failure of the United States Bank, the policy of this company was first directed to the procuring of these connections by securing the organization of the independent railway companies, and their construction by such pecuniary assistance as was required to effect this necessary object under contracts for the mutual interchange of business. This course was confidently expected would meet the object desired without involving the company in the direct management of distant enterprises.

It however soon became evident, after securing such feeders, that their success in diverting the traffic of the West from the channels it had become accustomed to follow, stimulated the older rival interests to endeavor to overcome it by obtaining the control of such feeders with a view to embarrass our business and augment their own. The efforts proved nearly successful, and were only prevented by promptly meeting the exigency by securing the absolute control of these lines for this company. The Board think that they would have been derelict in their duty if they had yielded to timid counsels and permitted this opportunity to secure their object to pass unnoticed. This control was affected by the lease for nine hundred and ninety-nine years of the Columbus Chicago and Indiana Central Railway, and of the Little Miami Railroad, through the Pittsburg, Cincinnati and St. Louis Railway Company, which your company controls by the ownership of a large majority of its shares; and the direct lease of the Pittsburg, Fort Wayne and Chicago, and the Erie and Pittsburg Railways. Under the lease of the Pittsburg, Fort Wayne and Chicago Railway this company became possessed also of one half the shares of the Indianapolis and St. Louis Rail way Company (between Indianapolis and Terre Haute), which had a lease of the old line between Terre Haute, Alton and St. Louis. The Pennsylvania Railroad Company had previously acquired a majority of the shares of the new line between Terre Haute and St. Louis *via* Vandalia, thus completing our connections with St. Louis.

Under the amended lease of the Columbus, Chicago and Indiana Central Railway, this company felt morally bound to assume its obligations to the Indianapolis and Vincennes Railroad Company, of which it is now nearly the sole shareholder. This enterprise is at present unprofitable, but will ere long prove a productive work, and when extended into Cairo, the grading of which is in a great measure finished, it will soon become a line of national importance.

It is not proposed nor is it desirable to manage these lines in a manner to divert traffic from its natural markets or channels, but solely with a view to secure to this company its fair share of the business of the West, which it was found impossible otherwise to obtain.

The result of the operations of all these lines for 1870 shows a small profit, which under judicious management must annually increase. The net profits for 1871 it is confidently expected will be very satisfactory.

With a view to give greater simplicity and efficiency to the management of this large Western interest, and as far as practicable return to our former policy, a charter was obtained from the Commonwealth of Pennsylvania incorporating the "Pennsylvania Company," to which all the interests above mentioned of the Pennsylvania Railroad Company will be transferred on the first of March next, and $8,000,000 of the preferred capital stock of the Pennsylvania Company received therefor, which amount covers fully all of our expenditures in this connection. The whole capital of the Pennsylvania Company will consist of $8,000,000 of preferred and not exceeding $4,000,000 of common stock. All the profits of the corporation during 1871, after meeting the obligations of the lines leased, are to be used by the managers in perfecting and equipping the railroads transferred to it. After 1871 the preferred shares of this company will yield at least 6 per cent. on their par value.

In addition to the interests of the company in the West to be transferred to the Pennsylvania Company, it still holds twenty-two thousand shares (a large majority) of the stock of the Cleveland, Mount Vernon and Delaware R. R. Co. —whose line is partly finished and the remainder in progress under judicious supervision of its President, Judge Hurd, of Mount Vernon, Ohio. This interest was received with the lease of the Pittsburg, Fort Wayne and Chicago Railway, and promises to become a profitable investment; also one million and forty-nine thousand dollars of the bonds of the Newport and Cincinnati Railroad Bridge, now being erected to connect the Little Miami Railway with the Kentucky system of railroads; four millions four hundred and forty-six thousand dollars of the general mortgage bonds of the Pittsburg, Cincinnati and St. Louis Railway Company; one million seven hundred and sixty-six thousand dollars of the second mortgage bonds of the Terre Haute, Vandalia and St. Louis Railway Company, and eight hundred and seven thousand dollars of the first mortgage bonds of the Cincinnati and Muskingum Valley Railroad Company—the line of which is built from Zanesville to Morrow, 132 miles, and is being extended from Zanesville 16 miles to Dresden, on the Pittsburg, Cincinnati and St. Louis Railway. The interest upon all these bonds (amounting to $8,068,000) will be duly met from the revenues of these works.

This company also holds a majority of the shares of the stock of the Chartiers Railway Company, whose line between Pittsburg and Washington is now approaching completion, and must soon become a profitable investment.

The liabilities of the Pennsylvania Railroad Company in the West, as guarantors, arise wholly under the leases that it has made or guaranteed, and extend to four millions of dollars of the first mortgage bonds of the Grand Rapids and Indiana Railroad Company—as required by the terms of the lease of the Pittsburg, Fort Wayne and Chicago Railway. The Grand Rapids and Indiana Railroad Company, besides its railway, holds lands pledged for the payment of these bonds, valued at least at eight millions of dollars, and they cannot, therefore, reasonably become a charge upon this company, even if the railway should prove unproductive—an expectation which is not justified by the revenues of that portion of the line already built; to the bonds of the Indianapolis and Vincennes Railroad Company, amounting to three millions one hundred and fifty thousand dollars upon 114 miles of road, which will doubtless earn, after 1872, ample revenues to meet its interest and provide for the principal when due; to the interest upon thirty-six millions seven hundred and twenty-four thousand and fifty-two dollars of the bonds of the Pittsburg, Fort Wayne and Chicago Railway Company and the Erie and Pittsburg Railroad Company, and to fifteen millions eight hundred and twenty-one thousand dollars of the bonds of the Columbus, Chicago and Indiana Central Railway Company. These works, as a whole, *now* yield net revenues *more* than sufficient to meet the interest upon all of the obligations mentioned, while the operation of the sinking fund of the Pittsburg, Fort Wayne and Chicago Railway Company, the terms of which have been faithfully complied with and the semi-annual amount due charged to running expenses, will pay of the whole of its mortgage indebtedness, amounting to $13,568,000 before the bonds are due.

From this general review of the interests of the company in the West, it will be perceived that, while securing to the company and this city uninterrupted communication with the trade centres of that region on and east of the Mississippi river, the board has at the same time also invested the means required to secure that object, so that they will yield satisfactory direct returns to this company.

The difficulties encountered by this company in securing harmonious railway connections with

the West have also been met in its efforts to open communications with the capital of the Union with which the Northern Central Railway and your road have formed the most direct route of travel to and from the north and northwest.

The Northern Central Railway Company fell for a time under the control of the Presidents of the Baltimore and Ohio and the Philadelphia and Reading Railroad Companies, who represented interests adverse to those of this company, rendering the object we desire of no easy accomplishment. During the monetary panic in Baltimore, however, immediately after the election of President Lincoln, the interest of the first-named party and many other shareholders in the Northern Central Company was thrown upon the market and immediately taken up by this company. The remaining shares required to make a majority of the stock of the company were purchased in London. This arrangement secured to this company a satisfactory connection with Baltimore; but to reach Washington the Baltimore and Ohio Railroad had still to be used. Every effort to obtain reasonable terms connecting our route with the national capital failed. Neither the sale of through tickets, the right to check through passenger baggage or to run through trains would be yielded, while the rates demanded upon freight passing over this line were quite prohibitory. These disadvantages were submitted to until the Baltimore and Ohio Railroad Company determined to extend a branch of their line to Pittsburg, when further forbearance, it seemed, would be construed into weakness, and steps were at once taken under the auspices of the Northern Central Railway Company to build an independent line from Baltimore to the Potomac, at Washington. This road is now nearly ready for the rails, and will be immediately extended by a tunnel under Baltimore to the Northern Central Company's depot, and thus open to the capital of the Union direct and uninterrupted communication with the North, Northwest and Northeast.

The products of the anthracite coal fields and the white pine lumber regions of Pennsylvania, consumed in Washington and vicinity, that have heretofore been excluded from the Northern Central Railway by the exactions referred to, will, when this road is completed, furnish a large and increasing traffic to that line. To make this enterprise complete arrangements have been made to extend the road across the Potomac, through Alexandria, to a junction with the Richmond, Fredericksburg and Potomac Railroad, northeast of Fredericksburg, thus forming a direct and continuous line of railway between all important points in the Southern Atlantic States with those of the North and East.

On reaching the Richmond, Fredericksburg and Potomac Railway, however, we unexpectedly met the restrictive policy which has heretofore governed most of the seaboard railroads south of New York, a policy which belongs to the past, and which we trust will soon be abandoned as inconsistent with the interests of the public and permanent interests of the shareholders of the company, and traffic be permitted to reach its destination and market whenever it will leave margin of profit to the transporter.

The privilege secured to the shareholders of the Harrisburg and Lancaster Railroad Company, under the lease of their railroad to this company, to convert their shares at par into the shares of the Pennsylvania Railroad Company, terminated on the twenty-ninth day of December last, leaving 7,056 shares, equal to $352,800 of the capital stock of that company still in the hands of individuals, upon which semi-annual dividends of three and a half per cent. have been guaranteed by this company.

The gradual alignment of the old Philadelphia and Columbia Railway is still in progress, and will be continued until the whole line is brought to the standard of modern railroads. That portion of the line between this city and Steamboat Station, in Chester county, where the most numerous and abrupt curvatures were laid, will be rebuilt and ready for use by the autumn of 1872. Grading upon this and other portions of the main line at points best suited for the purpose has been commenced for a third track, to avoid the vexatious detentions that now occur in passing trains in the same direction, travelling at different rates of speed.

There has not been much progress made by the Allegheny Valley Railroad Company toward the extension of its railroad (known as the "Low Grade Railway") to the Philadelphia and Erie Railroad, at Driftwood, except its relocation under the direction of John A. Wilson, Esq., Chief Engineer. His survey demonstrates the entire practicability of continuing a maximum gradient of eighteen feet per mile on straight lines from Columbia, Lancaster county, to near the summit of the Allegheny Mountains, and thence reaching the tunnel under the mountain by a short exceptional gradient of only thirty-six feet per mile, in favor of the heavy grades. The descent from the mountain to the Allegheny river is accomplished with a maximum gradient of sixteen feet per mile. We here have a line crossing the rugged Allegheny Mountains at an extreme elevation of only 1,440 feet above tidewater, with lower gradients than are found necessary in passing the plains of the Mississippi Valley. Upon such a line, when completed, freights in large quantities may be moved at one cent per net ton per mile, with a sufficient margin of profit to the transporter. This rate must draw to the line all the traffic south of the lakes, which now seeks the New York Canal.

The main object in the organization of the Pennsylvania Railroad Company was to promote traffic between this city and the West. This object has been kept steadily in view, and is not inconsistent with the best interest of the shareholders. It was confidently expected on the completion of your railway that the enterprise and capital of the citizens of Philadelphia would have been at once enlisted in marketing the products brought to their doors, and the means furnished to distribute them to points of consumption. But it soon became evident that this could not be depended upon, and that our cars must pass to New York to meet purchasers of their contents or the business of the company would become dwarfed to that of a second class railroad —a fate which the interests of the shareholders would not permit.

To remedy this difficulty this company, at an early period, offered to join the citizens or corporate authorities in establishing lines of steamers between this port and Liverpool, but without eliciting any favorable response until the present time, when the required stock subscription to such a line has been made. The success of the project now depends upon the purchase of one and a half millions of the bonds of the steamship company guaranteed by this company. The Board has agreed to take a majority of the stock of this company not exceeding $400,000, and make this guarantee, and now submit their action for your approval. In the success of this enterprise the Board has the fullest confidence, and it may be stated that the delay that has occurred in the organization of the line is not without its compensating advantages, as it will enable the company to profit by the very great improvements that have been made within the last ten years in the construction of steamers and their machinery, which have rendered almost obsolete steamships built previous to that date.

Even with the aid of this line of steamships, the tonnage capacity of your railway will be far in advance of the ability of this city to market, and the surplus must continue, as heretofore, to seek New York and other cities. In the adjustment of rates of freight from and to the West, the difference due to the shorter distances to Philadelphia have always been maintained. This discrimination, however, depends altogether upon the action of your Board for the time being; but arrangements may be made by the corporate authorities of Philadelphia by which these differences will be permanently adhered to.

Your directors have had under consideration for some months the propriety of leasing the railways and canals of the joint companies between Philadelphia and New York, but have not as yet come to a satisfactory conclusion in relation to this very important question. The principal object desired by this company is to secure ample facilities for the accommodation of the large traffic that we can send to Jersey City, and its prompt delivery at that point. These joint companies have been unable or unwilling to give us the facilities desired, and our business is consequently restricted in its development, and the terminal expenses unnecessarily increased. The effect of such a lease will not be detrimental to the interests of this city, as it is intended to maintain the discrimination in rates of traffic that has always existed in her favor, while its influence upon the prosperity of your company must be material if the lease is obtained upon satisfactory terms. The rate at present demanded is greater than the joint companies have derived from the net profits of their lines for some years.

Your Directors take much pleasure in acknowledging their indebtedness to the General Superintendent of the Pennsylvania Railroad, A. J. Cassatt, Esq., and his assistants, for the freedom from serious accidents on the road during the year, and for the very satisfactory reductions that have been made in the cost of operating the line, notwithstanding the increase of its tonnage. They also mention with commendation the success of the General Superintendent, W. A. Baldwin, Esq., of the Philadelphia and Erie Railroad, in the management of his line under the extremely low rates that it has been compelled to accept during the year.

To the General Manager of our leased lines beyond Pittsburg, J. N. McCullough, Esq., we are especially indebted, for the very satisfactory profits that have been realized from the railways committed to his charge, under the low rates upon through freights that have prevailed during a larger portion of the last season.

Respectfully submitted,
By order of the Board,
J. Edgar Thomson, President.

Washington and Richmond Railroad.

The Governor of Virginia has signed the bill chartering the Washington and Richmond Railroad company, some of the conditions of which, says the Baltimore *Sun*, are not likely to be very burdensome to the Pennsylvania railroad, in whose interest it was passed, to wit: the endorsement of the bonds of the Norfolk and Great Western road by the Pennsylvania company is not required till $2,000,000 of solvent subscriptions have been made to the stock of the road, and no one knows where they are to come from; and the guarantee of $15,000 per mile to the bonds of the Piedmont and Potomac road by the Pennsylvania company, another of the conditions of Washington and Richmond charter, is only for the superstructure and equipment of that road. Of course the road bed must be made from means otherwise raised before this guaranty can be demanded. This road is to run from the Chain Bridge or the Aqueduct Bridge, on the Potomac, near Georgetown, to Aldie, in Loudoun, and thence to the Alexandria and Manassas road, at or near Rectortown, and thence to the Shenandoah Valley road, at or near Luray.

☞ The London *Times* says that under a commission from the Argentine Government, Messrs. Waring Brothers are sending out a staff of engineers to survey a railway route of about 1,200 miles from Buenos Ayres across the Andes, to join the Chilian system from Santiago to Valparaiso, thus connecting in the southern hemisphere the Atlantic and the Pacific.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, March 11, 1871.

Stock Exchange and Money Market.

There has been a livelier business reported in the loan and discount line, chiefly resulting from the enlarged volume of dealings at the Stock Exchange. The offerings of Money, however, have been quite liberal, and rates have not varied materially, having ranged from 3@5 per cent. on call, and 6@7 per cent. per annum on the primer grades of mercantile paper. The city banks, notwithstanding the increased activity, were last week enabled to add $770,159 to their specie, and $841,360 to their legal tender reserves, while augmenting their deposits $7,430,458. They enlarged their loan and discount averages $4,625,887, and reduced their circulation $60,168. The U. S. Sub-Treasury reported a gain of $1,347,554 in its currency reserve, with a loss of $1,115,694 of its coin balance, as the result of the week's business. The office disbursed $2,583,575 of coin interest, during the week.

On Monday last, Government formally commenced the negotiation of the new 5 per cent. Loan, for the purpose of refunding 5-20 six per cent. bonds. On the first day, the amount of the new bonds subscribed for in this city was $2,500,000, and the aggregate of the day's subscriptions, at all points, as reported at the Treasury Department, at Washington, was about four and a half millions. The second and third days' subscriptions were on a reduced scale, due, in part, to the fact that the new bonds are not yet ready for delivery to subscribers, which tends to check the popular demand for the new issue. The London and Continental, as well as the home agency system, is being rapidly perfected, with a view to the more prompt and satisfactory marketing of the Loan. Wednesday's subscriptions were reported at $956,000.

Under the Treasury programme for March, Government will sell Treasury Coin, as follows: Thursday, March 9, $2,000,000; Thursday, March 16, $1,000,000; Thursday, March 23, $2,000,000; Thursday, March 30, $1,000,000. And buy in two millions of Bonds on each Wednesday of the month, the Department reserving to itself the usual privileges.

The specie reserve of the city banks according to the latest return is $24,332 207, against $35,898,498 same time last year. The city bank deposits are now $225,059,574, against $213,078,341 week ending March 5, 1870. The legal tender reserve amounts to $58,019,768, against $54,065,983 same time last year. The circulation now stands at $31,660 282, against $33,783,942 same time last year. The loans are now $282,681,886, against $268,634,212 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $111,238,555 a day, against a daily average of $79,911,303 the preceding week. The current week's exchanges average about 122⅛ millions a day. The city banks, last week reported a gain of $770,159 of specie, $7,430,458 of deposits, and $841,360 of legal tender notes. They increased their loans $4,625,887; and reduced their circulation, $60,168.

National Bank notes to the amount of $670,970 were issued last week by the Treasury Department. Deducting from the grand total issue to 1741 banks the currency returned, including worn out notes, amounting to $39,130,817, the existing 1,648 banks, (with an aggregate capital of $435,356,084,) retain an actual circulation of $309,876 048. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $353,075,000; and for the public deposits, $15,961,500—making a total of $369,036,500. The Treasury Department last week redeemed and destroyed $715,600 of worn and mutilated fractional currency, and issued $856,452 of new.

The coin reserve of the Treasury Department on Monday morning was $100,883,000, including $29,779,000 represented by outstanding coin certificates; and the currency balance was $16,252,000. On Wednesday, the coin reserve was $101,800,000.

Secretary Boutwell has instructed the U. S. Assistant Treasurer at this port to notify the holders of three per cent. certificates of March 2d, 1867, and July 25th 1868, that all such certificates bearing date from October 15th, 1867, to December 16th, 1867, inclusive, of the denomination of $5,000 each between numbers 86 and

1,099, inclusive, and of the denomination of $10,000 between numbers 759 and 1,070, inclusive, will be paid on presentation at his office at the Treasury, or at the Boston or Philadelphia Sub-Treasury, and from April 30, 1871, will cease to bear interest or to be available as a portion of the reserve of national banks. The aggregate amount of these certificates described is $2,000,000.

The U. S. Sub-Treasury, on Thursday morning of this week, held a balance of $8,002,100 in currency, and $65,493,532 in coin, against a balance a week previous of $10,288,890 currency, and $64,894,428 coin.

The U. S. Sub-Treasurer retired, last week, $3,080,118 of coin certificates, received for customs.

Government revenues have been yielding up to a fair average, since our last. The customs at the port of New York, last week were $3,311,119; and at the outports, equal to about $1.150,000 more, all in coin, or coin certificates. The internal revenue yield thus far in the current fiscal year beginning with July 1, 1870, has been about 104 millions.

Gold has been quoted firmer, on a rather more confident movement, though the actual dealings have not been quite as extensive. The speculative demand has been assuming a more positive form, stimulated by the free customs call, and the hardening tendency of the foreign exchanges. The range of the week has been from 110¾@111⅛, and the closing quotation on Wednesday was 111⅛ against 111 the preceding Wednesday. The Russia on Wednesday carried out $529,696 in specie.

The Gold Exchange Bank clearances on Saturday of last week were $37,224,000; on Tuesday of this week $15,639,000, the extremes since our last.

The export drain was $2,738,062 last week (including a transhipment of $2,257,000 in Mexican Silver) against $298,453, same week preceding year. The shipments since July 1, 1870, have been $50,121,770, against $21,827,653 same time in 1869–'70.

The customs demand for Gold last week, averaged $567,333 a day; thus far, this week, it has averaged $601,156 a day, or equal to a weekly aggregate of $3,606,926. The arrivals of specie from Europe, Havana and other foreign ports last week were $2,287,781, and since Jan. 1, 1871, $2,707,515, against $3,064,381 same time in 1870. The total customs revenue of the Government, in coin, at this port, since July 1, 1870, has been $98,130,028, against $88,972,094 same time in 1869–'70.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt since July 1, 1870, $65,115,218 against $65,589,902 same time in 1869–'70.

Foreign Exchange has been quoted stronger, on a very moderate offering of bankers' bills, and a rather livelier inquiry, from importers, to make remittances. Bankers' sixty day bills on London closed on Wednesday at 109½@109¾; sight bills on London, 110⅜@110⅝.

Government securities have been quite active during the week, at generally stronger prices, with increased dealings partly speculative in nearly all issues, especially the six per cents of 1881, the Ten-Forties, and the Currency Sixes. The latest dealings on Wednesday indicated rather less firmness in the general market.

On Wednesday, Government bought in two millions of Five-Twenties at 109 89@110 08, ex-interest. The amount of bonds offered was $4,594,550.

U. S. sixes of 1881 closed here on Wednseday of the current week at 115⅜@115⅝; U. S. Five-Twenties of 1862, 111⅞@112⅛; U. S. Five-Twenties of 1864 at 111⅞@112; U. S. Five-Twenties of 1865, 111⅞@112⅛; U. S. Five-twenties of 1865 consolidated, 110⅞@111; U. S. Five Twenties of 1867, 111@111⅛; U. S. Five-twenties of 1868, 111¼@111⅜; U. S. Ten-forties at 109¼@109½ ex-coupon; U. S. Six per cent. currency bonds, 114¼@114⅜.

State bonds have been in fair demand, at generally well supported prices.

Railway bonds have been in fairly active request at generally firm prices. Central Pacific Sixes have been quite active, closing at 95⅝@95¾. The Chesapeake and Ohio R. R. First Mortgage six per cent. gold bonds have been in good demand at 90 per cent. and accrued interest. Union Pacific Sixes closed rather weak at 83½@84.

Railway and miscellaneous share property has been quite active, but quite variable as to values, closing heavily and irregularly. Union Pacific stock closed at 29¼@29½. Western Union Telegraph at 54⅛@54¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

General business has been fairly active in the line of imported goods, as also in the chief articles of domestic produce. Breadstuffs have been quoted stronger in price. Provisions have shown less firmness. Naval Stores have been dearer, and advancing. Cotton has been further depressed and lower, under more liberal offerings and less favorable advices from Liverpool. Middling upland cotton closed on Wednesdayat 14¾ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,918,965 bales, against 2,153,682 bales same time last year; exports 1,844,468 bales, against 1,250,059 bales same time last year; stock at the ports, at latest dates, 695,724 bales, against 532,966 bales same date 1870. Ocean freights have been fairly active and quoted firmer. For Liverpool, cotton at ⅛@5/16d. by sail and 5/16@⅜d. by steam, per lb.; flour at 2s.@2s. 3d. by sail, and 2s. 6d.@@2s. 9d. by steam, per bbl.; grain at 5¼d. by sail, and 6⅛d. by steam. per bushel; and heavy goods at 15s.@27s. 6d. by sail, and 25s.@40s. by steam, per ton.

A Railroad Life Preserver.

Out of the horror and confusion of the great railroad disaster on the Hudson River road, thoughtful men are trying to evolve lessons which will aid in preventing a recurrence of similar scenes, and make railroad travelling as secure as science can make it. One fact, in particular, seems well proved—that the patent safety coupling which attached the cars of the ill-fated train, saved many lives which, if the old plan had been in use, would have been sacrificed. Mr. J. V. Farwell states that the car in which he was sleeping was connected with that before it by a patent coupling, which, when the forward car left the track and, doubtless, turned over, released it and left it unharmed. The patent device referred to, which as we happen to be informed, is that known as Miller's coupling, consists, prominently, of a great iron hook projecting from each car self-fastening, but so arranged that when one car tips over the other is at once unhooked. In connection with this coupler is a peculiar platform, very strong and built directly on the line of the car sills, so that it is absolutely impossible for one car to mount upon another and crush through it. Had the ordinary coupling and platform been in use the Chicago car would have, undoubtedly, leaped upon the other and "telescoped" through it, involving the passengers in both cars in a terrible and inextricable mass, and adding many fold to the horrors of the scene. This Miller patent, which we believe is in use on most of the roads leading out of Chicago, seems such a common-sense contrivance, and has so often saved scores of lives, that we wonder that it is not generally adopted. All the passenger trains of the Hudson River, New York Central and Michigan Central roads are equipped with it, so that the train in question would, in an ordinary accident, have escaped with slight damage. The inventor, Col. E. Miller, formerly a Wisconsin man, deserves the thanks of thousands whom his genius has saved from horrible maiming or death.—*Chicago Mail.*

Union Pacific Railroad.

At the annual meeting of the stockholders of this company in Boston on the 8th inst., the following gentlemen were elected directors for the ensuing year: Thomas A. Scott, Pennsylvania; Oliver Ames, Massachusetts; John Duff, Massachusetts; Elisha Atkins, Massachusetts; Oakes Ames, Massachusetts; L. P. Morton, New York; Royal E. Robbins, Massachusetts; James Brooks, New York; G. M. Dodge, Iowa; Sidney Dillon, New York; C. S. Rushnell, Connecticut; John Edgar Thomson, Pennsylvania; Andrew Carnegie, New York; George M. Pullman, Illinois; F. Gordon Dexter, Massachusetts.

At a subsequent meeting of the directors, Thomas A. Scott was elected President.

☞ Messrs. Overton & Lewis have the contract for the construction of the Brunswick and Albany Railroad, from Albany eastward to the Alappaha River, about 60 miles.

☞ About twenty miles of track has been laid on the St. Louis and Santa Fe Railroad, from Holden, a station on the Pacific Railroad, west to Harrisonville.

☞ The Lehigh and Susquehanna Railroad has been leased to the Pennsylvania Railroad Company.

☞ RAILROAD BONDS.—Whether you wish to buy or sell, write to CHARLES W. HASSLER, 24 Broad Street, New York.

NEW LOAN OF THE UNITED STATES.

IMPORTANT CIRCULAR.

TREASURY DEPARTMENT,
WASHINGTON, Feb. 28, 1871.

Public notice is hereby given, that books will be opened on the 6th day of March next in this country and in Europe, for subscriptions to the National Loan, under the Act approved July 14, 1870, entitled "An Act to authorize the Refunding of the National Debt," and the Act in amendment thereof, approved Jan. 20, 1871.

The proposed loan comprises three classes of Bonds, namely:

First—Bonds to the amount of five hundred millions of dollars, payable in coin, at the pleasure of the United States, after ten years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of five per cent. per annum.

Second—Bonds to the amount of three hundred millions of dollars, payable in coin, at the pleasure of the United States, after fifteen years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of four and a half per cent. per annum.

Third—Bonds to the amount of seven hundred millions of dollars, payable in coin, at the pleasure of the United States, after thirty years from the date of issue, and bearing interest, payable quarterly in coin, at the rate of four per cent. per annum.

Subscriptions to the loan will have preference in the following order, namely:

First—Subscriptions that may be first made for five per cent. Bonds to the amount of two hundred millions of dollars, of which there will be reserved, for twenty days, one-half for subscribers in this country and one-half for subscribers in foreign countries.

Second—Subscriptions for equal amounts of each class of Bonds.

Third—Subscriptions for equal amounts of Bonds bearing interest at the rate of four and a half per cent., and of Bonds bearing interest at the rate of five per cent.

Fourth—Subscriptions for any five per cent. bonds that may not be subscribed for in the preceding classes.

When a subscription is made, the subscriber will be required to deposit two per cent. of the amount thereof in coin or currency of the United States, or in bonds of the class to be exchanged, to be accounted for by the Government when the new Bonds are delivered, and payment may be made either in coin or in bonds of the United States, known as FIVE TWENTY BONDS, at their par value.

The coin received in payment will be applied to the redemption of Five-twenty Bonds, and the debt of the United States will not be increased by this loan.

The bonds will be registered or issued with coupons, as may be desired by subscribers. Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5,000 and $10,000; and coupon bonds of each denomination except the last two. The interest will be payable in the United States, at the office of the Treasurer, any Assistant Treasurer, or Designated Depositary of the Government, quarterly, on the first days of

February, May, August and November, in each year.

The bonds of the several classes aforesaid, and the interest thereon, are exempt from the payment of all taxes or dues to the United States, as well as from taxation in any form by or under State, municipal or local authority.

After maturity, the bonds last issued will be first redeemed, by classes and numbers, as may be designated by the Secretary of the Treasury.

The bonds will be issued at the United States Treasury, but the agents for the negotiation of the loan in Europe are authorized to make arrangements with subscribers for the transmission of the bonds to the agents through whom subscriptions may be received.

Subscribers in the United States will receive the new bonds of the agents with whom the subscriptions are made.

In the United States, the National Banks are authorized to receive subscriptions, and subscriptions may also be made at the office of the Treasurer of the United States, or of any Assistant Treasurer, or at the Designated Depositaries at Buffalo, N. Y., Chicago, Ill., Cincinnati, Ohio, Louisville, Ky., Mobile, Ala., and Pittsburg, Penn.

The following banking houses are also authorized to act as agents in receiving subscriptions in the United States, viz.:

Decrease of debt during the past month	$7,317,960 08
Decrease of debt since March 1st, 1869	$204,754,413 09

Bonds issued to the Pacific Railroad Companies, interest 6 per cent. payable in lawful money:

	Amount outstanding.	Accrued interest, not yet paid.
Union Pacific	$27,236,512	$272,365 12
Kansas Pacific	6,303,000	63,030 00
Sioux City and Pacific	1,628,320	16,283 20
Central Pacific	25,881,000	258,810 00
Central Branch Union Pacific	1,600,000	16,000 00
Western Pacific	1,970,000	19,700 00
Totals	$64,618,832	$646,188 32
Interest paid by United States	$10,758,910 45	
Interest repaid by transportation of mails, etc.	2,460,818 94	
Balance of interest paid by United States	8,293,091 51	

☞ The New York and Oswego Midland Railroad Company has leased the Midland and Crawford Railroad running north from Middletown, for the term of 99 years. The directors are also negotiating for a lease of the Middletown, Unionville and Water Gap Railroad, running south from Middletown.

☞ The Pittsburg and Connellsville Railroad Company received recently from Wilmington, Delaware, several first class passenger cars, with all the modern improvements, and President Hughart has contracted for Pullman palace sleeping cars, to be delivered in thirty days.

Journal of Railroad Law.

RAILROAD COMPANIES—NEGLIGENCE IN NOT RINGING BELLS.—DANGER IN WALKING UPON TRACKS. RULE OF DAMAGES.

The late case of Harty *vs.* The Central Railroad of New Jersey (42 N. Y. 468) was an action to recover damages for negligence causing the death of plaintiff's husband. The following is the able opinion of the court delivered by

EARL, CH. J.—I shall assume that the intestate was lawfully upon the railroad at the time of the accident. There was sufficient evidence to authorize a jury to find an implied license, to all the persons working at the slaughter house, to go upon the railroad between the highway crossing and the slaughter house. But, I think, the plaintiff should have been defeated at the circuit, both because he failed to show any negligence on the part of the defendant, and because the negligence of the intestate contributed to the accident. The only negligence alleged against the defendant was, that its servants upon the engine did not ring the bell, nor blow the whistle as required by the New Jersey Law. The sole object of this law, it seems to me, was to protect persons traveling upon the highway, at or near the crossing. In the language of Allen J., in the People *vs.* New York Central Railroad Co. (25 Barb. 199), in reference to a similar law of this State, "the hazards to be provided against were two fold: 1st. The danger of actual collision at the crossing; and 2d. That of damage by the frightening of teams traveling upon the public highway," near the crossing. For the protection of such persons, railroads were required to put up the signboard at the crossing, and to ring the bell or blow the whistle. The signboard was to be put up "so as to be easily seen by travelers," and none of the precautions were required, except where the railroad and highway crossed each other upon the level; thus showing clearly that the law makers had in mind only the danger to travelers upon the highways by collisions at the crossing. Railroad companies were not required by this law to ring the bell nor sound the whistle when the highway passed along the railroad nor when it passed at an elevation over it or under it, nor were they required to take these precautions for the protection of persons walking along upon the railroad. I conclude, therefore, that the intestate was not within the protection of this law, and that the railroad company owed him no duty, under the law, to ring the bell or sound the whistle. But the duty of railroads as to giving alarms by bell and whistle is not limited to the measures imposed by this law. They are bound to use at least ordinary prudence and diligence to avoid collisions with persons lawfully crossing their tracks; and hence at road crossings and in the streets of villages and cities, in the absence of any statute law, they would be required to use these ordinary precautions to avoid accidents, and if they omitted them they would be liable to persons injured without their own fault by collisions. If the intestate had been walking along upon the north track and the persons in charge of the engine had seen him in time, it would have been their duty to have rung the bell or blown the whistle so as to have warned him of danger. But he had been walking about 400 feet upon one of the other tracks, and the men in charge of the engine, if

they saw him, had no reason to suppose that he would needlessly and heedlessly go upon the north track, immediately in front of the engine; and, when he did do so, it was too late to warn him of danger. If this company was bound to give these warnings to this man, then every railroad is bound to do so to every person who may be upon the railroad ahead of a train, although he is not on the track and not in a place of danger. I think it would be unreasonable to carry the precautionary obligations of railroad companies to such an extent; and I therefore hold, that this railroad was guilty, as to the intestate, of no negligence in not ringing the bell or blowing the whistle, under the circumstances disclosed in this case.

I also reach the conclusion, that the intestate was guilty of negligence contributing to the accident. We may rightfully assume that the intestate was familiar with this railroad, as he lived and worked in sight of it for three months and daily passed over it between the crossing and the slaughter house, and that he knew that the trains made but little noise in passing over the salt meadows, and that the north track was the one used by westward bound trains. This train was upon time, going at a slow rate of speed. There was nothing to obstruct his view. All he had to do before he passed upon the north track was to look, and the neglect of this ordinary precaution cost him his life. It was not necessary for him to go upon the north track to avoid collision with the eastward bound train. He could have gone between the tracks. Instead of doing this, he needlessly and thoughtlessly went upon the north track with his back toward the coming train. When he was upon the railroad track, he knew he was in a place of danger and that he might be killed; and hence it was his duty to use his eyes and ears, and to take at least ordinary precautions to save his life. Not having done this, I believe it is now well settled that no damages can be recovered on account of his death.

The order of the General Term should be affirmed and judgment absolute ordered against the plaintiff.

Judgment affirmed and judgment absolute for defendant.

New Brunswick and Quebec Railway.

It affords us much satisfaction to learn that parties interested in the promotion of the scheme for building a railway from Riviere du Loup, in the province of Quebec, to Woodstock, in New Brunswick, appear to be meeting with every encouragement. They have succeeded in obtaining grants of land from the governments of Quebec and New Brunswick, equal to 10,000 acres per mile of railway to be built, and, in addition to this, they have received promises of support from some of the largest holders of land in both provinces—*Canadian News.*

☞ The following are the names of the new board of directors of the Memphis and Little Rock R. R. Co.: W. M. Farrington, Thos. M. Bowen, H. B. Edmondson, H. L. Brinkley, Sam. Tate. The new board elected Col. Sam. Tate President, and Hugh L. Brinkley Vice President.

☞ Mr. A. Mitchell has been appointed Assistant General Superintendent of the Illinois Central Railroad, with office at Chicago. Mr. C. A. Beck has been appointed Superintendent of the Chicago Division, with office at Centralia.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH, BANKERS,
No. 5 NASSAU STREET,
NEW YORK, February 27, 1871.

THE CHESAPEAKE AND OHIO RAILROAD.

A NEW TRUNK LINE FROM THE SEABOARD TO THE WEST, is already completed and in operation from Richmond to the celebrated White Sulphur Springs, 227 miles, and there remain but 200 miles, now under construction, to complete it to the Western terminus on the Ohio River, 315 miles below Pittsburg, at the head of RELIABLE AND CONTINUOUS navigation.

The completed portion of the Road is doing a GOOD LOCAL BUSINESS, which will be enormously increased as it progresses and opens the immense mineral riches of Virginia and West Virginia, whose coal and iron are celebrated for their quality and abundance, and would alone enrich the means of communication which affords them access to the markets East and West.

The advantages of the Chesapeake and Ohio Railroad AS A GREAT EAST AND WEST THROUGH LINE, for the transportation of the heavy freights (which constitute the principal part of the East and West through traffic), are numerous and important.

1. *A short route* between the Atlantic coast and the Great West.
2. *Low grades.*
3. *Light curves.*
4. *A Genial climate*, which admits of safe, economical, and rapid railroad operation throughout the year.
5. *East and West termini* at favorable points on tidewater and the Ohio River.
6. *A very large through and local traffic* awaiting its progress.
7. *A comparatively light capital and debt*, and consequently a light tax upon traffic for payment of interest and dividends.

All these conditions favor a cheap and economical working of the line, and enable the Chesapeake and Ohio route to do a profitable East and West through business at rates which would not pay by the more difficult and costly lines, *and to control an enormous Southwestern through trade.*

We are now authorized to sell an additional amount of the

FIRST MORTGAGE SIX PER CENT. GOLD BONDS

of the Company, at the original price of 90 *and accrued interest.*

The Bonds are secured by a mortgage upon the entire road, franchises, and property of the Company, WHICH NOW, IN COMPLETED ROAD AND WORK DONE, EXCEEDS THE ENTIRE AMOUNT OF THE MORTGAGE, and which, when completed, will be worth at least $30,000,000.

A *Sinking Fund* of $100,000 per annum is provided for their redemption.

They are issued as Coupon or Registered Bonds, and in denominations of

$100, $500, and $1,000.

Interest payable May and November, in the City of New York.

The superior advantages, valuable property and franchises, and able and honorable management of the Chesapeake and Ohio Railroad Company render it one of the most substantial, reliable and trustworthy Corporations in the country, and commend its Securities to the unhesitating confidence of capitalists and investors.

Pamphlets, maps and full particulars furnished upon application.

FISK & HATCH, Bankers.

Illinois Central Railroad.

The statement of this Company for the month of February, 1871, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	3,923.73 for	$40,406 20
Acres Int. Fund Lands sold	94.46 for	1,561 40
Acres Free Lands sold	80.00 for	1,120 00
Total sales during month of February, 1871	4,098.19 for	$43,087 60
To which add Town Lot Sales		250 00
Total of all	4,098.19 for	$43,337 60
Cash collected in February, 1871		$164,630 61

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois 707 Miles.	In Iowa 402 Miles.	Total. 1109 Miles.
Freight	$305,252 00	$36,438 00	$341,690 00
Passengers	113,238 81	24,112 05	137,350 86
Mails	6,375 00	3,059 33	9,434 33

Tot. Feb., '71	$498,865 81	$66,550 05	$665,415 86
Total actual earn'gs, Feb. 1870	$573,685 43	$88,103 53	$661,788 96

Southern Pacific Railroad Bill.

The Southern Pacific Railroad Bill has passed both Houses of Congress and received the signature of the President. It provides for a line from El Paso to San Diego, with branches to New Orleans and San Francisco, and grants about sixteen million acres of public lands, which are in addition to the land grant given by the State of Texas to the road. There is no subsidy, and the road is required to be built of American iron.

☞ The following houses have been appointed agents for the negotiation of the new Government loan abroad: Great Britain—Baring Brothers & Co., London; A. M. Rothschild & Sons, London; Morton, Rose & Co., London; Jay Cooke, Mc Culloch & Co., London. Germany—M. A. De Rothschild & Sons, Frankfort. France—De Rothschild Brothers, Paris; Drexel, Hargles & Co., Paris. Holland—Hope & Co., Amsterdam.

☞ The stockholders of the Springfield, Cincinnati and Dayton Short Line Railroad ratified the contract with the Cleveland, Columbus, Cincinnati and Indianapolis, and Lake Shore and Michigan Southern Railways and the Cincinnati, Sandusky and Cleveland Railroad. Surveys will soon be in progress at both ends of the line.

☞ The following named gentlemen were elected Directors of the Pennsylvania Railroad Company on the 6th inst. J. Edgar Thomson, Josiah Bacon, Wistar Morris, George Black, Pittsburg, Samuel T. Bodine, Joseph B. Myers, Edward C. Knight, Washington Butcher, John M. Kennedy, John Rice.

☞ The Houston Tap and Brazoria Railroad was sold on the 15th of February at Austin, the State of Texas becoming the purchaser at $89,000.

☞ The Delaware and Raritan Canal will be opened for navigation on Monday the 13th instant.

Western Maryland Railroad.

This road is progressing as rapidly as the contractors can employ the force engaged to advantage. Some three or four hundred hands are now at work on the five sections between Mechanics town, in Frederick county, and Smithsburg, in Washington county. The fine weather now opening will enable the company to push the road across the mountain with rapid speed.

☞ The Port Tobacco *Times* says that work upon the Baltimore and Potomac Railroad is steadily progressing, and at this time one-half the grading within Charles county has been completed. At the Pope's creek end of the line, Colonel Cox, the contractor, has about two hundred hands at work.

☞ The Farmington and Lowell Railroad is progressing rapidly toward completion. Colonel Phelps, the contractor, has full forces on the grading. The iron is on the way from Europe, and it is confidently expected that the road will be open for travel by the first of August.

☞ At a meeting of the Central Railroad Company (A. T. Stewart's) of Long Island, held on the 4th inst., Conrad Poppenhusen was elected President; Loomis White, Vice President; John A. Locke, Secretary, and Herman Poppenhusen, Treasurer.

☞ The opening of the first section of the Northern Pacific Railroad from its junction on Lake Superior to the Mississippi river took place on the 7th inst.

☞ The new draw of the Fitchburg Railroad bridge across the Charles River has been completed, and is in successful operation, so that the passage of vessels on the river is unobstructed.

Rolling Mill Property
FOR SALE,
OPPOSITE NEW YORK CITY.

The well-known North River or Durbin Rolling Mill, situated at Prospect and North 5th St., Jersey City, New Jersey. The Real Estate consists of sixteen city lots, 25x100 feet each, with two large Dwelling Houses, well built and in good order. Also a large building occupying two lots, suitable for a Machine Shop or other purposes, a Stable, &c.

The Rolling Mill was built for the manufacture of Locomotive and other descriptions of Boiler Tank and Plate Irons, contains a heavy Roll Train, Engines, Furnaces, Machinery, &c. to suit, in good order. It can be seen running, and has been successfully run from its establishment in 1855. Situated near the Hudson River, a short and nearly equal distance from all the New Jersey Railroad Depots and Ferries, the Erie Depots and Ferries and the Hoboken or Delaware & Lackawanna Depots and Ferries, from its proximity to the New York Market, the large Locomotive and Railroad Shops of the City and Paterson, the facilities for forwarding to all points by water or railroad, it cannot be surpassed.

The Real Estate is rapidly increasing in value the vast R. R. Interests and dock improvements mentioned having taken up almost the entire River front and space below the mill property from the Cortland St. to Hoboken ferries. The reputation and business established. The Proprietor intends retiring from the business, and for further particulars can be addressed or seen daily at the

Office, 140 HUDSON STREET,
Jersey City N. J.,
In the First National Bank Building.

Propositions for Lease or Selling the Machinery for removal entertained.

Map can be seen and General Information may be obtained also of Wm. H. Wallace & Co., Corner of Liberty and Washington Streets, N. Y., City Agents; and R. R. Chrisman, Supt. Central Iron Works, Harrisburgh, Pa. (formerly a Proprietor.)

THOMAS D. STETSON, Solicitor of American and Foreign Patents, and Professional Expert in Patent Cases. No. Tryon Row, New York.

HOOSAC TUNNEL NITRO-GLYCERINE WORKS.

Nitro-Glycerine, Electric Fuse Exploders, Pure Gutta Percha Insulated Wire.

The Tri-Nitro Glycerine manufactured under the Mowbray Patents is safer to handle, has 30 per cent. more explosive force, and is a more stable compound, than can be made by the Nobel Process. Our fuses are safe to handle and are sure fire. We purify our own Gum Gutta Percha, and insulate copper wire with machinery (the result of many years' investigation) with the sole view to render blasting with Nitro-Glycerine perfectly safe and 50 per cent cheaper than with powder. Proved to have double the force in blasting over Dualin, Dynamite, and other adulterations of inferior Nitro-Glycerine with inert matter.

Drexel, Winthrop & Co.,
NO. 18 WALL-ST.,
OFFER FOR SALE
Houston and Texas Central Railway Company
FIRST MORTGAGE LAND GRANT
SINKING FUND
7 Per Cent. Gold Bonds.

Secured by a First Mortgage upon 6,400 acres per mile, and upon the whole and entire line of road, its franchises and property of every description.

RECEIPTS IN GOLD COIN.

Operating 141 Miles. 1869.	Operating 166 Miles. 1870.
$1,047,827 65.	$1,538,420 00.

The receipts for January, 1871, were $213,000, gold.

The net earnings for the year 1870 were more than sufficient to pay the interest upon $13,000,000, or over three times the present issue of Bonds.

The affairs of this Company have been examined by many capitalists, who have invested largely in the Bonds, and we are confident that a careful scrutiny will prove them to be the best and safest security now offered in this market.

FOR SALE AT 90 AND ACCRUED INTEREST
BY
DREXEL, WINTHROP & CO.,
No. 18 Wall-st.

THE PARTNERSHIP HERETOFORE EXISTING under the firm name of Burton & Macdonald, engineers and contractors, is hereby dissolved by the withdrawal of Charles Macdonald. Existing contracts will be completed by the late firm, and either party may sign in liquidation.

Dated March 1, 1871, 80 Broadway, New York.
A. B. BURTON, CHARLES MACDONALD.

CHESAPEAKE AND OHIO RAILROAD.
Notice to Contractors.

SEALED PROPOSALS will be received by the undersigned, at Richmond, Va., until 12 M. 28th March, 1871, for the graduation and masonry on one hundred and eight miles of this road west of White Sulphur Springs, it being all the remaining unfinished portion of the road not now under contract. The work embraces 3,000,000 cubic yards in open cutting, 27,000 cubic yards in tunnels, and 60,000 cubic yards of masonry, of all classes, and is to be completed May 1st, 1872. Profiles and specifications can be had after the 14th March, at the offices of the company, 54 William street, New York; at Richmond, Va., and at Huntington, W. Va. Plans for and proposals for building the iron superstructure of the New River Bridge, at Miller's Ferry, Fayette county, W. Va., will be received at the same time and place. There will be two spans of 250 feet each, and two of 70 feet each. Parties submitting proposals should see the site of the bridge, where further information may be had from the engineer in charge. This bridge must be completed by December, 1871.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail,* with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired; and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

New York Saturday, March 18, 1871.

Union Pacific Railroad.

At a meeting of the newly elected directors of this corporation in Boston on the 8th inst., the following gentlemen were elected officers for the ensuing year: President, Thomas A. Scott, of Pennsylvania; Vice President, John Duff of Boston; Secretary, Hon. E. H. Rollins of New Hampshire; Treasurer, Hon. J. M. S. Williams of Boston. As soon as the result of the election was declared, Mr. Scott took the chair and addressed the Board as follows:

To the Board of Directors of the Union Pacific Railroad Company:

GENTLEMEN:—In taking charge of this important highway as its President, in obedience to the unanimous call of its shareholders and the action of your Board, I beg leave to state that, so far as my experience of over thirty years in railway life can be made useful to the board and the shareholding interest, it shall be freely given, and I trust the practical results may in the future be found satisfactory. As a condition precedent to accepting the position I made the following requirements: *First*, that all unsettled contracts for the construction and equipment of the road should be adjusted and paid. *Second*, that all the floating debt of the company should be provided for as it matures by the actual sale of assets on hand applicable to that purpose. Both these conditions having been complied with and a satisfactory balance in cash and assets remaining in the treasury to provide for contingent wants, I accept the position, and will endeavor to give it such time and attention as may be needful, in connection with the board and its officers, to insure a proper management of the affairs of the company.

In order that we may understand in brief form the present condition of the company, I have made the following summary from the official records as presented to me by the heads of departments:

REVENUE—EARNINGS, 1870.

January 1 to June 30		$3,794,727 91
July 1 to December 31		3,830,549 20
Total		$7,625,277 11
EXPENSES.		
January 1 to June 30	$2,740,472 27	
July 1 to December 31	1,936,942 51	
		$4,677,414 78
Net earnings		$2,947,862 29
Interest upon bonded debt, including 10 per cent. income bonds (but exclusive of land grant bonds)		2,831,123 00
Leaving surplus		$116,739 38

LAND DEPARTMENT. Bonds 7 per cent. currency, $10,000,000; annual interest, $700,000.

LAND SALES. 292,900 acres; proceeds, $1,306,566; average price per acre, $4 46.

On account of these sales the company has received and redeemed land grant bonds to the amount of	$736,000
For the remainder the company holds land notes maturing in one, two or three years, with accrued interest	576,650
	$1,312,650

The condition of the land department may, therefore, be stated thus:

Bonds		$10,400,000
One year's interest thereon		728,000
		$11,128,000
Principal reduced by bonds redeemed	$736,000	
Land notes on hand	676,650	
		$1,312,650

Showing an absolute reduction, after providing an amount equal to the interest upon the entire debt in the land department, of $584,650.

The Co. is entitled, under the grants from government after deducting the total lands pre-empted before passage of the act, to	12,080,000 acres.
From which deduct amount heretofore sold	292,883 acres.
Leaving on hand as an asset	11,787,117 "

which, at an average value of two dollars per acre, being twenty per cent. below the minimum government price for adjoining lands owned by it, should yield the gross sum of $23,574,234. So much thereof as may be required to be applied to the payment or redemption of the land grant bonds and the interest thereof, and the balance will go into the treasury, as received from time to time, for the benefit of the stockholders.

In going over the data submitted to me I find, as before stated—1st, That the gross earnings for the past year show an aggregate of $7,625,277 11. 2d, That the average expenses for the last six months of the year, during which the working organization was reduced to meet existing wants, have been, per month, $323,000. At the same time the road has been thoroughly maintained and operated efficiently for that cost, being about fifty-two per cent. of the gross earnings. It shall be the effort of the management to provide for a largely increased traffic and keep the expenditures of the year within this limit. Satisfactory assurances have been received from Mr. Sickles, Chief Engineer and Superintendent of the line, that this can be effected.

The arrangements recently perfected with the steamship lines upon the Pacific coast, and the steady growth of California in wealth and population, must result in a satisfactory increase of through traffic. To this may be added a large increase of local traffic, caused by the rapid development of the rich mining districts of Utah, Colorado, Montana and other territories, the traffic of which (supplies as well as productions) must to a large degree pass over your line.

From present indications it would seem reasonable to estimate the gross receipts of the coming year at a minimum of	$9,000,000
With a cost of maintaining and operating the line on this increased earning of not exceeding, say	4,500,000
Leaving as net receipts to be applied to interest and dividend, if so directed by the Board, exclusive of the operations of the land department of	4,500,000

The completion of the bridge across the Missouri River at Omaha within the present year, and for which the means have been provided by the sale of bridge bonds as specially authorized by act of Congress, will greatly facilitate the movement of traffic and relieve the public from the serious delay and annoyance incident to transfer by ferry.

The operations of the line for the first twenty months of its existence as a completed road show net earnings sufficient to meet the interest upon its entire bonded debt. This result cannot but be deemed, by all practically versed in the history of new railway lines, as indicating a successful

future. The yearly increase of traffic, costing but little additional to transport and therefore yielding a large percentage of net revenue, must soon give a value to your property not readily appreciated at present.

Philadelphia Scale Works.

We have been examining, with a great deal of interest, the extensive scale works of the Messrs. RIEHLE BROS. at Ninth and Coates streets, Philadelphia. We find they are making many new improvements, and display a great deal of taste in their mode of operations; their using the finest materials, and sparing no expense in finishing their work perfectly, are proofs of it. We know of no scales, especially their patented ones, that are superior to them, which fact has been more or less acknowledged by many of the largest concerns in the country, who have became their constant patrons, as is to a great extent, proved by the many letters of recommendation which they hold. Scales that are made merely for sale, do greater injury than good, and should not be used, as it is impossible for a scale made in a rough or careless manner, to weigh uniformly and accurately. The Messrs. RIEHLE BROS. have long maintained a reputation for the carefulness of their workmanship, and they have it in their power to make scales, which can take rank with any in this city, from the fact of their having their steam works and iron and brass foundries connected together in their business. Their workmen, too, are all hands of long experience. The Philadelphia Scale Works ranks among the oldest of its kind; having been established in 1846. We would like to say a word in praise of their testing machine, for ascertaining by actually weighing the breaking strain of metals, chain, rope, &c. The experiments with it are very interesting and useful. They have made several for different pipe foundries in this region, and for car works at St. Louis, which are giving the greatest possible satisfaction. Also a word in favor of a reliable mortising machine, made in a substantial manner, but time and space will not permit. A handsome railroad track scale, lately put up by them, (80 feet long), can be seen at the North Pennsylvania Railroad, Berks and American streets; also, a dormant scale, at Messrs. Washington Butcher & Sons, Front street, worth examining.

Kansas Pacific Railway.

This company has been actively engaged during eight months of the year, in the construction of that portion of its Main Line known as the "Denver Extension." On August 15th, the road was completed between Kansas City, Missouri, and Denver, Colorado, a total distance of 638.6 miles. Of this distance, about 210 miles of track were laid in 1870.

The following is a general exhibit of the earnings and expenses of the transportation department, for the year ending December 31, 1870:

EARNINGS.

Freight—Ordinary	$1,707,586 60	
Government	148,867 49

The average length of road in operation during the year was 551 50/365 miles, and the gross earnings per mile, $6,097 91. In 1869, the gross earnings per mile were $5,075 48—increase per mile in 1870, $1,022 43.

The earnings from merchandise and passenger traffic in 1870, were $2,657,256 68; do., in 1869, $1,703,415 92—increase in 1870, $953,840 76.

The transportation of live stock has increased largely over any preceding year, and has become an important branch of the business of the road. The total shipment of live stock in 1870, was 6,542 car loads, or 130,840 head; do., in 1869, 2 500 car loads, or 50,000 head—increase in 1870, (nearly 162 per cent.,) 4,042 car loads, or 80,840 head.

The live stock driven from Texas have heretofore reached the line of road at points east of Ellsworth, but since the completion of the road to Denver, there is every promise of a heavy movement of cattle from Texas, Southern Colorado and New Mexico, over the whole length of the line.

The operating expenses of the road have been about 73 per cent. of the gross earnings, an increase of 11 per cent. over the preceding year. This increase in expenses has been due to the operation of the new road rapidly extended into an uninhabited country, without any immediate corresponding increase of business; to the large expenditure incurred in providing permanently against winter snows; and to the high rates which the company has been compelled to pay for fuel at the western end of the line. A very large reduction has since been secured in the cost of fuel in Colorado (amounting to a saving of $6 per ton, or about $450 per day) by the completion of the Boulder Valley Branch of the Denver Pacific Railway, direct to one of the best coal mines in the Territory. The control of the Denver Pacific and Boulder Valley Roads being in this company, insures their operation in harmony with it.

In view of the completion of the road to Denver, the prospective growth of trade with Colorado and the Pacific Coast, the active settlement being made on the lands along and tributary to the road, and the assurance of a cheap and abundant supply of good fuel, we believe, that with economical management, the operating expenses of the road will not hereafter exceed 60 per cent. of the gross earnings. The earnings in 1870 exceeded the estimate made in the Annual Report, published at the beginning of the year, by over $300,000, and we are satisfied that the estimate then made of $4,000,000 of gross earnings for 1871, will be fully realized. We estimate the net earnings from the Transportation Department, for 1871, at $1,600,000.

The total Land Grant of the Company aggregates about 6,000,000 acres, of which about 5,300,000 acres were unsold December 31, 1870.

3,000,000 acres, lying between the 380th mile post and Denver, are included in the mortgage for $6,500,000, dated June 20, 1869, known as the "Denver Extension Mortgage," and the remainder of the lands unsold July 1st, 1870, are covered by the Land Grant Mortgage of that date for $2,000,000.

1,503,565 acres of these lands have been appraised and placed in the market, at an average price of $3.10 per acre.

The total sales of lands and lots in 1870, were 124,168 acres for $389,105 68, or an average of $3 13 per acre. Cash collections from land sales during 1870, were $217,520 31, and bills receivable, outstanding December 31st, $1,120,905 86.

By the terms of the mortgage of July 1st, 1870, the proceeds of all sales of lands after that date are placed in the hands of the Trustees for the purchase and redemption of the Bonds issued thereunder. Sales of lots and lands, under this trust, from July 1st to December 31st, aggregate 27,246 acres and 139 town lots, for the gross sum of $111,234 16, of which $41,472 86 was cash and $69,761 30 was bills receivable. The 2,000,000 acres of land covered by this trust, estimating from sales already made, and the appraisements placed upon the unsold tracts, will probably yield to the company, after the payment of the $2,000,000 of Bonds issued thereon, a net amount of from $2,000,000 to $2,500,000, which will in time inure to the Capital Stock. A portion of the 3,000,000 acres of land, chiefly in Colorado, which are included in the mortgage of June 20th, 1869, for $6,500,000, have been appraised and placed in the market, and it is believed that from these lands a sum will ultimately be realised sufficient to take up the bonds long before maturity.*

* Sales of 5,575 acres of these lands since January 1, 1871, average $5 76 per acre.

CAPITAL STOCK AND FUNDED DEBT.

Capital stock authorized by law	$10,000,000
Capital stock issued, 177,450 shares $50 each	8,872,500

INTEREST BEARING BONDS.

First mortgage 30 year bonds, authorized by Pacific Railroad Acts of Congress, bearing interest at 6 per cent. in gold, payable semi-annually, secured on 393 5/16 miles of Main Line.	$6,303,500
First mortgage 30 year Leavenworth Branch Bonds, bearing 7 per cent. interest in currency, secured on 34 miles of road between Leavenworth and Lawrence	600,000
Land Grant Bonds, bearing 7 per cent. interest in currency, not secured on road but upon 1,000,000 acres of land between 140th and 240 mile posts, ($126,000 maturing March 1st, 1871, balance March 1st, 1876) outstanding	318,000
First mortgage 30 year Railroad and Land Grant Bonds, dated June 20th, 1869, secured on main line, from 393 5/16 mile post to Denver, at 638 6/10 mile post, and on 3,000,000 acres of land, bearing 7 per cent. interest in gold, free of U. S. taxes	6,500,000
First mortgage 10 year Land Grant Bonds, secured on all land unsold July 1st, 1870, lying east of 380th mile post, (not less than 2,000,000 acres,) bearing interest at 7 per cent. in gold, free of U. S. taxes	2,000,000
	$15,721,000

U. S. GOVERNMENT SUBSIDY BONDS.

Second mortgage on 393 5/16 miles of main line; principal payable in 30 years in currency, interest 6 per cent. in currency, payable only by retention in the United States Treasury of one-half of charges for Government transportation	6,303,000

INCOME BONDS.

Principal payable in 50 years, interest 7 per cent. currency, payable from net earnings only	4,275,350

The Railroad and Lands owned and controlled by this company, consist of—

Total miles owned and controlled	793 6/10

Kansas Pacific Railway Lands, unsold (about) 5,300,000 acres.

ASSETS AND LIABILITIES.

The assets of the company, in addition to the railway structure and equipments, and the lands as enumerated above, are as follows:

Notes for lands sold prior to July 1st, 1870		$1,058,691 02
Cash and notes received from lands sold under Trust Deed of July 1st, 1870		111,234 16
75 Seven per cent. Kansas Pacific Land Grant Bonds		75,000 00
345 Kansas Pacific Income Bonds		345,000 00
81 Six per cent. Kansas Pacific 1st mortgage bonds		81,000 00
Live stock and supplies on hand		871,014 68
Stock of National Land Company and bills receivable		75,520 87
Cash from U. S. Government for transportation $284,482 13, one-half due to Co		142,241 07
Cash in hands of paymaster		17,345 57
Collections in hands of ticket and freight agents		153,397 56
Real estate unincumbered, at cost		95,612 12
15,000 shares stock Denver Pacific Railway and Telegraph Co., $100 per share		1,500,000 00
		$4,026,057 05

The Liabilities, in addition to the Funded Debt, are:

Vouchers and pay-rolls	$420,680 51	
Bills payable (less proceeds of Land Grant Bonds sold)	430,347 54	
Notes of company given in settlement with Contractors, due in 1872, 1873 and 1874	582,400 00	
Coupons not presented	7,991 00	
Due on Denver Extension Account	11,994 69	
Due foreign roads	86,830 13	
Due sundry creditors	250,533 86	
		1,790,777 23
Excess of assets over liabilities		$2,235,279 82

By order of the Board,

JOHN D. PERRY, President.

St. Louis, Feb. 20, 1871.

Atchison, Topeka and Santa Fe Railroad.

The St. Louis *Journal of Commerce* says, in a recent issue, that this road is in a very prosperous condition. The Company's charter extends from Atchison to the western boundary line of the State of Kansas—in general direction toward Santa Fe; with the land grant of ten sections per mile. The road is in operation from Topeka to Emporia, sixty-two miles, and under contract to Florence at the mouth of Doyle Creek, forty-five miles west of Emporia. The material is on hand, at Emporia, to complete this forty-five miles and the work is being pushed rapidly forward, and the road will be opened to that point by the 1st of May next. At Florence the road strikes the great western Texas cattle trail, and being a short line to St. Louis will become a favorite route for the drovers who are dealing extensively in Texas cattle. Engineers are staking out work for another section of thirty miles west of Florence, which will be placed under contract at once. The iron for this thirty miles (English fifty-six pound punched for fish-bar) has been purchased for cash. This will complete the road to the Arkansas River, to which point the Company expects to run trains by July 1st. The road-bed, stock and equipments are all first class, in every respect. The material has been bought for cash, and the Company has not a dollar of floating debt. The gross earnings of the road for five months since the road was opened to Emporia were $168,721 21, and the running expenses are less than fifty per cent. One hundred stock cars have been ordered, in addition to their already liberal supply of rolling stock. This company have near Topeka 75,000 acres of the justly celebrated Pottawattamie reserved lands, which were acquired by purchase, now open to sale on five years' time; and they will have from four to five hundred thousand acres of granted lands in market by the first of March. We notice that the Acting Commissioner of the General Land Office has, by direction of the Secretary of the Interior, issued instructions to the District Land officers at Augusta and Junction City, Kansas, directing the withdrawal of the lands issued to the Atchison, Topeka and Santa Fe Railroad under act of March 8, 1863, for that part of its line route from the north of the Osage Indian Trust Lands, near the junction of the Arkansas and Little Arkansas rivers, to the west line of the range twenty-four west on the Arkansas river, in the State of Kansas.

Northern Central Railway.

REPORT OF THE PRESIDENT.

BALTIMORE, February 23d, 1871.

To the Stockholders of the Northern Central Railway Company:

GENTLEMEN:—The following report of the operations of your road for the year 1870 is hereby respectfully submitted:

The earnings from transportation of freight were		$2,876,735 35
The earnings from transportation of passengers were		878,348 36
The earnings from transportation of express were		84,722 22
The earnings from transportation of mails were		40,032 50
The earnings from miscellaneous sources were		208,786 15
Total earnings of the year		$4,088,624 58
The operating expenses were:		
For conducting transportation	$857,923 56	
For motive power	837,532 03	
For maintenance of cars	342,491 18	
For maintenance of way	712,416 69	
For general expenses	66,298 23	
Total expenses		$2,816,661 74
Showing a net revenue of		$1,271,962 84

A decrease in net earnings of $14,839 82.

It is impossible to give an accurate comparison of the total earnings and expenses of the year 1870 with the preceding year because of a change made in the mode of keeping the accounts of tolls paid to other roads. Until this year it has been the custom of the auditor to charge expenses and credit receipts with tolls paid to other roads, when, in fact, we acted merely as their agents. For instance, to enable us to sell through tickets from points on our own and connecting lines to Washington city, we have been compelled to lift the ticket from Baltimore to Washington before the passenger left this road, and give each one an amount in money sufficient to purchase a ticket on the Washington Branch of the Baltimore and Ohio railroad. (At this point it is well to call attention to the fact, that the work on the Baltimore and Potomac railroad is rapidly approaching completion, and we will soon be enabled to connect with a line to Washington that will recognize the fact of the existence of more than one railroad connecting Baltimore with the rest of the world.) This sum, which during the year reaches a considerable amount, was neither a receipt nor an expenditure; yet it was considered so formerly and taken into the accounts. The money received for freights and passengers over the Cumberland Valley Railroad Bridge at Harrisburg, and the tolls paid to the Erie Railway Company for the use of a portion of their track at Elmira, together with the tolls paid the Chemung railroad, are of a like character, and have heretofore swelled both the receipts and expenditures beyond the reality. This year, while our receipts are almost identical with those of the preceding year, a comparison with last year's report would show a decrease of between one and two hundred thousand dollars in receipts and expenses against the business of the present year. This apparent falling off is, however, unreal, and is caused by the change in the accounts as they are now kept. With this explanation we omit the usual comparison of the receipts and expenditures with the previous year.

There were carried during this year 1,109,249 passengers, and in 1869 1,137,694, a decrease of 28,445. We moved in 1870 3,680,765 tons of freight and in 1869 3,413,332, showing an increase in tonnage of 267,433 tons. The price received for moving one ton one mile in 1870 was 1.90 cents, being ¼ of a cent less than in 1869. Had the rates of freight been equal to those of the last year this tonnage would have give us an additional net profit of $378,804 23. The operating expenses were 68.8 per cent. of the receipts, being 1,3 per cent. less than the previous year.

The road and its equipment has been kept in excellent condition. No expense, consistent with proper economy, has been spared to maintain and improve it, and we have again the satisfaction of reporting that another year has passed without any accident to a passenger.

In our last report we referred to efforts we were making to secure a more reliable coal traffic. We are glad to say that we have succeeded in increasing that branch of the business very materially. The coal transported over the main line this year reached a total of 691,498 tons, against 535,546 in 1869, an increase of 155,652 gross tons. Of this increase 26,849 tons went to the City of Baltimore, the totals to that point being 175,425 tons. The balance of the increase was distributed over and along the whole road.

The business of the leased lines has been generally satisfactory. The coal tonnage of the Shamokin division was 491,514 tons, an increase of 22,550 tons over 1869. The general trade of the Elmira division has been somewhat injured by the competition of the Lehigh Valley railroad to Elmira, which competes with us for the trade of that region to Philadelphia, and for the coal trade going North. The coal tonnage of the Elmira division for this year was 138,960 tons; for 1869 it was 153,099 tons, a decrease of 14,139 tons. During the past year a very valuable deposit of bituminous coal has been discovered near Ralston, on the line of this road, and already a company has been formed and a large amount of money expended on the development of the property. That company is now shipping coal, and we have every reason to expect a considerable revenue from this source, and, at the same time, obtain fuel for our engines much cheaper than we have been able to purchase it heretofore.

The mortgage for $175,000 of the "York and Cumberland railroad," due on the 1st of May, 1870, has been paid, leaving a balance in the sinking fund of $721,500. There now remains but one mortgage on that portion of the line, to wit, $500,000 guaranteed by the City of Baltimore, which matures January 1, 1877. The resources of the general sinking fund will be more than sufficient to meet that liability when it falls due.

The large increase in our equipment during 1869 has been ample to meet the demands on us during the past year, and we hope by proper management of the rolling stock to meet any ordinary increase of tonnage without being compelled to make additional purchases during the present year.

There has been added to the construction account during the year $458,298 78, to equipment

account $27,315 10, to real estate account $21,519 25, making a total of $502,128 08 charged to the principal accounts. The charges to construction have been for work on the new line in Baltimore. This we had hoped would have been completed during the year, but owing to the failure of the parties who contracted to build the iron bridges to have them ready by the time specified in the contract, the work has been very much delayed, and cannot now be ready for use before the first of May next. Upon the completion of this work our heavy expenditures will cease, and, with it finished, we shall not only be able to do a much larger business over the entire road, but to do it much more satisfactorily and much more economically. The necessity for increased terminal facilities was fully demonstrated during the busy season of the year, when for weeks we were compelled to use several miles of the main tracks to store loaded cars, some of which remained loaded for more than a month, during which time, of course, the patrons of the road were kept waiting for their freight, and the company lost the use of these cars.

It is now ten years since the present board first became connected with the road as its managers. Its reputation at that time as a desirable route for travelers, or as an expeditious channel for the transportation of freight, was any thing but enviable, while its financial condition can best be stated by quoting an extract from the report of John S. Gittings, Esq., its then retiring President. In speaking of the finances he said: "To meet our engagement with the State of Maryland, pay the interest on our bonded debt, meet the floating debt, pay for the material, rolling stock and cars absolutely required, is impossible." The bonds of 1885, with three coupons unpaid, were then selling for 45 cents on the dollar. They are now a favorite investment at 93. The stock was selling at $14 per share, with but few individuals reckless enough to purchase at that figure. In making up the statement for this year the growth of the business of the road suggested the propriety of making a comparison between the business of 1870 and that of 1860, together with a comparison of the financial condition of the company then and now.

The gross receipts of the main line in 1860 were	$964,621 30
The gross receipts of the main line in 1870 were	2,898,623 68
Showing an increase in ten years of	$1,934,002 38
The net revenue in 1860 was	$283,627 17
The net revenue in 1870 was	1,042,713 02
Increase of 1870 over 1860, net	$759,086 15
The number of passengers carried in 1860 was	363,076
The number of passengers carried in 1870 was	719,663
Increase of passengers carried in 1870 was	356,587
Number of tons of freight carried in 1860	592,769
Number of tons of freight carried in 1870	1,736,447
Increase of tons of freight carried in 1870	1,143,679

The total number of cars of all descriptions in 1860 was 1,764, and the general superintendent reported a large number of these unfit for service, and requiring to be rebuilt during the year 1861, because, as he said, "they had been running from twelve to eighteen years." The total number of freight cars now on the road is 5,648, and all in first-class order. The total number of engines belonging to the company in 1860 was 86. In 1870 we have 131. The road bed, track, bridges and the whole superstructure were in a deplorable condition, and to get a train over the line without a mishap of some character was an event which was said to inspire rejoicing among the officials and employees. To make a trip on schedule time was a exploit closely allied to impossibility, and therefore never attempted. The present condition of your property will compare favorably with any road in the United States. The total indebtedness in 1860, including stock, bonds and all other liabilities was $8,693,950 07, which was represented by a single track railroad of 138 miles in length, in bad condition and poorly equipped, with a trade producing a net revenue of $283,627 17, a sum insufficient for paying the interest on the funded debt alone, leaving the stockholder in great doubt as to whether his shares had any intrinsic value whatever.

The total indebtedness in 1870 is $14,530,903 89, and in addition to the single track of 138 miles, in excellent condition, you have 80 miles of double track, 30 miles of sidings, with 30 miles additional graded and ready for the double track; you have also an equipment that could not be replaced to-day for less than $4,500,000, real estate not necessary for the uses of the company worth a million of dollars, and a regular and legitimate trade yielding a net revenue of $1,042,713 02, a sum sufficient to guarantee dividends on your capital stock beyond all doubt. The trade and travel which we now enjoy has been built up against strong competition, and no fear need be entertained of its being diverted from us. The policy pursued for some years past of carrying freights at low rates we shall continue to adhere to, believing that much of our prosperity flows from that sound policy. And we have no fears that the next ten years will not show as gratifying a result as the last decade has presented.

We have heretofore avoided speaking of the importance of the business of this road to the city of Baltimore, because we believed that time would show to every fair-minded person that this line was not only important, but the most important railroad connection enjoyed by that city. We should have continued our silence but for the repeated oratorical efforts of the self-appointed railroad king of this State, whose custom it has been to magnify the importance of the Baltimore and Ohio Railroad, and belittle the Northern Central Railway by constant attacks upon it, and to endeavor to excite prejudice against it because of the interest the Pennsylvania Railroad Company holds in its stock. All will remember when the struggle took place between the Baltimore and Ohio Railroad Company and the Pennsylvania Railroad Company for the control of this road, the persistent efforts of the president of the first-named company to control it by inducing his friends to invest their money in what was in reality then a bankrupt concern—stimulating prejudices against the road and its connections, and rendering its management subservient to the interests of his own line, and thus preventing any recovery from its temporary bankruptcy. The president of the Pennsylvania Railroad Company, instead of indulging in forensic display, seeing that the road had intrinsic value, and knowing that if it was kept open for trade to and from Baltimore it would prove profitable, purchased the stock for his company, and has, up to this time, realized more than twelve per cent. per annum on his investment.

It is time some facts should be given to the people that they may see that this road is not controlled by the Pennsylvania Railroad Company for the purpose of diverting to Philadelphia trade which, under a different management, would go to Baltimore. This road is managed to give trade to the Pennsylvania Railroad which desires to seek Baltimore for a terminus; and so well is this understood by that company that it could afford to hold its stock in this company without any dividend return, receiving from the Baltimore trade which passes over a large extent of their line a sufficient profit to pay a good interest on its investment. The connections of the Baltimore and Ohio Railroad are being constantly referred to as something remarkable. The truth is, that its connections westward are nothing when compared to those of this road. We connect with and have the right to make rates to all points reached by the Pennsylvania Railroad. And a connection by its lines is a very different thing from the connections of the Baltimore and Ohio Railroad. The Pennsylvania Railroad Company owns and controls its lines from the Delaware and the Chesapeake to the Mississippi. The Baltimore and Ohio connects from the Chesapeake with the interior of Ohio, and from that point makes rates by sufferance.

If it is important to Baltimore to connect by rail with the great West, it is not difficult to see which of the two lines is the most valuable to her. During the past year the shipments of coffee, canned fruits and oysters, sugar and syrup alone over the Northern Central railway from Baltimore to the West reached the considerable total of 110,918,440 pounds; and of this aggregate we carried forty-two per cent. of all the coffee received in Baltimore for that year, leaving the home consumption, the Southern demand, the local sales, and the Baltimore and Ohio Railroad to manage the balance. Is it probable that if the Northern Central railway did not exist, or if it were owned by the Baltimore and Ohio Railroad, that the trade of Baltimore with the West would be as great as it is to-day? Her commercial activity would be confined to a small portion of Virginia, West Virginia, Ohio and Indiana; while by the Northern Central and the Pennsylvania roads it is enabled to reach all points North, East and West. And it soon will, by the same control, be able to reach the South on terms and at rates which must prove of lasting advantage to the commercial interests of the city.

Is it possible, in the movement now being made by this company and the Pennsylvania Railroad Company, to build a new road to Washington, that the trade of Baltimore will not be largely benefited by another connection with her natural territory, the Southern States? Certainly opening up new competing lines will add to her prosperity. And we think, too, it will prove a profitable investment, for our experience has taught us that trade can be increased by a judicious reduction of tolls, and that, when the increase is established, that road which adopts and adheres to a liberal policy with its customers can secure its share of traffic. Has this been the policy of the Baltimore and Ohio Railroad with the Washington Branch of its road? The experience of thirty years answers that inquiry. And yet we know that when the Baltimore and Potomac Railroad is finished and the fare between Baltimore and Washington is greatly reduced, the Baltimore and Ohio Railroad will make the corresponding reduction, and a speech will be delivered, telling the people of Baltimore of the vast importance of that line to her commercial prosperity and the utter worthlessness of the lines which, by their energy and liberality, have wrung this tardy concession to her people from the Baltimore and Ohio Railroad.

We do not object to the existence of that road. We know how valuable it is to Baltimore. But at the same time we know that its value to this city is greatly enhanced by the healthy and successful competition which it meets because of the existence of the Northern Central Railway.

In closing this report we take pleasure in bearing testimony to the efficient services rendered by the different officers of the company. By order of the board. J. D. CAMERON, Pres't.

ROBT. S. HOLLINS, Secretary.

Office Northern Central Railway Company, Baltimore, February 23, 1871.

☞ The Flint and Pere Marquette Railroad Company has taken a contract for the building of the Holly, Wayne and Monroe road, from Holly to Monroe, and has made a contract with the Wyandotte Rolling Mills to furnish 6,500 tons of rails between May and November. Contracts for rolling stock, etc., have also been made, and the road will soon be running from Holly, on the Detroit and Milwaukee road, to Monroe, where it connects with the Michigan Southern for Toledo.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of February, were:

ENTERED FOR CONSUMPTION.

	1870.	1871.
Manufactures of wool	$1,967,695	$3,385,022
" cotton	1,821,380	2,735,115

☞ The gangs of track-layers operating from the eastern and western termini of the Pittsburg and Connellsville Railroad are steadily approaching each other, a gap of less than thirty miles now separating them.

☞ The State debt of Illinois now amounts to only $2,400,000.

Savannah and Charleston Railroad.

The earnings of this road for the years 1869 and 1870, were as follows:

	1869.	1870.
From freight	$29,643 21	$47,712 87
" passengers	17,594 60	87,096 13
" mails, etc.	4,596 32	12,536 29
	$51,834 13	$147,345 29
Operating expenses	46,777 56	89,989 94
Net	$5,056 57	$57,355 35

The increase in earnings has been $95,511 16, with an increase in expenses of $43,212 38—making the increase in net earnings, $52,298 78.

This road is 104 miles in length, extending from Savannah to Charleston. It was destroyed during the war, and only restored so as to be opened for business throughout its entire length in March, 1869.

The whole debt of the Company is	$1,365,849 05
Of this amount there is already funded in 6 and 7 per cent. bonds	1,112,400 00
Unfunded after applying the available credits	$253,409 05

Besides this, there are ascertained liabilities for claims for rights of way, unfunded coupons, etc., which it is not possible to state with accuracy, though they are known to be not very large. The difference between these debts and liabilities and the true value of the company's property will show their true condition. This appears by the books, as follows:

Construction, equipment and right of way	$2,288,966 14
Due by contractors for over-payment and liable to be charged to construction and equipment	49,326 10
Total cost of road	$2,238,292 24
Deduct amount of debt	1,365,849 05
Value of stocks, as per books	$972,443 19

The President, however, has had an inventory and a careful appraisement of the property made, and reports the actual value to be $2,094,300, or but a trifle more than $20,000 per mile.

☞ The earnings of the South Carolina Railroad in 1870 were $1,472,020 59; and the expenses, $916,095 82—making the net earnings $555,924 77. In 1869 the earnings were $1,382,167, the expenses $909,405 43, and the net earnings, $472,761 57—showing an increase in earnings of $89,853 59, with an increase in expenses of only $6,690 39. The ratio of expenses to earnings in 1870 is 62.23 against 65.79 in 1869.

☞ The Mahoning (Ohio) Coal railroad was recently organized with a capital stock of $70,000. The corporators are Joseph H. Brown, Wm. Bonnell, Richard Brown, Aug. B. Cornell and David Himrod. The proposed road is to extend from Youngstown, Mahoning County—half way between Cleveland and Pittsburg—north to a point in Brookfield township, in Trumbull county, the road to be all within the limits of Mahoning and Trumbull counties.

☞ The Cedar Rapids, McGregor and Milwaukee Railroad company has been organized with a capital of $3,000,000. The officers are: H. G. Angle, President; S. C. Bever, Vice President; Dr. J. T. Ely, Treasurer; W. J. Abernethy, Secretary.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH, BANKERS,
No. 5 NASSAU STREET,
NEW YORK, March 11, 1871.

☞ THE CHESAPEAKE AND OHIO RAILROAD, A NEW TRUNK LINE FROM THE SEABOARD TO THE WEST.

There remain but 200 miles to be completed, of which nearly half is graded, to unite the unfailing navigation of the Atlantic coast with that of the Ohio and Mississippi Rivers at a favorable point. Roads projected, or now in progress, will connect it, by a short line, with the principal railroad centers of the West.

The road already possesses a PROFITABLE LOCAL BUSINESS, and its advantages AS A GREAT EAST AND WEST THROUGH LINE for the transportation of the heavy freights (which constitute the principal part of the East and West through traffic) are numerous and important.

1. A SHORT ROUTE between the Atlantic coast and the Great West.
2. LOW GRADES.
3. CHEAP FUEL.
4. A GENIAL CLIMATE which admits of safe, economical, and rapid railroad operation throughout the year.
5. EAST AND WEST TERMINI, at favorable points on tide water and the Ohio River.
6. A VERY LARGE THROUGH AND LOCAL TRAFFIC awaiting its progress.
7. A COMPARATIVELY LIGHT CAPITAL AND DEBT, and consequently a light tax upon traffic for payment of interest and dividends.

All these conditions favor a cheap and economical working of the line, which will enable the Chesapeake and Ohio route to do a profitable East and West through business at rates which would not pay by the more difficult and costly lines, *and to control an enormous Southwestern through trade.*

We are now authorized to sell an additional amount of the FIRST MORTGAGE SIX PER CENT. GOLD BONDS of the Company, at the original price of 90 *and accrued interest* from Nov. 1.

The Bonds are secured by a mortgage upon the entire road, (427 miles of main line) franchises, and property of the Company, WHICH NOW, IN COMPLETED ROAD AND WORK DONE, EXCEEDS THE ENTIRE AMOUNT OF THE MORTGAGE; and which, when completed, will be worth at least $30,000,000.

A *Sinking Fund* of $100,000 per annum is provided for their redemption.

They are issued as Coupon or Registered Bonds, and in denominations of

$100, $500, and $1,000.

The superior advantages, valuable property and franchises, and able and honorable management of the Chesapeake and Ohio Railroad Company render it one of the most substantial, reliable and trustworthy Corporations in the country, and commend its Securities to the unhesitating confidence of capitalists and investors.

Pamphlets, maps and full particulars furnished upon application.

FISK & HATCH, Bankers.

☞ C. H. Prior has been appointed Superintendent of the Iowa and Minnesota Divisions of the Milwaukee and St. Paul Railway.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that *the* cost thereof is included, in that headed "Railroad." *A dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, March 18, 1871.

Stock Exchange and Money Market.

Money has been moderately active, but, with a free offering of funds, both on bank and on private account, rates have been quoted without material change, having been from 3@5, generally 4@5 per cent. on call, and 6@7 per cent. per annum, in the best time engagements for street purposes, as well as on the more marketable grades of commercial paper. The city banks, last week, added nearly 6¾ millions to their loan and discount averages, less, it was believed, through local advances to mercantile borrowers, than by free discounts of Southern and Western bills on New York received through the country bank correspondents of some of the larger banking institutions. They increased their deposit line nearly five millions, partly by the proceeds of the new loans and discounts. They reported a loss of over half a million of Specie, and nearly a million of legal tender notes. The banks now hold $15,420,147 of specie and legal tender notes, in excess of the 25 per cent. of their liabilities required by the national banking act. The U. S. Sub Treasury at this port, last week, reduced its currency reserve, $1,301,534, and increased its coin balance $395,640. The receipts of the office were $4,172,481, in coin, and $3,874,231 in currency; payments $3,776,841 in coin, and $5,175,772 in currency. The office received $3,166,000 in coin or its equivalent, from customs; and disbursed $532,687 of coin interest.

Under the Treasury programme for March, Government will sell Treasury Coin, as follows: Thursday, March 16, $1,000,000; Thursday March 23, $2,000,000; Thursday, March 30, $1,000,000. And buy in, two millions of Bonds on each Wednesday of the month, the Department reserving to itself the usual privileges.

The specie reserve of the city banks according to the latest return is $23,769,176, against $33,399,135 same time last year. The city bank deposits are now $229,924,584, against $209,831,225 week ending March 12, 1870. The legal tender reserve amounts to $57,045,884, against $53,302,004 same time last year. The circulation now stands at $31,655,071, against $33,325,789 same time last year. The loans are now $289,353,394, against $268,140,603 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $108,023,601 a day, against a daily average of $111,238,555 the preceding week. The current week's exchanges average about 108¼ millions a day. The city banks, last week reported a loss of $563,031 of specie, a gain of $4,865,010 of deposits, and a loss of $973,884 of legal tender notes. They increased their loans $6,721,508; and reduced their circulation, $5,211.

National Bank notes to the amount of $664,820 were issued last week by the Treasury Department. Deducting from the grand total issue to 1800 banks the currency returned, including worn out notes, amounting to $39,748,682, the existing 1,653 banks, (with an aggregate capital of $435,356,084,) retain an actual circulation of $310,661,758. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $353,730,350; and for the public deposits, $15,811,500—making a total of $369,541,850. The Treasury Department last week redeemed and destroyed $633,341 of worn and mutilated fractional currency, and issued $327,475 of new.

The coin reserve of the Treasury Department on Thursday morning was $101,800,000, including $28,100,000 represented by outstanding coin certificates; and the currency balance was $16,700,000.

The U. S. Sub-Treasury, on Thursday morning of this week, held a balance of $9,074,686 in currency, and $65,870,906 in coin, against a balance a week previous of $8,002,100 currency, and $65,493,532 coin.

There has not been much spirit apparent in the Gold speculation, and the range of the price has been from 111⅛ to 111⅝, closing on Wednesday at 111⅜ against 111½ the preceding Wednesday. The main inquiry for actual "cash" Gold has been for Custom House purposes, this drain having averaged over half a million a day. The export demand was less urgent, notwithstanding the increasing firmness in the foreign exchanges. The shipments last week were $954,584; and on

Wednesday of this week, $1,094,000; and on Thursday, $100,000.

The U. S. Sub-Treasurer retired, last week, $3,067,483 of coin certificates, received for customs.

The Government revenues, last week, were liberal in the line of customs, and moderate in the excise form. The Excises yielded about two millions. The customs at the port of New York, last week were $3,408,483; and at the outports, equal to about $1,100,000 more, all in coin, or coin certificates. The internal revenue yield thus far in the current fiscal year beginning with July 1, 1870, has been about 106 millions.

The Gold Exchange Bank clearances on Thursday of last week were $43,058,000; on Monday of this week $17,512,000, the extremes since our last. On Wednesday they amounted to 30½ millions.

The export drain was $954,584 last week, against 775,685, same week preceding year. The shipments since July 1, 1870, have been $51,046,354, against $22,603,388 same time in 1869–'70.

The customs demand for Gold last week, averaged $577,667 a day; thus far, this week, it has averaged $562,000 a day, or equal to a weekly aggregate of $3,372,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $3,458, and since Jan. 1, 1871, $2,710,973, against $3,496,795 same time in 1870. The total customs revenue of the Government, in coin, at this port, since July 1, 1870, has been $101,597,970, against $91,703,902 same time in 1869–'70.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt since July 1, 1870, $65,647,905 against $66,092,292 same time in 1869–'70.

Foreign Exchange has shown more firmness, on a rather livelier inquiry for prime bills, which have been offered less freely. Bankers' sixty day bills on London closed on Wednesday at 109¾@109⅞; sight bills on London, 110⅛@110⅜.

The produce exports from this port, week ending with March 7th, were to the currency value of $6,264,325.

Government securities have been less active, but with comparatively moderate offerings of bonds of all issues, prices have been fairly supported. The subscriptions to the new refunding Five per cent. Loan, thus far reported, amount to about 12 millions.

On Wednesday, Government bought in two millions of Five-Twenties at 109 55@109 59, ex-interest. The amount of bonds offered was $7,823,500.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115⅛@115⅝; U. S. Five-Twenties of 1862, 112⅛@112⅜; U. S. Five-Twenties of 1864 at 112@112⅛; U. S. Five-Twenties of 1865, 112@112⅛; U. S. Five-twenties of 1865 consolidated, 110⅞@111; U. S. Five Twenties of 1867, 110⅞@111⅛; U. S. Five-twenties of 1868, 111@111¼; U. S. Ten-forties at 108⅜@108¾ ex-coupon; U. S. Six per cent. currency bonds, 113¾@114.

State bonds have been in less confident demand, at less buoyant prices.

Railway bonds have been in good request at generally firm prices. Central Pacific Sixes have been selling freely, closing at 95¾@96. The Chesapeake and Ohio R. R. First Mortgage six per cent. gold bonds have been in fair request, for investment purposes, at 90 per cent. and accrued interest. Union Pacific Sixes closed at 83⅛@83¾.

Railway and miscellaneous share property has been less active, and more variable as to values, closing heavily and irregularly. Union Pacific stock closed at 27⅛@27⅜; Ohio and Mississippi at 48⅜@48½. Western Union Telegraph at 56⅜@56½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	March 1.	March 8.	March 15.
Consols	91⅝	91⅝	91⅞
U. S. 5-20's of 1862	91⅜	92⅛	92⅛

" 10-40s	88¾	89⅛	88¾
Erie	19	19	18⅛
Ill. Central	109½	109⅝	110½
At. and Gt. West.	—	30	30½

General business has shown a fair degree of activity in the line of foreign imports at fairly supported prices, as a rule. In domestic produce, the movements have been on a moderate scale, with rather more firmness noted in Breadstuffs, Provisions, and Cotton. Naval Stores and Petroleum have favored buyers, under freer offerings. Middling upland cotton closed on Wednesday at 14⅞ cts. per lb. The receipts at all the ports, since Sept. 1, have been 3,057,248 bales, against 2,221,607 bales same time last year; exports 1,963,771 bales, against 1,323,686 bales same time last year; stock at the ports, at latest dates, 702,344 bales, against 531,597 bales same date 1870.

At the Live Stock markets, Beeves have been plenty and slow of sale at 9@15½c.; Veal Calves in fair request, at 5@11c; Sheep, dull, at 4½@9c., and Swine, at 7¼@7½c. per lb., all live weight. Milch cows, quiet at $40@$100, each. The week's receipts were 5,200 Beeves, 54 Cows, 1,147 Veal Calves, 18,969 Sheep and Lambs, and 14,529 Hogs.

Ocean freights have been less active and quoted easier. For Liverpool, cotton at ¼@$\frac{5}{16}$d. by sail and $\frac{5}{16}$@$\frac{3}{8}$d. by steam, per lb.; flour at 2s.@2s. 3d. by sail, and 2s. 6d.@@2s. 9d. by steam, per bbl.; grain at 5@5¼d. by sail, and 6d. by steam. per bushel; and heavy goods at 15s.@27s. 6d. by sail, and 25s.@40s. by steam, per ton.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—South Carolina 6s, new Jan. and July, 65½; do., April and Oct., 69; Arkansas 7s, issued to L. R. and Ft. S. R. R., 58; do. M., O. and R. R. R. R., 48; Georgia 7s, gold, 93½; North Carolina 6s, Special Tax, 20; do. Fund Act, 1866, 36; Michigan 6s, 1879, 99; N. Y. State 7s, Bounty Loan reg., 107¾; Alabama 8s, 100¼; Louisiana 6s, old, 69; do. new, 62; do. 6s, Levee bonds, 73¾; do. 8s, Levee bonds, 88; Morris and Essex const. bonds, 90; Albany and Susq. 2d mort., 93; Great Western 1st mort., 1888, 88; Ohio and Mississippi consol. bonds, 89¼; North Missouri 1st mort., 83½; do. 2d mort., 59; Hannibal and St. Joseph 8s conv., 103; Milwaukee and St. Paul 1st mort., Iowa Div., 87½; Pacific 7s, guar. by Mo., 96½; Toledo and Warbash 1st mort., St. L. TREASURY DEPARTMENT,
STATE OF ARKANSAS,
LITTLE ROCK, March 1, 1871.

The Semi-annual Interest, due April 1, 1871, on Arkansas State Seven per cent. bonds, will be paid on and after that date, at the Union Trust Company, No. 73 Broadway, New York.

HENRY PAGE, State Treasurer.

☞ The Columbus and Circleville (Ohio) R.R. Co. has lately been reorganized to build a road from Columbus south, about twenty-five miles, to Circleville, in Pickaway county, on the Cincinnati and Louisville Railroad. The capital stock is $500,000.

Jacksonville, Pensacola and Mobile R. R.

We learn that this road, is to be pushed, at once from the Apalachicola River, westward to its terminus at Mobile. In reference to this, a Tallahassee paper says: "The Jacksonville, Pensacola and Mobile Railroad will not pause at the Apalachicola, for, beyond that river, on through to Pensacola and Mobile, is a field from which, with its connections at Mobile, reaching into the interior of Alabama, and on to New Orleans, the road will derive enormous accessions to its prosperity. There is no part of Florida which will be more benefitted by such an enterprise, or which gives greater promise of remunerative return for the outlay of the necessary capital, than the eight counties west of the Apalachicola River, constituting what is known as West Florida, which embraces about 10,000 square miles of territory, containing nearly one-fifth of the entire population, and paying fully one-fifth of the resources of the State."

Fairbanks' Scales.

A Fairbank's Patent Iron Frame Railroad Track Scale, with a platform 123 feet long and 150 tons capacity, was built at Pacherton, Pa., on the Lehigh Valley Railroad, in 1868. The scale has been in constant use since that time. The Superintendent reports that, in the year 1870, cars loaded with coal were weighed amounting in the aggregate, including the cars, to 4,690,058 gross tons; or, deducting the cars, 2,810,020 gross tons of coal. This would require 281,002 cars of ten tons each, and in three hundred working days of ten hours each, it would give but thirty-eight seconds of time for weighing each car. To accomplish this enormus work, the scale is placed in an incline plane, down which the cars are run without an engine. The trains are "broken up" into sections of from three to six cars each, and allowed to pass over the scale at the rate of four or five miles per hour. The weight of the train is ascertained, while thus in motion, by means of a patent beam located at the end of the scale—the weigh-master is not required to handle any weight. The train is "made up" and the engine attached after it passes the scale. After the scale had been subjected to this severe use, a "test car," loaded with sealed weights, was run on, and the scale was found to be in perfect order, and ready for another year's service without repairs. —*St. Johnsbury Caledonian.*

☞ The earnings of the Union Pacific railroad in February, 1871, were $305,769; and the expenses, $168,772 95—leaving the net earnings $137,596 05. In February, 1870, the earnings were $500,139 42, the expenses, $449,838 67, and the net earnings, $50,300 75—showing a decrease in earnings of $194,370 42, with a decrease in expenses of $281,665 72—making the increase in net earnings, $87,295 30.

☞ The earnings of the Central Pacific Railroad in Februry, 1871, were $481,085; in February, 1870, $394,176—increase, $86,909. For the first two months of 1871 the earnings were $1,017,583; and for the first two months of 1870, $807,280—an increase of $310,303.

☞ The Baraboo Air-Line Railroad Company has been consolidated with or absorbed by the Chicago and Northwestern Railroad Company. Work on the new road, through the Baraboo Valley, is pushing forward with renewed vigor.

☞ RAILROAD BONDS.—Whether you wish to buy or sell, write to CHARLES W. HASSLER, 24 Broad Street, New York.

NEW LOAN OF THE UNITED STATES.

IMPORTANT CIRCULAR.

TREASURY DEPARTMENT,
WASHINGTON, Feb. 28, 1871.

Public notice is hereby given, that books will be opened on the 6th day of March next in this country and in Europe, for subscriptions to the National Loan, under the Act approved July 14, 1870, entitled "An Act to authorize the Refunding of the National Debt," and the Act in amendment thereof, approved Jan. 20, 1871.

The proposed loan comprises three classes of Bonds, namely:

First—Bonds to the amount of five hundred millions of dollars, payable in coin, at the pleasure of the United States, after ten years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of five per cent. per annum.

Second—Bonds to the amount of three hundred millions of dollars, payable in coin, at the pleasure of the United States, after fifteen years from the date of their issue, and bearing interest, payable quarterly in coin, at the rate of four and a half per cent. per annum.

Third—Bonds to the amount of seven hundred millions of dollars, payable in coin, at the pleasure of the United States, after thirty years from the date of issue, and bearing interest, payable quarterly in coin, at the rate of four per cent. per annum.

Subscriptions to the loan will have preference in the following order, namely:

First—Subscriptions that may be first made for five per cent. Bonds to the amount of two hundred millions of dollars, of which there will be reserved, for twenty days, one-half for subscribers in this country and one-half for subscribers in foreign countries.

Second—Subscriptions for equal amounts of each class of Bonds.

Third—Subscriptions for equal amounts of Bonds bearing interest at the rate of four and a half per cent., and of Bonds bearing interest at the rate of five per cent.

Fourth—Subscriptions for any five per cent. bonds that may not be subscribed for in the preceding classes.

When a subscription is made, the subscriber will be required to deposit two per cent. of the amount thereof in coin or currency of the United States, or in bonds of the class to be exchanged, to be accounted for by the Government when the new Bonds are delivered, and payment may be made, either in coin or in bonds of the United States, known as FIVE TWENTY BONDS, at their par value.

The coin received in payment will be applied to the redemption of Five-twenty Bonds, and the debt of the United States will not be increased by this loan.

The bonds will be registered or issued with coupons, as may be desired by subscribers. Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5,000 and $10,000; and coupon bonds of each denomination except the last two. The interest will be payable in the United States, at the office of the Treasurer, any Assistant Treasurer, or Designated Depositary of the Government, quarterly, on the first days of

February, May, August and November, in each year.

The bonds of the several classes aforesaid, and the interest thereon, are exempt from the payment of all taxes or dues to the United States, as well as from taxation in any form by or under State, municipal or local authority.

After maturity, the bonds last issued will be first redeemed, by classes and numbers, as may be designated by the Secretary of the Treasury.

The bonds will be issued at the United States Treasury, but the agents for the negotiation of the loan in Europe are authorized to make arrangements with subscribers for the transmission of the bonds to the agents through whom subscriptions may be received.

Subscribers in the United States will receive the new bonds of the agents with whom the subscriptions are made.

In the United States, the National Banks are authorized to receive subscriptions, and subscriptions may also be made at the office of the Treasurer of the United States, or of any Assistant Treasurer, or at the Designated Depositaries at Buffalo, N. Y., Chicago, Ill., Cincinnati, Ohio, Louisville, Ky., Mobile, Ala., and Pittsburg, Penn.

The following banking houses are also authorized to act as agents in receiving subscriptions in the United States, viz.:

NEW YORK CITY.

Austin Baldwin & Co.	Kountze Brothers.
Baker & Kitchen.	Leonard, Sheldon & Foster.
A. Belmont & Co.	Maitland, Phelps & Co.

Journal of Railroad Law.

RAILROAD COMPANIES—CONTRACTORS—LAW OF ENFORCEMENT.

The case of Owen *vs.* The New York Central Railroad Company (1 Lansing, 108,) was an action for damages for injuries received by the plaintiff while in the employment of the defendant as brakeman. It appeared that Owen, who had two years previously, been in the service of the company for several months, as brakeman on freight trains between Rochester and Syracuse, was in August, 1864, re-employed to act in that capacity between the same points. In September, succeeding his re-employment, while upon the roof of a freight car in a train moving upon his route, he was brought in contact with a road bridge crossing over the track, and sustained severe injuries. The jury returned a verdict for the defendant.

The following is the able opinion of the Court delivered by

JOHNSON, J.—If the learned Justice, before whom this cause was tried, committed any error in disposing of it at the trial, it was not an error of which the plaintiff can complain. He should, undoubtedly, at the close of the evidence, have nonsuited the plaintiff, or ordered the jury to find a verdict for the defendant, as requested. The risk of injury, by means of the passage of the cars under the bridge in question, must be held to have been assumed by the plaintiff, when he entered the defendant's service as a brakeman on the train. He had been in the defendant's employ in the same capacity, and on the same train before the present employment for a year or more, at which time he had passed daily under the same bridge, which has been at its present height ever since the road was constructed. The danger was open and obvious, and within the plaintiff's personal knowledge, at the time he entered the defendant's service the last time. It was a danger clearly incident to the service he undertook to perform. He knew, as well as his employer, the perils of the business, at least as respects the bridge in question, and the law will imply that he assumed the risk of personal injury. (Shearman *vs.* The Rochester and Syracuse Railroad Company, 17 N. Y. R., 153, and the cases there cited: Faulkner *vs.* The Erie R. R. Co., 49 Barb., 324.) Citations might be multiplied to any extent, but it is unnecessary. The decision in the case of Warner *vs.* The Erie R. R. Co., (49 id., 558,) has been overruled by the Court of Appeals. (S. C. 39, N. Y. R., 468.) The rule is well settled.

But if the rule were otherwise, upon the evidence in this case, the plaintiff was not entitled to recover upon another ground. The injury was caused by his own negligence. He admits that he knew this was a low bridge and he must have known that he could not pass under it while on the top of the cars without injury, unless he stooped or lowered his person sufficiently to avoid a collision. He might have avoided all injury by the exercise of the most ordinary care and caution. In this view of the case, the objections taken to the charge are of no moment. It answers, also, the exception to the ruling, including the evidence offered by the plaintiff, that other persons had been killed at the same crossing. That evidence was wholly immaterial, if the plaintiff took upon himself the risk of injury to his person from that structure, as he undoubtedly did. The order denying a new trial must therefore be affirmed, and judgment ordered upon the verdict.

Order affirmed.

Union Pacific Railroad.

The annual meeting of this corporation was held in Boston on the 8th inst. The meeting was called to order by Hon. Oliver Ames, President of the corporation, who submitted his annual report, as follows:

During the past year, on account of the great depression of business in California, the earnings of our road have not been as large as we anticipated; but, with the very rigid economy inaugurated in every department of our business, we have the utmost confidence that during the ensuing year, our net earnings will be sufficient to pay the interest on all our bonds. We have very much improved our road during the past year, by smoothing and perfecting the road-bed, strengthening our snow sheds where they showed signs of weakness last winter, increasing the amount of our snow fences; and so effectually has our road been protected during the past winter from obstruction by snow, that we have in no instance missed our connection at either end of our line; while the roads east, through Iowa, have been detained over twenty-four hours. The great danger anticipated from the snows of the Platte Valley and Laramie Plains has proved groundless; and the Union Pacific Railroad can be run with more certainty of being unobstructed by snows, than the railroads of New England and New York.

Our repair shops at Bryan and Wahsatch have been a source of great anxiety to us on account of the temporary nature of their construction, their liability to fire and the difficulty of removing our locomotives, should a fire occur. We decided last fall to remove from these shops, and put up new stone shops at Evanston, of sufficient capacity to accommodate the machinery and store the engines now sheltered at both of these shops. We commenced the construction of our shops at Evanston, but not early enough to complete them before the winter set in with such severity as to force us to postpone their completion till spring. They will be ready for occupation early in May. They are finely located on Bear river, with an abundance of pure water, and in the immediate vicinity of one of the most extensive coal fields on this continent.

The want of a bridge over the Missouri river at Omaha, to connect the eastern railroads with the Union Pacific, has been one of the most annoying incidents connected with the trip to California. The uncertain and turbulent character of the river, with its shifting banks, has made its passage uncertain, and frequently extremely tedious. During the past year we have been actively at work upon the bridge, and hope to have as permanent and durable a structure as can be made, ready for use the ensuing summer.

Mr. T. E. Sickles, the chief engineer of the company, submits a report in detail, upon the construction and present condition of the Missouri river bridge, from which I extract the following facts:

The bridge is of 11 spans, of 250 feet each, 50 feet above high water, resting upon one stone abutment now completed; and 11 iron piers, all in place, and the larger part of them already sunk from 60 to 72 feet in the sand and resting in the bed-rock.

All piers will be completed by the time the superstructure is ready to be placed in position.

The pneumatic system, used in sinking the piers, is specially applicable to the construction of foundations for bridges across rivers similar to the Missouri. Lignite, bones, &c., have been found to a depth of 50 feet below low water, showing a scouring of at least that depth; and the bed-rock, when reached, shows invariably a smooth surface, worn by attrition of sand upon it.

The shortest time in which any column was sunk was seven days; and the greatest depth any column has reached in twenty-four hours was 18½ feet.

The west approach to the bridge is 7000 feet long. The material for it is very rapidly moved, and it will be completed by April 1.

The east approach is 1¼ miles long, rising from the table-land in Council Bluffs to the bridge grade at 85 feet per mile. This approach requires 468,000 cubic yards of earth; and there has been put in by steam shovels and three trains of cars during the past winter 82,700 cubic yards.

With energetic prosecution of the work, Mr. Sickles is of opinion the bridge can be completed this year.

The bridge is being constructed for highway travel on the same level with the track of the railway. The revenue arising from this travel and the transportation by cars, taking as a basis the present transfer of cars, freight, and passengers, between the roads terminating in Council Bluffs, Iowa and the Union Pacific, and the foot travel between Council Bluffs and Omaha, Mr. Sickles finds to be for year 1870, at the rates charged, $176,430. In view of the rapid growth of Council Bluffs and Omaha, which now have a population of 29,000, the large immigration induced by the cheap lands along the line of the road, the development of the Utah silver mines, and of the agricultual and mineral lands generally, adjacent to the road, with the assured great increase in the trade in Texas cattle; the estimate for 1871 may be set down to be $275,000.

An Act has been obtained from Congress, authorizing a mortgage of the bridge. We propose, now, to issue two million five hundred thousand ($2,500,000) dollars of twenty (20) years, 8 per cent. mortgage bonds, to provide means for the completion of the bridge. The tolls on the bridge will be fixed at a rate sufficient to pay the interest on the bonds, and set apart enough to a sinking fund to redeem them at maturity. It is proposed to make the bridge a carriage-way for the accommodation of travel between the cities of Omaha and Council Bluffs, and from which it is expected to derive an income largely in excess of the additional cost, and without interference with its use for railroad purposes.

The increased facilities opened by the railroad for reaching the mining districts have greatly stimulated the development of the mines. Colorado and Utah are now opening some of the richest mines yet discovered in our country. The mines in the vicinity of Salt Lake are exciting great attention. It is estimated that from ten to fifteen thousand settlers and miners will be drawn there the ensuing season. The amount of ores to be sent over our road to smelting works east and in England is estimated to be from 500 to 1000 tons daily; while the machinery and supplies necessary to develop successfully and profitably the mines will give a very large westward business to our road. Our prospects of business from Salt Lake City and its vicinity are very encouraging; and I shall be greatly disappointed if it shall not be more than double what it was last year. Our coal mines have proved fully equal to our most sanguine expectations, both in regard to the superior quality of the coal as a steam generator and the extent of the deposit. It is believed that there is no better coal in this country for locomotive service, and none where it can be more cheaply mined. Iron ore, of very superior quality, and in vast quantities, has been discovered in the vicinity of Cheyenne and Laramie. We have promise of an iron district here that will be able to compete successfully with the most favored localities of our country. Extensive iron works must spring up on the line of our road, and we shall be furnished with cheap iron for all its uses. Coal and iron, the most necessary and essential materials for the construction and operation of a railroad, are found on the line of our road in unlimited quantities, and of the finest quality. They are the sure guaranties that our road can be maintained and operated at the lowest rates.

The sale of our lands and the settlement of the country on the line of our road have been very satisfactory: and a large increase of our business must be derived from this source. Our land agent, Mr. Davis, anticipates a very large influx of settlers the coming season, whose purchase must greatly reduce our indebtedness on Land Grant Bonds. One of the most promising sources for the increase of the business of our road is stock raising on the Platte Valley and Laramie Plains. Parties who have been in this business for the past two years have realized very satisfactory profits; and the rapid increase of the flocks and herds indicates that we may soon expect to transport hundreds of car loads of beef and cattle daily to Chicago and eastern markets. These immense plains, covered with the most nutritious grasses, which have been in past ages the pasture of countless herds of buffalo that have been driven off by advancing civilization, are now open for the flocks and herds of the enterprising settler. The pasturage is unlimited, and the extent of the business is only limited to the capacity of eastern markets for consumption.

Cattle that were purchased last summer for $13 each, and have cost but $1 since for their care, are now being sold for $24 each. It does not cost over from $5 to $8 to raise a steer up to three years old, that will weigh from eight to ten hundred pounds. These plains cannot be settled up for many years; and they offer to capital one of the most flattering openings for safe and profitable investments.

Since the opening of our road, we have been seeking to secure the transportation of the teas and silks of China and Japan. Arrangements have been recently made that will, we think, secure a large portion of this business overland; and we expect during the coming season a very large increase of our receipts from this source.

A business that has run for a long period in one channel is changed from its course with great difficulty. We shall find from year to year new business and new sources of income. The Montana business from the east, previous to last year, went almost entirely up the Mississippi river by steamboats. Last year a portion of it went over our road. This year I think it will almost entirely go over our road, leaving it at Evanston, Ogden and Corinne, for Montana, on wagons.

The great mutations which have taken place in our securities the few months past perhaps demand some explanation. After we had saved the Government millions upon millions on the cost of its transportation over the plains and to the Pacific; after we had done away with the necessity of keeping a cordon of soldiers for eighteen hundred miles, to secure the safety of emigration and of trans-continental trade; after we had opened the vast interior to settlement seven years earlier than required of us by our charter—the action of some of the departments of the Government became so hostile to us as to shake the credit of the corporation. The Treasury Department first refused to receive United States Pacific Railroad Bonds as a basis for banking, and thus lessened their mercantile value; next selected and set apart these bonds in its monthly publications of the public debt, as if not a portion of the debt of the United States, but of our road exclusively; thus apparently indicating its irresponsibility, and thereby again lessening their value; then published monthly, not only the indebtedness, with the interest, but the deficit of interest, as if due by us, and left unpaid; and then, worst of all, and hardest of all, withheld from us all our earnings in the transportation of letters, newspapers, packages, and of the army and navy, all of which hitherto we had been paid one-half of, as under act of Congress. The Treasury Department was fortified in the last act of injustice by an opinion of the Attorney General. These repeated blows against this, the great work of the age, so unexpectedly directed, shook our credit for a time; for it was soon seen and felt that no corporation could withstand such attacks, and hence those wide and wild variations in the market value of our securities. The Judiciary Committee of the United States Senate first (every member except one) offset their legal opinion, that the interest was not due, against the opinion of the Attorney General that it was all due; and every other committee in both Houses of Congress before whom the question was brought agreed with the Judiciary Committee of the Senate. Both Houses of Congress finally reversed the action of the Treasury Department and the Attorney General (the House of Representatives without a division); and the result is the restoration of the credit of the Company, with a great advance in all its securities.

OLIVER AMES,
Prest. Union Pacific R. R. Co.

Camp's Improved Dumping Car.

In order fully to test the advantages claimed for an alleged improvement on any portion of railroad equipment, without practically trying it, it is probably as well to institute a comparison between the alleged improvement and the article said to be improved by it. Applying this rule to the above mentioned improvement, we find its inventors claiming for it a capacity, on 4-8½ gauge, of *three* cubic yards. The ordinary gravel car carries *two*. Camp's car is dumped by the brakeman alone by raising a lever on each car as he passes along the train. The ordinary gravel car must have the assistance of from two to three men to dump it, according to which side has the preponderance of weight of load, and on which side it is required to be dumped. Camp's Car makes a *clean* dump, thus leaving the laborers for their legitimate work, shoveling the dirt after it is dumped instead of shoveling out each car as is frequently obliged to be done.

It will thus be seen on what the inventors of "Camp's Improved Dumping Car" base their claims to three advantages in the use of their car: 1st, It does more work. 2d, In less time; and 3d, With less expense for labor than by using the gravel car now in use. These are pretty solid advantages—on paper—and we are pleased to be able to announce that the Wyoming Valley Manufacturing Company, of Wilkesbarre, Pa, are building one of these cars for trial on the Lehigh Valley Railroad, where its performances will doubtless attract the attention of railroad men all over the country, for we believe gravel cars are about the only article of railroad equipment that have experienced no practical improvement in the past twenty years. We refer those interested to advertisement in another column.

☞ Ashbel Welch, Esq., President of the "United Companies" of New Jersey, has issued to the officers and employers thereof the following order:

A negotiation is pending for the lease of our works to the Pennsylvania Railroad Company. Should suitable terms be offered by that Company our Board of Directors will undoubtedly submit them to the stockholders for acceptance or rejection. This is a question for the stockholders themselves, and not for their agents. No official interference one way or the other can, therefore, be allowed.

☞ The earnings of the European and North American Railway in February, 1871, were $16,414 43. In February, 1870, they were $10,913 29; and in February, 1869, $9,822 81.

☞ The gross earnings of the Minnesota division of the Milwaukee and St. Paul Railway for 1870, were $1,050,968 69; operating expenses, $700,436 45; net earnings, $350,532 04.

Northern Pacific Railroad.

The Northern Pacific Railroad bridge across the Mississippi river at Brainerd, Minnesota, was finished on the 13th inst., and the first passenger train, containing officers of the road, passed over the structure. This completes the track of the Northern Pacific, 113 miles west from Lake Superior. The grade is finished nearly to Red River, 150 miles further, and at the present rapid rate of progress trains will run to Red River before September next.

☞ At a regular meeting of the Board of Directors of the Hudson Suspension Bridge and the New England Railway, held at New York on the 9th inst., Lieutenant-Governor Julius Hotchkiss, President of the Air Line Railroad, was unanimously elected a director. Arrangements are now being made to push the work vigorously.

CHIEF ENGINEER'S OFFICE,
CHESAPEAKE AND OHIO RAILROAD.
RICHMOND, VA., March 11, 1871.

NOTICE TO CONTRACTORS.—Sealed proposals will be received by the undersigned, at Richmond, Va., until 12 M. March 30th, 1871, for the construction of SHOPS at Huntington, W. Va., on the line of the Chesapeake and Ohio railroad, near the Ohio river. Proposals will be made for the wood, iron, stone and brick work, and for the sewerage, plumbing, windows and doors, separately.

Plans and specifications can be seen at the office of the company in Richmond and Huntington on and after the 20th instant.

Rolling Mill Property
FOR SALE,
OPPOSITE NEW YORK CITY.

The well-known NORTH RIVER OR DURBIN ROLLING MILL, situated at Prospect and North 5th St., Jersey City, New Jersey. The Real Estate consists of sixteen city lots, 25x100 feet each, with two large Dwelling Houses, well built and in good order. Also a large building occupying two lots, suitable for a Machine Shop or other purposes, a Stable, &c.

The Rolling Mill was built for the manufacture of Locomotive and other descriptions of Boiler Tank and Plate Irons, contains a heavy Roll Train, Engines, Furnaces, Machinery, &c. to suit, in good order. It can be seen running, and has been successfully run from its establishment in 1855. Situated near the Hudson River, a short and nearly equal distance from all the New Jersey Railroad Depots and Ferries, the Erie Depots and Ferries and the Hoboken or Delaware & Lackawanna Depots and Ferries, from its proximity to the New York Market, the large Locomotive and Railroad Shops of the City and Paterson, the facilities for forwarding to all points by water or railroad, it cannot be surpassed.

The Real Estate is rapidly increasing in value the vast R. R. Interests and dock improvements mentioned having taken up almost the entire River front and space below the mill property from the Cortland St. to Hoboken ferries. The reputation and business established. The Proprietor intends retiring from the business, and for further particulars can be addressed or seen daily at the

Office, 140 HUDSON STREET,

Notice to Contractors.

SEALED PROPOSALS will be received by the undersigned, at Richmond, Va., until 12 M. 28th March, 1871, for the graduation and masonry on one hundred and eight miles of this road west of White Sulphur Springs, it being all the remaining unfinished portion of the road not now under contract. The work embraces 3,000,000 cubic yards in open cutting, 27,000 cubic yards in tunnels, and 60,000 cubic yards of masonry, of all classes, and is to be completed May 1st, 1872. Profiles and specifications can be had after the 14th March, at the offices of the company, 54 William street, New York; at Richmond, Va., and at Huntington, W. Va. Plans for and proposals for building the iron superstructure of the New River Bridge, at Miller's Ferry, Fayette county, W. Va., will be received at the same time and place. There will be two spans of 250 feet each, and two of 70 feet each. Parties submitting proposals should see the site of the bridge, where further information may be had from the engineer in charge. This bridge must be completed by December, 1871.

NOTICE

To Contractors and Bridge Builders.

DEPARTMENT OF SURVEYS,
224 S. Fifth St., Philadelphia.

SEALED PROPOSALS will be received at the Department of Surveys until 3 o'clock P. M. April 15, 1871, for the CONSTRUCTION OF A BRIDGE over the river Schuylkill, on the site of the Suspension Bridge at Fairmount, and its approaches, to extend from Twenty-fifth and Spring Garden streets, in the Fifteenth ward, to Thirty-second and Bridge streets, in the Twenty-fourth ward, a length of about 2,730 feet.

Proposals will be received for the Bridge superstructure over the river, including all materials, workmanship and erecting ready for use. It will be 340 feet span, of wrought iron, and also two trusses for Thirtieth street, 80 feet span, of wrought iron. Detail plans of these bridges, conforming to specifications, to accompany proposals.

Proposals for all the iron work on *approaches* will be accepted separately, to be erected complete for use, as per plans and specifications.

And separate proposals for the graduation and masonry, to include curbing and paving, as per specifications and plans.

Each bid must be made upon blanks prepared, otherwise they will not be accepted, and every bidder must submit the names of two persons of undoubted responsibility, who will be bound with them as security for the faithful completion of contract. The city reserves the privilege of rejecting any and all bids that may not be satisfactory.

Payments will be made monthly in bonds of the city of Philadelphia, or in cash, at the discretion of the Mayor.

Each bid must be accompanied by a certificate from the Law Department that a proper bond, for the sum of five hundred ($500) dollars, has been filed there, in accordance with the ordinance approved May 25, 1860.

The contractor or contractors, in making their proposals, shall do so with the understanding that if their proposal shall be accepted, that every dispute or difference which may arise incident thereto shall be decided by the Chief Engineer and Surveyor, from whose decision there shall be no appeal.

All bidders are invited to be present at the opening of proposals offered on said day, at 3½ o'clock. Plans may be seen and examined at the Department of Surveys, where specifications and blank proposals may be obtained on and after the 16th inst.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

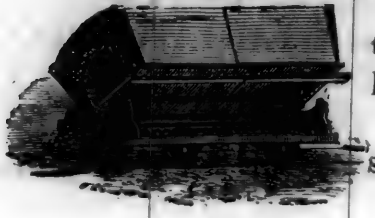
That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.



The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

15 R. R. Avenue, Newark, N. J.,

Opposite Market st. Depot.

$18 IMPROVED WALTHAM WATCHES.

GET THE BEST, AND BUY WHERE YOU CAN BUY THE CHEAPEST.

Engineers, Railroad Men, Master Mechanics and Machinists, if you wish to obtain a genuine Waltham Watch, with all the late improvements, and run no risk whatever of not obtaining a reliable timekeeper, send for Descriptive **PRICE LIST**, giving full particulars of Watches, style and quality of cases, or call and examine. In Coin Silver Cases, **$18.** In 18k Gold Cases, **$80.** Ladies' Size, **$70.** Every Watch thoroughly examined and regulated, and if any one should prove imperfect, return it at once and we will correct or exchange it for one that is perfect, FREE OF CHARGE. H. O. FORD & CO.

Eight years with American Watch Company, 84 Tremont street, opposite Tremont House.

Watches sent to any address, and by selecting from Price List you can get as good a Watch as if selecting in person.

New York Saturday, March 25, 1871.

The Coal and Iron Deposits of Great Britain and West Virginia.

From a recently published Report on the mineral and agricultural resources of the Kanawha Valley by Howell Fisher, Geological and Mining Engineer, we extract the following interesting comparison of the coal deposits of Virginia with those of Great Britain:

The coal area naturally depending upon the New river and Kanawha Valleys of West Virginia for its outlet (in fact by its contour inaccessible by other passable outlets) embraces a territory of over six thousand square miles, the extent of which is more readily comprehended when the fact is stated that it is quite equal in superficial extent to the whole productive coal area of Great Britain, from which is now mined over one hundred million tons per annum.

The great variety and fine quality of the coal of the middle sections of this field are well known and frequently attested.

The fine fatty Bituminous, the Splint, and the Cannal are the principal varieties. The work "Coal, Iron and Oil," by Daddow & Bannan, edition of 1866, page 340, speaking of this location and its coal, says: "Coal river, Elk river, and Gauley diverge from the Great Kanawha and spread their branches over one of the richest and most magnificent coal regions in the world, and bring down their wealth to one common centre on the Great Kanawha. The coals of this region generally are better, purer, and more available for all the requirements of trade and manufacture than the coal from any other portion of the Alleghany coal field. The seams of coal are more numerous and their thickness greater than in any other portion of this coal field; it can be mined cheaper and with more economy generally, under the same rates of labor, than in any other region in this country without exception."

The peculiar Splint coal of this section is a superior fuel in its raw state for the manufacture of pig iron.

Statistics of analysis made show the Kanawha coal to be among the purest found in the world.

The number of workable beds is variously stated from seven to fourteen.

There are five items that affect the value of a coal field.

First—Quality of the coal.
Second—Quantity.
Third—Accessibility of the coal itself.
Fourth—Market.

The last, one of the most essential, will be given this region by the Chesapeake and Ohio railroad.

In the third item, the most essential to cheap and profitable working, this region stands unrivaled. It has been stated before that the chasm of the river renders its most peculiar service in its relation to the coal. Cutting all the coal strata for nearly its whole length entirely through, and getting down among the shales under the coal, this river has caused the numerous streams which pierce this whole coal region to cut down through most of the coal bearing strata on their courses, leaving the coal entirely above water level, accessible at hundreds of points by simply scraping off the surface soil; so that, so far as the mere getting of the coal is concerned, two thousand dollars will open a mine ready to ship one thousand tons per week. There is no region in the world where less physical labor will prepare a mine for delivery of coal at the drift's mouth.

This will be made clearer by a comparison of the position of coal here and in Great Britain in this respect.

In Great Britain, and in fact in almost all of the European coal fields, the coal is deep below the water level. To reach the seams requires the expenditure of years of labor and vast sums of money in sinking shafts or pits, and in erecting pumping and hoisting machinery, to be maintained and renewed at heavy annual expense. It is authoritatively stated, that the cost of sinking shafts in the Newcastle region of England to the depth of one thousand feet has been, in many instances, one thousand dollars per yard. In the great northern coal field of Great Britain, producing twenty million tons per annum, there are two hundred pits or shafts, costing in first outlay for sinking and machinery, fifty millions of dollars, to which must be added the necessary expense of constructing and maintaining proper air courses and their accessories requisite to the safety of the employees.

There is now invested simply in pits and machinery for pumping and hoisting the one hundred million tons produced in Great Britain two hundred million dollars, and this vast sum is destined to utter destruction in serving the purpose for which it was used.

These pits and machinery being constructed, they involve a certain amount of labor for every ton of coal got, in addition to their cost and renewal.

Now, in this great coal field, crossed by the Chesapeake and Ohio Railroad, nature has already sunk all the necessary pits and shafts, which need neither repair, renewal, or labor to work them. The laws of gravity have provided the most perfect, permanent, and costless pumping machinery; and the most perfect ventilation of the mines and safety of the employees, instead of requiring scientific knowledge and anxious thought, is simply a matter of the most ordinary care, the almost perfect freedom from noxious gases being the natural result of the position of the coal strata.

Improved Street Railroad Car.

As a cheap and convenient means of personal locomotion, the street railroad has superseded to a very great extent the use of stage and omnibus, and may be rightly designated as one of the features of modern civilization. Millions of capital are invested in their construction and equipment; and in a single one of our large cities, millions of passengers are transported annually upon them. No vehicle ever devised is so readily accessible, and so essentially democratic in its adaptation to the needs of universal humanity as the street car. In it the head and the heels of society are brought together, and not unfrequently the contact is so close as to obstruct wholesome ventilation. High and low, rich and poor, judge and pickpocket, saint and sinner, are jumbled together as indiscriminately as under the sod of an old-fashioned graveyard.

This means of transit having become so indispensable, it is important that the system should be brought to the utmost degree of perfection. Any improvement in the details of construction confers a direct benefit upon myriads of our population, including numerous over-worked and poorly paid drivers and conductors. Horses, too, participate in the advantages of diminished friction and dead weight.

Changes for the better in the construction of street cars have been made from time to time, but the latest and most important improvements are embodied in those manufactured by the well-known firm of McNairy, Claflen & Co., of Cleveland, Ohio. The engravings (*See Advertisement*) present a view of one of these cars complete, and also of Higley's patent truck and gearing, as it appears when detached from the body of the car. Numerous testimonials from street railway companies in all parts of the country, speak of the practical working of this apparatus in the most unqualified terms of approval. We copy from the circular of the manufacturers above named the following detailed description of the improvements:

The Brake.—The device, in the form of a wheel, on the axle, under the central part of the car, is in two parts; one part, next to the nearest car-wheel, is a shell or dish-wheel, and is made fast to the axle; the other part is a wheel with a conical face, closely fitted into the shell or dish-wheel. The two cone-faced wheels (one on each axle) are loose on the axles, and are connected by bars, as shown in the engraving. On each axle, toward the opposite car wheels, are shoulders; and between each shoulder and the cone-faced wheel are two knuckle joints, one above and one below the axle, which are operated by rods connecting them with the brake lever. When the knuckle-joints are straightened, they form a brace between the shoulder and the cone-faced wheel, crowding the latter into its shell or dish-wheel; and the cone and dish-wheel thus brought in contact constitute the friction surface of the brake. The parts are strong and simple, and not liable to get out of order; and the large friction surface renders the break very effective.

The Anti Friction Journal-Bearing—This bearing is formed by three inter-lapping rollers, made of chilled iron or steel, and resting on the top of the journal. The rollers are shown on the ground in the engraving. These rollers have their centre bearings in the cast iron journal casing or housing on which the car body rests. The rollers, having a diameter many times that of the journal, revolve, in a corresponding degree, more slowly than the journals; and, as the journal and rollers revolve in opposite directions, the friction is reduced to its minimum. An examination of this bearing after it had been subjected to hard service for twelve months disclosed no perceptible wear on the surface of the rollers or journal, nor on the roller centre-bearings. The superiority of this bearing in the amount of power required to start a car from rest is very obvious in practice.

The Swing Motion—This is a simple and important device. The car body, it will be seen, rests on eight rubber springs—the springs resting on projecting shoulders of the journal casing. Passing vertically through each spring and the shoulder of the casing is a bolt, extending from the car body to the stirrup brace below. The hole in the casing shoulder has twice the diameter of the bolt; and by this simple means ample lateral play is given to secure an easy and comfortable swing motion to the car body. The value of this improvement, in reducing the wear and tear of cars and track, by preventing sharp lateral jolting, and in promoting the comfort of passengers, can scarcely be over-estimated.

The Draw Head—This consists of a series of annular rubber springs on the follower, so arranged with reference to the form of the draw head, in combination with the easy running anti-friction journal-bearing above described, as to wholly avoid the violent jerking so disagreeable usually in starting.

☞ The President and Directors of the Cumberland and Ohio Railroad have signed a contract with Myer & Hay for 106 miles of road, from Campbellsburg to Greensburg, Ky. The company have funds on hand to pay for the work. The office of the company is at Lebanon, Ky.

Illinois Central Railroad.

The receipts from operations of this road for the year ending December 31, 1870, were as follows:

From freight		$4,609,890 44
" passengers		1,673,786 48
" sleeping cars		31,674 00
" extra baggage		2,971 65
" mails		76,500 00
" express		168,783 47
" rent of property		131,386 32
" rent of cars		19,185 56
" dockage		8,511 00
		$6,722,638 92
Net earnings over Chicago, Burlington and Quincy Railroad, as per contract		421,095 21
Net earnings over Peoria & Oquawka Railroad, as per contract		67,818 68
Total earnings in Illinois		$7,211,552 81
Earnings over leased lines in Iowa—		
Dubuque and Sioux City		1,185,632 02
Iowa Falls and Sioux City		140,672 41
Cedar Falls and Minnesota		141,100 98
Total		$8,678,958 22
Less operating expenses, viz:		
Salaries	$188,946 28	
General expenses	261,572 33	
Legal expenses	26,112 07	
Claims and damages	84,998 32	
Station expenses	672,471 79	
Freight train expenses	724,425 48	
Passenger "	275,005 82	
Repairs of engines	521,870 51	
" cars	442,344 51	
" tools, &c	47,339 63	
Cleaning engines	57,688 22	
" cars	20,626 48	
Equipment expenses	60,772 81	
Repairs of road	1,133,943 84	
" bridges	123,346 95	
" fencing	69,226 31	
Operating St. Charles Air Line	4,589 79	
Insurance	33,779 67	
		4,759,007 81
Leaving net earnings		$3,919,950 41
Deduct—		
Charter tax paid State of Illinois	$464,584 52	
Charter tax paid State of Iowa	25,527 04	
Rent of leased lines	572,517 05	
		1,062,628 61
		$2,857,321 80
Add—		
Amount applicable to Interest Fund, as per Land Office Report	$230,644 85	
Amount applicable to Free Land Fund, as pr Land Office Report	383,221 69	
		613,866 54
Net amount, as shown in General Balance sheet		$3,471,188 84

It will be seen that the gross earnings of the whole line were $8,678,958 22; operation expenses, $4,759,007 81; State taxes, $490,111 56; and rent of leased lines in Iowa, $572,517 05—leaving net earnings, $2,857,321 80, against $2,887,375 38, in 1869; a decrease of $30,053 58. The percentage of expenses to earnings, including State taxes, was 60.5 per cent., against 61¼ per cent. in 1869.

The gross earnings in Illinois were $7,211,552 81, and the net, $2,790,105 22, being an increase over last year of $57,349 06; and of leased lines the gross earnings were $1,467,405 41; working expenses, $802,144 74; State taxes, $25,527 04; and rent, $572,517 05—leaving a net profit of $67,216 58. The President in his report says:

During the year the lines in Iowa leased by this Company were completed, and the number of miles now in operation, is 402.15, being about 134 miles more than were in operation at the date of my last report.

During the year 1,623,944 tons of freight of all classes were hauled; against 1,601,972 tons in 1869; the rates for which averaged 2.81 cents per ton per mile, against 2.48 cents in 1869.

The motive power and rolling stock of the Company have been maintained in efficient order. In the maintenance and renewal of track, the expenditures amount to $1,257,290 79, and include the cost of re rolling 7,146.6 tons of iron. In Illinois, 65 miles of track were relaid with re-rolled iron, and 84¼ miles with repaired and old iron; and in Iowa 6.6 miles with re-rolled iron and 20¾ miles with repaired iron.

Bridges have received thorough repairs, and of the amount charged to this account, $28,171 78 was for replacing six spans of the bridge over the Illinois river, with iron. This bridge (2,883 feet long,) is, with the exception of the draw, entirely of iron, with substantial stone abutments and piers.

The amount of permanent expenditures was $414,309 95, of which $195,263 33 was for construction, and $214,288 11 for equipment. Included in the construction expenditures is the cost of ballasting with stone 21.9 miles of track—a portion of the cost of new spans in Illinois river bridge—of new and substantial engine house and workshops at Waterloo, and of 2.1 miles of new siding. Of the total amount charged for construction, $28,803 30 was expended on leased lines. The equipment has been increased by the addition of ten locomotives, three sleeping cars, three mail and express cars, eight caboose cars, twenty-three house cars, two flat cars, and two snow plows.

Arrangements were perfected during the past year with the Belleville and Southern Illinois Railroad Company, by which we run through passenger and freight trains between St. Louis and Cairo; and we have also made satisfactory relations with the St. Louis and South Eastern Railroad Company. Our arrangement with the St. Louis, Vandalia and Terre Haute Railroad Company for a direct route between Chicago and St. Louis, has proved to be of benefit to us. Negotiations are pending for the construction of a road between Cairo and the Mobile and Ohio Railroad, but no definite arrangement has as yet been made. The completion of the Iowa Falls and Sioux City Railroad to Sioux City enables us to compete for the trade of Dakota and the territories of the Northwest. The country west of Fort Dodge is unsettled, and until the lands adjacent to that line are disposed of and improved, the traffic will be light.

The Land Department during the past year collected $2,111,865 84, and sold 60,858.22 acres of land for $625,991 90, at an average of $10 28 per acre. The total expenses of the Department were $104,058 56. The lands sold averaged 54 acres to each purchaser. The amount owing to the Department at the close of the year for lands sold, was $2,989,024 40. During the past year 4,120 deeds were issued, embracing 264,872.93 acres, which canceled $2,018,536 of Construction Bonds. The total amount of canceled Bonds used to the close of the year by the issue of deeds, was $12,163,262. Of the original grant of land (2,595,500 acres) there had been sold at the close of the year, 2,179,390 acres, of which 1,621,703.44 acres had been deeded and are now subject to

taxation. There are 415,610 acres remaining unsold, of which 256,847.53 acres are located south of the Ohio and Mississippi Railroad, and being heavily timbered and not so readily brought under cultivation as the open prairie lands, they have been and are, slow of sale.

The total amount paid during the year for interest on Funded Debt, Sterling Exchange, and premium on gold used to pay coupons in New York, was $622,053 28. For Dividends and United States taxes thereon, $2,594,391 59. We closed the year with a balance of $1,840,090 55 in net assets; a stock of working supplies, costing $749,665 56; a fund of $1,552,500 for the purchase of Construction Bonds; and with $1,414,738 Bonds in hands of Trustees in advance of deeds and collections.

The Funded Debt was reduced during the year by the purchase of $97,500 of 7 per cent Construction Bonds, and now amounts to $6,869,500, after deducting the amount set aside for the purchase of Construction Bonds.

The annual meeting of the Shareholders will be held in Chicago, on Wednesday, the 31st day of May next. The term of service of three Directors will expire at that date.

General Balance Sheet.

Capital stock has been increased $1,530 by the conversion of canceled bond scrip.

The working stock of supplies consists of wood, coal, etc., on Chicago, North and Iowa Divisions, $68,690 58; engineering materials and tools, $350,499 23; materials at shops, $327,273 87; stationery, $3,101 88—total, at debit in General Balance Sheet, $749,665 56.

The lands remaining unsold are located as follows: on Main Line—south of Ohio and Mississippi Railroad 256,847.33 acres; between Scandoval and Decatur, 59,785.71; between Decatur and Dixon, 12,254.45; between Dixon and Dunleith, 13,984.41. On the Chicago Branch—between Odin and Tolono, 45,579.76; and between Tolono and Chicago, 27,158,34—total, 415,610.

During the year 11 new first class engines were built at the company's works, making the number owned by them at the close of the year, 187; of these 86 were employed on passenger trains, 110 on freight, 22 switching, etc., and 19 undergoing repairs. 42 engines have received general repairs, and 45 thorough repairs.

The number of miles run by engines with passenger trains, was 1,330,723; with freight trains, 3,355,761; with construction trains, 124,020; switching, 577,102—total, 5,387,606, a decrease, compared with the previous year of 26,697. Cost of repairs, $563,005 37. Cost of repairs per mile run, 10.45 cents against 11.27 cents in 1869. The total cost per mile, including wages, fuel, oil, waste, tallow and cleaning, has been 25.15 cents, against 25.49 cents in 1869, 27.57 cents in 1868, and 29.62 cents in 1867—the total cost being $1,355,465 95, against $1,381,349 88 in 1869, and $1,266,531 96 in 1868. The cost of oil, waste and tallow per mile run, has been 0.78 cents; of fuel, 6.83 cents. Av. miles run to a pint oil, 13.52; to a ton of coal, 35.07.

The company have 85 passenger, 1 officer's, 1 pay, 44 baggage, mail and express, 16 sleeping, 2,512 grain, 50 Blue Line, 320 stock, 271 flat, 1,069 coal, 2 powder, 4 derrick, 3 tool and 2 tank cars, and 6 large and 10 small snow plows. There have been added to the rolling stock 3 new sleeping, 3 mail and express, 8 caboose, 23 house and 2 flat cars, and 2 snow plows. Two passenger, 2 baggage and mail, and 84 freight cars were rebuilt. 4,574 new wheels were used in repairs of cars during the year. The cost of repairing passenger cars has been 2.18 cents, and of freight cars 0.58 cents per mile run.

The total number of passengers carried was 1,376,585—a decrease of 22,831. Number carried one mile, 54,305,218—an increase of 999,202. Av. number of miles traveled by each passenger, 39.45. Av. fare of each passenger, $1 53.82. Revenue per mile of road, $2,099 68.

Tons of freight transported 1,628,944—an increase of 21,972. Tons carried one mile, 265,409,371—an increase of 12,073,253. Tons carried one mile north, 126,042,619; do., south, 139,366,802. Tons of local freight carried one mile, 245,248,157; do., through do., 20,161,214. Av. distance each ton was carried 163.43 miles. Av. revenue per ton, $3 78.24. Revenue per mile of road, $6,090 74.92.

The amount of expenditures in road department, has been for operation, $1,449,488 91, and for construction $195,263 33. There were used in repairs of road, 351,559 cross ties, 591,124 lbs. spike, 14,869 chairs, 61,388 fish plates, 15,607 bars of old iron, 86,029 bars of repaired iron, 28,953 bars of re-rolled iron and 3,823 bars of steel and steel headed rail. The length of track relaid was 176.6 miles.

President.—John M. Douglass.

Directors.—His Excellency, John M. Palmer, Governor of Illinois, Ex Officio. R. Daniel Wolterbeek, Cunningham Brothwick, H. H. Hunnewell, until May, 1871; Abram S. Hewitt, William Tracy, W. H. Osborn, until May, 1872; Henry Chauncey, George Bliss, John M. Douglas, until May, 1873; Thomas E. Walker, Wilson G. Hunt, Jonathan Sturges, until May, 1874.

Gen'l Superintendent.—Marvin Hughitt.

Treasurer.—Thomas E. Walker.

Land Commissioner.—John B. Calhoun.

Citizens Passenger Railway.

The Citizens Passenger Railway Company was organized in Baltimore on the 18th inst., by the unanimous election of the gentlemen named as officers of the Company: James S. Hagerty, President; Oliver A. Parker, Wm. J. Hooper, A. P. Burt, Hervey Shriver, Jacob Hecht, P. S. Chappell, and Henry Knell, Directors. After which the Directors met and elected John E. H. Boston, Esq., of the firm of Oliver Parker & Co., Secretary; and Geo. B. Keen, Esq., of the firm of Keen & Hagerty, Treasurer. The laying of the track of the road was commenced last week at the corner of Fremont and Lombard streets, and has reached very near to Exchange Place. It was also commenced on Saturday at Lafayette Square. The Directors are fully supplied with funds, and it is their intention to push the road to an early completion. This line is designed to run from the western boundary of the city, at Wilkens avenue, to Patterson Park, the eastern boundary.

☞ St. Paul is now connected with St. Louis via the Milwaukee and St. Paul, Iowa Central and North Missouri railroads. Arrangements are now being made by which through trains will run between the two cities. The distance, seven hundred miles, can be made in about twenty-four hours.

Railroads of the State of New York.

A tabular statement of their Stocks, Bonds and Debts, Cost, Earnings, Dividends, &c., for the year ending September 30, 1870.

Compiled from the Annual Reports of Companies to the State Engineer and Surveyor.

Railroads.	Capital Account. Stock. $	Bonds. $	Debt. $	Total. $	Length of Track. Main. M.	Branch. M.	Other. M.	Cost of Roads & equipm't. $	Road Oper. M.	Gross Earnings. Passenger. $	Freight. $	Other. $	Total. $	Expenses and Rents. $	Net Earnings. $	Dividends Am't. $	Rate p. c.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in *Italics*. State-aid Railroads are distinguished by a "†."

American Railroad Journal

Saturday, March 25, 1871.

Stock Exchange and Money Market.

Money has been more actively sought, mainly for speculative purposes, and rates have been quoted up to 4@6 per cent. on call, and 6@7 per cent. per annum on the best mercantile credits. The offerings have been less liberal, particularly on bank account. Some outflow of currency has been noted. The city banks, in their last weekly exhibit, showed a further falling off of $1,422,289 in their legal tender reserve, and $1,105,431 in their specie hoard, with a gain of $1,021,059 in their deposit line. They added $3,223,010 to their loan and discount averages; and reduced their circulation $49,856. The banks now hold $12,649,676 of specie and legal tender notes, in excess of the 25 per cent. of their liabilities required by the national banking act. The U. S. Sub Treasury at this port, last week, reduced its currency reserve, $145 866, and increased its coin balance $582,179. The receipts of the office were $3,368,743, in coin, and $4,859,924 in currency; payments $2,786,556 in coin, and $4,505,795 in currency. The office received $2,780,000 in coin or its equivalent, from customs; and disbursed $355,741 of coin interest.

Under the Treasury programme for March, Government will sell Treasury Coin, as follows: Thursday, March 23, $2,000,000; Thursday, March 30, $1,000,000. And buy in, two millions of Bonds on each Wednesday of the month, the Department reserving to itself the usual privileges.

The specie reserve of the city banks according to the latest return is $22,663,745, against $32,014,747 same time last year. The city bank deposits are now $230,945,648, against $208,816,823 week ending March 19. 1870. The legal tender reserve amounts to $55,628,645, against $52,774,420 same time last year. The circulation now stands at $31,605,215, against $38,699,563 same time last year. The loans are now $292,576,404, against $270,003,682 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $98,280,959 a day, against a daily average of $108,023,601 the preceding week. The current week's exchanges average about 96 millions a day. The city banks, last week reported a loss of $1,105,431 of specie, a gain of $1,021,059 of deposits, and a loss of $1,422 289 of legal tender notes. They increased their loans $3,223,010; and reduced their circulation, $49,856.

National Bank notes to the amount of $806,990 were issued last week by the Treasury Department. Deducting from the grand total issue to 1800 banks the currency returned, including worn out notes, amounting to $40,210,582, the existing 1,658 banks, (with an aggregate capital of $435,856,084,) retain an actual circulation of $311,780 103. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $354,030,000; and for the public deposits, $15,911,500—making a total of $369,941,500. The Treasury Department last week redeemed and destroyed $540,700 of worn and mutilated fractional currency, and issued $296,897 of new.

The coin reserve of the Treasury Department on Thursday morning was $108 292,000, including $27,172,000 represented by outstanding coin certificates; and the currency balance was $14,002,000.

The U. S. Sub-Treasury, on Thursday morning of this week, held a balance of $6,718,022 in currency, and $67,089,899 in coin against a balance a week previous of $9,074 683 currency, and $65,870 906 coin.

The U. S. Sub-Treasurer retired, last week, $2,376,877 of coin certificates, received for customs.

Government revenues, were on a moderate scale, last week. The Excises yielded about 1⅞ millions. The customs at the port of New York, last week were $2,666,877; and at the outports, equal to about $850,000 more, all in coin, or coin certificates. The internal revenue yield thus far in the current fiscal year beginning with July 1, 1870, has been about 107¾ millions.

Gold has been less confidently dealt in and has receded from 111½@110⅝, closing on Wednesday of this week at 111, against 111⅜ the preceding Wednesday. The offerings have been more liberal. The customs call has been fair, and the export drain, rather heavier. The shipments last week were $1,993,517; and on Wed-

nesday of this week, $179,000; and on Thursday, about $300,000.

The Gold Exchange Bank clearances on Friday of last week were $23,682,000; on Monday of this week $41,058,000, the extremes since our last. On Wednesday they amounted to 25⅞ millions.

The export drain was $1,998,517 last week, against $3,10,491, same week preceding year. The shipments since July 1, 1870, have been $53,039,871, against $22,918,829 same time in 1869–'70.

The customs demand for Gold last week, averaged $458,932 a day; thus far, this week, it has averaged $789,123 a day, or equal to a weekly aggregate of $4,734,738. The arrivals of specie from Europe, Havana and other foreign ports last week were $10,630, and since Jan. 1, 1871, $2,721,606, against $3,840,005 same time in 1870. The total customs revenue of the Government, in coin, at this port, since July 1, 1870, has been $104,821,560, against $94,404,025 same time in 1869–'70.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt since July 1, 1870, $66,003,646 against $66,438,891 same time in 1869–'70.

Foreign Exchange has been more freely purchased at generally strong and buoyant rates. Bankers' sixty day bills on London closed on Wednesday at 109¾@109⅞; sight bills on London, 110⅛@110⅜.

The produce exports from this port, week ending with March 7th, were to the currency value of $5,123,187.

Government securities have been in less request and though not offered freely in the open market, values have declined slightly, closing barely steady. The subscriptions to the new refunding Five per cent. Loan, thus far reported, amount to about 19 millions.

On Wednesday, Government bought in two millions of Five-Twenties at 109 34@109 47, ex-interest. The amount of bonds offered was $6,889,100.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115⅜@115⅝; U. S. Five-Twenties of 1862, 112⅛@112¼; U. S. Five-Twenties of 1864 at 111¾@112; U. S. Five-Twenties of 1865, 111¾@112; U. S. Five-twenties of 1865 consolidated, 110⅜@110¾; U. S. Five Twenties of 1867, 110⅝@110¾; U. S. Five-twenties of 1868, 110⅞@111⅛; U. S. Ten-forties at 108⅜@108¾ ex-coupon; U. S. Six per cent. currency bonds, 113⅞@114.

State bonds have been in less request at irregular prices.

Railway bonds have been in fair request and quoted generally firm. Central Pacific Sixes have been in good demand, closing at 95⅝@95¾. The Chesapeake and Ohio R. R. First Mortgage six per cent. gold bonds have been selling to a fair extent at 90 per cent. and accrued interest. Union Pacific Sixes closed at 83⅛@83⅝.

Railway and miscellaneous share property has been more active, and generally stronger, though closing less buoyantly. Union Pacific stock closed at 24⅜@24⅝; Ohio and Mississippi at 48@48⅛. Western Union Telegraph at 58¼@58½.

General business has been moderately active in the leading lines. Breadstuffs and Cotton, Pork and Lard have been freely dealt in at variable figures, closing about steady. Middling upland cotton closed buoyantly on Wednesday at 15⅛ cts. per lb. The receipts at all the ports, since Sept. 1, have been 3,159,889 bales, against 2,265,264 bales same time last year; exports 2,064,609 bales, against 1,417,617 bales same time last year; stock at the ports, at latest dates, 692,692 bales, against 475,853 bales same date 1870.

At the Live Stock markets, Beeves have been in more demand at 10@16c.; Veal Calves at 5½@11½c; Sheep, at 5½@9c., and Swine, at 7½@8c. per lb., all live weight. Milch cows, quiet at $40@$100, each. The week's receipts were 4,262 Beeves, 47 Cows, 1,266 Veal Calves, 15,301 Sheep and Lambs, and 12,326 Hogs.

Ocean freights have been fairly active and quoted firmer. For Liverpool, cotton at ¼@$\frac{5}{16}$d. by sail and $\frac{5}{16}$@⅜d. by steam, per lb.; flour at 2s. @2s. 3d. by sail, and 2s. 6d.@@2s. 9d. by steam, per bbl.; grain at 5@5¼d. by sail, and 6d. by steam. per bushel; and heavy goods at 15s.@27s. 6d. by sail, and 25s.@40s. by steam, per ton.

TREASURY DEPARTMENT,
STATE OF ARKANSAS,
LITTLE ROCK, March 1, 1871.

The Semi-annual Interest, due April 1, 1871, on Arkansas State Seven per cent. bonds, will be paid on and after that date, at the Union Trust Company, No. 73 Broadway, New York.

HENRY PAGE, State Treasurer.

☞ Mr. EDWARD HAIGHT, late President of the Bank of Commonwealth, has associated with him his son, EDWARD HAIGHT, Jr., and will transact a Banking, Stock Brokerage and Commission business at 9 Wall Street. Attention is called to their business card on second page.

☞ An important internal revenue decision relative to the tax on dividends, surplus profits and interest on funds of corporations, etc., will be found in another column.

☞ The Blue Earth *City Post* says the Burlington, Cedar Rapids and Minnesota Railway will be extended to Blue Earth City by the 1st of January, 1872.

☞ The construction of the California Pacific Branch Railroad, from Vallejo, through Sonora county, by way of Santa Rosa, to Healdsburg, will be commenced immediately.

☞ Marvin Hughitt has been appointed Assistant General Manager of the Milwaukee and St. Paul Railroad, with headquarters at Milwaukee.

☞ The contract for grading the first nine miles of railroad west of Menasha, Wis., has been awarded to Jas. McGillan and John Dougherty.

Morris Canal.

The Morris Canal Company of New Jersey has contracted to lease its canal, with all its boats, properties, works, appurtenances and franchises, to the Lehigh Valley Railroad Company for a term of 999 years. The terms proposed are, that the railroad company shall pay at the regular semi-annual dividend periods of the canal company, in February and August of each year, beginning next August, 5 per cent. on the preferred stock of the company and 2 per cent. on the consolidated stock, amounting to 10 per cent. per annum on the former and 4 per cent. per annum on the latter, to be continued every year during the 999 years of the lease. It also agrees to pay all obligations incurred since the closing of the canal up to the 1st inst., not exceeding $100,000; and all obligations incurred since the 1st inst. properly expended on the works of the canal. The railroad company also agrees to pay, for the purpose of meeting the expenses of maintaining the organization of the canal company, annually, in quarterly payments, $1,500. The canal company is indebted on first mortgage 6 per cent. bonds to the amount of $500,000, on second mortgage 6 per cent. bonds $285,000, on 7 per cent. boat loan $236 965, and on 7 per cent. scrip given for dividends $103,164, making a total indebtedness of $1,125,129, all which the railroad company assumes, as well also the riparian tax of $25,000 per annum. This lease will be submitted to the stockholders of the Morris Canal Company for approval at their annual meeting, on the 3d of April. The fair and equitable terms of the lease will, no doubt, insure its prompt approval. To the consolidated shareholders the terms are especially liberal, the guaranteed 4 per cent. per annum being at 6 per cent. equal to 66⅔ of the par of the stock, which has paid very irregularly of late years, and the shares for some time past have been quoted at 35@40, the par of which is 100. The two semi-annual dividends on the preferred stock passed by the company are not provided for in the proposed lease.—*Phila. Ledger Mar.* 22.

New Orleans, Mobile and Chattanooga R. R.

At the Annual meeting of the stockholders of this company held in New York on the 14th inst., the following named gentlemen were elected to serve as directors for the ensuing year, viz: James A. Raynor, Wm. S. Williams, Edwin D. Morgan, John A. Griswold, Oakes Ames, Thomas W. Pierce, Peter Butler, George Innis, Wm. M. Tweed, James H. Banker, Harrison Durkee, John Stewart, Louis A. Von Hoffmann, Levi P. Morton and Joseph Seligman. At a subsequent meeting of the directors, Jas. A. Raynor was elected President, John A. Griswold Vice President, Harrison Durkee Treasurer, and John J. Howell Secretary. The Executive Committee, elected to serve for the ensuing year, and to whom is confided the management of the affairs of the company, are Oakes Ames, Ed. D. Morgan, James H. Banker, Harrison Durkee, John Stewart, L. P. Morton, John A Griswold and Wm. S. Williams.

☞ The rails of the Knox and Lincoln Railroad are now laid to Wiscasset, and the construction train is rapidly ballasting and gravelling the road to that place. It is expected to open the road for travel to Wiscasset by the first of April, and they expect to have cars running to Damariscotta by June.

☞ Four surveying parties have been fitted out from Alexandria, Va., to locate the Lynchburg and Danville railroad line.

☞ The first twenty miles of the Savannah and Memphis railroad from Opelika westward, were completed on the 16th inst.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH, BANKERS,
No. 5 NASSAU STREET,
NEW YORK, March 24, 1871.

☞ THE CHESAPEAKE AND OHIO RAILROAD,

A NEW TRUNK LINE FROM THE SEABOARD TO THE WEST.

There remain but 200 miles to be completed, of which nearly half is graded, to unite the unfailing navigation of the Atlantic coast with that of the Ohio and Mississippi Rivers at a favorable point. Roads projected, or now in progress, will connect it, by a short line, with the principal railroad centers of the West.

The road already possesses a PROFITABLE LOCAL BUSINESS, and its advantages AS A GREAT EAST AND WEST THROUGH LINE for the transportation of the heavy freights (which constitute the principal part of the East and West through traffic) are numerous and important.

1. A SHORT ROUTE between the Atlantic coast and the Great West.
2. LOW GRADES.
3. CHEAP FUEL.
4. A GENIAL CLIMATE which admits of safe, economical, and rapid railroad operation throughout the year.
5. EAST AND WEST TERMINI, at favorable points on tide water and the Ohio River.
6. A VERY LARGE THROUGH AND LOCAL TRAFFIC awaiting its progress.
7. A COMPARATIVELY LIGHT CAPITAL AND DEBT, and consequently a light tax upon traffic for payment of interest and dividends.

All these conditions favor a cheap and economical working of the line, which will enable the Chesapeake and Ohio route to do a profitable East and West through business at rates which would not pay by the more difficult and costly lines, *and to control an enormous Southwestern through trade.*

We are now authorized to sell an additional amount of the FIRST MORTGAGE SIX PER CENT. GOLD BONDS of the Company, at the original price of 90 *and accrued interest* from Nov. 1.

The Bonds are secured by a mortgage upon the entire road, (427 miles of main line) franchises, and property of the Company, WHICH NOW, IN COMPLETED ROAD AND WORK DONE, EXCEEDS THE ENTIRE AMOUNT OF THE MORTGAGE; and which, when completed, will be worth at least $30,000,000.

A *Sinking Fund* of $100,000 per annum is provided for their redemption.

They are issued as Coupon or Registered Bonds, and in denominations of

$100, $500, and $1,000.

The superior advantages, valuable property and franchises, and able and honorable management of the Chesapeake and Ohio Railroad Company render it one of the most substantial, reliable and trustworthy Corporations in the country, and commend its Securities to the unhesitating confidence of capitalists and investors.

Pamphlets, maps and full particulars furnished upon application.

FISK & HATCH, Bankers.

☞ RAILROAD BONDS.—Whether you wish to buy or sell, write to CHARLES W. HASSLER, 24 Broad Street, New York.

Journal of Railroad Law.

COMMON CARRIERS—WHAT CONSTITUTES "BAGGAGE" FOR WHICH THEY ARE LIABLE.

The facts in the late case of Dexter *vs.* The Syracuse, Binghamton, and New York Railroad Company (42 N. Y. 326) are fully and clearly stated in the following opinion by

SMITH, J.—The points made upon the motion for a non-suit present the true theory of the defence, and present for discussion and consideration the true principles upon which the right of action of the plaintiff depends. The requests to charge, and the propositions submitted to the circuit Judge, are simply reiterations in a different form, quite needlessly made, of the same points or questions. It is not denied and cannot be, in view of the numerous decisions on the subject in this state and in others, that the defendant, as a carrier of passengers, is responsible for the carriage and safe delivery of such baggage as by custom and usage is ordinarily carried by travelers, and that the payment of the usual fare includes, in contemplation of law, a compensation for the conveyance of such baggage.

The difficulty is not with the rule of law, but with its particular application to the facts of the case.

It is for the obvious interest of the carriers of passengers to encourage travel by allowing the passenger to take with him as baggage whatever he may deem proper or desire for his necessity, comfort, convenience, pleasure or amusement, on the journey or on his stay away from his home, within reasonable limits.

The question, as held in Merrill *vs.* Grinnell, when property lost by a traveler is claimed as baggage, is whether it is or was a reasonable description or class and amount of baggage, in view of the condition in life of the passenger, the extent and object of his journey, the time of his contemplated absence from his home, and other particular circumstances of the case. The error I think in the argument of the defendant's counsel, as presented at the trial on his motion for a nonsuit, and in his numerous requests, is in the claim that the baggage which a traveler may take, and the carrier must safely transport and deliver, is limited to such apparel or other articles as "were absolutely" necessary or material for his use, comfort or convenience on his journey, or while away from his home. In this case the plaintiff's husband was away from his home without a trunk or any articles of wearing apparel, so far as we can see from the evidence except such as he had upon his person. The trunk and apparel for which the action was brought were purchased in the city of New York to take with him on his return home; he probably did not need or intend to use any portion of it by the way. He left New York at six o'clock P. M. and arrived at his home in Cortland the next morning or forenoon.

The argument of the counsel in effect is, that having no occasion for the use of the clothing or other articles contained in the said trunk on the way, he had no right to carry them as baggage at the risk of the carrier, or any baggage. Such a rule would I think, be too strict and narrow for these times, when steamboats and railroads have so wonderfully increased the temptations and facilities for travel, and superseded the old modes of transportation by stage coaches, canal and river boats, and other ways as means of transportation from place to place formerly in use.

It would be a more fair rule to hold the carrier responsible for whatever he received as baggage from the traveler within such limits as to weight and amount as the carrier might fix and prescribe. Public carriers and the courts, I think have been growing more liberal on this subject of late than formerly. The case of Merrill *vs.* Grinnell indicates the growth of a spirit of progress and expansion on this subject corresponding with the great increase of travel and inter-communication among the people in modern times.

In this case, the assignor of the plaintiff and the owner of the trunk, for whose loss, with its contents, the action was brought, was allowed to recover for many articles of clothing, besides money, that the passenger did not need to use by the way. He was an emigrant from Germany to New York, and purchased his ticket at Hamburg for the transportation of himself and baggage to New York *via* Hull and Liverpool; his baggage consising of a black leather trunk, and its contents consisting of a large amount of wearing apparel, among which were six dozen shirts, two swords, valued at sixty eight dollars, $800, in gold, and other articles valued in all at $1,991 27. This court allowed the plaintiff to recover for all these articles. The chief controversy related to the money. It is quite apparent that of these materials of wearing apparel, very few, and of the money very little, if any, were requisite for the use of the passenger by the way. His ticket for transportation was paid for at Hamburg before he started, and it does not appear that he sought or had occasion to open or to take anything from his trunk before his arrival in New York, where upon demand for it, it was found to have been stolen or lost.

This case, I think, clearly establishes that the right of the traveler to recover of the carrier for lost baggage is not limited to such apparel or other articles as he expected to use or needed by the way. I think, a young man for instance, may start from his eastern home to remove and take up his residence in a western State or City and take with him his ordinary wearing apparel, though he might not need or expect to use a single article of it by the way, except such as he wore upon his person, and I cannot admit that it would be a sound rule of law, to hold that if a gentleman from the interior of the State or Country should purchase in New York or any other city a new coat or a new suit of clothes for his own use and put into his trunk, he could not recover of the carrier for its loss, because he did not expect to stop to wear it or put it on by the way. With the exception of the few articles purchased for his wife and other members of his family, the contents of the trunk in controversy in this action consisted of articles of male attire suitable for the condition of the plaintiff's husband, and purchased and designed, as he testified, for his immediate personal use.

The case is not one where there was any fraud practiced or intended upon the carrier, or any implied misrepresentation that the articles were apparel or clothing when in fact they were merchandize, as in the case Pardee *vs.* Drew (25 Wend. 460). In that case the plaintiff was a merchant residing at Delhi, in the County of Delaware. He put on board the defendant's steamboat, in New York, a trunk to be transported to Catskill, and took passage himself at the same time to accompany the trunk home, where he would doubtless, in the ordinary course of travel, arrive on the same day. The trunk was filled with silks and other fine goods of the value of about $300 purchased for sale, and contained nothing else. The plaintiff recovered for the value of the trunk and its contents at the Circuit, and the Supreme Court set aside the verdict and granted a new trial, on the ground that the trunk was filled with merchandise. Chief Justice Nelson said the trunk did not contain an article for the personal convenience of the traveler, "that the contents of the trunk had no necessary connection with the baggage which it is customary to allow passengers to carry for a journey."

He said also, that the misrepresentation of the trunk and the contents as baggage, in the customary sense, was unfair, and calculated to impose upon the captain which would of itself exonerate the defendants. This is the true ground on which the carrier is exempt from liability in such cases. The implication upon the facts of this case, is, that if the trunk had contained the customary baggage, that is clothing and articles designed for personal use of plaintiff and his family, he would have been entitled to recover, although the trunk was purchased in New York and simply transported to the plaintiff's home with him on his return home. This case was put upon the express ground that the contents were merchandise and not personal baggage. It virtually admitted that, if the trunk had contained such baggage as is customarily taken by travelers, the defendant would be liable. And in that case, it is quite apparent that if the trunk had then been filled with wearing apparel, the plaintiff could hardly be expected to use or need it on his way home. It would have been taken for use after return to his home. The rights of the traveler in respect to his baggage cannot I think, properly rest upon a rule so restricted as claimed by the defendant; one which would operate so harshly and unreasonably upon the traveling public. If the plaintiff's husband had taken this trunk and its contents with him when he left home, it could scarcely be pretended that he was not entitled to take it home with him from New York as personal baggage at the risk of the carrier. I think he was entitled to equal protection for it on his journey homeward from New York. No fraud was perpetrated or designed upon the railroad company. The trunk was of such description with its contents as was customarily taken and carried unquestioned by all travelers. There was really no dispute about the facts at the circuit, and the direction of the Circuit Judge to the jury to render a verdict for the plaintiff was therefore not erroneous and the judgment at the General Term should be affirmed.

But a majority of the brethern think that the dress purchased by the deceased for his landlady at the cost of seven dollars should not have been embraced in the verdict, and that the plaintiff was not entitled to recover for that sum. The judgment should therefore be modified by striking out the said sum of seven dollars, and the interest thereon from the date of the verdict be deducted

therefrom and for the residue the judgment should be affirmed.

Judgment so modified and affirmed with costs.

Internal Revenue Decisions.

TAX ON DIVIDENDS, INTEREST, &C.

Some difficulty has existed in the construction of the act of July 14th, 1870, upon the subject of the tax on dividends and interest paid by the banks and other corporations, which are required to withhold the tax from the holders of their stocks and bonds, and to pay it to the Government. The rulings of the office of Internal Revenue have not been uniform upon this subject.

Commissioner Pleasonton has recently issued a letter to Supervisor Dutcher of New York, covering all the points involved, which has evidently been prepared with care and may be considered a final ruling upon the subject.

It will be remembered that the act of July 14th provides that the sections of the old law, which impose a tax of five per cent. upon the dividends and interest paid by the corporations referred to, "shall be construed to impose the taxes therein mentioned to the 1st day of August, 1870, but after that date no further tax shall be levied or assessed under said sections." The same act imposes "for and during the year 1871 a tax of two and one-half per centum" on interest paid upon the bonds of such corporations and upon their dividends and undivided profits.

The questions of doubt refer exclusively to the interval from the 1st of August, 1870, to 1st January, 1871—whether the corporations named are liable to any tax on interest and profits for that period.

Commissioner Pleasonton decides that they are exempt from tax for all the profits of that period, whether divided or not, and for any interest earned in that period. He also decides that they are exempt from tax on all dividends declared and on all interest payable in that period, even though the profits so divided and the interest so payable have been earned when the 5 per cent. tax was in force. Dividends declared since 30th December, 1870, and interest payable since that date, are taxable (at 2½ per cent.) only for such portion as was earned either before the 1st August or subsequent to 30th December, 1870, the portion earned within that interval being exempt.

This exemption, we understand, applies only to the liability of corporations themselves to pay the tax. The individual holder of the stock or bonds will be liable for the tax on all that portion of the dividends and interest upon which the corporation has not paid the tax.

The corporations to which this ruling refers are banks, trust companies, savings institutions doing a general banking business, insurance companies, railroad, canal, canal navigation and slackwater companies. The Commissioner's letter is as follows:

OFFICE OF INTERNAL REVENUE,
WASHINGTON, February 27, 1871.

SIR:—Upon further consideration it is deemed advisable to publish in the Internal Revenue Record the following instructions, which, it is believed, cover all the questions which have arisen respecting the liability to tax of dividends, surplus profits and interest on bonds of the corporations enumerated in sections 120 and 122, act June 30, 1864, as amended, and section 15, act July 14, 1870.

First—Dividends of the corporations enumerated in sections 120 and 122 aforesaid, which were *declared* at any time prior to August 1, 1870, are subject to a tax of five per cent.

Second—Undivided profits of said corporations which are carried to the account of any surplus or contingent fund prior to August 1, 1870, are subject to a like tax of five per cent.

Third—Interest (or coupons representing interest) due from the corporations mentioned in section 122, which became *due and payable* prior to August 1, 1870, is also subject to tax of 5 per cent. Returns of these dividends and surplus profits should be made on Form 65, and returns of this interest on Form 68.

Fourth—All dividends of the corporations before mentioned which were declared within the last five months of 1870 are exempted from a *dividend* tax, even when said dividends are composed wholly or in part of profits accrued prior to August 1, 1870.

Fifth—Profits carried to the account of a *fund* within the last five months of 1870 are exempt from a surplus tax, even if said profits were earned prior to August 1, 1870.

Sixth—No tax should be withheld from interest (or coupons representing interest) falling due and payable within the above period of five months.

Seventh—Dividends of said corporations which are *declared* on or after January 1, 1871, are taxable as follows: If composed wholly of profits accrued or earned prior to August 1, 1870, at the rate of 2½ per cent.; if composed partly of profits accrued prior to August 1, partly of those accrued within the last five months of 1870, and partly of those accrued since January 1, 1871, at the rate of 2½ per cent. upon so much of the dividend as represents profits accrued either prior to August 1, or subsequent to December 31, 1870, excluding profits of the last five months of 1870.

Eighth—Profits carried to the account of a *fund* on or after January 1, 1871, are subject to the same liability to tax as the dividends above described. So much of such profits as were earned prior to August 1, or subsequent to December 31, 1870, are taxable at the rate of 2½ per cent.

Ninth—Profits of the corporations previously mentioned, which were earned or accrued within the last five months of 1870, are not taxable when divided or carried to the account of a *fund* subsequent to December 31, 1870.

Tenth—Interest falling due and payable on or subsequent to January 1, 1871, is taxable at the rate of two and a half per cent. if such interest accrued either prior to August 1 or subsequent to December 31, 1870. From so much of it as accrued within the last five months of 1870 no tax whatever is to be withheld.

Eleventh—Returns of dividends and surplus profits by the corporations mentioned in section 15, act of July 14, 1870, should be rendered on Form 65 1-2, and returns of interest on Form 68 as revised.

Twelfth—All previous rulings of this office, inconsistent with these instructions are herewith revoked. A. PLEASONTON, Commissioner.

☞ The Washington *Star* says the Baltimore and Potomac Railroad Company has just entered into contract for the heaviest steel rails for the road between that city and Baltimore, and will shortly begin to lay them from both ends of the road. The ties are now being delivered.

☞ Books were opened on the 19th inst., at Lebanon, Ohio, for subscription to the railroad from Dayton, through Lebanon to the Little Miami Railroad near Loveland. Ten per cent. of the whole amount was subscribed at once.

☞ The surveyors of the Cincinnati and Southern Railroad have completed the preliminary survey to Chattanooga.

☞ The Morris Canal will be opened for navigation on or before the 1st of April.

☞ UNION PACIFIC LAND GRANT BONDS

OFFICE OF MORTON, BLISS & CO., BANKERS,
NEW YORK, March 20, 1871.

The undersigned offer for sale the balance of the Land-Grant Bonds of the Union Pacific Railroad Company. The road has been in operation about twenty months. It is complete in all respects, and its earnings have averaged $8,000,000 per annum. These bonds bear seven per cent. interest, coupons payable April and October. The following summary of the financial condition of the Company is from the address of Col. Thomas A. Scott to the stockholders, upon his accepting the Presidency, at the annual meeting in Boston, March 8:

LAND DEPARTMENT.—Bonds, seven per cent. currency, $10,400,000.

Land Sales, 292,900 acres; proceeds, $1,806,566; average price per acre, $4 46.

On account of these sales the Company has received and redeemed land grant bonds to the extent of..... $736,000

For the remainder the Company holds land notes maturing in one, two and three years, with accruing interest... 576,650

Total..... $1,312,650

The condition of the Land Department may, therefore, be stated thus:

Bonds..... $10,400,000

Principal reduced by bonds redeemed.. $736,000
Land notes on hand..... 576,650

Showing an absolute reduction of.. $1,312,650

The Company is entitled, under the grants from Government, after deducting total lands pre-empted before passage of the act, to..... 12,080 000 acres.

From which deduct amount heretofore sold..... 292 883 acres.

Leaving on hand as an asset..11,787,117 acres.

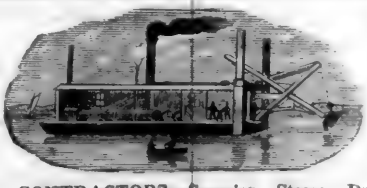
—which, at an average value of two dollars per acre, being twenty per cent. below the minimum Government price for adjoining lands owned by it, should yield the gross sum of $23,574,234. So much thereof as may be required to be applied to the payment or redemption of the land grant bonds, and the balance to go into the Treasury. The average land sales amount to about $75,000 per month:

From present indications it would seem reasonable to estimate the gross receipts of the coming year at a minimum of..... $9,000,000

With a cost of maintaining and operating the line on this increased earning of not exceeding, say..... 4,500,000

Leaving as net receipts to be applied to interest and dividend, exclusive of the operations of the Land Department of $4,500,000

The operations of the line for the first twenty months of its existence as a completed road show net earnings sufficient to meet the interest upon its entire bonded debt.



This result cannot but be deemed, by all practically versed in the history of new railway lines, as indicating a successful future. The yearly increase of traffic, costing but little additional to transport and therefore yielding a large percentage of net revenue, must soon give a value to your property not readily appreciated at present.

MORTON, BLISS & CO., No. 30 Broad-st.

☞ The directors of the Allegheny Valley Railroad company have elected the following officers for the ensuing year: Col. W. Phillips, President; Jno. Ballantine, Esq., Controller; Capt. W. A. Tomlinson, Secretary and Treasurer; A. T. Rowand, Auditor; Col. J. J. Lawrence, General Superintendent; Thos. M. King, Assistant Superintendent; Capt. H. Blackstone, Chief Engineer; S. J. Jackson, Resident Engineer.

☞ The directors of the Maine Central Railroad Company have elected Edwin Noyes Superintendent of the road, and Levi L. Lincoln, Assistant Superintendent; Joshua Nye, Financial and Purchasing Agent; J. S. Cushing, Treasurer; A. T. Thompson, Assistant Treasurer; Joseph W. Clapp, General Ticket Agent, and A. Hersey General Freight Agent.

☞ The incorporators of the Winona and Southwestern Railroad held a meeting at Winona, Minn., on the 10th, and elected the following officers: President, John Robson; Vice President, William Windom; Secretary, William Mitchell; Treasurer, Matthew G. Norton.

Rolling Mill Property FOR SALE, OPPOSITE NEW YORK CITY.

The well-known NORTH RIVER OR DURBIN ROLLING MILL, situated at Prospect and North 6th St., Jersey City, New Jersey. The Real Estate consists of sixteen city lots, 25x100 feet each, with two large Dwelling Houses, well built and in good order. Also a large building occupying two lots, suitable for a Machine Shop or other purposes, a Stable, &c.

The Rolling Mill was built for the manufacture of Locomotive and other descriptions of Boiler Tank and Plate Irons, contains a heavy Roll Train, Engines, Furnaces, Machinery, &c. to suit, in good order. It can be seen running, and has been successfully run from its establishment in 1855. Situated near the Hudson River, a short and nearly equal distance from all the New Jersey Railroad Depots and Ferries, the Erie Depots and Ferries and the Hoboken or Delaware & Lackawanna Depots and Ferries, from its proximity to the New York Market, the large Locomotive and Railroad Shops of the City and Paterson, the facilities for forwarding to all points by water or railroad, it cannot be surpassed.

The Real Estate is rapidly increasing in value the vast R. R. Interests and dock improvements mentioned having taken up almost the entire River front and space below the mill property from the Cortland St. to Hoboken ferries. The reputation and business established. The Proprietor intends retiring from the business, and for further particulars can be addressed or seen daily at the

Office, 140 HUDSON STREET, Jersey City N. J.,

In the First National Bank Building.

Propositions for Lease or Selling the Machinery for removal entertained.

NOTICE

To Contractors and Bridge Builders.

DEPARTMENT OF SURVEYS,
224 S. Fifth St., Philadelphia.

SEALED PROPOSALS will be received at the Department of Surveys until 3 o'clock P. M. April 15, 1871, for the CONSTRUCTION OF A BRIDGE over the river Schuylkill, on the site of the Suspension Bridge at Fairmount, and its approaches, to extend from Twenty-fifth and Spring Garden streets, in the Fifteenth ward, to Thirty-second and Bridge streets, in the Twenty-fourth ward, a length of about 2,730 feet.

Proposals will be received for the Bridge superstructure over the river, including all materials, workmanship and erecting ready for use. It will be 340 feet span, of wrought iron, and also two trusses for Thirtieth street, 80 feet span, of wrought iron. Detail plans of these bridges, conforming to specifications, to accompany proposals.

Proposals for all the iron work on *approaches* will be accepted separately, to be erected complete for use, as per plans and specifications.

And separate proposals for the graduation and masonry, to include curbing and paving, as per specifications and plans.

Each bid must be made upon blanks prepared, otherwise they will not be accepted, and every bidder must submit the names of two persons of undoubted responsibility, who will be bound with them as security for the faithful completion of contract. The city reserves the privilege of rejecting any and all bids that may not be satisfactory.

Payments will be made monthly in bonds of the city of Philadelphia, or in cash, at the discretion of the Mayor.

Each bid must be accompanied by a certificate from the Law Department that a proper bond, for the sum of five hundred ($500) dollars, has been filed there, in accordance with the ordinance approved May 25, 1860.

The contractor or contractors, in making their proposals, shall do so with the understanding that if their proposal shall be accepted, that every dispute or difference which may arise incident thereto shall be decided by the Chief Engineer and Surveyor, from whose decision there shall be no appeal.

All bidders are invited to be present at the opening of proposals offered on said day, at 3½ o'clock. Plans may be seen and examined at the Department of Surveys, where specifications and blank proposals may be obtained on and after the 16th inst.

STRICKLAND KNEASS,
Chief Engineer and Surveyor.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

RUFUS HATCH'S CIRCULAR, NO. 5.

FRAUDS IN RAILROAD MANAGEMENT, AND THEIR REMEDIES.

Railroads are vested with the right to take private property for public use. This prerogative of Government is granted them in consideration of their public utility, but, as now conducted, they rarely fulfil their beneficent purposes. Labor and skill have removed the obstacles in the way of cheap and easy transit, and yet the farmer gets no profit on his products, nor the merchant or manufacturer on his wares.

In Circulars Nos. 1, 2, 3 and 4, I have endeavored to show where the fault lies.

It will be seen by the following table, condensed from those Circulars, that, of the four trunk railroads connecting this city with the Far West,

The New York Central and Hudson has increased its stock by watering	$57,676,700
The Lake Shore and Michigan Southern has increased its stock by watering	20,065,870
The Chicago and North Western has increased its stock by watering	8,840,510
And its managers have made by profits on construction	12,447,375
And by profits on Land Grants	12,328,792
The Milwaukee and St. Paul has increased its stock by watering	4,760,347
Profits Land Grants	19,105,842
Total	$185,125,486

Here is *one hundred and thirty five millions one hundred and twenty five thousand dollars in excess of the actual cost* of these roads—enough, expended without waste, to build and equip a first class, double track, road—steel rails and iron bridges—from New York to Omaha, and with a line to St. Paul.

The lines I have mentioned in this series of Circulars pass through the wealthiest and most productive sections of this country, from the seaboard to Omaha and St. Paul. All who use them are robbed by the few who own and control them. Nor does the evil stop here. If Commodore Vanderbilt and his imitators can *double* the capital of their respective roads, they can *treble* and *quadruple* it; in fact, there is no limit which they may not pass. Governor Palmer, of Illinois, may well ask, "Is the created greater than the creator." Can private property be seized on the plea of public good, and then, when the benefits promised are about to be realized, shall the purpose for which these roads are supposed to be built and run be totally ignored? Are these Railways, chartered by the States, under the belief that the people are to be the gainers, and the commerce and wealth of the whole country largely and rapidly increased by their construction and operation, to be appropriated by a few rich, shrewd and unprincipled men, and used merely as a means of enriching themselves? Shall the desire of the Vanderbilts to be worth $100,000,000 enable them to ride rough-shod over the interests of the community at large, and treat with ruffianly contempt the just demands of those to whose heretofore quiet submission, under the infliction of a great wrong, they owe their ill-gotten gains?

The time has come when these questions must be answered. Low rates of transportation are now a *necessity* to all classes of the people, and they must be had. Very little wheat is grown within 500 miles of tide-water. The great fields for this staple are constantly moving West, and will soon be 1,500 miles inland. Corn is not raised for export within 1,000 miles of New York.

The great arteries of commerce can no longer be permitted to remain under the control of despots, whose will is law, whose charges have no reference to cost, whose fixed purpose is to get all they can, and who pay themselves an income on property which has cost them nothing with the money filched from those who labor honestly for their bread.

How can the great necessaries of life be transported from the seats of production to the markets, and still leave a fair margin for profit to the producer? The solving of this problem means, for the East, cheap food; for the interior a reasonable profit to labor, and for the whole country, the turning to their proper account of its illimitable resources.

The foreign markets, as well as our own, are to be considered. The prices of breadstuffs in New York are regulated by those in London. The competitors of the Iowa and Minnesota farmers are the wheat growers of Hungary and Russia. The railroads of the two countries named have, within a few years, opened up immense grain growing districts, as productive as our own and much more favorably situated in reference to the foreign markets.

We have nearly lost the monopoly once possessed in our railways, in the construction of which we were far in advance of all other agricultural nations. It is only to be regained by a reduction of the cost of transportation to a point which will enable us, as formerly, to undersell our rivals, and still have a fair margin left for profit.

This matter of freight charges would regulate itself but for the "Vanderbilt System" referred to. There can be no reform while men of such unlimited rapacity, men so lost to what is regarded as fair and honest dealing between man and man, men who never *build* railroads to get a fair return of their outlay, but *buy* them to use as a means of oppression and extortion, control our great avenues of trade. If it is determined that Mr. Vanderbilt, his family and a few chosen friends, are to have four millions annually out of the people of this State, without any equivalent, by all means let a law be passed to that effect, that the burthen may be borne equally and the local interests along the line of the road not be made to suffer exclusively from this unjust exaction. The improvements made in the means of locomotion are daily and hourly lessening the running expenses of our railroads, but this saving

is represented *by an issue of bogus stock*, not a reduction in the cost of transportation.

The tonnage moved last year equalled 150,000,000 tons. In 1851 it did not exceed 5,000,000 tons. This vast increase is the creation of our railways within the past twenty years. The quantity moved shows the primary importance of this subject. If a saving could be effected equal to fifty cents per ton, in the movement of this freight, the gain to the whole country would be $75,000,000 annually. There were raised in the United States the past year 1,000,000,000 bushels of corn, one cent. per bushel saved on this quantity would equal $10,000,000; ten cents per bushel would equal $100,000,000. If ten cents per bushel could be added to the profits, the production of this staple would double in quantity in a few years—doubling the traffic of the railroads and adding largely to the business and wealth of the country.

How much must the rate be reduced to give this profit of ten cents per bushel on corn grown one thousand miles from New York? Only about *three mills per ton per mile*, or one tenth of a mill per bushel per mile! The railroads named could not only reduce their rates on corn three mills per ton per mile, but three times three, and still have abundant margin for profits *upon the honest costs of the road*. It is not necessary to go far for the proof of this. Grain can be shipped by the Baltimore and Ohio Railroad and its connections, from St. Louis to Baltimore, eighteen to twenty cents per bushel cheaper than to New York from St. Louis, by way of Lake Shore and Michigan Southern and Central and Hudson Railroads, and the same road carried first-class freight, the past winter, *fifty cents a hundred pounds cheaper*, from Baltimore to Chicago and St. Louis, than the other two lines charged, from New York to Chicago and St. Louis.

The Baltimore and Ohio road passes for a long distance through and over mountains; its tunnels and grades are numerous, and the latter heavy, and its working expenses necessarily large. It was an object of peculiar aversion during the war, and suffered constantly by the destruction of its track, bridges, rolling stock, &c. Its losses by freshets have been frequent and heavy, and yet it pays an eight per cent. dividend, and shows by its report of 1870, a surplus of $21,375,000 "invested in the various branch and connecting roads, and the great improvements which it has been continuously constructing on the main line." So much for good and honest management.

The exorbitant charges on the principal trunk lines, running from this city West, are daily and hourly driving trade from Manhattan Island and building up the neighboring markets of the seaboard. It is not only the produce flowing from the interior to the sea that this is thus being diverted, but the New York sugar and other manufacturers find themselves unable to compete with those of Boston, Baltimore, Portland and other places, because the latter are, by their facilities for cheaper transportation West, enabled to undersell them.

These railroad frauds and swindles are not exclusively confined to the *old* roads but there are series of *new* lines, started by the merest financial adventurers who build the roads, rob them of their land grants (where they receive any), mortgage them to the extent of twice their cost, and then issue, in addition to this, stock, equal in many instances to the amount of the bonds. In Circular No. 6 I propose to give a list of these new securities and of those who offer them for sale, and, by their flaming advertisements, try to entrap the public into buying them.

The remedy for such wrongs and abuses as these lies in Legislative action. What do Managers living in New York care about the prices that the people pay for the transportation of their products? Nothing, except to get the highest rates. They are absentees and have no interests to be appealed to, nor can they be reached on any ground of public consideration. But the States that gave these corporations their existence can regulate and control their action.

In the words of a petition now being extensively circulated and signed in this State, Railroads are public highways, constructed for public use and the public are entitled to all the benefits resulting therefrom, beyond the adequate compensation due their constructors and operators. Upon this plea were their charters asked for, for this purpose were they authorized, and sound policy will permit no departure from this principle. It certainly will not do to let Railroad Corporations, singly or in combination, usurp the legitimate functions of Government or unjustly oppress the people.

An organized effort to correct these abuses is demanded.

The people should therefore ask their Legislatures to pass laws to regulate the rates of fare and transportation on every railroad operated by steam within the limits of their respective States and make the same as near uniform as may be, and so that the amount collected shall in no instance be more than sufficient to pay an annual dividend of eight per cent. on the actual cost of construction and equipment, after paying operating expenses and reserving sufficient to keep the Road, Depots, Bridges and Rolling Stocks in perfect order, and providing that all in excess of this shall go into the Treasury of the State, for the use and benefit thereof.

Also to pass a law authorizing the appointment of Commissioners to supervise the operations of these roads, to see that they are made safe, and that the laws in regard to them are complied with.

Also that no railroad company or corporation shall hold or possess any property in real estate save as an easement for public use.

Also prohibiting under severe penalties, any officer or employee of such roads from being pecuniarily interested in any business done upon the road wherewith they are connected as officer or employee, save and except where the proceeds of such business goes into the treasury of said road for the mutual benefit of all the stockholders. And to enact such other laws as will cure the evils complained of.

In the matter of through freight, the Federal Government could, and should, interfere, in virtue of the power it possesses to regulate the commerce between the States.

Such action would at once bring the managers of roads to their senses. Instead of spending their whole time in New York, manipulating the market and maturing schemes for bogus issues of stock, they would be found, where they should always be, upon the lines of their respective roads, making their dividends out of savings, out of good management and economies introduced, and of which they themselves would set the example.

The people's representatives cannot refuse to grant protection against the usurpation by individuals of a power to tax and oppress the public for private gain, which even the Federal and State Governments would not dare exercise. We are told by one of our most prominent and widely-known public speakers that we have no legislatures; that our legislators are bought and sold by the railway corporations as mutton is bought and sold in the market, and that the time will soon come when the controllers of the great line which spans this Continent, connecting New York and San Francisco, will have acquired such wealth and influence that Congress will sit merely as a committee to register their decrees.

If the present State Legislatures refuse to grant the relief required and demanded by their constituents, men can and must be found, whose support of the interests they are chosen to protect cannot be "bought off."

The people of the whole country are the sufferers from this infamous monopoly; they have the remedy in their own hands, and should apply it at once.

Railroad Improvements on Long Island.

Several new railroads are now in course of construction on Long Island, and three of them are to be in running order by the Fourth of July. These three lines are—A. T. Stewart's road, a branch road between Winfield and Flushing, and a branch of the Long Island Railroad from Willow Tree to Rockaway. The Flushing and North Shore Railroad Company will construct and operate Mr. Stewart's new road. It is their intention to make an extension to Breslau and Babylon, and also to construct a branch line from Farmingdale to Port Jefferson, on the north side of the island. Every care will be taken in making the new road. Steel rails will be laid on all the curves, and on other parts of the road the rails will be steel capped and joined by fish-plates. The number of through trains each day will be fifteen, and the time from New York to Hempstead by express trains will be fifty minutes. Special trains will also be run every morning and evening for the accommodation of mechanics, and of those who wish to stay late in this city.

The contract for the grading of the new branch of the Long Island Railroad to Rockaway has been awarded, and will now be pushed forward as rapidly as possible. The survey of the proposed extension of the Northport branch of the Long Island Railroad to Port Jefferson is completed, and nearly all the stock has been subscribed. A double track is to be laid during the summer between Hunter's Point and Jamaica, and a double track is now nearly complete between Bushwick and Pearsall's Corner, on the South Side Road. A survey for a proposed extension from Patchogue to Moriches has also been made. Ten new passenger coaches, ten baggage and ten flat cars have lately been added to the rolling stock of the company. During the coming season the company will run hourly trains to Merrick.

The route for the Bay Ridge and Hempstead Plains Railroad has been surveyed, and the grading will soon begin, as the contract for building the road between Valley Stream and Bay Ridge has been concluded, and it is intended to have the road in running order by the end of the year. Right of way through Woodhaven and some

parts of New Lotts has been given to the company.

Ohio and Mississippi R. R.

The directors of the Ohio and Mississippi Railroad met yesterday and decided to carry out the plans in regard to the narrowing of the gauge which they have had for some time in contemplation. To facilitate the execution of what they proposed they accepted the resignation of John Ross, of Vincennes, and Charles Parsons, of St. Louis, and elected to fill their places Daniel Torrence, of New York, and John King, Jr., of Baltimore. The resolutions necessary to the final completion of the work were all unanimously passed. It is expected that the change of gauge will be effected by the 1st of August. A contract for forty new engines, to be built on the 15th of July, has been awarded to the Baldwin Locomotive Works of Philadelphia. Ten of the old engines have already been altered to suit the proposed gauge. Three hundred freight cars are in process of construction, and a large amount of other work is already completed. It is not expected that the injunction granted recently will seriously interfere with the proceedings. We copy the following from the Auditor's report presented at the meeting:—"There has been issued and sold during the year $382,000 of consolidated mortgage bonds and $310,875 of preferred capital stock. The bonded debt of the company is comprised in the following items:—Old bonds of the first and second mortgages, &c., (ultimately to be exchanged for the new consolidated bonds, of which $4,000,000 was reserved for that purpose), amount to $3,672,000, and consolidated bonds amount to $2,862,850, including sterling bonds held in London, making a total of mortgage bonds now outstanding the sum of $6,534,850; this includes the amount appropriated to the construction of the Louisville division. The preferred capital stock, also including the amount appropriated to the Louisville division, amounts to $4,030,000."—*Cincinnati Enquirer*, March 23.

Pennsylvania Railroad.

We gave in our issue of March 11th, the Report of the President of the Pennsylvania Railroad Company. The following is the

GENERAL ACCOUNT.

To capital stock		$33,850,000 00
First mortgage bonds, due 1880	$4,972,000 00	
Second mort. bonds, due 1875	4,866,840 00	
General mort. b'ds, due 1910	15,784,500 00	
Lien of the State upon the Public Works between Philadelphia and Pittsburg, purchased by this Company, bearing 5 per cent. interest, payable in annual instalm'ts of $460,000, applicable first to the interest, and the remainder to principal—original amount of which was $7,500,000	5,924,716 63	
Short bonds or debentures, six per cent., due July 1, 1871	1,109,224 00	
Mortgages & ground rents, at 6 per cent. remaining on real estate purchased	102,809 32	
		32,760,089 95
Bills and accounts payable, including dividends due to stockholders unpaid		4,962,733 83
Contingent fund		1,000,000 00
Balance		524,391 91
		$73,097,215 69

By balance standing on the books of the Company for the construction of the railway between Harrisburg and Pittsburg, including branches to Indiana and Hollidaysburg (in all 276 miles); also for cost of stations, warehouses, shops and shop machinery on the whole road from Philadelphia to Pittsburg		$14,247,968 11
Balance standing on books of the company for the purchase of the Philadelphia and Columbia Railroad		5,375,733 48
Balance standing to the debit of equipment of road, consisting of 629 locomotives, 298 passenger cars, 124 baggage, mail and express cars, 10,226 freight cars, and 1,012 road cars		6,974,191 22
Cost of real estate of company and telegraph line		4,726,419 55
Extension of Pennsylvania Railroad to south bank of the Monongahela and to the Delaware river, including wharves and grain elevator		2,482,594 69
Total amount charged to construction, equipment and real estate accounts for the railroad between Philadelphia and Pittsburg		$33,806,907 00
Other Assets:		
16,595 shares Harrisburg and Lancaster Railroad stock		829,750 00
25,547 shares Connecting Railway stock		1,277,350 00
31,636 shares capital stock of the Philadelphia and Erie Railroad Company, exclusive of 48,000 shares of preferred 8 per cent. stock held by the sinking fund		779,637 26
Stock and bonds upon the line of railway between Pittsburg and Columbus, Ohio, as standing upon the books of the company at this date		6,808,153 88
70,231 shares of capital stock of the Pennsylvania Canal Company		1,101,156 00
Amount of bonds and stock of municipal and other railroad corporations		13,438,740 03
Cost of bonds and stock in the sinking fund, to pay Pennsylvania Railroad second mortgage bonds, and the bonds of the Harrisburg and Lancaster Railroad Company		2,433,433 85
Amount of fuel and materials on hand for repairs to locomotives, cars and maintenance of way, &c., on the Pennsylvania Railroad		1,788,239 19
Amount advanced to pay for fuel and materials on hand for repairs to locomotives and cars, and maintenance of way, &c., for the Philadelphia and Erie Railroad		432,907 14
Amount advanced to operate the Philadelphia and Erie Railroad		255,534 14
Amount of bills and accounts receivable and amount due from other roads		8,568,549 10
Balance in hands of Agents		758,422 29
Balance in hands of Treasurer		818,436 81
		$73,097,215 69

THOS. T. FIRTH, *Treasurer.*

PHILADELPHIA, *December* 31, 1870.

☞ The Oswego (N. Y.) *Gazette* says:—We were shown, a few days ago, by Mr. H. A. Brooks, Clerk of the County, a mortgage of $30,000,000, given by the Erie Railway on their road, and which was left with him for record; $24,000,000 of the money raised on this mortgage is to be applied to the taking up of previous mortgages due or to become due, and the balance of $6,000,000 is to be expended in building a narrow gauge from New York to Buffalo and in equipping the same.

Baltimore and Ohio Railroad.

The following is a comparative statement of the earnings and working expenses of the Main Stem of the Baltimore and Ohio Railroad for the years ending September 30, 1869 and 1870—including the Winchester and Potomac and Washington County Branches from October 1, 1869, and the Winchester and Strasburg Branch from July 1, 1870:

	1869.	1870.
Earnings:		
From passengers	$1,246,919 48	$1,477,392 64
" tonnage	7,477,996 16	6,950,335 52
Total	$8,724,915 74	$8,427,728 16
Working expenses:		
Transportation exp.	$1,505,218 85	$1,610,962 21
General expenses	61,213 84	74,800 47
Losses by accidents	54,862 82	66,514 59
Repairs of railway	1,514,479 26	1,548,695 11
" locomotives	665,742 87	550,086 86
" burden cars	556,088 92	312,498 61
" pass. cars	117,257 40	122,833 90
" stationary machinery	125,478 11	132,257 68
" depots	363,651 43	264,057 10
" water stat'ns	54,320 70	45,015 88
" bridges	279,495 96	221,349 97
" telegraph	9,491 96	6,389 82
Fuel, preparing, etc.	285,598 34	317,802 11
Cleaning engines and cars	82,944 12	89,903 12
Pumping water	14,169 69	20,121 18
Watching cuts, tunnels and bridges	58,739 35	62,578 60
Contingent expenses of machinery department	7,352 84	7,623 29
Total	$5,756,106 46	$5,453,469 00
Net earnings	$2,968,809 28	$2,974,268 16

The ratio of expenses to earnings was in 1869, 65.97, and in 1870, 64.7.

It is shown that the earnings, in comparison with the fiscal year 1869, have decreased $297,187 58, and the working expenses have decreased $302,646 46, making a comparative increase in the net profits of $5,458 88. Compared with the fiscal year 1868, the increase of earnings being $869,083 65, and the increase of working expenses $399,011 27, the increase of net profits amounts to $470,072 38.

During the fiscal year, the sinking fund for the redemption of the city loan increased to $1,277,739 09, showing a gain of $75,940 27.

A dividend of 4 per cent. upon the capital stock was paid on the 30th of October, 1869, and a similar dividend on the 30th of April, 1870. The United States tax thereon was also paid by the Company.

The balance of cash in the Treasury on September 30th, 1870, was $272,279 19, after deducting $124,965 for payment of the interest on the city loan, and on the bonds of the Company, which matured October 1st, 1870.

The liabilities of the Company, compared with the statement of September 30th, 1869, have increased, as follows:

Preferred stock, second series, 6 per cent	$282,500 00
Sterling loan £800,000@$4.84 gold	3,872,000 00
	$4,154,500 00

The entire original mortgage debt incurred for construction and eqpipment was $11,895,166 67.

In addition to the payment of all dividends upon stock, payments have been made from the earnings of the Company in liquidation of the following mortgage indebtedness:

For loan which matured in 1854		$1,000,000 00
For loans which matured in 1856 to 1860, inclusive		566,666 67
For loan which matured in 1867		1,000,000 00
In advance, on account of loan which will mature in 1875		265,250 00
In advance, on account of loan which will mature in 1880		120,500 00
In advance, on account of loan which will mature in 1885		789,500 00
In advance, on account of loan which will mature in 1890	$1,277,379 09	
Less amount reserved of the $5,000,000 lo'n as basis for this sinking fund	500,000 00	
		777,379 09
		$4,519,295 76

The Baltimore and Ohio Company has also advanced from its earnings for the payment of mortgage debts on the Northwestern Virginia, now the Parkersburg Branch Railroad 2,401,500 00

Making an aggregate of payments from the earnings of the Baltimore and Ohio Company, of mortgage debts, of $6,920,795 76

The comprehensive policy of the Company in opening and extending the great lines which have been aided and improved or organized under its auspices, has required large investments of capital. In order to carry out promptly plans of the highest consequence for the promotion of the interests of the City of Baltimore, and the important cities and vast regions with which the system of improvements of the Baltimore and Ohio Company connects, it became desirable to secure capital more rapidly than could be realized from the annual surplus earnings of the Company. The Board, therefore, decided to obtain a loan of £800,000, which was negotiated promptly and successfully in July last, through Messrs. Baring Brothers & Co., in London.

The following investments of capital have been made within a brief period, viz:

In mortgage bonds of the Marietta and Cincinnati Railroad Company, as re-organized	$1,400,000 00
In mortgage bonds of the Pittsburg and Connellsville Railroad Co.	1,000,000 00
In stock in Washington County R.R.	783,280 00
In stock and debt of the Winchester and Strasburg Railroad	596,663 66
In the Metropolitan Branch R. R.	800,671 40
In the Ohio Bridges	1,414,909 70
In Parkersburg Branch for arching tunnels	1,349,518 90
Total	$7,325,043 66

It will be observed that after deducting the entire sum received from the sale of preferred stock and the sterling loan, more than three millions of the amount thus invested were derived from the earnings of the road, in addition to which the increase of equipment, substitution of iron for wooden bridges, of steel for iron rails, the construction of double track, the erection of piers, wharves, and of extensive and costly buildings, to meet the requirements of business at various points, have all been paid from the revenues of the Company.

It will be further noted, that the increased liabilities, for the past year, are $2,766,295 76 less than the aggregate of the amount heretofore paid from the earnings of the Baltimore and Ohio Company, of original mortgage debts, on the Baltimore and Ohio and Parkersburg Branch Roads.

The Profit and Loss Account shows an increase for the past year of $1,013,374 72. It will be seen by this account that the surplus fund, which represents the capital invested in the various branch and connecting roads and the great improvements which have been continuously constructed on the main line, now amounts to $21,375,050 73.

Statement of profit and loss for the years ending September 30:

	1869.	1870.
Balance from previous year	$19,310,662 08	$20,361,676 01
Net earnings	2,968,809 28	2,974,268 16

* Bonds of N. W. Va. R. R. guaranteed by the B. and O. R. R. Co., of which the payment—principal and interest—has been assumed by the B. and O. R. R. Co., under contract of July 18, 1864.

WASHINGTON BRANCH.

Statement of earnings and expenses for the years ending September 30:

Earnings:	1869.	1870.
Passengers	$329,797 22	$303,724 10
Tonnage	86,126 83	78,090 36
Total	$415,924 05	$381,814 46
Expenses:		
Repairs of road	$124,825 06	$170,518 64
" depots	9,285 71	9,396 11
" water stations	849 34	2,138 28
" bridges	273 09	15,036 71
Pumping water	3,182 60	2,038 45
Total	$138,415 80	$199,128 19
Net earnings	$277,508 25	$182,686 27

The earnings of 1869–'70 show a decrease, as compared with the previous year, of $34,109 59; the expenditures charged are $60,712 39 more—making a decreased gain of $94,821 98.

A dividend of five per cent. was paid on the 16th of October, 1869, and a similar dividend on the 16th of April, 1870.

Large expenditures have been made to maintain and improve the tracks. Nineteen hundred and twenty-one tons of new—including eighty-six tons of steel—rails, and 47,937 cross ties, have been used. Substantial arches of first class masonry have been constructed at Dorsey's and Muddy Runs. New passenger houses have been erected at Jessup's Cut and at Sunny Side stations.

Statement of profit and loss for the years ending September 30:

	1869.	1870.
Balance from prev. yr.	$335,732 76	$357,660 64
Net earnings	277,508 25	182,686 27
Total	$613,241 01	$540,346 91
Dividends on stock	$165,000 00	$165,000 00
Internal revenue tax (including State tax on passeng'r ain 1869)	85,330 37	15,487 75
On account of annuity.	1,000 00	1,000 00
Payments for lands in Washington	4,250 00	2,875 00
Balance carried to next year.	357,660 64	355,984 16
Total	$613,241 01	$540,346 91

Statement of the liabilities and assets of the Washington Branch, Sept. 30:

Liabilities:	1869.	1870.
Stock	$1,650,000 00	$1,650,000 00
Annuity (principal).	20,000 00	20,000 00
Profit and loss	357,660 64	355,984 16
	$2,027,660 64	$2,025,984 16
Assets:		
Road, real estate, etc.	$1,650,000 00	$1,650,000 00
Amount due by B. & O. R. R. Co.	377,660 64	375,984 16

PARKERSBURG BRANCH RAILROAD.

The following is a comparative statement of the earnings and expenses for the years ending September 30:

Earnings:	1869.	1870.
Passengers	$101,145 34	$119,308 04
Tonnage	434,887 91	442,581 95
Total	$536,033 25	$561,884 99
Expenses:		
Transportation	$123,611 64	$130,729 25
Repairs of road	389,263 59	375,667 12
" water stations.	5,687 83	4,415 51
" telegraph	1,053 86	1,090 87
" stationary machinery	3,126 64	2,756 28
" locomotives	53,453 05	52,169 19
" burden cars	21,350 21	15,177 14
" passenger cars	6,737 93	5,439 05
" bridges	28,941 64	8,065 95
" depots	15,163 13	12,942 33
Pumping water	3,223 23	2,884 41
Losses by accidents, etc	1,572 36	1,223 33
Fuel, preparing, etc	33,789 71	36,075 25
General expenses	1,368 02	2,891 71
Cleaning engines & cars	5,520 21	2,948 85
Contingent expenses	727 24	29 61
Internal revenue taxes.		3,274 56
Total	$694,605 34	$661,780 41
Deficit	$158,572 09	$99,895 42

It will be seen that the earnings were $25,851 74 more than in 1869, while the expenses decreased $32,834 93—showing a better result compared with that year, of $58,676 67.

The aggregate earnings of the Main Stem, (including the Winchester and Potomac and Washington County Branches, and the Winchester and Strasburg Branch from July 1, 1870,) and of the Washington Branch and Parkersburg Branch, for the years ending September 30, 1869 and 1870, were as follows:

	1869.	1870.
Main Stem	$8,724,915 74	$8,427,728 16
Washington Branch.	416,924 05	381,814 46
Parkersburg Branch.	536,033 25	561,884 99
Totals	$9,676,873 04	$9,371,427 61

The aggregate expenses of operating and repairs were as follows:

	1869.	1870.
Main Stem	$5,756,106 46	$5,453,460 00
Washington Branch.	138,415 80	199,128 19
Parkersburg Branch.	694,605 34	661,780 41
Totals	$6,589,127 60	$6,314,368 60

And the aggregate net earnings, after deducting the cost of operating and repairs, as follows:

	1869.	1870.
Main Stem	$2,968,809 28	$2,974,268 16
Washington Branch.	277,508 25	182,686 27
Parkersburg Branch.	*158,572 09	*99,895 42
Totals	$3,087,745 44	$3,057,059 01

* Deficit.

Showing an aggregate decrease compared with the preceding year of $30,686 43.

The earnings of the Central Ohio Division for the fiscal year were $842,435 99; the expenses, $774,112 69—and the net earnings, $68,323 30.

The earnings of the Lake Erie Division from July 1, 1869 to Sept. 30, 1870, were $626,506 88; the expenses, $419,152 49—and the net earnings, $207,354 39.

The gross revenue of the Main Stem and Branches, including the Central Ohio and Lake Divisions, is thus shown to be $10,840,370 48; the expenses, $7,507,633 78—and the net earnings, $3,332,736 70.

During the year, 315,522 new cross ties, 9,554 tons re-rolled iron rails, and 4,329 tons steel rails were used in repairing the tracks on the Main Stem; 47,937 cross ties, 1,885 tons of iron rails, and 86 tons of steel rails on the Washington Branch; 40,465 cross ties, and 2,553 tons of new rails on the Parkersburg Branch; 2,274 tons re. rolled rails on the Central Ohio division; and 100 tons new, and 693 tons re-rolled rails on the Lake Erie division.

The locomotive equipment of the Main Stem and Branches at the close of the fiscal year 1869 consisted of 315 engines; to which there were added in 1870, 9—making a total of 324; of these, 62 were passenger, and 262 tonnage; 277 were 1st class, 38 2d class, and 9 3d class. On the Central Ohio division, there are 30 engines, and on the Lake Erie division, 9—making a total of 363.

The number of cars in service at the close of the fiscal year 1869 was 5,338; to which there were added in 1870 299—making the total at the close of that year, 5,637; of which 164 were passenger, 27 baggage, mail, etc., 1 pay, 1 post office, 1 officers', and 5,438 tonnage, stock and coal cars.

The mileage of engines in 1869 and 1870 was as follows:

	1869.	1870.
Main Stem	$6,640,721	$6,749,834
Washington Branch	418,895	429,686
Parkersburg Branch.	691,644	761,854
Total	$7,751,260	$7,941,374

No returns are given of the number of passengers carried. The through tonnage, which amounted in 1869 to 199,873 tons, was in 1870, 286,835 tons—showing an increase of 86,962 tons.

The aggregate quantity of coal transported on the main stem in 1869 was 1,357,990; and in 1870, 1,219,638 tons—showing a decrease of 138,852 tons.

The tonnage of live stock in 1869 was 51,702; and in 1870, 54,604—increase, 2,902.

The quantity of lumber brought to Baltimore in 1869 was 32,002 tons; and in 1870, 30,248 tons—decrease, 1,744 tons.

The quantity of flour brought to Baltimore in 1869 was 630,049 barrels; in 1870, 940,390 barrels—an increase of 310,341 barrels.

In July last, the Winchester and Strasburg road was completed. This road forms the extension of the Winchester and Potomac road from Winchester, nineteen miles to Strasburg, in Virginia. It there connects with the Orange, Alexandria and Manassas road, and thus opens the line through to Harrisonburg, 102 miles from Harper's Ferry. This line is destined to connect with the projected Valley road, which is to be a part of the great interior route, passing through most fertile and extensive regions, and which promises to become ultimately the Great Trunk Line from Baltimore to New Orleans. The Baltimore and Ohio Company has invested in the Winchester and Strasburg Company, by subscription to its stock and advances, $596,663 66. A contract has been made with that Company for the lease of its road.

Lands of the Far West.

We desire to call attention to the advertisement of the LAND GRANT BONDS of the Union Pacific Railroad Company, in another column of our paper. These securities have a certain and absolute value in the provisions made for the payment of interest and their ultimate redemption. There is a feeling amounting to assured confidence, among capitalists, that these bonds will very soon reach 90—as there is certainly no reason in the world why they should not. They pay a certain annual interest of *eight per cent.* on that valuation, and the company is obliged to buy them in at maturity at whatever rates the holders may be able to rule. A recent example has been had, in the case of the Hannibal and St. Joseph Railroad Land Bonds, after which the Union Pacific's were identically framed, where the aforesaid company had to pay as high as one hundred and sixteen before they could reach and retire their bonds. There certainly can be no reason why these should not and will not rule as high, as they approach their maturity. The generous donations, and legislative enactments of the government, and the hold this great enterprise has in the affections of the American people, are all additional guaranties of the value and stability of their securities. The manner, too, in which the individual managers of this great national work have repeatedly pledged their own private fortunes, to sustain its credit and promote its welfare, is a conspicuous evidence of the undoubting confidence of those who best know all the details of its affairs. The evidence furnished by the Government, from its official records, showing a saving of a *quarter of a million per month* to the National Treasury, proves its value to the whole tax paying people of the country, and its *necessity*, as a bond of mutual interest and commercial necessity, uniting the extremest limits of this vast continent. While every known security has its periods of fluctuations in the market, we confidently believe that there will be a uniform and steady appreciation of these securities, and therefore those who are induced to purchase at the present time can hardly fail of securing a safe and profitable investment.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, April 1, 1871.

Stock Exchange and Money Market.

There has been a less urgent inquiry reported for Money for all business purposes since our last, and the offerings have been unusually liberal for the season, which circumstances have had the effect of checking the upward tendency of rates. Call loans have been quoted at 4@6, generally 4@5; and the best grades of mercantile paper in the discount line at 6@7 per cent. per annum. At these figures the wants of all responsible borrowers have been promptly provided for by the banks and by private lenders. The uncertainty as to the April programme of the Treasury Department, relative to the sales of Gold and purchases of Bonds in that month, has tended to disturb confidence in values to some extent, and the various rumors from Washington in reference to the same general subject have served to increase the uneasiness. But, on the whole, the Money market has worked advantageously for the borrowing interests. The city banks, in their last weekly statement, exhibited a reduction of $5,171,341 in their deposit line, $3,046,738 in their special reserve, and $430,237 in their legal tender average. They contracted their loans $1,462,084, and their circulation $21,817. The banks now hold $10,470,990 of specie and legal tender notes, in excess of the 25 per cent. of their liabilities required by the national banking act. The U. S. Sub Treasury at this port, last week, reduced its currency reserve, $642,403, and increased its coin balance $627,236. The receipts of the office were $4,764,316, in coin, and $3,854,434 in currency; payments $4,137,080 in coin, and $4,496,637 in currency. The office received $4,105,000 in coin or its equivalent, from customs; and disbursed $258,712 of coin interest.

The specie reserve of the city banks according to the latest return is $12,617,007, against $32,271,252 same time last year. The city bank deposits are now $225,774,302, against $208,910,713 week ending March 26 1870. The legal tender reserve amounts to $55,193,408, against $52,685,063 same time last year. The circulation now stands at $21,583,398, against $33,674,394 same time last year. The loans are now $291,114,320, against $270,807,768 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $94,027,381 a day, against a daily average of $98,280,959 the preceding week. The current week's exchanges average about 105½ millions a day. The city banks, last week reported a loss of $3,046,738 of specie, a gain of $5,171,341 of deposits, and $430,237 of legal tender notes. They reduced their loans $1,462,084; and their circulation, $21,817.

National Bank notes to the amount of $1,540,950 were issued last week by the Treasury Department. Deducting from the grand total issue to 1800 banks the currency returned, including worn out notes, amounting to $40,270,582, the existing 1,653 banks, (with an aggregate capital of $435,356,084,) retain an actual circulation of $312,388,551. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $354,164,000; and for the public deposits, $15,723,500—making a total of $369,887,500. The Treasury Department last week redeemed and destroyed $709,762 of worn and mutilated fractional currency, and issued $391,941 of new.

The coin reserve of the Treasury Department on Monday morning was $104,490,000, including $27,357,000 represented by outstanding coin certificates; and the currency balance was $13,770,000.

The U. S. Sub-Treasury, on Thursday morning of this week, held a balance of $9,728,063 in currency, and $66,853,569 in coin against a balance a week previous of $6,718,022 currency, and $67,089,899 coin.

The U. S. Sub-Treasurer retired, last week, $3,630,959 of coin certificates, received for customs.

Government revenues were unusually liberal in the line of customs, last week, though moderate in that of excises. The Excises yielded about two millions. The customs at the port of New York, last week were $4,040,959; and at the outports, equal to about 1¼ millions more, all in coin, or coin certificates. The internal revenue yield thus far in the current fiscal year beginning with July 1, 1870, has been about 109¾ millions.

Gold has been offered with much more freedom, largely on speculative account, and the price has fallen from 111 to 110⅛, closing on Wednesday of this week at 110⅜ against 111 the preceding

Wednesday. The increasing rate of subscription to the new Funding Loan, and the anticipation that the Treasury Department would add largely to its sales of Gold, and its purchases of Bonds, in April, have operated against a firm market. The selling interest has been the dominent one at the Gold Exchange. The dealings have been on a more extensive scale, particularly through the latter half of the week. Monday's business was quite heavy, as reflected by the exchanges of Tuesday noon, which reached nearly 71 millions. The customs demand was unusually active, and the export drain was up to a full average. The shipments last week, were $1,531,579; and on Wednesday and Thursday of this week, about $300,000.

The customs at this port on Wednesday were $567,000.

The Gold Exchange Bank clearances on Friday of last week were $17,370,000; on Tuesday of this week $70,801,000, the extremes since our last. On Wednesday they amounted to 59¾ millions.

The export drain was $1,531,579 last week, against $118,091, same week preceding year. The shipments since July 1, 1870, have been $54,571,450, against $23,031,920 same time in 1869–'70.

The customs demand for Gold last week, averaged $684,166 a day; thus far, this week, it has averaged $585,000 a day, or equal to a weekly aggregate of $3,510,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $20,772, and since Jan. 1, 1871, $2,748,378, against $3,931,818 same time in 1870. The total customs revenue of the Government, in coin, at this port, since July 1, 1870, has been $108,434,875, against $97,032,495 same time in 1869–'70.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt since July 1, 1870. $66,262,858 against $66,665,828 same time in 1869–'70.

Foreign Exchange has been in fair demand and rates have been generally well supported. Bankers' sixty day bills on London closed on Wednesday at 109¾@109⅞; sight bills on London, 110⅜@110½.

The produce exports from this port, week ending with March 28th, were to the currency value of $4,441,092.

Government securities have been depressed in price since our last, the offerings having been more liberal, while the demand has been quite limited. The uncertainty as to the April business of the Department has been against buoyancy in values. Some speculative efforts to weaken prices have been reported, but have not been very manifest. The latest dealings on Wednesday showed a rather firmer market. The subscriptions to the new refunding Five per cent. Loan, thus far reported, amount to about 45 millions. Wednesday's subscriptions included a round million from Messrs. Fish & Hatch.

On Wednesday, Government bought in two millions of Five-Twenties at 108 80@109 27, ex-interest. The amount of bonds offered was only $2,539,000.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115⅜@115⅞; U. S. Five-Twenties of 1862, 112@112⅛; U. S. Five-Twenties of 1864 at 111⅜@111¾; U. S. Five-Twenties of 1865, 111⅜@112¾; U. S. Five-twenties of 1865 consolidated, 110⅛@110¾; U. S. Five-Twenties of 1867, 110⅛@110¾; U. S. Five-twenties of 1868, 110⅝@110⅞; U. S. Ten-forties at 108@108⅛; U. S. Six per cent. currency bonds, 114⅜@114½.

State bonds have been in moderate request at less buoyant prices.

Railway bonds have been selling to a fair extent at about steady prices. Central Pacific Sixes have been in demand, closing at 95⅛@95¼. The Chesapeake and Ohio R. R. First Mortgage six per cent. gold bonds at 90 per cent. and accrued interest. Union Pacific Sixes closed at 83¼@83⅜.

Railway and miscellaneous share property has been unusually active, and generally quite buoyant in price, closing somewhat irregularly, under sales to realize profits. Union Pacific stock closed at 26½@26⅝; Ohio and Mississippi at 47¼@47⅜. Western Union Telegraph at 57⅛@57⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	March 15.	March 22.	March 29.
Consols	91⅞	92¼	93
U.S. 5-20's of 1862	92⅛	92⅜	92 5/16
U. S. 5-20s, 1865	91⅜	91⅝	91⅞
" 1867	90 3/16	90¾	91 5/16
" 10-40s	88¾	89	89
Erie	18⅛	18⅛	19
Ill. Central	110½	110½	110½
Al. and Gt. West.	30½	35	38

In general business, there has been a fair show of activity in the leading lines, with, as a rule, rather more firmness in values. Middling upland cotton closed buoyantly on Wednesday at 15¾ cts. per lb. The receipts at all the ports, since Sept. 1, have been 3,242,894 bales, against 2,821,345 bales same time last year; exports 2,162,023 bales, against 1,494,024 bales same time last year; stock at the ports, at latest dates, 658,328 bales, against 443,744 bales same date 1870.

At the Live Stock markets, Beeves have been in fair demand at 11@16c. Veal Calves at 9@12½c; Sheep, at 8½@9c., and Swine, at 7¾@8¼c. per lb., all live weight. Milch cows, quiet at $40@$100, each. The week's receipts were 5,852 Beeves, 100 Cows, 1,756 Veal Calves, 24,913 Sheep and Lambs, and 13,816 Hogs.

Ocean freights have been moderately active and rates have been quoted firmer. For Liverpool, cotton at ¼@⅜d. by sail and 5/16@⅜d. by steam, per lb.; flour at 2s. @2s. 3d. by sail, and 2s. 6d.@2s. 9d. by steam, per bbl.; grain at 5½d. by sail, and 6¼d. by steam. per bushel; and heavy goods at 15s.@27s. 6d. by sail, and 25s.@40s. by steam, per ton.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ ELIZABETHTOWN AND PADUCAH RAILROAD.—The well known Bankers, Messrs. NORTON, SLAUGHTER & CO., of 41 Broad Street, Messrs. WM. ALEXANDER SMITH & CO., of 40 Wall Street, and Messrs. HALLGARTEN & CO., of No. 28 Broad Street, New York, recommend, after a thorough investigation into the affairs of the Company, THE EIGHT PER CENT. FIRST MORTGAGE BONDS OF THE ELIZABETHTOWN AND PADUCAH RAILROAD COMPANY of Kentucky, as a very safe and desirable investment. They are only authorized to offer a limited amount of these securities at 87½ and accrued interest. The Bonds offered are on the completed portion of the Road, which is now in successful operation.

TREASURY DEPARTMENT,
STATE OF ARKANSAS,
LITTLE ROCK, March 1, 1871.

The Semi-annual Interest, due April 1, 1871, on Arkansas State Seven per cent. bonds, will be paid on and after that date, at the Union Trust Company, No. 73 Broadway, New York.

HENRY PAGE, State Treasurer.

Leonard, Sheldon & Foster.

The attention of our readers is called to the advertisement of Messrs. LEONARD, SHELDON & FOSTER, which will be found on last page of this paper. The members of this well known Banking house are: W. B. Leonard, (late Leonard, Rhoades & Grosvenor,) W. C. Sheldon, (late Buckly, Sheldon & Co.,) and W. H. Foster, (late acting Vice President of Central National Bank, and formerly Bank of Commerce, Boston.) They buy and sell Government and State Securities, Stocks, Bonds and Gold upon commission. They also negotiate special Loans and Commercial Paper. Checks upon their house are collected through Clearing House as upon National and State Banks. Circular Letters of Credit furnished to travellers through this house, available in all the principle cities of Europe.

Messrs. Miller & Smith.

We desire to call attention to the advertisement, on page 370, of Messrs. PHILIP S. MILLER and LENOX SMITH, who have formed a co partnership for the sale of railroad iron. These gentlemen are both experts in iron, and as men of honor and integrity we take pleasure in recommending them to railway men desirous of obtaining good material.

Important Shipments.

J. A. Cottingham, of 104 West Street, this city, has just been awarded contracts for the transportation of 5,000 tons steel rails from this city to Bridgeport and New Haven, Connecticut, for the New York and New Harven, Hartford and New Haven, Naugatuck, and Shore Line Railroads. Mr. Cottingham makes the shipments of Railroad Iron, Locomotives and Cars a specialty, and has had nearly twenty years' experience in the business. One of the Barges he employs, the "James Cottingham," cost $16,000, and was built expressly for the transportation of Cars and Engines. His shipments for other Roads and Companies this Spring will amount to over 30,000 tons. He has transported all the Locomotives built by the Rogers Locomotive Works for the Union Pacific Railroad; all the Cars, Engines and Railroad Iron for the South Side Railroad of Long Island; and over one thousand Locomotives and ten thousand Cars without loss; and has also, during the past five years, shipped over one hundred thousand tons of other heavy freight, mostly Rails. Being pretty well acquainted with the character of most every kind of craft afloat suitable for shipments of Rails, he selects the very best vessels that can be procured, and by so doing has avoided losses of any account. We doubt if there are many men in any such or similar business that have been so successful—at all events the contracts received from such companies as those aforementioned gives him the reputation of being one of the best shippers of those materials in this city.

☞ E. W. Woodward, Esq., has been elected President of the Indianapolis and St. Louis Railroad Co. The line from Indianapolis to St. Louis will continue to be operated independently under his management in the joint interest of the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company, and the Pennsylvania Railroad Company, who equally own and control it.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH, BANKERS,
No. 5 NASSAU STREET,
NEW YORK, March 27, 1871.

THE FIRST MORTGAGE SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY—of which about $6,000,000 have already been marketed—are secured upon an East and West Trunk Line of Road, 427 miles in length, the greater part of which (227 miles) is in earning operation, and the remainder rapidly building. When completed it will establish a short, economical and favorite route between tide water navigation and the chief railroad and river cities of the West.

Besides the immense volume of through traffic between the East and West which this Road can command by its unapproachable advantages in distance, grades, fuel and unfailing navigable connections, this road must convey enormous quantities of the superior smelting, cannel and bituminous coals of the Kanawha Valley, and the iron ores of Virginia and West Virginia, which are in demand at both ends of the line.

The value of the property, the certainty of a large and profitable business, the established reputation and credit of the Company, and its able and honorable management, give to these securities an assurance of superior value and safety.

They may be had in *Coupon* or *Registered* form, and in denominations of

$1,000, $500, and $100.

We have prepared pamphlets showing the agricultural, mineral and manufacturing advantages of the adjacent territory, and the traffic facilities and financial prospects of the Road, which will be furnished on application.

FISK & HATCH, Financial Agents.

☞ TEXAS PACIFIC RAILROAD COMPANY.—Notice is hereby given, that, pursuant to the Act of Congress, entitled "An Act to Incorporate the Texas Pacific Railroad Company, and to aid in the Construction of its Road, and for orther purposes," approved March 1, 1871, the persons named in the first section of said Act, who are by said Act constituted a Board of Commissioners, known as the Texas Pacific Railroad Commissioners, will meet at the Office of the Southern Transcontinental Railroad Company, on the north-east corner of Warren and West-sts., in the City of New York, on the 15th day of April, 1871, at 12 o'clock, noon, of that day, for the purpose of opening Books of Subscription to the Capital Stock of the said Texas Pacific Railroad Company, of receiving Subscriptions to said Stock, and electing a Treasurer in pursuance of the said Act.—Dated New York, March 27, 1871. J. C. Fremont, Marshall O. Roberts, Henry D. Cooke, John W. Forney, E. L. Fancher, Luther R. Marsh, Richard C. Parsons.

☞ The Mississippi and Missouri Air Line Railroad, which was lately completed from West Quincy north to La Grange, has been consolidated with the Mississippi Valley and Western Railway—the last mentioned name being the title of the consolidated company. The roads will connect at or near Alexandria, Mo., nearly opposite Warsaw, Ill., and probably continue northwest, and west through the southern tier counties of Iowa.

Journal of Railroad Law.

RAILROAD COMPANIES—VALIDITY OF MORTGAGE BINDING SUBSEQUENT ACQUIRED PROPERTY—VENDOR'S LIEN NOT ENFORCEABLE AS AGAINST SUCH MORTGAGE.

The facts in the recent case of Pierce *vs.* The Milwaukee and St. Paul Railroad Company and others, (24 Wis., 551,) are fully stated in the following opinion by

COLE, J.—By its charter, the Milwaukee and Horicon Railway Company was expressly authorized to borrow money, and to make and execute in its corporate name all necessary writings, notes, bonds and other papers, and also to execute and deliver "such securities, in amount and kind," as might be deemed expedient to secure such loans. Sec. 21, chap. 450, Laws of 1852. It therefore had full power to make and deliver the mortgage to Lowry, bearing date April 1, 1856. By that instrument the company mortgaged all its road, from the junction thereof with the La Crosse road, in or near the village of Horicon, to a point in or near the village of Berlin, being about forty-two miles of road, "including the right of way and land occupied by said road, together with the superstructure and tracks thereon, and all rails and other materials used thereon, bridges, viaducts, culverts, fences, equipments, necessary depot grounds and buildings thereon," belonging to the mortgagor, with the rolling stock and personal property appertaining to that line of road then belonging to the company or thereafter to be acquired, "and all future right thereto" and interest therein to be acquired by the corporation, together with the name and functions appertaining to the road with its corporate rights and franchises. The mortgage then, in express terms, covered the franchises and property, real and personal, belonging to the company, April 1, 1856, and also all future acquired real and personal property for that portion of its road; and this mortgage was executed by direct legislative authority conferred upon the corporation in its charter. In the mortgage, the company among other things, covenanted "to execute and deliver any further reasonable and necessary conveyance or conveyances of the premises, or any part thereof, to the said party of the second part," "for more fully carrying into effect" the trusts created, "particularly for the conveyance of any rights, interest or property subsequently to the date hereof acquired by the said parties of the first part, and comprehended, or intended so to be, in the description or terms of this instrument."

Now it appears that the plaintiff and wife, in June, 1856, sold and conveyed to the Milwaukee and Horicon Railroad Company the premises mentioned in the pleadings, and upon which a vendor's lien for the purchase money is sought to be enforced. It is difficult to see upon what principle the action can be maintained.

It is apparent that the Lowry mortgage purported to include the right of way across the plaintiff's land, which was the subject matter of the conveyance from him to the Company. It is true, the title to those premises was not in the Company when the mortgage was executed; but it is perfectly clear that it was the intention of the parties that the mortgage should become a lien upon any right or interest in real estate subsequently acquired for right of way, or necessary or the use of the road. It is insisted in the brief of the counsel for the plaintiff that the instrument did not purport to mortgage future acquired realty; but a bare reference to the clauses which have been cited will show that this is inadmissible. It obviously purports to convey as well the real and personal property belonging to the company, at the time of the execution of the mortgage, and therein described as all real and personal property subsequently acquired for the use of the road. The language employed is not fairly susceptible of any other construction. And this being so, it is very manifest that when the company subsequently acquired an interest in these premises, from that moment the mortgage became a lien and charge upon them. Farmers' Loan and Trust Company *vs.* Fisher et al, 17 Wis., 114. And there is still a stronger reason for holding in this case that any after acquired interest in real estate for the use of the track would inure to the benefit of the mortgagee, and become vested in him, in view of the fact that the mortgage contains the covenant for further assurance above quoted. Could it with any justice be claimed that the Milwaukee and Horicon Railroad Company, after executing the mortgage with this covenant, might assert its title to the premises in question? It seems to us not, but that the company would be clearly estopped from saying that the mortgage did not become a lien upon the premises. The Lowry mortgage has been foreclosed in an action to which the Milwaukee and Horicon Railroad Company was made a party defendant. A foreclosure sale was had of all the property, corporate rights and franchises embraced in the mortgage. It appears that Hunt and Sage purchased the property at the foreclosure sale, and have conveyed it, without notice of any equities of the plaintiff in the premises to the defendant company. Now we suppose the purchaser at the foreclosure sale obtained whatever interest the Milwaukee and Horicon Railroad Company had in the premises, as well as the rights and interest of the mortgagee under the mortgage, whatever they were. Such was the necessary effect of the foreclosure. And that it would be a violation of all principle to permit the plaintiff, after the foreclosure sale and at this late day, to enforce a vendor's lien for the consideration named in the deed given in June, 1856, really seems to us too plain for argument.

We think the Judgment of the Circuit Court must be reversed, and the cause remanded with directions to dismiss the complaint.

Judgment reversed.

☞ The Portland and Rochester Railroad Company has contracted with George F. Hitchings of Portland, to distribute the sleepers, ballast the road and lay the sleepers from Springvale and Rochester. It is said that the road will be in good running order by the middle of June through its entire length.

☞ Forty miles of the Portland and Ogdensburg Railroad have already been completed in Maine. Portland has so far loaned its credit to this enterprise to the amount of $750,000. Little but surveying has been done upon this line in New Hampshire.

☞ Mr. Munson, the contractor of the Montpelier and Wells River, Vt., Railroad has filed his bond of $200,000 for its completion.

Quincy Mining Company.

The directors submit the following report of the business of the mine for the past year, and statement of the financial condition of the Company:

The shipment of the season was 2,952,742 pounds of mineral, which has been smelted at Detroit, and yielded 84 55-100 per cent., or 2,496,774 pounds of ingot copper. The product of the mine for the year, as prepared for shipment, was 3,045,676 pounds, or nearly 1,523 tons of mineral, for which, estimating only the product of December, left over at the mine at 20c. per pound, has been realized the gross sum of $537,452 48; realized from sale of silver $717 75, making the gross earnings $538,170 23.

The expense of the year are as follows:—Running expenses at mine, $315 896 58; building and construction account, $4,040 89; other expenses as per treasurer's balance-sheet, $63,272 20; total cost $382,709 67, which, deducted from gross earnings, $538,170 23, leaves as profit $155,460 56. There has also been realized during the year, from interest on loans $2,169 76, giving, as net results of year's business, $157,630 32. The statement of assets and liabilities in our last report showed a balance of assets on hand, as of date Jan. 1, 1870, of $305,903 11; earnings of 1870, $157,630 32, making $463,533 43; deduct dividend paid March 10, 1870, $120,000, making balance of assets on Jan. 1, 1871, $343,533 43. "There are also, in addition, the special reserve fund of $50,000, set apart as heretofore reported, for the endowment of an insurance and repairs account, and fully secured by mineral, mining supplies and materials, worth to the company at least twice that amount."

The necessity of continuing during this winter the regular openings on the main vein, which had been discontinued around No. 4 shaft was apparent, and, on the uncertainty of how much outlay for dead work would have to be incurred, and of how much productive ground might be opened, your directors decided to divide from the earnings of the year the sum of $80,000 or $4 per share, which was paid Feb. 6, reserving a portion until the regular mining work should develop the prospect for the product of the coming season. The work is progressing very favorably, and unless something unforeseen should occur, it may now be expected that a further dividend will be made in August next.

Atlantic and Pacific R. R.

The bonds and stock of the Atlantic and Pacific Railroad Company have been admitted to official dealings at the New York Stock Exchange on the following report of the Governing Committee:

The Atlantic and Pacific Railroad Company was organized under an act of Congress of the United States, approved July 27, 1866. Length of road two hundred and ninety two miles. From the town of Pacific (thirty-seven miles distant west from St. Louis), to Seneca, on the western boundary of the State of Missouri, approved March 17, 1868, and was consolidated with the Atlantic and Pacific Railroad Company on the 25th October, 1870. The South Pacific Railroad Company issued the following, which have been assumed by the Atlantic and Pacific Railroad Company:

First mortgage six per cent. bonds, secured by mortgage on the whole road. Interest payable in gold coin semi-annually January 1 and July 1. Principal and interest payable in New York city. Dated July 1, 1868; mature July 1, 1888, $7,250,000. Of the above mentioned bonds there are 5,000 of $1,000 each, numbered from 1 to 5,000 inclusive, and 4 500 of $500 each, numbered from 5,000 to 9,500 inclusive. Trustees: George Tyler Bigelow, John James Dixwell.

The Atlantic and Pacific Railroad Company have issued the following, which were guaranteed by the South Pacific Railroad Company be-

fore it was absorbed by the Atlantic and Pacific:

Six per cent. bonds, secured by mortgage on 500,000 acres of land in Missouri. Interest payable in gold coin semi-annually, January 1 and July 1. Principal and interest payable in New York city. Dated July 1, 1868; mature July 1. 1888, $3,000,000. Of which there are 2,000 of $1,000 each, numbered from 1 to 2,000 inclusive, and 2,000 of $500 each, numbered from 2,001 to 4,000 inclusive.

The South Pacific Railroad Company received a grant of lands in Missouri under an act of Congress, passed June 10, 1852 (when the lands were withdrawn from sale for the purpose of constructing the road), of more than one million of acres. Under the Atlantic and Pacific Railroad Company's charter about five hundred thousand acres have already been received and secured by the Company, viz: 480,000 acres in Missouri and about 20,000 acres in Arkansas. The receipts from the sales of lands are applicable, first, to providing what is necessary to pay the interest on the bonded debt, and the balance is appropriated to paying off the bonds at a price not exceeding 110 per cent. The capital stock is as follows:

100,000 shares of "Preferred Stock on the Division of the Road in Missouri," at $100 each	$10,000,000
50,000 shares, Common Stock, at $100 each	5,000,000
Total Capital (and $10,250,000 of Bonds)	$25,250,000

All the "stock" has been issued.

Boston and Maine Railroad.

A special meeting of the stockholders of this road was held in Boston on the 16th ult., the President Hon. Francis Cogswell, in the chair. After an explanation by the President a vote was passed accepting the "Act for the extension of the Boston and Maine Railroad," approved by the Governor of Maine February 17, 1871, declaring that the road should be forthwith constructed, and authorizing the Directors to begin and complete the work at the earliest date consistent with economy.

This action has become necessary by the inability of the Boston and Maine road to renew an arrangement with the Portland, Saco and Portsmouth Railroad, so that they could use their tracks from South Berwick Junction to Portland. The vote showed 10,524 shares represented, of which 10,405 were in favor of the act. The Directors were instructed to issue stock instead of bonds.

Baltimore and Potomac Railroad.

The Baltimore and Potomac Railroad is rapidly advancing towards completion. About two weeks more of work remains to be done on the road through Prince George's, when that portion will be in readiness to receive the ties and rails, which have already been contracted for and which are now being delivered at Annapolis. The work of grading was commenced in Charles county last November, and is now more than half finished. The grading on the Washington Branch has been pushed forward to the outskirts of that city, and a pile bridge is being built across the Eastern Branch. The company will proceed to lay the track immediately on so much of the road as is prepared to receive it. The rails will be laid upon the Main Stem and the Washington Branch at the same time. The most vexatious delays in the construction of the road have been occasioned by the land suits in which the company has been engaged from time to time, and the tardiness of some of the judges, who have, in some instances, failed to render judgments for months after the cases were submitted to them.

Unless something unforeseen occurs (or more delay is created by the land suits on hand at present, which is not anticipated,) the public may confidently look for the opening of the road to travel in the fall. Thus another artery will be opened through which trade will pour into Baltimore. Another through route will be established, by means of which Baltimore will be placed in communication with all the Southern and Western markets, and a rival road will have been completed between this city and Washington, leading to a diminution of the high tariff now levied by the Baltimore and Ohio Railroad on its Washington Branch. Some time will yet elapse before the road is in running order along the entire route. The magnitude of the tunneling which has been imposed upon the road through Baltimore will cause delay, and a depot will be established on the outskirts of the city for the accommodation of the trade which is expected to be attracted here by its partial opening. This delay will hardly prove detrimental to the interests of Baltimore, as much of the trade which would otherwise pass through the city will thus be stopped, and connections formed in Baltimore which may not be easily sundered hereafter.—*Balt. Am.*

A Good Investment.

We invite attention to a notice in our Money column of the first mortgage bonds of the Elizabethtown and Paducah Railroad Company of Kentucky, offered for sale by three prominent houses of New York. Upon inquiry at the agency of the Company we learn that the entire length of the road is 185 miles, that 63 miles of the line are already completed and in successful operation, and that the Company have bought and are now receiving iron enough to complete the Western Division, say 113 miles, and they expect to have this division of the road finished by 1st June. The work on the Western Division is being rapidly prosecuted, and the Company expect to have the entire road nearly completed during the present year.

The Company have a large and *bona fide* stock subscription, of $3,095,000, and with the proceeds of their first mortgage bonds now offered, will be ample to complete and equip the entire line. The affairs of the Company are in the hands of some of the most prominent and responsible business men of Kentucky, which is a guaranty that the interests of the Bondholders will be safely represented.

☞ Hon. Albert Currier, of Newburyport, Mass., has been awarded the contract for the construction of the Newburyport City Railroad. The work will be commenced at once, and completed about the 1st of July. The road is about two miles long.

☞ A corps of engineers are now locating a railroad route from the present terminus of the Southern Pennsylvania Railroad to connect with the Bedford County Railroad at Bloody Run. The latter road connects with the Pittsburg and Connellsville Railroad at Bridgeport.

☞ The Boston and Albany Railroad, Connecticut River Railroad, and probably all the Massachusetts Railroad corporations will pay their semi-annual dividends in May, instead of July, the present year. This change is owing to the time being changed to make the annual returns to the State.

☞ The Portland, Saco and Portsmouth Railroad has been leased to the Eastern Railroad for ninety-nine years for ten per cent. annual dividends.

☞ UNION PACIFIC LAND GRANT BONDS

OFFICE OF MORTON, BLISS & Co., BANKERS,
NEW YORK, March 20, 1871.

The undersigned offer for sale the balance of the Land-Grant Bonds of the Union Pacific Railroad Company. The road has been in operation about twenty months. It is complete in all respects, and its earnings have averaged $8,000,000 per annum. These bonds bear seven per cent. interest, coupons payable April and October. The following summary of the financial condition of the Company is from the address of Col. Thomas A. Scott to the stockholders, upon his accepting the Presidency, at the annual meeting in Boston, March 8:

LAND DEPARTMENT.—Bonds, seven per cent. currency, $10,400,000.

Land Sales, 292,900 acres; proceeds, $1,306,566; average price per acre, $4 46.

On account of these sales the Company has received and redeemed land grant bonds to the extent of	$736,000
For the remainder the Company holds land notes maturing in one, two and three years, with accruing interest	576,650
Total	$1,312,650

The condition of the Land Department may, therefore, be stated thus:

Bonds	$10,400,000
Principal reduced by bonds redeemed	$736,000
Land notes on hand	576,650
Showing an absolute reduction of	$1,312,650
The Company is entitled, under the grants from Government, after deducting total lands pre-empted before passage of the act, to	12,080,000 acres.
From which deduct amount heretofore sold	292 883 acres.
Leaving on hand as an asset	11,787,117 acres.

—which, at an average value of two dollars per acre, being twenty per cent. below the minimum Government price for adjoining lands owned by it, should yield the gross sum of $23,574,234. So much thereof as may be required to be applied to the payment or redemption of the land grant bonds, and the balance to go into the Treasury. The average land sales amount to about $75,000 per month:

From present indications it would seem reasonable to estimate the gross receipts of the coming year at a minimum of	$9,000,000
With a cost of maintaining and operating the line on this increased earning of not exceeding, say	4 500,000
Leaving as net receipts to be applied to interest and dividend, exclusive of the operations of the Land Department of	$4,500,000

The operations of the line for the first twenty months of its existence as a completed road show net earnings sufficient to meet the interest upon its entire bonded debt.

This result cannot but be deemed, by all practically versed in the history of new railway lines, as indicating a successful future. The yearly increase of traffic, costing but little additional to transport and therefore yielding a large percentage of net revenue, must soon give a value to your property not readily appreciated at present.

MORTON, BLISS & CO., No. 30 Broad-st.

☞ The progress of the work on the extension of the South Shore Railroad to Scituate, Marshfield, Cut River and Duxbury (Mass.) is rapid and permanent residents on the line are exerting themselves to improve their villages and estates preparatory to the opening of the road to travel early in the summer.

☞ Secretary Boutwell has officially informed President Scott of the Union Pacific Railroad that the Treasury Department was paying over in money to the Pacific Railroad Companies performing services for the Government, one half of the compensation allowed for such services, and such payments will continue to be made.

Rolling Mill Property

FOR SALE,

OPPOSITE NEW YORK CITY.

The well-known NORTH RIVER OR DURBIN ROLLING MILL, situated at Prospect and North 5th St., Jersey City, New Jersey. The Real Estate consists of sixteen city lots, 25x100 feet each, with two large Dwelling Houses, well built and in good order. Also a large building occupying two lots, suitable for a Machine Shop or other purposes, a Stable, &c.

The Rolling Mill was built for the manufacture of Locomotive and other descriptions of Boiler Tank and Plate Irons, contains a heavy Roll Train, Engines, Furnaces, Machinery, &c. to suit, in good order. It can be seen running, and has been successfully run from its establishment in 1855. Situated near the Hudson River, a short and nearly equal distance from all the New Jersey Railroad Depots and Ferries, the Erie Depots and Ferries and the Hoboken or Delaware & Lackawanna Depots and Ferries, from its proximity to the New York Market, the large Locomotive and Railroad Shops of the City and Paterson, the facilities for forwarding to all points by water or railroad, it cannot be surpassed.

The Real Estate is rapidly increasing in value the vast R. R. Interests and dock improvements mentioned having taken up almost the entire River front and space below the mill property from the Cortland St. to Hoboken ferries. The reputation and business established The Proprietor intends retiring from the business, and for further particulars can be addressed or seen daily at the

NOTICE
To Contractors and Bridge Builders.

DEPARTMENT OF SURVEYS,
224 S. Fifth St., Philadelphia.

SEALED PROPOSALS will be received at the Department of Surveys until 3 o'clock P. M. April 15, 1871, for the CONSTRUCTION OF A BRIDGE over the river Schuylkill, on the site of the Suspension Bridge at Fairmount, and its approaches, to extend from Twenty-fifth and Spring Garden streets, in the Fifteenth ward, to Thirty-second and Bridge streets, in the Twenty-fourth ward, a length of about 2,730 feet.

Proposals will be received for the Bridge superstructure over the river, including all materials, workmanship and erecting ready for use. It will be 340 feet span, of wrought iron, and also two trusses for Thirtieth street, 80 feet span, of wrought iron. Detail plans of these bridges, conforming to specifications, to accompany proposals.

Proposals for all the iron work on *approaches* will be accepted separately, to be erected complete for use, as per plans and specifications.

And separate proposals for the graduation and masonry, to include curbing and paving, as per specifications and plans.

Each bid must be made upon blanks prepared, otherwise they will not be accepted, and every bidder must submit the names of two persons of undoubted responsibility, who will be bound with them as security for the faithful completion of contract. The city reserves the privilege of rejecting any and all bids that may not be satisfactory.

Payments will be made monthly in bonds of the city of Philadelphia, or in cash, at the discretion of the Mayor.

Each bid must be accompanied by a certificate from the Law Department that a proper bond, for the sum of five hundred ($500) dollars, has been filed there, in accordance with the ordinance approved May 25, 1860.

The contractor or contractors, in making their proposals, shall do so with the understanding that if their proposal shall be accepted, that every dispute or difference which may arise incident thereto shall be decided by the Chief Engineer and Surveyor, from whose decision there shall be no appeal.

All bidders are invited to be present at the opening of proposals offered on said day, at 3½ o'clock. Plans may be seen and examined at the Department of Surveys, where specifications and blank proposals may be obtained on and after the 16th inst.

STRICKLAND KNEASS,
Chief Engineer and Surveyor.

PRATT'S
PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

New York Saturday, April 8, 1871.

Lehigh Coal and Navigation Company.

A special meeting of the stockholders of this corporation was held in Philadelphia on the 28th ult., for the purpose of acting upon a proposed agreement for the lease of the Lehigh and Susquehanna Railroad and its branches to the Central Railroad Company of New Jersey, and also upon a supplement to the charter to enable the Company to consolidate their loans, borrow money, and secure the same by mortgage. The provisions of the lease are as follows:

First.—The Central Railroad Company will pay as rent one-third of the gross receipts derived from all the business of the road.

Second.—They will purchase all the equipments of the Lehigh and Susquehanna road, and pay therefor by assuming the payment of about $2,300,000 of the $5,000,000 gold loan, at or before maturity, and will pay the interest thereon until the bonds are surrendered for cancellation. The Central Railroad also agree to assume all liabilities under the two car trust organizations, and to purchase all materials on hand and shop tools and machinery.

Third.—They will maintain and perpetuate the railroad at their own cost, but the loss by freshets when exceeding $5,000 at any one time, to be paid by the Lehigh and Susquehanna Company.

Fourth.—They will provide at their own cost all of the rolling stock and machinery necessary for all the business of the company.

Fifth.—They covenant to protect the interests of the Lehigh and Susquehanna Company in case of a merger, or close alliance of any kind between them and the Lehigh Valley Railroad Company.

Sixth.—They will furnish all cars required for the transportation of the coal from the Lehigh mines.

Seventh.—They will provide all cars that may be required for the transportation of coal to the canal from collieries on the line of the Lehigh and Susquehanna road, or roads connecting therewith.

Eighth.—They covenant to pro-rate all transportation charges on traffic interchanged between the Lehigh and Susquehanna road and other roads controlled by them.

Ninth.—All the coal from the Lehigh lands of the Lehigh Coal and Transportation Company is pledged to the leased road and to the canal of that company, and to the Central Railroad of New Jersey; and also three-fourths of the coal from the Wyoming lands, where not pledged by existing contracts to other lines.

Tenth.—The Central Railroad of New Jersey have the option for three years of leasing the Lehigh Canal, at a net annual rent of $300,000.

Eleventh.—All necessary further sidings, double track, stations, shops or other buildings, to be made with the consent and at the expense of the Lehigh and Susquehanna Railroad Company. The money to be advanced by the Central Railroad of New Jersey, and at a rate of interest not to be less than 7 per cent. The Lehigh and Susquehanna Company to have the right to repay the advance at any time.

Twelfth.—All differences between the two companies to be arbitrated.

The advantages expected to be derived from this arrangement are: First. The entire relief of the Lehigh Company from any demands for further equipment or for money for the extension of the road and branches, until the same can be secured at reasonable rates. Second. The Lehigh Company secure the full influence of a powerful corporation, controlling the shortest and best line across New Jersey. Third. Many collateral advantages which cannot be secured by direct covenants, but must result from the efficient operation of the line and the alliance between the companies. Fourth. A moderate increase on the gross receipts of last year when the mines of the Lehigh Company were idle for six months, the mines of the principal transporters not fully opened, rates low and business dull, will give sufficient revenue to pay all interest besides that provided for by miscellaneous receipts other than those from the canals of the Lehigh Company and from the mining of coal. The confirmation of this lease by the stockholders will leave the company as during the period of its greatest prosperity, a "Coal and Navigation Company."

The act of the Legislature submitted gives to the Company authority to borrow money at a rate not exceeding 7 per cent. per annum and to secure the same by mortgage. The consolidation and funding of all debts having been accomplished, it is supposed that the future prosperity of the Company will be well assured by directing all their energies to the development of its other interests and chiefly to its coal estates, containing nearly six hundred millions tons of Anthracite Coal, all located on the line of the road and its branches now leased to the New Jersey Central Railroad Company.

The act of the Legislature was accepted by a *viva voice* vote, after which Mr. Borie offered a resolution ratifying the proposed lease.

A recess was then taken, in order to take a stock vote on the resolution.

Upon re-assembling, it was announced by the tellers that 93,134 votes had been polled, all of which were in favor of the approval of the lease.

Hempfield Railroad.

The Hempfield Railroad, running from Wheeling, West Virginia, to Greensburg, Pennsylvania, including the equipments, was sold on the 30th ult., under authority of the Supreme Court of Pennsylvania, and purchased by John King, Vice President of the Baltimore and Ohio Railroad Company, for $131,000. The Wheeling *Register* says:

Though not unexpected, our citizens will be glad to receive this news. It gives promise of renewed life and vigor to the Hempfield and additional trade to the city. This will make a link in the new through line from East to West *via* the Pittsburgh and Connellsville Railroad. Now let our citizens offer liberal inducements to the Baltimore and Ohio Railroad for them to establish their shops here, and the transfer of the Hemp-

field to the Baltimore and Ohio Road will be one of the greatest things that ever happened Wheeling.

New York and Oswego Midland Railroad.

The annual meeting of the commissioners and stockholders of the New York and Oswego Midland Railroad was held in Oswego on the 28th ult. The annual report was read by Mr. Littlejohn. It gives a very full and satisfactory presentation of the progress of the work, its financial matters, the successful operation of 225 miles of road, and favorable prospects of its early completion to New York; the procuring of dock frontage at Jersey City, rapid progress of the tunnel, completion of shops, depots, &c., procurement of iron, &c. The election of directors then took place, and resulted in the choice of the following gentlemen: Dewitt C. Littlejohn, Cheney Ames, Oswego; William Foster, Constantia; Dewitt C. Stephens, Oneida; J. Warren Merchant, De Ruyter; E. T. Hayes, Norwich; John R. Clark, Oxford; Henry E. Bartlett, Walton, Delaware county; A. C. Edgerton, Delhi; Edward Phaler, Fallsburg; Henry R. Low, Elisha P. Wheeler, Middletown. The amount of stock represented and voted on was $5,123,400. The Oswego *Palladium* says that under the arrangement with the Delaware and Hudson Canal Company, they have arranged to market over the Midland during the coming year 300,000 tons of coal, and if this is done, the road will pay seven per cent. from Sidney Plains to Oswego.

Chicago and Alton Railroad.

The earnings of this road for the years ending December 31, 1869 and 1870, were as follows:

	1869.	1870.
From passengers	$1,391,597 43	$1,292,184 93
" freight	3,066,143 73	3,312,067 73
" express	109,324 43	92,827 18
" U. S. mail	51,542 48	55,529 63
" miscellaneous.	62,954 74	96,795 42
	$4,681,562 81	$4,849,404 89
Expenses, viz:		
Conducting transp	$574,538 22	$630,977 08
Motive power	767,186 99	763,156 04
Maintenance of way	816,723 78	862,539 70
" cars	302,274 26	258,808 89
Taxes	119,639 21	161,697 46
General expenses	96,235 58	108,926 68
	$2,676,593 04	$2,786,105 85
Net earnings	$2,004,969 77	$2,063,299 04
Add balance to credit of income account, December 31, 1869.		51,420 75
Total to be accounted for.		$2,114,719 79
Disbursed as follows:		
Payments to first mortgage sinking fund		$48,000 00
Dividend March, 1870, 5 per cent., and U. S. tax		398,205 26
Dividend September, 1870, 5 per ct.		473,350 00
Interest on income bonds		76,090 00
Interest on sinking fund bonds		24,080 00
Interest on 1st mortgage bonds		166,810 00
U. S. tax on sinking fund payments		1,200 00
Rent paid Joliet & Chicago R.R. Co		159,049 89
Rent paid St. Louis, Jacksonville & Chicago R. R. Co		240,000 00
Improvements in 1870, paid from earnings		226,141 73
Old fire losses, uncollectable		16,554 43
Surplus, December 31, 1870		285,238 48
Total, as above		$2,114,719 79

The capital stock and funded debt of the corporation at the close of the past and preceding years compared as follows:

Capital stock:	1869.	1870.
Common	$5,145,000	$8,925,500
Preferred	2,425,400	2,425,400
Totals	$7,570,400	$11,350,900
Bonded debt:		
Sinking fund bonds	$356,000	$308,000
First mortgage bonds	2,383,000	2,383,000
Income bonds	1,087,000	1,087,000
Totals	$3,826,000	$3,778,000

At the commencement of the year 1870 your Company was operating four hundred and thirty-one miles of railway, as follows:

	Miles.
Chicago to Joliet, under perpetual lease, executed January 1st, 1864	38
Joliet to East St. Louis, owned by your Co.	242
Bloomington to Godfrey, St. Louis, Jacksonville and Chicago Railway, under perpetual lease, dated April 30, 1868	151
Total	431

During the year your Company has acquired, by purchase and construction, eighty miles of railway, as follows:

	Miles.
Dwight to Wenona, by purchase at actual cost, March 15, 1870	35
Wenona to Washington, by construction under the direction of the officers of your company, opened December 11th, 1870	25
And a branch line from Varna to Lacon, opened December 18th, 1870	10
Total	80

—Making total number of miles in operation, January 1st, 1871, 511 miles.

The cost to your company of the eighty miles of railway acquired as above stated, will not exceed the estimate of fifteen thousand dollars per mile made at the time the question of its acquisition was submitted to the stockholders for their approval. The present state of that account with the road in operation, but not in all respects fully completed, shows the cost to be $1,108,747 26, or $13,859 34 per mile.

It will be seen, from what has been stated, that only thirty-five miles were acquired in time to affect the receipts of your company for the year to any considerable degree, and by reason of the almost total failure of the crops in that section of the State in 1869, the traffic was very light.

The country traversed by the lines recently acquired is unsurpassed for fertility. It is all under cultivation, and a large traffic may be expected from the products of the soil. One of the best, most extensive and cheaply mined deposits of coal in the State is located upon this line, from which a traffic has already sprung up, amounting to an average—during the past nine months—of four thousand tons per month.

Your Directors are confident that the traffic will pay a liberal return upon the cost of the line.

The operation of the Jacksonville Division during the past year shows in direct returns from traffic, as well as in many other ways, the great advantage of controlling that line under the existing lease.

The operating expenses upon your lines for the year (exclusive of taxes) amount to 54.11 per cent. of gross receipts; including taxes, 57.4 per cent. In 1869 the operating expenses were 54.62 and 57.17 per cent. respectively.

The number of passengers carried during the year was 732,531, being an increase of only 978 over the preceding year; 94.3 per cent. of the number of passengers were local, only 5.7 passing the entire distance between Chicago and St. Louis. The average amount of fare paid by passengers (including through and local) was one dollar and sixty-two cents.

By reason of the general failure of crops, a decrease in the amount of freight traffic for the year was feared, but we are happy to report that the general increase in industrial pursuits, and an increased amount of through traffic with points west of the Mississippi River, have enabled us to show an increase over that of the preceding year.

The aggregate tonnage of freight for the year is 2,522,064,297 lbs., an increase of 12½ per cent. over that of 1869.

The coal traffic of your line continues to increase. Commencing in 1865 with only 6,000 tons, it has increased to 266,096 tons in 1869, and 338,324 tons in 1870, showing an increase of 27 per cent. during the past year.

The receipts from express companies, carriage of mails, and from miscellaneous sources, amounts to $245,152 23, an increase of $21,330 58 over the corresponding receipts in 1869.

The condition of your property has been fully maintained, and in many respects improved. 4,760 tons of new and re-rolled rails, and 218,000 cross ties were used in repairs and renewal of track, and the cost charged in the account of operating expenses.

Experience has shown that economy requires the use of steel rails on portions of your line which are subjected to the heaviest traffic. We have nine miles of steel rail track now in use, to which it is expected that at least twenty miles will be added during the present year.

Nine new depot buildings at way stations, and a blacksmith shop, foundry, boiler house, and rolling mill for repairing rails, at Bloomington, have been completed during the year.

Six and one-third miles of new side tracks have been added during the past year.

The number of locomotives owned by your company is 108. That they have been kept in good condition for service is not only apparent upon inspection, but is attested by the fact that the average mileage of each engine during the year amounts to 27,469, making an aggregate of 2,966,664.

The cost of motive power per mile run may be stated as follows: Repairs, 6.76 cents; wages, 6.61 cents; fuel, 8.85 cents; oil and waste, 0.96 cents; and cleaning, etc., 1.25 cents; making a total of 24.43 cents.

The cost per mile run in 1869 was 28.94 cents, showing a reduction of 4.51 cents.

The traffic of the present year will require an additional number of engines, and measures have been taken to procure the delivery of fifteen at an early day.

The number and description of cars upon your line is as follows:

Pullman's Palace sleeping cars	8
Pullman's dining cars	5
Passenger coaches	47
Baggage, mail and express cars	21
Freight cars of all kinds	2,256
Tool and wrecking cars	5
Paymaster's car	1
Total	2,343

Of the number stated above, five passenger cars, one tool car, and two hundred and eighteen freight cars, have been constructed at the company's shops during the year.

The condition of your cars has been fully maintained.

In anticipation of an increased traffic, freight cars are now being constructed at your shops at the rate of fifteen cars per week.

While your board of directors fully appreciate the fact that the policy of your company in the future should be (as it has been in the past) to foster and encourage local traffic, we have also felt it to be our duty to ask permission in writing from the stockholders (as required by our charter) to make such contracts of lease or otherwise as should appear to the board to be expedient to secure a portion of the large and rapidly increasing traffic between Chicago, Missouri, Kansas, and the Southwest. This permission was asked by circular, dated December 15th, 1869, and its importance was so apparent that the approval of our stockholders was given almost unanimously.

Negotiations were immediately commenced with the St. Louis, Jacksonville and Chicago Railroad Company for permission to use the franchise of that company in the construction of a line from Roodhouse to Louisiana in the State of Missouri, a distance of 37 miles, and also with the Louisiana and Missouri River Railroad Company, of Missouri, for the completion and control of their lines in process of construction.

A contract has been concluded with the St. Louis, Jacksonville and Chicago Railroad Company, by which, in consideration of the fact that under the terms of the perpetual lease of that line as now operated by your company, provision is made for a certain increased rental (pro rata) when the gross receipts of that line shall exceed certain stipulated amounts, and the prospect that an increased traffic upon that line will result from the execution of our plans, they grant to your company the right to construct the line as above stated, and use the same in all respects as its own property. They also grant the subsequent use of their franchise as may be found necessary in operating the same.

They also agree to issue, for the use of your company in providing a construction fund, fifteen thousand dollars per mile of first mortgage bonds, and five thousand dollars per mile of second mortgage bonds—if the same shall be required—upon condition that your company shall assume the payment of interest and principal of all bonds so issued at their request. The work of building the road from Roodhouse to a point on the Mississippi River opposite Louisiana, in Missouri, is now in progress, and will be completed by July next.

A contract has also been concluded with the Louisiana and Missouri Railroad Company, by which that company agrees to complete its road bed, including bridges and cross ties, so as to have the same fully prepared for laying the rails from Louisiana to Mexico (a distance of 51 miles) by the 19th of May, 1871. That company also agrees to complete, in like manner, a line from Mexico to Jefferson City—the Capital of the State—(a distance of 50 miles) by the 19th of May next.

It is further agreed that in a like manner a roadway shall be prepared from Mexico to Glasgow by the 19th day of May, 1872, and also from Glasgow to Kansas City, upon a location to be agreed upon (with the exception of constructing a bridge over the Missouri River) by the 19th day of May, 1873.

In all the undertakings on the part of that company, as before stated, including the cost of right of way and depot grounds, it is provided that payment shall be by them made from the proceeds of local subscriptions to their common stock—said subscriptions amounting to about eleven thousand dollars per mile for the entire distance.

It is further stipulated that first mortgage 7 per cent. bonds, at the rate of sixteen thousand dollars per mile shall be issued, and that fifteen thousand dollars per mile in said bonds, ten thousand dollars per mile in preferred stock, and five thousand dollars per mile in common stock, shall be placed in the hands of a trustee, and appropriated to the purchase of materials, the completion of the road, and procuring rolling stock. And that the sale of said bonds and shares of stock, and the completion of the railway and purchase of rolling stock, as aforesaid, shall be under the direction of the officers of your company.

Your company agrees, on its behalf, to construct a line to connect its present lines with Louisiana, and to take possession of and operate for one thousand years the line from Louisiana to Mexico, and such other extensions of that line as may be hereafter completed, as before stated, and that the amount of rent to be paid for the use of the same shall be yearly ascertained as follows: All taxes and assessments shall be first deducted from gross earnings, and 35 per cent. of the remainder shall be the amount to be paid as rent for that year, provided, that the amount paid shall in no year be less than $1,370 per mile; and that your company shall assume the payment of coupons on the mortgage bonds before referred to, and charge the amount of the same on account of rent.

A contract has also been made with the North Missouri Railroad Company, dated May 25th, 1870, by which it is mutually agreed to operate a through line for passengers and freight upon equitable terms, between Chicago and other points on the Chicago and Alton Road, and Kansas City and other points on the North Missouri and connecting roads, as soon as the connection is made at Mexico. Said contract to continue in force until the Louisiana and Missouri River Railroad shall have been completed to Kansas City—either party having the right to terminate it after the road shall have been completed to that point by giving three months' notice.

From Louisiana to Mexico the road bed and bridges are now nearly completed, and it is confidently expected that a through line will be in operation between Chicago and Kansas City, *via* Louisiana and Mexico, by the 1st day of July next. That line will be as short as the most direct line now operated between Chicago and Kansas City. When the proposed line is completed from Mexico to Kansas City, the distance will be less than by any other line.

Other connections will be secured in Missouri by building the lines heretofore designated, which will give to your company and those with which connection will be made, the advantages of a route from 80 to 100 miles shorter than any other built or projected between Chicago, Southern Kansas, the Indian Territory and Texas.

The country which will be traversed by the lines in Missouri will afford a large local traffic, and a large through traffic is confidently expected, especially in transportation of Lumber and Texas cattle.

GENERAL BALANCES, December 31, 1870.

Cost of road and equipment		$13,716,233 11

Phœnixville Bridge Works.

We have received from CLARKE, REEVES & Co. a book of designs of Iron Bridges, Viaducts, etc., for Railroads, as built by them at Phœnixville, Pa. Their present facilities are equal to turning out one hundred feet of finished bridge for each working day in the year, and can be largely increased if necessary. Everything is done upon the premises, beginning with the manufacture of the iron from the ore, next rolling it into the shapes required, and finally applying the machine labor that completes the structure ready for erection. It is believed that all this is done by no other single company in this country. It results in a uniform excellence of quality of iron and workmanship, which cannot be got from bridge-builders who procure their iron from different makers. In their circular they say:

We are prepared to construct any style of wrought-iron bridge, and according to any specified dimensions and weights; at the same time, we would call the attention of engineers and railway men to that style of bridge which we have been building during the last three years, and that has stood the test of use with the marked approbation of those best able to judge.

What we claim as the peculiar advantages of our bridges, are as follows:

We use that style of truss (originally developed in wood by Pratt and in iron by Whipple) which experience has shown to be the best adapted for railway purposes, as there are more of them in use in this country than of any other kind.

So far as we have modified the connections and other details of construction, we have endeavored to be guided by the following principles:

Simplicity and uniformity of construction; least possible exposure of surface to corrosion; uniformity of strain on all parts alike; concentration of material along the lines of strain; and the use of the most suitable kind of material for the purposes required.

We build our short spans stronger than has been heretofore customary, providing for a variable load of two tons per foot. We do this, because there is generally no slackening of speed in crossing a short span, and the live load of the locomotive bears a much greater proportion to the dead weight of the structure in short than in long spans. At 250 feet span the live and dead loads are nearly equal, while on a 30 feet span the live load is more than four times the dead load. As the live load is accompanied with impact and vibration, and four-fifths of the strain comes from it, it is but prudent to take this into account.

In proportioning the different parts of our bridges, the strain per square inch is diminished; or, in other words, the strength of each part is increased in proportion to its nearness to its work. As the panel system is fully strained by the passage of each locomotive, it should have greater strength than the chord system, which can only get its maximum strain when the whole length of the bridge is covered with locomotives, which in practice seldom occurs on spans longer than 100 feet. The bolts which support the floor system being subject to accidental shocks, have given them the greatest strength of all. This is merely following out in practice the principle of "uniformity of strains." Inasmuch as the strength of an iron bridge (like that of an iron chain) is measured by the strength of its weakest part, it follows that the structure in which this principle is most accurately carried out will be the strongest, while the purchasers of the bridge will not be compelled to pay for useless iron, which diminishes instead of adding to its strength. On the other hand, if bridges are too light, they will show this defect by excessive vibration under a passing train. This fault, we believe, our bridges cannot be charged with. We always furnish diagrams of strains, giving the actual dimensions of each part, and the calculated strains.

For full particulars and book of designs, address CLARKE, REEVES & Co., 410 Walnut street, Philadelphia.

Baltimore and Potomac Railroad Tunnels.

The construction of the tunnel at Baltimore, connecting the Baltimore and Potomac railroad with the Northern Central railway, has been let to Thomas Ritter, of Philadelphia. This tunnel is the one that passes under the western part of the city, and is part of the main line to Washington. The tunnel on the Union railroad will be let to-day. This latter is the tunnel at Greenmount Cemetery, to connect with Canton, in the eastern part of the city, at tide water.

The western tunnel, the contract for building which was secured by Mr. Ritter, runs 7,400 feet under the city. This work will cost from one million to one and a quarter millions dollars when completed. The Union railroad tunnel extends some 3,400 feet under ground, with surface track also from the Belvidere bridge to Canton at tide-water. This will cost $800,000 to $1,000,000. The road, not over three miles in length, is to be used by five other roads, viz: The Northern Central, Baltimore and Potomac, Philadelphia, Wilmington and Baltimore, Western Maryland, and Baltimore and Ohio, to all of which it affords a transit through Baltimore and connection with the several works named. This cannot fail of being a very profitable enterprise. It is owned and paid for chiefly by the Canton Company, to whose wharves it extends. Certain privileges and restrictions exist in the charter, which secure its full use to all roads connecting therewith by paying the stipulated tolls. The work on both these tunnels will be commenced in a few days after both contracts are finally awarded, and vigorously carried forward to completion. The result must prove vastly advantageous to all, and especially to the Canton Company. Quite a number of Philadelphia and Pennsylvania contractors were in the city last week bidding for these railroad tunnel contracts, and they underbid the Marylanders, thereby procuring the work, amounting altogether to over $2,000,000.—*Baltimore Sun, April* 4.

Pork Packing in the West.

The Cincinnati *Price Current* publishes its annual statement of Pork Packing in the Western States, of which the following is a recapitulation:

	1869–'70.	1870–'71.
Ohio	525,325	762,169
Illinois	862,572	1,231,428
Indiana	282,054	424,614
Kentucky	202,000	288 970
Missouri	431,118	483,745
Iowa	139,487	183,012
Tennessee	11,330	41,270
Wisconsin	178,626	248,700
Minnesota	7,800	14,000
Totals	2,635,312	3,677,908
		2.635,312
Increase in number		1,042,596

The average weight of hogs and the yield of leaf lard, by States, compare as follows:

	Average weight per hog.		Yield of lard per hog.	
	1870. lbs.	1871. lbs.	1870. lbs.	1871. lbs.
Ohio	225 1-5	240¾	26⅛	31 1-6
Indiana	202¼	239 1 5	23½	29⅛
Illinois	203½	227¼	21¼	30⅜
Kentucky	213¾	235	21½	29 4-9
Missouri	190¼	226¼	25¼	30
Iowa	192	239 1-10	23	32 1/10
Wisconsin	200	228 1-5	19	31
Tennessee	..	216	..	25⅔
Minnesota	.. ..	242	..	....

The general average weight of hogs and yield of leaf lard, for the whole West, compare with the five previous seasons as follows:

Years.	Hogs, lbs.	Lard, lbs
1866	231 3-10	31 1-7
1867	232 1-7	29¾
1868	201	21¾
1869	206¾	24¼
1870	205¾	23⅞
1871	230 1-7	30 1-7

The comparative aggregate yield of meat and leaf lard in pounds is shown thus:

	Meat, lbs.	Leaf lard, lbs.
1869-'70	542,215,444	62,918,074
1870-'71	846,466,962	110,862,655
Increase	304,251,518	47,944,581

Here is shown an increase of 56 1-9 per cent. in the yield of meat, and 76 1-5 per cent. in the yield of leaf lard, over the crop of the season of 1869-'70. By dividing the aggregate yield of meat this season with the average weight of hogs last season, it will be shown that the crop this season is equal to, say in round numbers, 4,109,000 hogs of last year's average.

The whole number of hogs packed in the West, for each of the last twenty seasons, is as follows:

Years.	No. of hogs.	Years.	No. of hogs.
1851–'52	1,182,846	1861–'62	2,893,666
1852–'53	2,201,110	1862–'63	4,069,520
1853–'54	2,534,770	1863–'64	3,261,105
1854–'55	2,124,404	1864–'65	2,422,779
1855–'56	2,489,502	1865–'66	1,785,955
1856–'57	1,818,468	1866–'67	2,490,791
1857–'58	2,210,778	1867–'68	2,781,084
1858–'59	2,465,552	1868–'69	2,499,873
1859–'60	2,350,822	1869–'70	2,635,312
1860–'61	2,155,702	1870–'71	3,677,908

Michigan State Debt.

The condition of the public debt of Michigan at the date of the Auditor of State's report, October 31, 1870 was as follows:

FOREIGN DEBT.	
Five per cent. certificates of State stock	$249,219 99
Two and one half per cents	5,020 13
War loan bonds	179,000 00
Total	$433,240 12
DOMESTIC DEBT.	
School Fund, non-negotiable bonds	$3,551,316 15
Five per cent. certificates purchased, for which non-negotiable bonds has not been given	119,366 67
University bonds	63,585 00
Total	$3,784,267 82
REDEMPTIONS DURING THE YEAR.	
Five per cent. certificates	$1,086,135 67
Purchased by Sinking Fund	119,366 67
	$1,205,502 34
Two and one-half per cents	4,820 00
Water loan bonds	25,000 00
Total	$1,235,322 34

Northern Central Railway.

We gave in our issue of March 18th the Report of the President of this company for the year ending December 31, 1870, showing the receipts from operations of the road to have been $4,088,624 58, the operating expenses $2,816,661 74, and the net revenue $1,271,962 84. From the Treasurer's statements, which have since been received, we learn that the receipts and expenses were apportioned as follows:

RECEIPTS.	
Main Line	$2,898,623 68
Wrightsville Branch—six months	29,385 81
Shamokin Division	273,564 74
Elmira Division	500 095 75
Chemung Division	89,139 31
Canandaigua Division	297,865 29
Total earnings	$4,088,624 58
Bonds issued	620 000 00
Floating debt increased	13,501 99
Sinking funds decreased	45,000 00
Total	$4,767,126 57
EXPENDITURES.	
Main Line	$1,855,910 66
Wrightsville Branch—six months	27,803 07
Shamokin Division	171,893 56
Elmira Division	409,876 44
Chemung Division	101,596 35
Canandaigua Division	249,581 66
Total operating expenses	$2,816,661 74
Interest, discount and gold premium	605,598 49
Dividends on capital stock	299,994 00
Taxes on capital stock, dividends and surplus	27,427 57
Rent of Wrightsville, York and Gettysburg R. R	1,532 74
Rent of Shamokin Valley and Pottsville R. R	106,318 85
Rent of Elmira & Williamsport R.R.	165,315 00
Rent of Elmira, Jefferson and Canandaigua R. R	27,901 03
First mortgage bonds of York and Cumberland Railroad Co., due May 1, 1870	175,000 00
Construction	487,876 47
Real estate	26,185 58
Equipment	27,315 10
Total, as above	$4,767,126 57

The financial condition of the company, December 31, 1870, was as follows:

ASSETS.

Railway and appurtenances		$9,960,612 49
Canton Extension		342,182 02
Real estate		777,853 59
Equipments		3,016,449 42
		$14,097,097 52
Cash	$228,005 33	
Passenger agents	5,751 21	
Freight agents	128,798 56	
Post Office Department	16,722 42	
Individuals and corporations	769,659 69	
Materials and supplies	280,382 41	
		1,429,319 62
		$15,526,417 14

LIABILITIES.

Capital stock—100,000 shares		$5,000,000 00
Third mortgage six per cent. coupon bonds of York and Cumberland R. R. Co., guaranteed by City of Baltimore, due January 1, 1877	$500,000	
Second mortgage six per cent. coupon bonds of Northern Central Railway Co., due July 1, 1885	2,500,000	
Third mortgage six per cent. coupon bonds of Northern Central Railway Co., due April 1, 1900	1,223,000	
	$4,223,000	
Deduct amount in sinking funds	721,500	
		3,501,500 00
First mortgage six per ct. annuity of Northern Central Railway Co., due State of Maryland—irredeemable		1,500,000 00
Consolidated mortgage six per cent. gold bonds of Northern Central Railway Co., due July 1, 1900—total (including $3,501,500, as above,) $6,000,000—issued:		
Dollar coupon bonds	$1,986,000	
Dollar registered bonds	33,000	
		2,019,000 00
Income convertible seven per cent. coupons bonds of Northern Central Railway Co., due April 1, 1880		475,000 00
Bills payable	$1,047,391 08	
Interest, &c., accrued	270,947 91	
Interest on upons	43,478 75	
Pay rolls & vouchers	535,783 35	
Foreign roads—passenger account	42,155 16	
Foreign r'ds—freight account	23,519 84	
Individuals and corporations	72,127 80	
		2,035,403 89
		$14,530,903 89
Profit and loss account		995,513 25
		$15,526,417 14

J. S. LEIB, *Treasurer.*

BALTIMORE, *December* 31, 1870.

☞ The bill recently passed by the Virginia Legislature, provides for funding two-thirds of all the bonds, stocks and certificates, with the interest to July 1, 1871, except the five per cent. dollar bonds and the sterling bonds. Coupon registered bonds, payable in thirty-four years, with interest payable semi-annually, will be issued for this two-thirds, and certificates of indebtedness for the remaining one-third, payable when a settlement shall have been made with West Virginia.

New Orleans and Texas Railroad.

A few gentlemen, at the invitation of officers of the New Orleans, Mobile and Texas Railroad Company, on Thursday last proceeded up the newly laid track of this road on the western side of the Mississippi River, on a tour of inspection, starting from the river bank of the Zeringue plantation, at what is called "The Company Canal," opposite to the lower limits of the town of Carrollton. The locomotive "Chattanooga" was found to be in waiting at 8 o'clock A. M., and attached thereto was a platform-car, provided with benches sufficient for the party, which comprised H. Van Vleck, the very energetic and able Chief Engineer of the company; G. W. R. Bayley, Division Engineer in charge of the company's operations from the Mississippi River to the Texas line; Col. J. R. Kendrick, the company's Superintendent of Transportation at New Orleans; Charles H. Raynor, Superintendent of the Company, at Mobile; John H. Disley, Jr., Land Agent of the company; Mr. Rogers, Mr. Sooville, and others. Proceeding up the line at a moderate speed, the road-bed and track was found in excellent condition, and elicited from the Chief Engineer and his guests, unqualified approval. Mr. Bayley, the veteran engineer, (so long connected with the Opelousas Railroad,) seemed to be pleased with the result of his labors as he listened to the high praise bestowed upon the work. Some parts of the track require to be made more solid but as a whole and for a new road, the work was pronounced to be of a first-class order. For several miles up towards St. Charles parish the Morgan or Opelousas Railroad track and that of the Chattanooga Company—we use here the title "Chattanooga" Company, because it is best known by the name—lie nearly side by side, and the steamboats as they pass up and down the river are plainly seen by those who are on the trains, which are almost within hail of the dwellings on the river plantations, passing as they do, through the centre of the fields. The terminus of the day's trip was reached about 12 o'clock noon, at a point 36 miles from New Orleans, near the line which separates the parishes of St. John the Baptist and St. James. Here was found the construction train and the track-layers engaged in laying down the cross ties and the rails immediately thereafter at the rate of half a mile per day. They are now only 20 miles from Donaldsonville, which place Mr. Bayley says they will reach by the first of May. Donaldsonville is just 57 miles from New Orleans by the line of the road, and 75 by the river. Beyond Donaldsonville the road is graded and ready for the cross-ties for the distance of perhaps twenty miles—say to Grand river.

After a minute inspection of the work and a pleasant interview with Messrs. Becnel, Roussel, and other planters of St. John the Baptist, the party returned to the city, delighted with their trip.

The crossing from New Orleans to the starting point on the other bank of the river (opposite the lower line of Carrollton) is to be accomplished by a large and powerful ferry boat similar to that now in use by Mr. Charles Morgan for the transportation of freight and passengers across the river to his depot at Algiers. The freight cars will be loaded on the levee, at the foot of Calliope street, and ferried to the other side. On both sides of the river an adjusting platform with moveable rails and a landing stage such as are now at the foot of St. Ann street for Mr. Morgan's cars, will be constructed in time for the opening of business. It is supposed that passenger trains will run from New Orleans to Donaldsonville and back, sometime in July or August next, perhaps sooner.

D.

☞ There have been about seventy-five proposals put in at Richmond, Va., for constructing the 108 miles of the Chesapeake and Ohio road west of the White Sulphur Springs. Bidders, however, will not know their fate until the 10th of April.

The Public Debt Statement.

The following is a recapitulation of the public debt statement March 31, 1871:

DEBT BEARING COIN INTEREST.

Five per cent. bonds		$214,567,300 00
Six per cent. bonds		1,699,776,950 00
Total		$1,914,344,250 00
Accrued interest		40,469,826 91

DEBT BEARING INTEREST IN LAWFUL MONEY.

Three per cent. certificates	$38,815,000 00
Navy Pension fund 3 per cent.	14,000,000 00
Certificates at 4 per cent.	678,000 00
Total	$53,493,000 00
Interest	377,900 85
Debt on which interest has ceased since maturity	$3,162,502 26
Interest	514,942 39

DEBT BEARING NO INTEREST.

Demand and legal tender notes	$356,098,621 00
Fractional currency	40,340,444 63
Certificates of gold deposited	25,261,460 00
Total	$421,700,525 63
Unclaimed Pacific R.R. Interest	13,695 01
Total amount outstanding	$2,392,700,277 89
Total interest	41,376,365 16
Total debt, principal and interest, to date, including interest due and unpaid	$2,434,076,643 05

AMOUNT IN TREASURY.

Coin	$105,697,800 04
Currency	18,681,246 74
Total	$124,379,046 78
Debt less amount in Treasury	$2,309,697,596 27
Debt less amount in Treasury March 1, 1871	2,320,708,846 92
Decrease of debt during the past month	$11,011,250 65
Decrease of debt since March 1st, 1869	$215,765,663 74

Bonds issued to the Pacific Railroad Companies, interest 6 per cent. payable in lawful money:

	Amount outstanding.	Accrued interest, not yet paid.
Union Pacific	$27,236,512	$468,547 68
Kansas Pacific	6,303,000	94,545 00
Sioux City and Pacific	1,628,320	24,424 80
Central Pacific	25,881,000	388,215 00
Central Branch Union Pacific	1,600,000	24,000 00
Western Pacific	1,970,000	29,550 00
Totals	$64,618,832	$699,282 48
Interest paid by United States		$10,753,910 45
Interest repaid by transportation of mails, etc.		2,599,405 33
Balance of interest paid by United States		8,154,505 12

☞ At the annual meeting of the Cary Improvement Company in Boston on the 3d inst., Simon Willard of Boston, Julius Hallgarten, O. D. Ashley and Thomas Hope of New York, A. P. Blake and Chas. A. White of Boston, and John Low of Chelsea, were elected directors. Since the last annual meeting, sales have been effected of lands of the company amounting to $18,760 60, being for 69,928 feet at an average of about 19⅕ cents per foot. The assets of the company, April 1, 1871, amounted to $65,369 18, and the liabilities to $32,481 51—showing an excess of assets o $31,087 67, not including 12,000,000 feet of land which the company own.
